OM Hen,
Besok (minggu) ngana pi aja ke pasar loak di Jl. Jatinegara Timur (pindahan dr SOGO jongkok sepanjang lapangan Urip Sumoharjo depan Psr Jatinegara), +/- 50 mtr masuk dr jl. Jatinegara Timur II, ‘nglewati jembatan kecil belok kanan ketemu Mesjid ... di depan Mesjid situ ada lapak p. Haji yg jual joran pancing fiber glass sampe sepanjang 9 mtr.
Beli 2 batang yg 6 meteran (bahan/batangnya aja, TANPA kerekan, ring utk “rel” senar dsbkaN LOGISTIK .). Sampe di rumah potong +/- 1 – 1.5 mtr ujungnya -- yg terlalu kecil utk dipake ngebahan elemen antena.

Untuk sebelah sayap Dipole 20m perlu +/- 5 mtr, so kalo’ kurang panjang sambung PANGKAL-nya dg pipa PVC.
Tinggal terpasrah sm “ur own ingenuity” utk bikin element-to-boom mounting bracketnya (ato pulang dr beli joran mampir ke Sinarwaja di Psr Kenari, kaya’nya si Ayung masih ada “stok” barang gituan – ato habis baca imil ini silah LL OM Taufan yb0ai yg sbg “sesama alumni” tentu dg enteng akan nawarin dr “stok” bliao ;-)

Dg bahan semua lengkap (pake aja kabel monster 2x50 utk ngebahan elemen, dan pipa PVC 1.5” buat Boom), paling juga perlu 1/2 hari buat ‘ngrakit 3-ele Yagi, Dick Bird G4ZU’s style ...(malam ini beta cuba menelusuri di folder mana orek-orekan beta ttg ini tersimpan, otherwise silah tanya uncle Google dg kata kunci “G4ZU”.
Dg konfigurasi paling sederhana (dr atas terlihat spt <|>) paling nggak Gain 7-8 dBd sudah terbayang ;-)

GL es 73,
[bam]

Cerita intermezzo waktu saya di makassar (bo'ongan lho).

Seorang teman wanita dari jakarta baru turun dari pesawat di bandara Makassar.
Langsung masuk taxi, baru jalan supir taxi dg halus bertanya : "Tidur dimana kita, Bu ?".
Si ibu ini marah, disangka supir kurang ajar.

Setelah dijelaskan bahwa di Makassar, KITA = ANDA - baru deh ngerti karena maksud sebenarnya si supir mau tanya Ibu ini mau nginap di hotel mana, karna begitu masuk taxi sibuk dg HPnya.

Lagian mbak Endang ini....!!?
3 suku bangsa : sapa aja ? Manado-Makassar..... satunya suku bangsa Indonesia ?
Xixixixixixixixi......

hen

Wah, bisa salah persepsi nih kalo 3 suku bangsa ngobrol bareng.

Bah. Indonesia : KITA = you & me
Bah. Manado   : KITA = me
Bah. Makassar : KITA = you

Sama seperti bhs sunda dan jawa, atos-nya sunda = sudah, jawa = keras.
Sunda, Amis = manis

Salam,

OM Bambang,
Hari minggu ini kita nyanda bisa pi ka mana2.
Pagi, kita pe kawan bikin pesta perkawinan anaknya di Cawang, siang harus siapkan logistik dll utk besok ke Lombok.

Kita akan pertimbangkan mengingat kemungkinan besar ini akan terpisah dari antena yg sudah ada : 4 el. Yagi 15M dan 4 el. Deltaloop 10M - pada satu boom yang ada.
Jadi jangan sampe mereka/antenna baku pegang.

Eh, OM Bambang - kalo pake istilah "kita" beda di Sulut dan Sulsel lho, itu bahasa daerah bukan bahasa Indonesia. HI.

Bah. Indonesia : KITA = you & me
Bah. Manado : KITA = me

Bah. Makassar : KITA = you

3658. http://www.mulandxc.org WAPC Rules Worke d All Provinces(WAPC) of China DX Contest 1. Objective Amateurs around the world can work any other amateurs during the 24 hour contes t period, while contacts with Chinese provinc es, municipal cities, autonomous regions, and special administration zones are encouraged. 2.Contest Date First Saturday of October, within China's Golden Week national holiday s. The first WAPC contest will be hold in 20 12 Oct. 6, from 0000-2359 UTC. A testing cont est will be running on third Saturday of Apri l, 2012, It is 21 April 2012 from 0000-2359UT C.logs and records will be filed but no award s will be issued. 3.Bands and modes In 5 am ateur bands: 80-40-20-15-10 meter; WARC band excluded.CW, SSB, and the mixed of the two mo des. 4.Categories Power limits are defined as following High, above 100 watts and up to legal limit of licensee;Low, 100 watts or les s, while greater than 5 watts;QRP, 5 watts or less.The following categories are currently available: High: Mixed all band; CW all band ; SSB all band. Mixed 10 meter; Mixed 15 mete r; Mixed 20 meter; Mixed 40 meter; Mixed 80 m eter. Low: Mixed all band; CW all band; SSB all band. Mixed 10 meter; Mixed 15 meter; Mix ed 20 meter; Mixed 40 meter; Mixed 80 meter. QRP: Mixed all band. Remarks: No multi-play er category. A participant can operate and en ter in multiple single band categories. An al l band participant will be automatically ente red in each single band category he worked, a nd competing with other single band participa nts and be eligible for that single band awar d. Single band participant operating other ba nds during the contest are encouraged to subm it their logs for more than one band to aid i n the log-checking process. 5. General Rules 5.1 Transmitters and receivers must be loca ted within a 500-meter diameter circle, or wi thin the property limits of the station licen see's address. Antennas must be physically connected by wires to the transmitters and re ceivers. 5.1.1 All categories of entrants ar e allowed to use packet and WEB clusters, ski mmer, RBN etc. 5.1.2 Remote control of trans mitting or receiving device is not allowed. 5.1.3 Self-spotting is not allowed. Solicitin g contacts by telephone, telex, internet, pac ket mail during and before the contest is for bidden. 5.2 Only one signal can be transmitt ed at any given time. 5.2.1 Operating, loggi ng,and spotting functions must be performed o nly by participant himself, any auxiliary tra nsmitting or receiving from other operators i s not allowed. 5.3 All mixed mode participan ts can contact same station both on CW and SS B. IARU recommended frequencies are encourage d for contest QSOs, cross mode QSO is not all owed. 5.4 Mixed all band QRP participants ar e encouraged to sign they call with the /QRP suffix. 6.Exchange Using CQ Bravo or CQ Chi na as a

shorthand to initiate your contest. F or CW, using CQ B. 6.1 Non-Chinese station: signal report with serial number, start from 001. eg. 59(9) + 001. 6.2 Chinese station: signal report with a two character shorthand forChina's provinces List of Chinese provi nces, municipal cities,autonomous regions, an d special administration zones(source from: C hina National standards series GB/T 2260-2007). AHAnhui Sheng*1 BJ Beijing Shi*2 CQChongq ing Shi FJ Fujian Sheng GD Guangdong Sheng GS Gansu Sheng GX Guangxi Zhuangzu Zizhiqu*3 GZ Guizhou Sheng HAHenan Sheng HB Hubei Sheng H E Hebei Sheng HIHainan Sheng HK Hongkong Tebi exingzhengqu*4 HL Heilongjiang Sheng HN Hunan Sheng JL Jilin Sheng JS Jiangsu Sheng JX Jia ngxi Sheng LNLiaoning Sheng MOMacau Tebiexing zhengqu NM Nei Mongol Zizhiqu NX Ningxia Huiz u Zizhiqu QH Qinghai Sheng SCSichuan Sheng SD Shandong Sheng SHShanghai Shi SN Shaanxi Shen g SX Shanxi Sheng TJ Tianjin Shi TW Taiwan Sh eng XJ Xinjiang Uygur Zizhiqu XZ Xizang Zizhi qu(Tibet) YN Yunnan Sheng ZJ Zhejiang Sheng Notes: 1 Province 2 Municipal city 3 Autonomo us region 4 Special Administration Zone, SAZ. BS7 is considered in HI, BQ9 is considered i n TW. 7. Calculating QSO points 7.1 For Chi nese stations: QSO with the 34 Chinese provi nces, municipal cities, autonomous regions, a nd special administration zones: 10 points QS O with other Asian DXCC entity: 3 points. QSO with other continent: 5 points. 7.2 For Non -Chinese stations: QSO with Chinese station: 10 points. QSO with same DXCC entity: 1 poin ts. QSO with different DXCC on your own conti nent: 3 points. QSO with other continent: 5 p oints. 7.3 Marine and airborne mobile statio ns are not count as multiplier, but worth 5 p oint for any participant. 8. Dupe 8.1 Dupes are contacts made with the same station on t he same band and mode. If the first contact b etween stations is valid, dupes have 0 points value. If the first contact is not valid, se cond (dupe) contact is accepted. 8.2 Dupe co ntacts are not penalized; one does not have t o mark them in the log submission. Moreover, entrants are strictly recommended to leave DU PES in the log file. PLEASE DO NOT DELETE DUP ES! 9. Multipliers Two types of multipliers are available, provincial and DXCC entity: Provincial: Each different Chinese provinces, municipal cities, autonomous regions and spe cial administration zones, contacted on each band, is counted as one(1) multiplier, despit e of the modes worked. That is, only 34 Chine se provincial multipliers are available on ea ch band. DXCC entity: Each different DXCC en tity contacted on each band, is counted as on e(1) multiplier, despite of the modes worked. BY, BV, VR2, XX9, BS7, BQ9 each count as one multiplier. 10. Total Scores The total sco res is the result of total QSO points multipl ied by

the sum of the provincial and DXCC ent ity multipliers. 11. Log submission requirem ents We need electronic contest logs! 11.1 Please submit your Cabrillo format contest lo g to this contest committee. Using N1MM as a log tool is strongly encouraged. It is avail able at: http://www.mulandxc.org/wp-content/uploads/2012/03/mulandxc.rar In case of a fa iled download, a new download site may be poi nted in the contest rule page in: http://www .mulandxc.org Also WINTEST can be used in WA PC though it works only in YO-DX mode this ti me, and the score may be not accurate. In cas es of that WINTEST was used, the final score has to be re-calculated after we received the log. 11.2 Time in all the logs must be UTC. 11.3 Contest log must include the contest e xchanges, i.e. signal report with shorthand o f provinces, municipal cities, autonomous reg ions and special adminstration zones, or seri al numbers. 11.4 The file name of the contes t log should be your_contest_callsign.log. 1 1.5 No paper log will be accepted. 11.6 If t he submitted log can not be correctly convert ied to the text format, it will be treated as invalid. 11.7 The file header of the submit ted contest log must contain the intended cat egary and full mail address including country name, this will be the address used for awar ds and/or certifications. 11.8 Calculation o f the total scores is not necessary in the lo g, it will be officially calculated by commit tee designated software. 12.Deadline of log submission 12.1 All logs have to be submitte d before 31 Oct. 2012. 12.2 Logs can be subm itted via email: mulandxc@gmail.com. Make sur e the contest call and category is included i n the subject line. 13. Awards 13.1 Chinese participants: A certificate of first, second , and third place in Bravo land will be issue d to each categories list in section 4. 13.2 Non-Chinese participants: A first place cert ificate will be issued for each categaries in each country. 13.3 Amateurs who worked all 34 Chinese provinces, municipal cities, auton omous regions and special adminstration zones within one contest, will receive a special W AP award. Amateurs who worked all 34 Chinese provinces, municipal cities, autonomous regio ns and special adminstration zones outside of contest, is eligible for WAPC award. WAPC aw ards progrom details will be announced soon. 14.Penalties Following penalties are counte d as triple good QSO points. *incorrectly lo gged calls(bad call) *incorrectly logged exch ange numbers *QSO not in other station’s lo g(NIL) QSO is neither counted nor penalized f or the following: *other station incorrectly logged entrant’s call *other station incorr ectly logged entrant’s exchange number *QSO time in entrant’s log and other station’ s log difference is more than 3 minutes *QSO bands or modes in entrant’s log and other s tation’s log differ. *dupe QSO which is not in the other station’s log.

15. This rule is made by Mulan DX Club. Awards infomatio n will be published after each year’s Sprin g festival on club website: http://www.muland xc.org. Mulan DX Club’s decision is final. http://www.mulandxc.org

WAPC Rules
Worked All Provinces(WAPC) of China DX Contest

1.Objective

Amateurs around the world can work any other amateurs during the 24 hour contest period, while contacts with Chinese provinces, municipal cities, autonomous regions, and special administration zones are encouraged.

2.Contest Date

First Saturday of October, within China’s Golden Week national holidays.

The first WAPC contest will be hold in 2012 Oct. 6, from 0000-2359 UTC. A testing contest will be running on third Saturday of April, 2012, It is 21 April 2012 from 0000-2359UTC.logs and records will be filed but no awards will be issued.

3.Bands and modes

In 5 amateur bands: 80-40-20-15-10 meter; WARC band excluded.CW, SSB, and the mixed of the two modes.

4.Categories

Power limits are defined as following High, above 100 watts and up to legal limit of licensee;Low, 100 watts or less, while greater than 5 watts;QRP, 5 watts or less.The following categories are currently available:

High:
Mixed all band; CW all band; SSB all band.
Mixed 10 meter; Mixed 15 meter; Mixed 20 meter; Mixed 40 meter; Mixed 80 meter.

Low:
Mixed all band; CW all band; SSB all band.
Mixed 10 meter; Mixed 15 meter; Mixed 20 meter; Mixed 40 meter; Mixed 80 meter.

QRP:
Mixed all band.

Remarks: No multi-player category. A participant can operate and enter in multiple single band categories. An all band participant will be automatically entered in each single band category he worked, and competing with other single band participants and be eligible for that single band award. Single band participant operating other bands during the contest are encouraged to submit their logs for more than one band to aid in the

log-checking process.

5. General Rules

5.1 Transmitters and receivers must be located within a 500-meter diameter circle, or within the property limits of the station licensee’s address. Antennas must be physically connected by wires to the transmitters and
receivers.

5.1.1 All categories of entrants are allowed to use packet and WEB clusters, skimmer, RBN etc.

5.1.2 Remote control of transmitting or receiving device is not allowed.

5.1.3 Self-spotting is not allowed. Soliciting contacts by telephone, telex, internet, packet mail during and before the contest is forbidden.

5.2 Only one signal can be transmitted at any given time.

5.2.1 Operating, logging,and spotting functions must be performed only by participant himself, any auxiliary transmitting or receiving from other operators is not allowed.

5.3 All mixed mode participants can contact same station both on CW and SSB. IARU recommended
frequencies are encouraged for contest QSOs, cross mode QSO is not allowed.

5.4 Mixed all band QRP participants are encouraged to sign they call with the /QRP suffix.

6.Exchange

Using CQ Bravo or CQ China as a shorthand to initiate your contest. For CW, using CQ B.

6.1 Non-Chinese station: signal report with serial number, start from 001. eg. 59(9) + 001.

6.2 Chinese station: signal report with a two character shorthand forChina’s provinces

List of Chinese provinces, municipal cities,autonomous regions, and special administration zones(source from: China National standards series GB/T 2260-2007).

Notes:
1 Province
2 Municipal city
3 Autonomous region
4 Special Administration Zone, SAZ.
BS7 is considered in HI, BQ9 is considered in TW.

7. Calculating QSO points

7.1 For Chinese stations:

QSO with the 34 Chinese provinces, municipal cities, autonomous regions, and special administration zones: 10 points QSO with other
Asian DXCC entity: 3 points. QSO with other
continent: 5 points.

7.2 For Non-Chinese stations:

QSO with Chinese station: 10 points.
QSO with same DXCC entity: 1 points.
QSO with different DXCC on your own continent: 3 points.
QSO with other continent: 5 points.

7.3 Marine and airborne mobile stations are not count as multiplier, but worth 5 point for any participant.

8. Dupe

8.1 Dupes are contacts made with the same station on the same band and mode. If the first contact between stations is valid, dupes have 0 points value. If the first contact is not valid, second (dupe) contact is accepted.

8.2 Dupe contacts are not penalized; one does not have to mark them in the log submission. Moreover, entrants are strictly recommended to leave DUPES in the log file. PLEASE DO

NOT DELETE DUPES!

9. Multipliers

Two types of multipliers are available, provincial and DXCC entity:

Provincial: Each different Chinese provinces, municipal cities, autonomous regions and special administration
zones, contacted on each band, is counted as one(1) multiplier, despite of the modes worked. That is, only 34 Chinese provincial multipliers are available on each band.

DXCC entity: Each different DXCC entity
contacted on each band, is counted as one(1) multiplier, despite of the modes worked. BY, BV, VR2, XX9, BS7, BQ9 each count as one multiplier.

10. Total Scores

The total scores is the result of total QSO points multiplied by the sum of the provincial and DXCC entity multipliers.

11. Log submission requirements

We need electronic contest logs!

11.1 Please submit your Cabrillo format contest log to this contest committee.

Using N1MM as a log tool is strongly encouraged. It is available at:

http://www.mulandxc.org/wp-content/uploads/2012/03/mulandxc.rar

In case of a failed download, a new download site may be pointed in the contest rule page in:

http://www.mulandxc.org

Also WINTEST can be used in WAPC though it works only in YO-DX mode this time, and the score may be not accurate. In cases of that WINTEST was used, the final score has to be re-calculated after we received the log.

11.2 Time in all the logs must be UTC.

11.3 Contest
log must include the contest exchanges, i.e. signal report with shorthand of provinces, municipal cities, autonomous regions and special adminstration zones, or serial numbers.

11.4 The file name of the contest log should be your_contest_callsign.log.

11.5 No paper log will be accepted.

11.6 If the submitted log can not be correctly convertied to the text format, it will be treated as invalid.

11.7 The file
header of the submitted contest log must contain the intended categary and full mail address including country name, this will be the address used for awards and/or certifications.

11.8 Calculation
of the total scores is not necessary in the log, it will be officially calculated by committee designated software.

12.Deadline of log submission

12.1 All logs have to be submitted before 31 Oct. 2012.

12.2 Logs can be submitted via email: mulandxc@.... Make sure the contest call and category is included in the subject line.

13. Awards

13.1 Chinese participants: A certificate of first, second, and third place in Bravo land will be issued to each categories list in section 4.

13.2 Non-Chinese participants: A first place certificate will be issued for each categaries in each country.

13.3 Amateurs who worked all 34 Chinese provinces, municipal cities, autonomous regions and special adminstration zones within one contest, will receive a special WAP award. Amateurs who worked all 34 Chinese provinces, municipal cities, autonomous regions and special adminstration zones outside of contest, is
eligible for WAPC award. WAPC awards progrom details will be announced soon.

14.Penalties

Following penalties are counted as triple good QSO points.

*incorrectly logged calls(bad call)
*incorrectly logged exchange numbers
*QSO not in other station’s log(NIL)
QSO is neither counted nor penalized for the following:
*other station incorrectly logged entrant’s call
*other station incorrectly logged entrant’s exchange number
*QSO time in entrant’s log and other station’s log difference is more than 3 minutes
*QSO bands or modes in entrant’s log and other station’s log differ.
*dupe QSO which is not in the other station’s log.

15. This rule is made by Mulan DX Club.

Awards infomation will be published after each year’s Spring festival on club website: http://www.mulandxc.org. Mulan DX Club’s decision is final.

BY1WXD/0 – TIBET AUTONOMOUS REGION

Club station BY1WXD will operate as BY1WXD/0 for ten days from the Tibet Autonomous Region (near Lhasa, grid square NL59hi) between September 27 to October 7, 2012.

Per the Chinese operators, this is “the first officially announced DXpedition activity in Tibet Autonomous Region of China by Chinese hams and they sincerely welcome DX chasers all over the world to work us.”

This period overlaps the “Worked All Provinces of China” Contest October 06 (0000-2359z). Contest rules here http://www.mulandxc.org/?page_id=2

Bands will 40 to 6m. Operators: BA7CK BA8IK BA9TX BD2FW BD4TS BD5FFK BD5QDM BD5SO BD9GQ BG0GE BG3MTK BG5TOW BG6MA BG9API and BG9XE.

Subject: HRDLOG.net News Jun–Aug 2012

Print logbook
This function allows to print your own logbook. It requires just to select the year from which the print has to start and you will get your logbook in PDF format, easily loadable or printable.
It is reachable from Login -> Print -> Logbook

Social networks
In the latest period, the page which allows the integration with Facebook (Login -> Modify profile ->Facebook) were not working anymore due to some modificatins on the social network servers. Now this functionality is available again. In addition, you can follow the news also on the page http://www.facebook.com/HRDLOGnet or join the group "HRDLOG.net official user group".
The integration with Twitter (Login -> Modify profile -> Twitter) has been improved: now it is possible to postpone an #hasthag on your own tweet sent to the social network and new buttons have been added in order to make possible to Follow @HRDLOGnet, Tweet on @HRDLOGnet or send a tweet.

Section for QSL Manager
It has been created a new section of the web site completely dedicated to ones who works as QSL Manager; this section is reachable through Login -> QSL Manager -> Manage.
The QSL Managers can register their customers, manage the questions and the sending of QSL, save the cost of their activities, have annual reports; the whole is integrated with the logbook part of HRDLOG.net and with the printings of HRDLabel.
This function has not to be confused with the setting of your own QSL Manager, operation which has to be done through Login -> Modify Profile -> User Data.

Page List DXCC
We remind you that through the page "List DXCC" (Login -> List DXCC) is possible to visualize the list of the contacted countries and of the confirmed ones.
After this updating, it is also possible to verify the correspondence between the callsign and the assigned country (Check DXCC) and modify the attribution in case of error.

Logbook import from a HTTP server
This function, suitable for DXpedition or expert users, allows to import your own logbook taking it from a web server. You can store your logbook in ADIF format on your own web server, indicate the file address and it will be automatically imported every day.
On this version, two ways of charging are provided: "Skip Duplicate QSO" by which the QSO already present on HRDLOG.net are ignored and "Update duplicate QSO" where the QSO present are updated.
The settings are reachable through Login -> Import Logbook -> ADIF Remote Logbook

New Gadget
It is available a new gadget to be installed on your own PC which allows to visualize in real time all the names "on air" useful to add a new entity DXCC to your own logbook.
The gadget analyzes the data of the logbook, of the "on air", of the clusters and it cross them with the estimations done on the real propagation.
This gadget, as the other ones, is downloadable at
http://www.iw1qlh.net/index.php/download/win_ham/HRDLOG.net/

Integrations
The integration with other applications is still on going. The integration with Log4OM, Winlog32 and youLOG are already added or still on test.
The HRDLabel version 6 is now able to print the QSL taking the data directly from HRDLOG.net and from EnzoLog.

We remind you that HRDLOG.net is a website completely independent and absolutely free. For the people who would like to contribute, they can make a voluntary donation.

Propagation Forecast Bulletin 36 ARLP036
From Tad Cook, K7RA
Seattle, WA September 7, 2012
To all radio amateurs

SB PROP ARL ARLP036
ARLP036 Propagation de K7RA

A surprising jump in solar activity occurred this week. Average daily sunspot numbers rose nearly 55 points (about 74%) to 128.7. Average daily solar flux values were up over 28 points to 136.9. A pair of coronal mass ejections on September 3 and 4 excited Earth's geomagnetic field, causing A index values to jump. Middle latitude A index on September 2-5 was 14, 23, 14 and 24. The planetary A index on those dates was 12, 32, 13 and 28, while high-latitude college A index (Fairbanks, Alaska) was 48, 52, 39 and 49.

Solar flux predictions show flux values peaking today (September 7) at 130, then on September 8-12 solar flux of 125, 120, 115, 110 and 105. Solar flux on September 13-16 is predicted at 100, then 95 on September 17-22, then 100, 110, 115, 120 and 125 on September 23-27, and peaking at 130 on September 28. From September 29 through October 2 solar flux is predicted to be 120, then 115 on October 3-5, and 110 on October 6-7.

The planetary A index is predicted at 8 on September 7, the 7 on September 8-10, 5 on September 11-13, 10 on September 14-16, 5 on September 17-19, 10 on September 20, 8 on September 21-23, and 5 on September 24-28.

F.K. Janda, OK1HH predicts our Earth's geomagnetic field will be quiet on September 7, mostly quiet September 8, quiet to unsettled September 9, quiet to active September 10, mostly quiet September 11, quiet to unsettled September 12, quiet to active September 13, mostly quiet September 14, quiet to active September 15, quiet to unsettled September 16, quiet September 17, quiet to unsettled September 18, mostly quiet September 19-20, quiet to unsettled September 21, quiet to active September 22, quiet September 23-28, and active to disturbed September 29.

Our 3 month moving average has an update, now that August is done, and the average daily sunspot number for the trailing three months,

June 1 through August 31 was 91.9. The three month moving averages centered on July 2011 through July 2012 were 63, 79.6, 98.6, 118.8, 118.6, 110, 83.3, 73.7, 71.2, 87.3, 91.5, 96.5 and 91.9. The monthly averages of daily sunspot numbers, May through August 2012 were 99.4, 90.1, 99.6 and 85.8.

NASA has a revised forecast for the peak of Cycle 24, and it looks very interesting. Instead of a peak in Spring 2013 with a smoothed international sunspot number of 60, the peak is now predicted for Fall 2013, with the smoothed sunspot number prediction revised to 76, about 27% higher. Perhaps Cycle 24 will have a double peak, the first being in Fall 2011 and the second in Fall 2013.

The revised forecast is at
http://solarscience.msfc.nasa.gov/predict.shtml.

For VHF propagation, Ken Tata, K1KT tells us to check http://aprs.mountainlake.k12.mn.us/ which he says is "great for live, real time propagation as they are derived from global APRS reports. Unfortunately, most of the rest of the world has no APRS stations. If there are Es paths the red plumes can be huge!"

For tropo predictions, check the Hepburn maps at http://www.dxinfocentre.com/tropo.html. These maps are updated daily at 1PM EST, I believe. By using weather maps and this site you can sometimes do your own tropo forecasts."

Ken says, for the last hour or so of reported contacts, check http://www.dxmaps.com/spots/map.php?Lan=E&Frec=50&ML=M&Map=NA&DXC=N&HF=N&GL=N. I checked conditions in Europe on 10 meters at 1200 UTC on September 7, and saw lots of tropo and sporadic-E propagation indicated.

Back on August 31, Jeff, N8II reported: "The bands have gone from pretty punk to exciting in just a couple of days, no wonder with SFI currently 135 and K1, lots of over the pole DX worked yesterday including RI1FJ (Franz Josef land) for a new band country at 0045Z on 12M CW, 1 hour after my sunset and about 03 hrs in FJL! More details to follow. 15 was open 1/2 hr after sunrise to EX8MLE and UK8 this AM."

Roland Anders, K3RA of Elkridge, Maryland reports, also from August 31: "That jump in the SSN really seemed to liven things up to Asia on the bands here in MD-especially on 10 and 12. Wednesday night was a precursor of things to come. 15 was open to JT, HL, YB, and several JAs as late as 0225Z.

"Thursday morning I worked a few Asians on 20 at 1200Z or so, and at 1220Z I happened to see a huge number of spots on 10 meters by Europeans. The 10 meter band map is usually pretty blank at that hour. 12 was open, too, but that was not nearly so unusual as the 10 meter spots. So I tuned up to 10 and immediately started working EUs, and ran 15 of them in about 30 minutes. Then I moved to 15 CW

at 1320Z and worked a couple of Chinese stations that were new stations for me. After some more EUs, I moved to 15 SSB and worked HS, two YBs and finished with 9N1AA at 1452Z.

"Friday morning, I got on 15 at 1200Z and worked some JAs, EX, a couple of HS stations, China, VU, a couple of YBs and A7. I moved to 10 at 1310Z to work 5H3ME on CW, then to 12 for a good run of EUs. Back to 10 at 1500Z to pick up YB4IR, then to 15 to work YB, JY, and VU. At 1525Z I moved to 12 SSB and snagged XU7AAJ. That's several hours after his sunset, a new band country for me. 12m was also good for OD5ARMY on SSB and an Israeli mobile.

"Friday night at midnight on 15 I heard a strong JA working RX9 and could hear both sides of QSO. So I called CQ and worked some JAs.

"Here on the east coast, I often find that when I tune 20 at 1200Z and later, I find very little if any activity, but CQing over the pole often produces JA and other Asians. So, if all you do is listen and look for spots, you may be missing some good opportunities. Same can be said for 17 meters, which is usually open to EU at that hour, but Asians can be enticed to answer CQs. And look for those openings over the pole on 10 and 12 mid-morning East Coast time--it's that time of year."

Bob Foster, N9BGC of Waverly, Iowa wrote on September 2, "This past week saw several solid DX openings from NE Iowa to Eastern Europe, the Pacific and South America on 15 meters SSB. The band stayed open well past sunset. My station is very basic - 100 watts into a ground mounted Gap vertical. Legitimate 5-7 to 5-9 signals were sent to Poland, Croatia, Hawaii, Brazil and Spain. Not exotic DX, but quite consistent 4,000 to 5,000 miles. It was quite satisfying considering my modest station. Normally, I have to rely on 20 M and 40 M CW for such contacts."

Fred Laun, K3ZO sent comments about this year's All Asia Phone contest. "Given that this contest is possibly the most affected by solar effects since the beam headings from here to the area where the maximum number of possible QSOs is located go right through the north magnetic polar area, I thought it would be interesting to compare my score this year to the score in last year's contest."

In 2011 with solar flux at 119, he had 96 contacts on 40, 93 on 20, and 196 on 15, with a total of 385 QSOs and 70,455 points. In 2012 with solar flux at 145 he had 19 QSOs on 40, 81 on 20, 298 on 15 and 4 on 10 meters, total 402 QSOs, and a score of 81,606.

"The 15 meter numbers this year would have been even more lopsided if I hadn't had to break off great runs twice on Friday night due to equipment problems, and if I hadn't had to shut down almost completely during the best hours to Japan Saturday night because of thunderstorms. My 140 foot tower took a direct lightning hit at 9:45 Saturday night.

"The main difference between the two years was the existence of a great opening to Japan on 15 Saturday morning between 1200 and 1400 UTC. This opening did not exist during last year's contest, when the furthest east that 15 opened in the same time frame was to Thailand. Unfortunately, the great Saturday opening this year did not repeat itself Sunday morning because of a solar proton event which had the effect of lowering the MUF over the pole in that direction. However propagation to that area on 20 on Sunday morning was much better than it had been on Saturday morning which gave me a chance to fatten up my 20 meter numbers. RU0AI registered a mind-boggling 45 dB over 9 on my S-meter during the Sunday morning run.

"The other difference of note was that I was able to make Asian QSOs on 10 this year; not many -- one UA9, two HZs and an A6, but last year I didn't have any. As always, I had no packet in the shack on purpose so I missed some 10 meter stuff I'm sure. K3TW in Florida reported hearing HS0ZJU on 10. Ken, KE3X piloted the N3HBX station to much better numbers than mine. Congrats to Ken for a job well done."

For a peek at the K3ZO antenna farm, go to http://www.bing.com/maps/default.aspx?cp=38.81|-76.934&style=h&lvl=16&v=1, and zoom in, then click on Aerial and Bird's Eye. You can drag the image around, and also select views from four different images in four directions on the compass rose in the upper right. Quite impressive.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 1078
BID: $OPDX.1078
September 10, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)
Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, W2VU, AA3B, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4GN, N4JF, WA4DAN, W5JE, KH6BZF, N7CQQ, K8GI, K8YSE, KQ8Z, W8GEX & 60m News, W9ILY, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, HK3CW, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, OH2BH, OH2YY, ON5NT, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, SM3CVM, VA3RJ & ICPO and the VHF-DX-Portal (MMMonVHF) for the following DX information.
DXCC COUNTRY/ENTITY REPORT
According to the AR-Cluster Network for the week of Sunday, 2nd-September, through Sunday, 9th-September there were 218 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5Z, 6W, 6Y, 7P, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E5/n, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH8, KH8/s, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PY, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV5, SV9, T30, T32, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP6,
VP8, VP8/h, VP9, VR, VU, XE, XU, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZL, ZP, ZS
* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).
3D2, FIJI
Orlando, PT2OP, will be active as 3D2OP from Viti Levu between October 7-14th. Activity will be holiday style on the HF bands. QSL via his home callsign, direct (preferred) or by the Bureau.
3D2, FIJI
Cicero, PY7ZY, a member of the T30PY/T30SIX DXpedition, will be active as 3D2ZY from Viti Levu, Fiji (OC-016), between October 11-15th, prior to his participation in the Tarawa Island, Western Kiribati, DXpedition. Activity will be on the HF bands (specific bands were not mentioned). QSL via his home callsign.
5H, TANZANIA
Arne, OH2NNE, will be active as 5H2DK from Moshi (KI86qq) between October 2-17th. Also, there may be sporadic activity using a portable setup from different locations between October 18-27th. This will be a one man operation on SSB only. The setup includes an Icom 706 MKIIG boosted with an SG-500 to emit full 100 watts permitted, A3S tribander (10/15/20)

and dipoles for 12/17/40/80 meters bands. The portable setup will include the Icom 706, an AH-4 mobile antenna tuner, a wire antenna taped to a 6m fishing stick.
Prelimanry TX frequencies plan is: 3790, 7090, 14250, 18150, 21250, 24950 and 28450 kHz. The RX will be the same as TX, 5up, 5-10up or 7.145 on 40m band. In order to maximize the possibility for everyone to get into the log, Arne suggest/asks that Europe call 5 up and outside Europe/Scandinavia to call 10 up. Arne states, "We will try our best to serve everybody. Please behave according to the rules in order to maximize QSO rate and minimize the number of failed QSOs. We will try to upload the log, if possible." QSL via his home callsign.
5R, MADAGASCAR
Eric, F6ICX, will once again be active as 5R8IC from Saint Marie Island (AF-090) between November 10th and December 9th. Activity will be holiday style operating CW, RTTY, and PSK63, and using a FT450 with 100 watts into various GPs or Inverted-Ls and a Hexbeam for 20-10 meters. There will be no online log during his activity. QSL via his home callsign (QRZ.com). View pictures of his last trips at:
http://f6kbk.free.fr/5r8ic/5r8ic.htm
5W & KH8, SAMOA AND AMERICAN SAMOA (ZK3 Cancelled!)
John, N7CQQ, sent out the following press release on September 9th [edited]: "Well gang, we have thrown in the towel on getting to Tokelau (ZK3) this time around. The boat is normally scheduled for a two week turn around with about two days to get to and two days to return from Tokelau. This month the boat scheduled to go to Tokelau was tasked to do another cruse and another boat was substituted from New Zealand. The weather has delayed the arrival of the substituted boat from New Zealand, so we still don't know when the boat to Tokelau will depart Apia, Western Samoa. But wait the story gets better!
The return boat trip is 'Scheduled' for departure from Apia, WS, on September 18th. The return date to Apia, WS, after picking us up at Tokelau is September 29th give or take weather and the changing schedule. The scheduled flight returning Ron/N6XT and John/N7CQQ back home is scheduled out of American Samoa on October 1st. So we have given up our attempt to visit Tokelau this trip. We will continue to operate 5W and KH8 when we return to AS about the 19th or 20th of September to see the Swains guys return. We have lots of information to share about visiting Samoa and Tokelau.
73, de John/5W0QQ and Ron/5W0XT see you in the pile up and still having fun in the Pacific."
ADDED NOTES: There has been plenty of SSB activity by John and Ron on 20 meters. John also mentioned to OPDX on Friday, "We just finished installing the SteppIR Big vertical at the Samoa Marina Hotel, they are nice folks. Had some difficulty with power strips, 120v power strips don't work well on a 220 volt system... Got a great internet connection so should be able to stay in touch."
6Y, JAMAICA
Jürgen, DL3JH, is now active as 6Y5/DL3JH from Jamaica (NA-097) until September 22nd. Activity should be on all HF bands using CW and SSB. QSL via his home callsign.
BY, CHINA
Members of the Dongcheng District Radio Club station (BY1WXD) will be active as BY1WXD/0 for ten days from the Tibet Autonomous Region (near Lhasa, grid square NL59hi) between September 27th and October 7th. This will be the first DXpedition in the Tibet Autonomous Region by Chinese operators.
Operators mentioned are Che/BA7CK, Xu/BA8IK, XiangQian/ BA9TX, Donghui/BD2FW, Gu/BD4TS, Zheng/BD5FFK, Ampear/BD5QDM, Youjun/BD5SO, Li/BD9GQ, Lin/BG0GE, BG3MTK, BG5TOW, Lihua/BG6MA, Nalan/BG9API and Xiaolei/ BG9XE.
This operation is sponsored by WOUXUN Elecs. Activity will be on 40/30/20/17/15/12/10/6 meters (To Be Finally Determined) using modes CW, SSB, RTTY and PSK. They will have two

stations on the air using Icom IC-7000's and SpiderBeam (To Be Finally Determined). Also, this activity will take place during the "Worked All Provinces of China" Contest [WAPC] (October 6th, between 0000-2356z). For details on the WAPC, visit:
http://www.mulandxc.org/?page_id=2
CE, CHILE
Robert, SQ1DWR, will be active as CE3/SQ1DWR from Chile between October 10-22nd. Activity will be on 40-10 meters using CW. QSL via his home callsign.
CR3/CT9, MADEIRA ISLANDS
The CR3L contest station in Santana on Madeira Island (AF-014) will be busy over the next few months during the upcoming contest season. Look for the following operators to be active possibly as CT9/homecall and CR3L during the upcoming dates and contests:
Sept. 20th-Oct. 4th: Operators Walter/DJ6QT, Goetz/DJ3IW, Kalle/DM3BJ, Stefan/DK1MM, Horst/DK1QH, Dieter/DK4QT, Han-J./ DL1YFF, Boris/E73Y and Marijan/S56A. Activity during the CQWW DX RTTY Contest (September 29-30th) as a Multi-Multi entry.
Oct. 21st- Nov. 2nd: Operators Karlfried/DL1EK, Peter/DH4JQ, Marion/ DF4UM, Marco/DJ5KW and Leo/DK8VC. Activity during the CQWW DX SSB Contest (October 27-28th) as a Multi-Op entry.
November 20-27th: Operators Arno/DL1CW, Ulf/DL5AXX, Frank/DL8WAA, Ulrich/DJ2YA, Falk/DK7YY, Gennady/UA9MA, Mikhail/ UA9PM and Ruslan/UA9ONJ. Activity during the CQWW DX CW Contest (November 24-25th) as a Multi-2 entry.
QSL CR3L via DJ6QT. Activity by operators, QSL via their home callsign. Visit the CR3L Santana, Madeira Island, Web page at:
http://www.cq3l.de
CQ NEWS
Richard, W2VU, sent the following press release on September 4th:
"CQ News: Bob Cox, K3EST, Retires as CQWW Contest Director - Bob Cox, K3EST, has retired as Director of the CQ World Wide DX Contest and as CQ's Director of Contesting, it was announced today by CQ Publisher Dick Ross, K2MGA. Cox has been at the helm of the CQWW for 35 years, guiding the contest through massive changes in technology - both on and off the air - and CQWW's growth to become the world's most popular amateur radio contest.
>Cox first took the reins of the CQWW in January, 1977, along with Larry Brockman, WA6EPQ (now N6AR), who worked with Bob until March, 1994. In making his announcement to members of the CQ World Wide Contest Committee, Bob said, '35 years encompasses almost the entire history of modern contesting. All the way from paper logs to today's need for instant answers. During that time a framework was created that made the CQWW the innovator of almost everything used in contesting today including log checking.' He added, 'With that in mind…I am tired and wish to move on with other interests.'
>Ross said the association had been long and fruitful, telling Cox 'it has been an honor to have worked with you for these many decades. Your contributions to the art and sport of amateur radio contesting have been enormous.'p Cox's retirement is effective immediately. A successor has not yet been named."CU1-CU9, AZORES (Press Release - Dated September 4th)[edited])
Martti, Laine, OH2BH, sent out the following:
DXERS TAKING A NEW COURSE IN AZORES, SEPTEMBER 28-30, 2012
NEW WEBSITE GOES LIVE
http://azores-islands-hunt.com
It is often said that DXers only work DX. More recently, we have seen a healthy shift toward assisting the society they visit by helping locals become stronger in Amateur Radio. Something totally new is now happening in the CU-land the Azores.
In recent years, the Azores Islands have balanced their agriculture and livestock sectors through increased awareness of their great location and unique landscape facilitated by the

development of the local infra- structure to receive more visitors from industrialized countries. Signif- icant progress has been made in expanding tourist facilities, convention hotels and holiday resorts. The Azores is now capable of accommodating 10,500 visitors per day. Additionally, the Azorean airline (SATA) is set to serve many European destinations in addition to the US and Canada.
Radio amateurs are now stepping forward to help the Azoreans increase the awareness of all of their nine islands, all within reach of SATA airline service. Forming nine country teams with the locals, a total of twenty DXers will fly in from SATA destinations to be on the air from the nine islands as part of the 'Azores Nine Islands Hunt' - a unique concept to bring everyone on board globally to share what the Azores can offer. Those participating are:
United States: K2DO (YL), KI1U, KE3Q, N2GA
Canada: VE3DZ, VE3FWA
Germany: DJ9ZB, DF9TF
United Kingdom: G3TXF, G7VJR
Finland: OH2BH, OH8NC, OH9MDV
Norway: LB3HC
Belgium: ON7LX (YL), ON7TK, ON5NT
Denmark: OZ7AM, OZ1IKY
Together with local hams from each island: CU1AAD, CU2BV, CU2CE, CU2DX, CU3CS, CU4AB, CU5AM, CU6AB, CU7CA, CU8AAE and CU9AC
The Amateur Radio group is also set to streamline emergency communic- ations procedures throughout the archipelago. Together with the local amateur population and administrators, they will be using this activity to test the island-to-island amateur radio network. The ARRL is sending their best resources, lending their expertise in this field.
The project website was launched today at
http://azores-islands-hunt.comfor your review while you can also study the Azores at:http://www.visitazores.com/en
CY0, SABLE ISLAND (Update)
The following was a press release dated September 5th [edited]:
"Planning continues for the October 8-17th DX- pedition to Sable Island (CY0). Half of our gear is in storage at the Maritime Air Charter facility in Halifax, Nova Scotia. We are in the process of shipping the remaining gear. We have booked our flights to Halifax. All remains on schedule for the CY0 operation to begin around 2300z on October 8th. As always, weather and flying conditions will dictate the actual schedule. The aircraft has to land on the beach as there is no "runway" on the island.
>This operation will be highly focused on 10,12 and 15 meters where the most demand for CY0 exists. We continue to discuss antenna options due to the restrictive environment we will be operating under.
>Ron and Murray will begin loading the Britten-Norman aircraft late in the afternoon on October 7th. All gear must be weighed as we have a 1400 pound weight limitation, including our body weights. We will then watch the weather very closely. On Monday morning, October 8th, Maritime Air and the OIC on Sable have scheduled a 1200z call to determine if a flight is GO/NO GO. More updates to follow.... WA4DAN/CY0 and AA4VK/CY0"For more details and updates, visit: http://www.cy0dxpedition.com
EA8, CANARY ISLANDS
Mike, DL3FCG, will once again be active as EA8/DL3FCG from La Orotava, Tenerife Island (AF-004, S-012 for the Spanish Islands Award, WLOTA LH-1276) between October 15-28th. Activity will be on 80-10 meters using CW, SSB and the Digital modes. He also plans to be in the WAG Contest (October 20-12th) and the CQWW DX SSB Contest (October 27-28th). QSL via DL3FCG, direct or by the Bureau (preferred). All QSOs will also be confirmed via LoTW and

eQSL. Visit his Blog Page for more details at:
http://dl3fcg.blogspot.de
GJ0, JERSEY
Jim, G0UPG, will be active as GJ0UPG from Jersey between September 9-15th. Activity will be on the HF bands, mainly SSB, probably using a FT-857D, an LDG 200 Pro II tuner - both powered by 12V 8AH battery, into a vertical antenna made from a telescopic fishing pole. QSL via his home callsign, direct or by the Bureau. Also LoTW or eQSL.
HS, THAILAND (Yaesu Presents Radios to HS0AC in Thailand))
Press release from Dennis Motschenbacher, K7BV, received on September 3rd:
"I depart Thailand early Tuesday morning after a number of days of DX pileups along side some of the most enthusiastic and friendly hams in the world! I will never forget my time here to present two Yaesu FT 2000D radios (thanks to Yaesu President Mr. Jun Hasegawa) to the Radio Amateur Society of Thailand headquarters station HS0AC that lost their radios during the terrible floods last year.
>http://www.qsl.net/rast/http://www.hs5ac.net/smf1112/smf/index.php?topic=749.0
>I was delighted to find Thailand extremely "radio active" with over 300,000 hams; most on VHF. However, after seven years of waiting, the Thai hams are once again able to test for a license that gives them the HF bands. Over 40 have already passed the exam this year and at least one more test is schedule in 2012. I understand that upgrade testing will likely now occur three times a year meaning 100s of new HF operators are about to appear on the HF bands.
>All this is great news for hams around the world!73 Dennis Motschenbacher K7BV HS0ZKS Executive Vice President Amateur Radio Sales"
IOTA NEWS
AS-095. Operators Victor/RU0ZM, Valery/UA0ZC, Valdimir/RA0ZJ and Alex/UA0ZAM will be active as homecall/p from Starichkov Island between September 8-14th. Activity will be on the HF bands. QSL via their homecallsigns.
EU-069. Members of the "Invoker Team" will be active as EG5INT from Columbretes Island between September 20-24th. Operators mentioned are George/EA2TA, Christian/EA3NT, Ramon/EA3OR and Raul/EA5KA. QSL via EA5KA.
EU-088. Bernd, DL8AAV, will be active as OZ0AV from Laeso Island (DIA NK-003, WLOTA 2820) between September 10-22nd. Activity will be on the HF bands, propagation permitting. QSL via DL8AAV, by the Bureau or direct.
EU-172. Mike, DG5LAC, will be active as OZ/DG5LAC from Langeland Island (DIA FY-019, WLOTA 0590) between September 29th and October 5th. Activity will be on 80-10 meters using SSB. QSL via his home callsign, by the Bureau or direct.
OC-110. Rod, YJ8RN, is currently visiting Loh Island in the Torres Island IOTA Group (in Vanuatu) and is active as YJ8RN/p. The length of stay unknown. Activity has been mainly 20 meters SSB. QSL via his home callsign: Rod Newell, Box 905, Port Vila, Vanuatu.

Yuriy, N2TTA, announced this past week that he will also be active as KP2MM during the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW. For more details, see:http://www.n2tta.info
N1, UNITED STATED (Special Event)

Members of the Symbol Technologies ARC will be honoring the lives lost during the horrific events of September 11th, 2001, with activating special event station N1Y between 1400z Monday, September 10th, and 1400z Tuesday, September 11th. Suggested frequencies are: 3911, 7240, 14070 and 50135 kHz, as well as D-Star REF10C. QSL direct to W2SBL: STARC, One Motorola Plaza, B-13, Holtsville, NY 11742 (with a #10 SASE).
PLEASE NOTE: There will be a reading of one name of the fallen with every QSO.
NEW OFFICERS FOR 2012-2014
Members of the Colombian Radio Amateur Association (LCRA - Liga Colombiana de Radioafionados , elected the following new Board of Directors as of September 1st, for the 2012-2014 term. They are:
President - Roberto "Rob" Rey, HK3CW (cwdude@...)
V. President - Francisco "Siso" Hennessey, HK3W (hk3w.info@...)
(Vocal) is - Francisco Pineda, HK3IXI
Aquilino Torres, HK3Z
Dalia Preziosi, HK3JI Controller (Attorney) - Alvaro Góme
z, HK5LNJ
NH8, SWAINS ISLANDS
The international team of 19 operators are now active as NH8S from Swains Island until September 18th. San, K5YY, 60m pilot station for NH8S, reported earlier in the week that "Joe, W8GEX, will try to get on 60m after NH8S has been on a few days and things 'settle down' ... Do not expect him on before Sept. 9th or 10th.....
As announcements have said, he will look for Europe at about 0400z and North America from about 0900-1100z during USA sunrises." Remember, the NH8S team will also be running seven stations from 160-6 meters using CW, SSB and RTTY. They plan to upload logs to ClubLog daily and can be found at:
https://secure.clublog.org/charts/?c=NH8S#r
Before going to print, as of 0116z September 9th, the NH8S team has made a total of 27899 QSOs with 9707 Unique callsigns (13245/SSB, 2134/CW and 1/RTTY). Breakdown by Continent: 104/AF, 0/AN, 10333/AS, 5254/EU, 11060/NA, 874/OC and 274/SA. The NH8S team recommends to QSL via OQRS by ClubLog for both direct or Bureau QSLs. PLEASE NOTE: They will activate the OQRS system after the DXpeditions ends -- on or about Saturday, 22-September-2012. Complete instructions will be provided on the NH8S QSL page. Direct QSLs can be mailed to: Swains Island DXpedition, P.O. Box 5005, Lake Wylie, SC 29710, USA. Bureau QSLs go to AA4NN (but use the OQRS - it is faster). QSL via LoTW (Logs will be posted 6 months after the conclusion of the DXpedition). There will not be any QSLs via eQSL. More details on the NH8S operation, see the Web site at:
http://nh8s.org

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!
SI9, SWEDEN (Special Event)
Special event station SI9AM from the King Chulalongkorn Memorial in Ragunda, Sweden, the largest Thai Pavilion in the world outside Thailand, will be active between September 15-16th. Operators will be Lars/SM3EAE, Joe/SM3FJF and Göran/SM5SIC. They plan to be an entry in the Scandinavian Activity Contest [CW] (September 15-16th). Outside of the contest, activity will be on 160-10 meters. Suggested frequencies are:
 CW - 1817, 3517, 7017, 10117, 14017, 18077, 21017, 24897 and 28017 kHz
  SSB - 1840, 3760, 7060, 14210, 18160, 21310, 24960 and 28510 kHz
  FM - 145.550 MHz and repeater RV49 - 145.612 MHz
QSL via SM3CVM, direct or by the Bureau. For more information, visit the SI9AM Web page at: http://www.si9am.se
V2, ANTIGUA
Bud, AA3B, will be active as V26K from Antigua (NA-100) between November 22-26th. Activity will include the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band/Low-Power entry. Outside of the contest, activity will be all CW on the HF bands only. QSL via AA3B.
VK9X, CHRISTMAS ISLANDS (Update)
Pekka, OH2YY, informs OPDX that his good friend Pekka Ketonen, OH1TV, will be joining him at Christmas Island. The VK9XM callsign will be used and there will be two stations. They will have two yagis to cover the bands 20-10 meters and a dipole for 40 meters. They will operate on SSB and CW. Dates and QSL info will remain unchanged. The schedule for the operation is from Oct. 6th (ca. 12Z) to Oct. 12th (ca. 24Z). QSL via his home callsign, direct or by the SRAL QSL Bureau. Direct QSLs go to: Pekka Ahlqvist OH2YY, Vapaalanpolku 8B, 01650 Vantaa, Finland.
VP2V, BRITISH VIGRIN ISLANDS (Update)
Steve, AA7V, will once again be active as VP2V/homecall from Virgin Gorda (Tortola) between September 26th and October 1st. Activity will include the CQWW DX RTTY Contest (September 29-30th) as a Single-Op/All-band/High-Power entry. He mentioned in July to OPDX that he will probably not take a keyer/paddles and possibly a microphone. Steve states, "I will lug my Ameritron amp down there and (hopefully) run 400w. I have a G5RV and an 80/40 trap dipole which will both hang off the porch of one of those cliffside villas. If any time, I will try 17 meter RTTY. Thank goodness no 160 in this contest." QSL via AA7V direct or LoTW. NO BUREAU QSLS. For more details on Steve's activities in the coming months, see OPDX.1072.
XV29, VIETNAM
Yasu, JL7XBN, will be active as XV29FM from Vung Tau between October 19-22nd. Activity will

be on 20/15/10 meters using the modes FM, SSB, PSK, RTTY and JT65A. More details and QSL info is forthcoming.
Z8, SOUTH SUDAN
The "DX-World.Net" Web page is reporting:
"Jim, K7QI, is the first operator to be issued with the new Z8 prefix for an upcoming stay in South Sudan. Within the next few weeks he plans to be active from Juba as Z8AAA. QSL via K7GSE who will update this news in the coming days." LAST MINUTE UPDATE FROM "DX-World.Net" Web page: "Jim, Z8AAA, will be home on September 25th for couple of weeks before heading back to Southern Sudan with a new Yaesu FT 2000D and a Hex beam. He hopes to be on the air sometime in October or November and thanks all for emails and best of luck messages. Will keep all informed of any more news.."ZL, NEW ZEALAND
Members of the Quake Contesters Group will be active as ZL3X during the CQWW DX RTTY Contest (September 29-30th) as a Multi-Single Low-Power entry. QSL via ZL3PAH or LoTW. Operators mentioned are Mark/ ZL3AB, Don/ZL3DMC, Andrew/ZL3DW, Geoff/ZL3GA, Graeme/ZL3GK and Phil/ZL3PAH.

OM Seno,

Kalo state side sampe muncul di bawah 14.150 SSB, even buat extra class, itu illegal operation ...udah out of the band mereka ... batas SSB paling rendah di sana 14.150 ... SSB di 14.150.01 saja udah pasti kena tegur tuh ... hehe

Allocation di 14.000 - 14.150 di state side cuma buat RTTY and data ...including CW ..

Pahlawan Award dan Nusantara Award

YB0NDT Karsono Suyanto

Liburan panjang menyambut Hari Kemerdekaan Indonesia dan Libur Idul Fitri saya manfaatkan untuk melihat-lihat lagi QSL Card-QSL Card yang pernah saya terima semenjak tahun 2004 (Pertama kali saya menjadi Anggota ORARI). WAIA Award dan Borobudur Award sudah saya dapatkan.

Saya juga membaca persyaratan untuk mendapatkan Pahlawan Award. Award yang di kelola oleh ORARI Daerah Jawa Timur, di mana saya harus memiliki 50 QSL Card dari Call Area 3, semua tingkatan harus saya miliki (YD3-YG3,YC3-YF3, YB3-YE3) dan saya juga harus memiliki minimal 20 QSL Card dari Station yang ada di kota Surabaya.

Saya sortir lagi QSL Card-QSL card tersebut, ternyata QSL Card saya dari Call Area 3 jumlahnya memenuhi persyaratan dan juga saya memiliki 20 Surabaya Station.

QSL Card dari Call Area 3

Setelah semua persyaratan terpenuhi, tidak lupa saya mengisi form K untuk claim award tersebut.

Form K, Untuk Claim ORARI Award

Saya hubungi Om Adhi YB3MM, dan beliau kenal dengan Award Manager dari Pahlawan award tersebut yaitu Om Yan Bambang Susanto YB3CEV, dan saya sangat bersyukur om Adhi mau membantu saya untuk menyerahkan QSL card saya untuk di check oleh om Yan. Akhirnya saya kirimkan via TIKI QSL Card dan from nya ke kantor om Adhi.

Dua hari setelah saya kirimkan, om Adhi memberikan kabar bahwa QSL Card dan Form K telah di terima. Saya sangat gembira saat saya menerima kiriman foto via Blackberry bahwa om Yan sedang menuliskan Pahlawan Award untuk saya.

Om Yan YB3CEV sedang menulis Pahlawan Award untuk saya ... horeee ...

Om Yan YB3CEV dan om Adhi YB3MM

Pahlawan Award YBØNDT

Tanggal 17 Agustus 2012, juga telah di umumkan ke seluruh penjuru dunia, telah lahir award baru yang di buat oleh Indonesian Island Hunter Group yang bermarkas di New Jersey Amerika. Award yang di keluarkan bernama Nusantara Award. Ada juga
websitenya www.nusantaraaward.com
Nusantara Award ini bisa di miliki asalkan sudah QSO dengan station yang QRV dari pulau-pulau di Indonesia. Untuk Claim Award tersebut cukup QSO dengan 10 Pulau dari YB Land dan confirm dgn QSL Card nya.

Lima pulau besar (main Island) mutlak harus ada.
Main Island yang di maksud adalah: Sumatera, Kalimantan, Jawa, Sulawesi, Bali, Papua. Tetapi setiap aplicant cukup dengan 5 (lima)pulau saja. Dan lima pulau lainnya bisa di cari, misalnya pulau Bangka, Pulau Belitung, Sumbawa Besar, Timor Island, atau bisa juga ber QSO dengan teman-teman ORARI yang melakukan DX pedition.

Saya membaca bahwa aplicant dari YB Land bisa melakukan claim award tersebut langsung ke Om Adhi YB3MM. Saya pun mencari QSL Card untuk melakukan claim award tersebut:

QSL Card saya untuk Claim Nusantara Award

Proses Claimnya juga tidak rumit. Dan biaya untuk aplicant dari Indonesia adalah Nol rupiah. Aplicant hanya menyertakan perangko balasan sebesar Rp.7500,- (Tujuh Ribu Lima Ratus Rupiah).

Setelah saya confirm mendapatkan Nusantara Award, saya juga membuka websitenya, ternyata award saya tercantum di sana dengan nomor 014. Sangat profesional. Dan sudah ada beberapa kawan dari YB Land yang mendapatkannya, bahkan ada beberapa amatir radio dari mancanegara telah mendapatkannya.

Sampul Nusantara Award

Nusantara Award YBØNDT

Award-award tersebut sudah tiba di QTH saya, sudah saya laminating dan siap saya pajang di ruang hamshack saya.

Terima kasih om Adhi YB3MM, terima kasih Om Steve W2FB, dan terima kasih untuk om Yan YB3CEV.

YB0NDT Karsono Suyanto

3673. http://www.ybdxc.net/2012/09/whats-appeal-of-ham-radio.html

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-09-10 15:41:15 UTC

http://www.unclebam-yb0ko.com/why-ham-radio.html

YB0KO, Bambang Soetrisno

What’s the Appeal of Ham Radio?

(quoting -- and editing a bit -- a few lines from www.hello-radio.org) Some hams are attracted by the ability to communicate across the country, around the globe, or even with astronauts on space missions. Others may like to build and experiment with electronics. Computer hobbyists enjoy using Amateur Radio’s digital communications opportunities. Those with a competitive streak enjoy “DX contests,” where the object is to see how many hams in distant locations they can contact. Some like the convenience of a technology that gives them portable communication.
Mostly we use it to open the door to new friendships over the air. We do it either through participation in one of the nets, or simply by joining an on going "ragchewing" easily found in any ham bands.

BTW, following is "a bit polished & edited" e-mail I wrote back in 2010, in responding to a query from YL Clara Endah Triastuti (Titut) ... who was at that time needed some basic information on "what Ham radio is all about" to compliment the thesis she was working out for her S-3 degree (PhD) in the University of Wollongong, NSW, Australia.
Pse note that the word INA in the following text refers to (and is the abbreviation of) Indonesia

---

mbak Titut ing paran,
di awal threads ini pernah saya sampaikan bahwa hard disk saya crashed beberapa minggu/bulan yll, dan sejak itu praktis saya kehilangan NYARIS semua "ilmu" yang tersimpan dalam beberapa folders di hard disk yang tidak/belum saya buatkan back up-nya (dan rupanya gagal di-recovery walaupun sudah sempat berpindah-pindah tangan di antara beberapa “tukang oprèk” crashed HD yg di Glodok sana) .
Nah, hari Kamis 13/05 kemarin, pas kalender merah (hari libur resmi) di INA, saya manfaatkan waktu untuk mengunduh (down loading) file-file yang tersimpan sebagai Attachments di folder Sent Mail pada webmail (gmail.com) saya, sampai terkumpul puluhan files dated back sampai bulan-bulan awal 2008, yang saya rasa cukup untuk melengkapi orek-orekan dalam responding to your queries (and virtual interviews) in the past few days, yang saya "ombyok-in" aja jadi satu di imil sekarang ini, sbb. :

1. The "breakers":
FYI, terminoloji "breaker" secara "resmi" tidak masuk dalam vocabulary radio amatir, walaupun para amatir radio juga melakukan kegiatan ‘nge"break" sebagai porsi utama dari kegiatan radio amatir itu sendiri.
Istilah BREAKER lebih umum dipakai di lingkungan CB-ers (CB = citizen-band = spektrum frekuensi 27 MHz atau band 11 mtr), atau yang di Indonesia dikenal sebagai KRAP (Komunikasi Radio Antar Penduduk) dengan RAPI (Radio Antar Penduduk Indonesia) sebagai wadahnya.
Walaupun sebagai "breaker" amatir radio dan CB-ers sama-sama meng-claim dirinya sebagai

OPERATOR Radio, di tahun 70-an OM Soewondo YBØAT (SK) --- sebagai hobbiist beliau waktu itu menjabat sebagai Ketua Umum ORARI Pusat, sedangkan sebagai profesional (Marsekal Udara dengan dua bintang di pundak) beliau adalah Ketua G-6 (membawahi bidang KOMLEK/Komunikasi dan Elektronika) HANKAM --- pernah memberikan definisi berikut untuk membedakan kedua "species" pengguna frekuensi tersebut:

Amatir Radio adalah (seorang) operator ber-lisensi (licenced operator) yg meng-operasi-kan (to operate) perangkat (radio) telekomunikasi-nya, sedangkan CB-er(s) adalah sekedar KOMUNIKATOR yang ber-komunikasi (to communicate) dengan menggunakan perangkat (radio) telekomunikasi, atau untuk singkatnya sering disebutkan: A Radio Amateur is an OPERATOR, while a breaker (CB-er) is merely a COMMUNIATOR.
Karenanya, untuk membuktikan bahwa seseorang memang MAMPU atau MUMPUNI (capable) untuk mengoperasikan perangkat radionya (dalam kapasitas sebagai seorang operator/Amatir Radio), maka orang tersebut HARUS mengikuti ujian (negara) untuk mendapatkan “laisens” (sekarang disebut IAR/Izin Amatir Radio)-nya.

Callsign (Prefix, Call Area dan Suffix)
Sebagai seorang Amatir Radio, begitu lulus ujian di samping mendapatkan IAR maka yang bersangkutan akan mendapatkan tanda pengenal (Callsign), yang terdiri dari rangkaian huruf dan angka: dua huruf Prefix, angka Ø ~ 9 yang menunjukkan Call Area dimana yang bersangkutan berdomisili, dan beberapa huruf Suffix (yang sifatnya individual, dalam arti “melekat” pada diri si penyandang).
Di INA Prefix sekaligus menunjukkan tingkat kecakapan yang bersangkutan, yang terdiri dari huruf-huruf YH (tingkat Pemula), YD/YG (Siaga, seperti pada OM Yono yang YDØNXX), YC/YF (Penggalang, seperti OM Onno yang YC1DAV waktu beliau masih di Bandung, dan YCØMLC sekarang) dan YB/YE (Penegak, seperti YBØAT (SK) yang saya sebut-sebut sepanjang thread ini, dan juga rekan di Bandung OM Gatot Dewanto YE1GD).
BTW, huruf (SK) di belakang nama/callsign seseorang mengindikasikan bahwa yang bersangkutan sudah SILENT KEY -- harafiah berarti "sudah tidak dapat mengethuk (kunci kethuk) lagi" -- atau sudah meninggal dunia]

Tingkat kecakapan akan menentukan privilege dan restriksi yang didapatkan yang bersangkutan sebagai seorang operator Radio Amatir, mis. : mode yang digunakan dalam berkomunikasi (CW/telegrafi, voice: AM/FM/SSB, dijimode dsb), daya pancar (transmitted Power), frekuensi/band untuk establishing QSO/ber-komunikasi (yang tentunya harus bersifat 2-way/dua arah: to send to or transmitting dan to receive information from the other side(s), seperti band 80m (frekuensi 3.500 – 3.900 MHz), 40m (7.000 – 7.200 MHz), 20m (14.000 - 14.350 MHz),15m (21.000 – 21.350 MHz), 2m (144 – 148 MHz) … dll.

[untuk rincian deskripi tentang Callsign, privilege/restriksi yang valid (current) pada saat penulisan ini silah baca Peraturan Menteri KOMINFO nr. 33/PER/M.KOMINFO/08/2009 atau yang lazim juga disebut sebagai PERMEN 33/2009]

BTW, CB-ers juga punya Callsign (JZ + angka + individual suffix), tetapi karena mereka bisa mendapatkan callsign tersebut TANPA harus mengikuti ujian (cukup dengan mendaftar/registrasi di sekretariat RAPI setempat) maka Prefix tersebut tidak berkaitan dengan atau menunjukkan tingkat kecakapan apapun. Regulasi seperti ini (CB-ers tidak harus mengikuti uijian) berlaku di semua Negara di mana kegiatan CB atau komunikasi antar penduduk di bolehkan menurut peraturan/perundangan yang berlaku di Negara tersebut.

[di Amerika dan Australia –- sebelum datangnya era penggunaan telepon seluler --- CB ini pernah sangat populer di antara para truckers yang melayani route-route high-ways antar negara bagian (inter states) ataupun coast-to-coast.

Di samping untuk killing time mengatasi kejenuhan dalam perjalanan berjam-jam atau bahkan berhari-hari itu, CB mereka perlukan untuk koordinasi antar mereka, untuk menghubungi kantor pusat maupun kantor di kota tujuan, untuk mendapatkan back up lojistik (pompa bensin, motel di pinggir jalan, rest areas … zaman itu selalu dilengkapi perangkat CB). Juga untuk saling mengingatkan kalau lagi ada razia petugas Highway Patrol, atau adanya pos-pos speed radar (!!!) …
(kalau anda sempat atau pernah nonton film “Smokey and the Bears” anda bisa saksikan kucing-kucingan antara para truckers dengan petugas polisi itu. Saya sudah lupa pastinya yang mana yang smokey dan yang mana yang beruang, but my gut’s feeling kok bilang Smokey adalah julukan bagi para sopir, and the other way around sebutan Bears apllies to the Police ;-)

Catatan:
Zaman pra ORARI, Prefix yang dipakai di Indonesia (sejak masih zaman Hindia Belanda doeloe) adalah PK, menuruti "jatah" Prefix PAA – PZZ yang “pada zaman-nya” berlaku bagi negeri Belanda dan koloninya (seperti Hindia Belanda (INA) dapat “jatah” huruf-huruf antara PKA-POZ, Netherlands Antilles PJA-PJZ, Brasil PPA – PYZ, Suriname PZA – PZZ, dll), yang untuk era sekarang “rawan” untuk jadi “rancu”/confusing dengan prefix yang sama yang dipakai dinas-dinas lain (misalnya ada callsign PKI yang dipakai oleh/diassign untuk stasiun pantai (coastal station, di bawah DitPerLa – Direktorat Jenderal Perhubungan Laut) di Jakarta (dan juga untuk kapal-kapal laut berbendera Indonesia, seperti armada PELNI), callsign PKGxxx dipakai oleh pesawat-pesawat GARUDA, PKMxxx oleh MNA/Merpati Nusantara Airlines (dan dengan huruf ke-3 yang berbeda untuk airlines lain yang berbendera Indonesia, pengaturannya di bawah Dinas PenSip/Penerbangan Sipil/Ditjen
Perhubungan Udara), PK2SC untuk Radio Elshinta (CMIIW, tapi “model” susunan huruf + angka seperti itu berlaku di lingkungan Radio Siaran/broadcasters)..
Sekitar tahun 50an, prefix JZ (seperti yang sekilas disebut di atas, yang sekarang dipakai rekans CBers) juga PERNAH dipakai oleh amatir radio INDONESIA, khususnya oleh amatir radio asing (foreigners) yang mendapat izin untuk ber-operasi di sini (mis.: Harry Diemondt JZØODA (ex PK1AD/PK4IM, yang mengindikasikan juga bahwa sebelumnya yang bersangkutan pernah tinggal dan beroperasi dari Jawa Barat dan Sumatra Selatan), Henry J Schrier JZØKF ex PAØGF, yang menunjukkan yang bersangkutan “asli”nya adalah amatir radio dari Negeri Belanda).
Angka Ø (zero) pada callsign JZØ tersebut menunjukkan bahwa kedua amatir “bulé” tersebut mengudara dari wilayah Papua, yang di zaman itu masih bernama "Netherlands Nieuw Guinea" (sekarang angka Ø mengindikasikan call area DKI Jakarta).
BTW, di era modern --- tahun 80-90an --- callsign PAØAGF disandang oleh Mr. Aucke F Gerbens (SK), "boss" saya waktu masih kerja di lingkungan Philips Indonesia (baca juga halaman C'est moi to know more about me, my hobby, and my profession)

Catatan:
Kalau kebetulan berada di bandara, sebelum naik ke pesawat (atau dari jendela pesawat, sebelum take off) silah amati pesawat terbang yang berjejer di apron; di sayap dan ekor masing-masing pesawat terpampang jelas call sign PKxxx bagi pesawat berbendera Indonesia, VKxxx bagi pesawat berbendera Australia (mis.: QANTAS), 9V untuk pesawat SIA/Singapore Air Lines, HSxxx untuk Thai Airlines, Nxxx bagi pesawat berbendera Amerika semisal Northwest Airlines, dan sebagainya ...

2. Tentang "breakers" legal dan illegal:
Dari blah-blah-blah di butir 1 di atas, tentunya bisa ditarik benang merah untuk membedakan mana breaker yang legal (= mereka yang ber-callsign), dan mana yang illegal (= those NON

callsigners, tapi bekerja di frekuensi atau band yang sebenarnya assigned to those callsigners – yang tentunya tidak terbatas para Amatir Radio saja).
Di tahun '67-'68 yang disebut-sebut sebagai era “kebangkitan” radio amatir di INA, nyaris SEMUA pengguna frekuensi ini menyebut diri (dan kelompoknya) sebagai radio amatir atau radio eksperimen (disingkat Radam atau Radex/Radeks .. seperti di "kampung" saya doeloe ada Radam CAM2/Corps Angkatan Muda Muhammadiyah, dan REXOB, Radio Eksperimen Orde Baru (sic.), namun pelan-pelan kemudian terjadi pemisahan antara mereka yang mengarah ke penggunaan radio sebagai sarana komunikasi 2-arah (disebut juga amatir QSO, atau amatir koling-kolingan – karena radionya dipakai untuk saling “Call” atau “memanggil”); dan mereka yang lebih mengarah ke penggunaan radio sebagai sarana siaran (broadcast), thus yang sifatnya one-way.
Pada awalnya “pemisahan” ini tidak terlalu tegas dan kasat mata, karena banyak (atau bisa dibilang hampir semua) yang menjalani peran ganda: siang hari radionya dipakai untuk siaran (dengan “pola” yang nyaris sama di seluruh negeri: puter lagu, kirim-kiriman salam sayang, atau yang lebih “smart” lantas menjual “kupon” stensilan - - jaman itu belum ada mesin fotokopi - - untuk acara “anda meminta kami memutar” atau sejenisnya); kemudian di malam hari, lewat jam 23.00 keatas “siaran” ditutup dan radionya kemudian dipakai untuk koling-kolingan, yang pada awalnya bertolak dari niatan untuk sekedar mengecek sampai seberapa jauh jangkauan pancarannya.
Banyak yang sebenarnya “tanpa sengaja”, atau tanpa tahu KENAPA*) lantas menggunakan frekwensi yang secara tehnis memang memungkinkan komunikasi jarak jauh di MALAM HARI, karenanya pada era itu amatir koling-kolingan ini lebih identik dengan mata merah dan tampang lusuh karena kebiasaan “ngalong”, bergadang sampai pagi di depan pemancar (plus tubuh kerempeng karena terdadah/exposed ke pancaran RF dari pemancar tabung (valve/tube) ber-voltage tinggi (> 600 VDC) yang umumnya tidak diberikan pelindung/shielding yang memadai secara tehnis).
Sejalan dengan upaya pembinaan dari pihak otoritas (lihat paragraph berikut tentang “sweeping”) dan “kesadaran” dari para amatir sendiri, pelan-pelan “pemisahan” mulai terlihat tegas: antara mereka yang bercallsign dan bekerja di band/frekuesi yang memang assigned untuk Radio Amatir*), dan para Radio Gelap (bahasa kerennya “clandestine radio”) yang bekerja di frekwensi, mode dan operating procedures yang “suka-suka dia” aja (misalnya dengan seharian muter lagu tanpa jeda, nyerocos “siaran” tanpa menyebutkan identitas dan lokasi, “mojok” atau kencan di udara .... serta berjenis ulah dan laku “lajak” lainnya ...)

*) sampai tahun 70an, di radio penerima “rumahan” – yang dipakai ortu atau kakek nenek kita ‘ndengerin misalnya Ketoprak Mataram dari RRI Nusantara II Yogyakarta, atau gending/tembang Cianjuran dari pesinden Upit Sarimanah dari RRI Bandung – terutama dari jenis pesawat radio “berkelas” dengan merk-merk Eropah seperti Philips, Erres, Grundig, Löwe dan sebagainya di papan gelombangnya tertulis (atau ditandai) dengan jelas “band assignment” tersebut, misalnya dengan tulisan: 80m Amateur Radio band … di samping tanda-tanda/markings untuk broadcast band, seperti 120m, 90m, 75m, 60m, 49m, 41m dan seterusnya. Pada era itu lazim juga pada papan gelombangnya diterakan pembagian antara band MW/medium wave dan SW/short wave, yang tergantung "merk" dan "kelas"nya bisa saja mencakup SW-1, SW-2 s/d SW-6)

Mengikuti perjalanan waktu (dan bertambah pinter-nya para ”oknum” yang memang demen ber’laku lajak” itu) peta (mapping) per-radio-an di tanah air justru makin ke sini makin bertambah KUSUT, seperti yang akan saya wedar [asal kata wedaran (Jw) = perut, isi perut, jadi ‘ngawedar = mengeluarkan isi perut (atau uneg-uneg), atau kurang lebih = curhat dalam bahasa gaul sekarang] di paragap berikut …

3. Tentang “sweeping”
Di manapun di muka bumi ini – terlebih di negeri-negeri “beradab” – “sweeping” atau “razzia” sebagai bagian atau bentuk dari upaya penegakan hukum (law enforcement) selalu bisa ditemui, walaupun “kadar” dari tindak lanjut yang mengikuti sweeping tersebut bisa berbeda seperti bumi dan langit antara di satu negeri/Negara dg negeri/Negara lain.
Di INA, pada zaman Orla, sweeping bisa dilakukan aparat KODIM setempat (ini sesuai dengan kondisi HANKAMNAS di tanah air pada waktu itu yang berada dalam status SOB/Staat van Oorlog en Beleg atau harafiah berarti “dalam keadaan perang dan pengepungan”) yang merazia dari pintu-ke-pintu untuk mencari para SWL/short wave listener **) – hobiist pendengar siaran radio di gelombang pendek, yang di zaman konfrontasi dengan Malaysia di era itu curi-curi ‘nguping (bener-bener kuping ditempelin speaker radio, supaya 'nggak kedengaran sampai keluar rumah) mendengar siaran dari Radio Malaysia (di gelombang 49 dan 41m), VOA/Voice of America (a.l. di gelombang 25m), BBC London (dengan banyak relay stations di kawasan “Timur Jauh” ini, sehingga bisa dengan mudah ditangkap di 60, 49, 41, 31 dan 25m) yang memang di”haram”kan oleh Pemerintah pada waktu itu (yang menganggap Malaysia adalah “negara boneka NEKOLIM/neo kolonialisme dan imperialisme”
bentukan Inggris dan Amerika). Di samping radio di sita, kalau lagi sial pemiliknya bisa-bisa dijatuhi hukuman kurungan, atau lebih sial lagi di”cap” mata-mata, dan hukumannya jadi masuk ranah hukum pidana “subversib”.

**) banyak amatir radio yang mengawali ke”gila”annya sama radio dengan menjadi SWL ini. Seperti disebut di atas, di pesawat radio zaman lawas papan (display) gelombangnya selalu ditandai/tercantum band (atau gelombang) untuk Amatir radio, yang "kebetulan" (bukan dalam konotasi “fortunately”, karena semua itu sebenarnya ada dasar hukumnya (RR/Radio Regulation yang diterbtkan oleh ITU/International Telecommunication Union, regulator global/mondial yang berpusat di Geneve, Switzerland) dengan pertimbangan plus perhitungan tehnis-nya) selalu berada dekat-dekat dengan band yang dijatahkan untuk radio siaran (broadcast), misalnya band amatir 80m dekat atau berjejeran dengan “riak gelombang” (begitu istilah yang dipakai para penyiar radio zaman itu) 75m (FYI dari jadoel ada stasiun RRI – ato NIROM pada zaman Hindia Belanda – dari Semarang, Soerabaia (ejaan era itu), Mataram, kemudian dari luar ada All India Radio, BBC ….), kemudian band amatir 40m berjejeran dengan gelombang 41m, band amatir 20m berada dekat gelombang 25m dan seterusnya).
Sejalan dengan curiosity, eagerness to know more dan naluri berburu (hunting) “stasiun BARU” -- sifat-sifat dasar para SWL yang sebenarnya juga dimiliki amatir radio -- tidak mustahil jemari yang muter tombol pencari gelombang membawanya 'nyasar ke salah satu band amatir yang disebut di atas, yang bagi mereka tentunya akan menarik sekali untuk mengamati bagaimana para amatir radio tersebut saling ber two-way communication (ketimbang radio siaran yang sifatnya one-way), saling mengirim QSL-cards (acknowledgement atas well established-nya sebuah QSO -- yang juga merupakan kebiasaan di lingkungan SWL).
Karena kesamaan “naluri” inilah banyak SWL yang semula hanya menjadi “pendengar pasip” lantas stepping forward dengan ikut UNAR dan bermetamorfosa menjadi amatir radio, dan karena sebelumnya sudah bertahun terbiasa (dari mendengar) dengan operating procedures yang baik, biasanya mereka kemudian menjadi amatir radio yang baik juga.
Di era kebangkitan Orde Baru dan kebangkitan radio non RRI dan non siaran, sweeping dilakukan oleh aparat gabungan (misalnya SKOGAR – tingkat Garnizun atau ke-wali kota-an, KMKB-DR/komando Militer Kota Besar Djakarta Raya, atoau gabungan aparat di bawah koordinasi HUBDAM setempat untuk kota-kota besar lainnya. Yang disasar adalah para radio gelap yang disebut di paragrap 2, dan sejalan dengan filosofi SECURITY APPROACH yang dianut fihak otoritas pada masa itu, sangsi (kalau tertangkap) juga cukup berat, minimal pemancar (dan peralatan studio lainnya) di sita, dan “operator”nya di-inepin di sel-sel tahanan

institusi militer tersebut (BUKAN di tahanan kepolisian atau kejaksaan seperti pada kasus-kasus pelanggaran di ranah sipil/civilian biasa).

Beruntung rekans yang pada masa itu tinggal di Bandung (dan Jawa Barat umumnya), aparat yg bergabung di bawah Komando Pertahanan Subversi Daerah di bawah pimpinan AKBP Tommy Fattah bersikap lebih luwes (ketimbang di daerah lain) dalam “mengawasi” kegiatan illegal ini. “Pemanggilan” terhadap para aktivist per-radio-an (baik yang 2-way maupun yang one-way) tersebut lebih bersifat ke upaya pembinaan, yang bermuara ke pembentukan “organisasi” PARB (Persatuan Amtir Radio Bandung) -- yang notabene akan memudahkan fungsi kontrol/pengawasan – yang akhirnya menjadi salah satu embrio bagi terbentuknya ORARI, organisasi amatir radio yang berskala nasional.

... banyak rekan amatir yang percaya hal tersebut tidak lepas dari arahan Jendral Polisi Hoegeng YBØBG, KAPOLRI pada saat itu, yang dikenal sebagai pribadi dan amatir radio yang humble, sedikit bicara tapi banyak bertindak nyata ...

Manakala situasi sudah “aman terkendali” (jargon yang saat itu populer di lingkungan otoritas), nama AKBP Tommy Fattah tersebut diabadikan dalam bentuk TOMMY FATTAH Memorial Station dengan callsign YB1ZA]
Pola yg sama berlaku juga di daerah-daerah lain (Jateng, Jatim, KalBar dll), di tempat-tempat mana fihak otoritas “kebetulan” berada ditangan pejabat yang mengerti dan/atau mau mengerti (apalagi kalau sampai appreciate) dinamika yang berlangsung di lingkungan per-radio-an itu. Di tempat-tempat seperti itu kemudian muncul dan terbentuk organisasi amatir radio seperti PARI (Persatuan Amatir Radio), PRAI (Persatuan Radio Amatir Indonesia), PRAJOGA (Persatuan Radio Amatir Jogjakarta) dan sebagainya.
Situasi “aman terkendali” seperti ini dimana-mana secara bertahap mendorong Pemerintah untuk mengalihkan fungsi kontrol dan pengawasan dari fihak militer ke fihak sipil, yang dalam hal ini berada dibawah Departemen Perhubungan (dan kemudian Dep. KOMINFO), dengan Ditjen POSTEL dan dinas terkait (seperti dulu ada Dinas Monitoring dan Pengendalian Spektrum Frekuensi,atau yang sekarang disebut SDPPI dengan BALMON/Balai Monitoring sebagai institusi pelaksananya)
Betapapun, di lapangan (atau dunia nyata, the real world) mengendornya pengawasan dan melunaknya sanksi yang diberikan atas pelanggaran di hampir semua lini kehidupan bernegara, membuat fenomena “kenapa harus legal -- dan bayar lebih – kalau do it illegal way toh bisa berjalan "aman-aman saja” kian hari kian merebak hampir di seantero kawasan negeri (!)
Law enforcement seolah jadi slogan kosong, yang membuat mereka “yang masih waras” dan menafikan “ora melu edan ora keduman” (kalau 'nggak ikut gila 'nggak kebagian) hanya bisa ‘ngelus dada (yang -- minjem istilah mbak Titut sendiri -- mostly “no longer perky” itu)
Di bidang radio dan penggunaan frekuensi, diberlakukannyanya berjenis peraturan yang dianggap “merepotkan” mendorong para “calon” pengguna frekuensi untuk mengambil jalan pintas: do it the illegal way, apalagi kemudian tumbuh dan berkembang paradigma baru: UUD, ujung-ujungnya duit ..

(sebut saja misalnya keharusan memiliki IAR bagi amatir radio; call sign RAPI yang toh bisa didapat dengan hanya mendaftar ke Sekretariat; stasiun broadcast non RRI -- lazim disebut radio siaran swasta niaga -- harus dikelola oleh Badan Hukum; birokrasi dalam pengurusan izin untuk memiliki dan menggunakan pemancar bagi pengguna komersial yang memerlukan komunikasi antara kantor Pusat yang biasanya berada di Jakarta dan daerah operasi yang tersebar di pulau-pulau yang berada di luar jangkauan sarana Telekom reguler (= jaringan telpon dr PERUMTEL).

Contoh kasus lain adalah mahal dan lamanya masa tunggu bagi pengadaan sambungan telepon di kota-kota besar -- bahkan di Jakarta sendiri -- , akhirnya mendorong calon pelangan telpon di Jakarta dan kota-kota besar lainnya untuk kemudian beralih menggunakan pesawat atau HT/handy talkie di band 2m.
Akibatnya bisa diduga, pemancar gelap muncul di mana-mana, di semua spektrum frekuensi (HF, VHF …), dengan dilatari berragam motivasi yang mendorong timbulnya keinginan atau kebutuhan untuk “mengudara”. a.l. karena iseng (biasanya dengan memutar lagu seperti di saat mulai tumbuhnya radio siaran seperti disebut di depan); frustasi karena tidak lulus sesudah beberapa kali ikut ujian (biasanya lantas jadi tukang nge-JAM/jammer, yang “menimpa” dan mengganggu pancaran stasiun-stasiun legal); “jealousy” (melihat rekan lain “bebas” berlaku lajak, kenapa aku tidak “boleh” melakukan hal yg sama ???); duit (misalnya seorang, atau sekelompok orang, atau bisa saja berbentuk perusahaan, yang menerima imbalan untuk setting up sistim komunikasi bagi perusahaan atau instansi tertentu, serta menyelenggarakan jasa perawatan dan perbaikan – maintenance and repair services – bagi sistim yg sudah dipasangnya).

BTW, betapa parah sikon pada waktu itu dapat diikuti dari beberapa "kisah nyata" beriku ini ....

Di awal 80an, saya mendapat masalah waktu memperkenalkan dan memperagakan teknoloji satellite navigation & positioning di kantor Janhidros (Jawatan Hidrografi dan Oceanografi) TNI/AL di jl Gunungsahari, dihadapan para pejabat Janhidros dan BAKOSURTANAL (Badan Koordinasi Survai dan Pemetaan Nasional). Masalahnya, perangkat MAGNAVOX MX-1502 yang jauh-jauh kami datangkan dr Torrance, CA jadi “budeg”, dan tidak bisa mendeteksi satelite pass yang lewat di angkasa di atas Jakarta (diperlukan minimal 3 lintasan satelit untuk computing posisi/lokasi kami saat itu). Selidik punya selidik, dengan Spektrum Analyzer bisa dideteksi bahwa udara Jakarta dari seputaran bunderan HI (jl Thamrin) sampai teluk Jakarta ternyata dipenuhi “luberan” pancaran pemancar-pemancar di band 2m (MESTINYA-nya sih bekerja di spektrum 144–148 MHz) yang seolah mengambang, menutupi dan mengeblok sinyal di frekuensi 150 Mhz yang datang dari satelit-satelit yang melintas diatas sana.

(kurang lebih seminggu sebelumnya, demo serupa berhasil dengan sempurna waktu kami adakan di sebuah hotel di Singapura, dengan antena yang di”glethakin” begitu aja di teras hotel).

Masih “urusan dalam negeri”, pada kurun waktu yg hampir sama, upaya beberapa rekans di beberapa bagian Jakarta – umumnya di Jakarta Barat dan Utara (tidak termasuk saya yang waktu itu tinggal di Jakarta Timur), untuk me-monitor dan memberikan laboran penerimaan sinyal yg dipancarkan roket-roket eksperimentil yang diluncurkan LAPAN dari Pamungpeuk juga gagal, karena sinyal tersebut tidak bisa “menembus” udara Jakarta yang sudah demikian crowded dengan spurious signals dari pemancar-pemancar “liar” tersebut.

Dan, yang menyangkut nama NKRI di percaturan publik telekom internasional adalah gangguan-gangguan (interference) yang ditimbulkan oleh sinyal yang dipancarkan oleh pemancar-pemancar liar tersebut kepada jaringan atau trafik telekomunikasi lintas batas atau internasional, misalnya pada kasus-kasus berikut:

1. di band VHF: repeater pd satelit-satelit OSCAR/orbitting satellite carrying amateur radio secara otomatis akan dimatikan setiap kali melintasi wilayah udara Indonesia, karena transmitter-nya akan terpicu oleh spurious signals dr daratan Indonesia untuk bekerja secara terus menerus (continuously ON) – yang dapat meng-degradasi-kan kinerjanya atau bahkan bisa rusak karena kepanasan, serta kehabisan “tenaga” karena suplai dari baterai tenaga surya (solar cells) yang kapasitasnya memang terbatas tidak cukup cepat utk

recovering power drain yang berlebihan akibat terus-terusan ON tsb.

2. di band HF: gangguan pada MARITIME DISTRESS FREQUENCY 2.8xx MHz (komunikasi emergency atau “marabahaya”) oleh pancaran-pancaran “liar” di frekuensi sekitar 3 MHz (gelombang 100m, karenanya operator yang bekerja di situ biasa disebut dengan sebutan “operator cepèkan” (cepèk = 100 dlm dialek Mandarin “pasar”).

(BTW, sebenarnya banyak di antara operator cepèkan ini adalah tehnisi yang handal, karena rata-rata yang bekerja disitu menggunakan homebrew radios (radio yang mereka bikin sendiri), yang secara tehnis banyak yang memang bagus kwalitasnya, hampir layak disebut sebagai work of art (kerja seni). Tapi itulah, sebagai seniman di bidangnya, kebanyakan mereka tidak mau repot dengan hal-hal “administratip” seperti urusan pendaftaran, ujian, batasan frekuensi, power output dan sebagainya, yang dianggap mengganggu “kebebasan” mereka)

Hal yang sama bisa juga terjadi pada kanal emergency yang lain di 8.2xx Mhz, atau pada frequency yang digunakan oleh ATC/air traffic controller untuk mengatur lalulintas pernerbangan (gangguan pada frekuensi ini lebih banyak disebabkan oleh pancaran harmonisa (harmonics) dan spurious dari pemancar yang bekerja di rentang frekuensi 4 – 6 MHz)

3. Hal-hal illegal akan tumbuh subur di habitat yang illegal pula: dimana-mana merebak illegal logging (pembalakan liar), illegal mining (misalnya penambangan pasir besi), illegal fishing (ini malah diperburuk dengan beroperasinya kapal-kapal nelayan asing yang mencuri ikan diperairan NKRI).
Illegal operation atau business di berbagai sektor tersebut memerlukan radio untuk menunjang operasi mereka: komunikasi antara kantor pusat (biasanya di Jakarta) dengan lapangan, koordinasi lojistik, koordinasi transaksional (misalnya proses delivery logs/kayu gelondongan hasil pembalakan liar, atau mineral hasil penambangan liar: pasir besi, bauxit, batubara …) kepada pembeli atau penadah yang dilakukan di tengah laut, atau diperairan perbatasan dengan negeri tetangga.
Di lapangan mereka menggunakan perangkat VHF (= rig dan HT 2m) atau ada juga beberapa yg menggunakan perangkat UHF di band 70cm, misalnya untuk komunikasi jarak dekat dan LOS/line of sight (= sepanjang garis pandang lurus tanpa penghalang/ obstacle antara pengguna), misalnya untuk komunikasi di lingkungan SATPAM/satuan pengamanan, atau petugas sekuriti perkantoran, sedangkan untuk komunikasi antar pulau, darat-ke-kapal atau sebaliknya, atau antar kapal mereka menggunakan alkom (alat komunikasi) yang bekerja di band HF.

Alkom yang “relatip murah” adalah alkom yang khusus diproduksi untuk penggunaan di amatir band; yang kebanyakan adalah buatan dan merk-merk dari Jepang, seperti Yaesu, Kenwood, ICOM, Alinco .. atau sedikit merk Amerika seperti TenTec, SGC, Elecraft. Kecuali merk Elecraft, semua produsen tersebut juga mengeluarkan versi (untuk penggunaan di lingkungan) komersial, bahkan versi militer.

Nah, tentunya bisa dibayangkan bagaimana semrawutnya spektrum frekuensi HF dan VHF yang dipenuhi pancaran “liar” dari pengguna “liar” seperti ini. Apalagi dalam kondisi propagasi dan jam-jam tertentu pancaran di band HF bisa diterima (dipantau) dan terdengar serta mengganggu di tempat yang ribuan KM jaraknya dari asal pancaran.
Atas gangguan tersebut protes resmi dalam berbagai bentuk sudah disampaikan ke fihak otoritas NKRI, juga dalam forum atau sidang badan-badan regulatory international (seperti ITU, atau forum NGO yang membidangi telekomunikasi seperti IARU, WARC dan sebagainya). Dari tahun ke tahun perwakilan NKRI harus bertebal (dan merah) muka menghadapi cecaran komplaint dari berbagai fihak yang merasa terganggu dan dirugikan.
Kembali ke dunia nyata, sweeping yg secara sporadis dilakukan sering terjadi malah “salah

sasaran": bisa terjadi malah setasiun amatir radio resmi yg digerebek, pemilik setasiun harus bisa menunjukkan IAR dan KTA-nya yg ASLI (bukan fotokopi), atau dicari-cari kesalahannya seperti harus bisa menunjukkan Invoice (bukti pembelian) dari pemancarnya, surat izin penggunaan pesawat (IPPRA), Logbook, papan nama …. dan sebagainya.
Juga terjadinya "tebang pilih" dalam pelaksanaan sweeping, di mana Petugas hanya berani melakukan sweeping di dan ke daerah-daerah pinggiran, kalau perlu sampai masuk ke gang-gang sempit (asal dari jauh kelihatan ada tiang antena yg terpancang).
Jarang atau bahkan tidak pernah terdengar sweeping dilakukan di rumah-rumah berpagar tinggi dan dijaga SATPAM, walaupun sudah menjadi rahasia umum SIAPA oknum di belakang illegal logging, illegal mining dan hal-hal lain yg serba illegal tersebut.
Yang lebih mengesalkan lagi adalah banyak kasus dimana sweeping tersebut adalah sekedar "kedok" dari ulah jahil Petugas, karena penyelesaian "damai" atau "di bawah meja" selalu ditawarkan pada kesempatan pertama (yup, peng-ejawantah-an tersamar (disguised manifestation) dari policy yang serba UUD, yg menjadikankan lemah dan mandulnya fungsi Law enforcement seperti disebut di depan)

4. Tentang Habibie's kids
Despite apa yg disampaikan OM Onno, quote … "Memang awal Internet di Indonesia di motori oleh kita-kita yang belajar di luar negeri karena beasiswa utangan World Bank & juga dari MENRISTEK waktu itu ... saya sendiri dapet-nya dari World Bank tapi jalur DIKNAS bukan RISTEK" … unquote,
Sebagai seorang amatir saya lebih setuju dengan yang mbak Titut bilang, quote …. "it was people of your kind, the hobbyists that had nothing to do with Indonesian government, who set the baseline for Internet establishment in Indonesia … unquote, karena doing things tanpa pamrih, tanpa mengharapkan imbalan materi dalam membawa diri dan bangsanya untuk selalu berada di depan dalam penguasaan iptek/ilmu pengetahuan dan teknoloji adalah sejalan dengan yang tersirat dalam kode etik ke 3 Amatir Radio:

The Radio Amateur is PROGRESSIVE … with knowledge abreast of science ….+)

+) Kode Etik Amatir Radio aslinya ditulis Paul M Segal W9EEA di tahun 1928, yang mencantumkan (disingkat):

The Radio Amateurr is: CONSIDERATE, LOYAL, PROGRESSIVE, FRIENDLY, BALANCED and PATRIOTIC .

Saya pribadi – walaupun bukan jebolan ITB – dengan melihat nama-nama yang "terlibat" dalam kisah "mulo bukané internet ing tanah Indonesia" (eh, mbak Titut ini berlatar belakang etnis Jawa dan berbahasa ibu (mother's tongue) Jawi bukan sih?), kok lebih cenderung untuk menyebut mereka ini sebagai the Iskandar Alisyahbana's kids.
Prof. Iskandar Alisyahbana adalah rektor ITB yang semasa menjabat selalu menekankan fungsi kampus dan civitas academica sebagai "the agent of CHANGE", tentunya salah satunya adalah perubahan dari kita -- sebagai bangsa – yang semula "bodo" (may I name it: scientifically retarded) menjadi "pinter" dan melek teknoloji.
Perubahan berupa lompatan ke depan di bidang telekomunikasi Indonesia yang semula berbasis teknoloji HF ke teknoloji satelit pada orde Giga Hertz adalah "baby" beliau, dan dimotori oleh anak-anak didik beliau. Teknoloji komunikasi data, internet dan sebagainya yang merupakan pengembangan atau a step forward di bidang teknoloji telekomunikasi tentunya tidak lepas dari sentuhan tangan-tangan dingin (atau tangan-tangan emas?) the Iskandar Alisyahbana's kids ini.

5. Tentang regulasi (Policy yang berubah, kontroversi tentang istilah Organisasi, wadah tunggal, dll)
Regulasi berupa Peraturan Pemerintah, Keputusan Menteri, Keputusan Dirjen dan sebagainya

dapat disimak di tulisan ORARI sebagai wadah tunggal, sedangkan perubahan kebijakan dalam pengaturan frekuensi (Band plan) yang paling current tercantum dalam PerMen 33/2009.
[kedua "dokumen" saya sertakan pada halaman Policy & Regulation pada laman ini]

[Bagi saya pribadi yang sudah lebih dari 40 thn menggeluti hobby ini, perubahan kebijakan yang cukup signifikan adalah diberikannya privilege (dengan batasan-batasan tertentu) bagi amatir tingkat SIAGA, yang melebihi privilege bagi amatir tingkat NOVICE di Amerika, yang selama ini bisa dbilang menjadi rujukan hampir semua institusi radio amatir di dunia (a.l. diperbolehkannya tingkat Siaga untuk bekerja dengan mode Voice di band 40m, yang semula merupakan privilege eksklusip bagi penyandang tingkat Penggalang dan Penegak, apalagi dengan Permen 33/2009 tersebut spektrum band 40m sudah diperlebar 100 KHz dari semula hanya dari 7.000 – 7.100 MHz menjadi dr 7.000 – 7.200 MHz]

6. I've learnt: menulis urutan sejarah itu susah ya?
Yessss, indeed …. saya yang ikut dalam Tim Penelusuran Sejarah ORARI Pusat merasakan itu juga (!)

Banyak masukan dari mereka yang memang bisa masuk kategori “pelaku sejarah” (malah dengan embel-embel: "jangan lupa dimasukin ya … !?"), tetapi banyak di antara masukan tersebut yang sifatnya subjective, sehingga lebih cocok untuk disebut sebagai sekedar memoar dari yang bersangkutan ketimbang sebagai sebuah dokumen sejarah.
Memoar lebih cocok diterbitkan di BLOG yang bersangkutan (nah, ini bisa jadi bahan disertasi anda juga kan ..!?), atau dijadikan bahan bagi penulisan otobiografi atau biografi seseorang, tapi TIDAK untuk menjadi bahan bagi penulisan sejarah.

[Kalau penyuntingnya pinter, di samping sebagai compilation of memoars, Blog juga bisa jadi KRONIK (chronicle), penyampaian secara runut dan urut kejadian (event, happening) yang berkaitan dengan kegiatan yang dilakukan si Blogger].

Nah, bisa dibayangkan bagaimana tebal (dan membosankan)–nya sebuah dokumen sejarah yang hanya sekedar merupakan hard copy atau printout dari Blog (atau Blogs) dari seorang atau sekelompok zo genaamd “pelaku sejarah” seperti itu kan … !?
Atau, sederhananya – siapapun akan cepet jadi bosan dan fed up kalau harus membaca potongan-potongan cerita yang saya tulis secara random di sepanjang imil ini, dimana berulang kali disebut SAYA, SAYA dan SAYA sebagai pelaku atau nara sumbernya .., kecuali kalau semua itu saya kumpulkan dalam satu memoar, atau kronikel, yang saya bagikan gratisan kepada mereka yang memang ‘nge-FAN abizzzzz sama saya ;-)

Penutup
For sure orèk- orèkan ini TIDAK akan bisa anda masukin di Bab I makalah anda, tapi paling 'nggak bisalah kiranya menjadi bahan rujukan, atau pun sekedar buat dibaca-baca di ruang tunggu kalau mau bertemu Philip Kitley, dosen pembimbing Anda.
Semoga juga ini bisa menjadikan anda tahu lebih dekat tentang berbagai aspek dari Radio Amatir (the hobby, kegiatannya) yang begitu beragam, Amatir Radio (the individuals), ORARI (the organization), dan sebagainya
Di samping untuk menambah wacana, barangkali bisa juga untuk bahan cerita ke anak cucu kalau misalnya ada yang nanya: "Apa aja sih yang buDe (atau eyang putri) Titut pelajari selama ing paran (di rantau, di ose-tra-lia*) ini) ???

[OOT, sekedar berbagi cerita: saya sendiri yang sebelumnya pernah merasa “tidak perlu tahu” terus jadi berbalik 180 degrees jadi “pingin & mau tahu” lirik lengkap dari lagu (keroncong) Yen in Tawang ono Lintang (“hit” dari penyanyi keroncong legendaris Waljinah) -- yang sampai sekarang (setelah tahu) suka jadi bikin mata basah dan dada nyeseg -- justru

karena suatu pagi di thn 1983 di coffee shop Hiruton Hoteru (Hotel Hilton) Tokyo (thus dalam sikon ing paranjuga) diputerin lagu itu, waktu suatu pagi saya jadi orang pertama yang masuk ke situ, janjian sama si Jepun yang jadi host selama saya berada di sana.
Di samping ada cook yang “orang Jawa”, the following morning saya baru “ngah” coffee shop itu namanya “Bengawan Solo” (pernah dipakai untuk menjamumaestro Gesang waktu beliau diundang komunitas fans beliau, yang kalau tidak salah belakangan juga sampai berhasil mengusahakan bahwa beliau mendapatkan royalty untuk lagu-lagunya yang cukup banyak penggemar di Jepun sono).
Belakangan lagi, setelah di suatu hari minggu saya minta diantar Yoshi-san (yg host saya itu) ke toko buku Dempa (one of leading publishers and book stores di Jepun) di Sinjuku untuk cari majalah CQ edisi terakhir (ini majalah komunitas radio amatir Jepun, diterbitkan oleh JARL/Japan Amateur Radio League), saya baru “ngah” kalo’ Yoshi-san ini walaupun BUKAN amatir radio, tapi pernah ikut dalam/sebagai Support Team pada beberapa kali ekspedisi petualang, pendaki gunung, penjelajah kutub Naomi Uemura JG1QFW, amatir radio Jepun yang sudah menaklukkan 4 puncak gunung tertinggi di bumi (Kilimanjaro di Tanzania, Aconcagua di Argentina, MontBlanc dan Matterhorn (dua-duanya di sisi yang berbeda dari peg. Alpen, Switzerland), mengarungi (rafting) S Amazone dan melintasi kutub Utara dan Selatan – yang semuanya dilakukannya dengan berjalan kaki (kecuali tentunya waktu rafting di S Amazone), seorang diri.

(saat makan siang di kantin perusahaan, Yoshi menunjukkan tangannya, yang beberapa jarinya terpaksa dipotong karena frost-bite, waktu suatu malam tanpa sadar tangan tersebut(tanpa gloves) terjulur keluar dari “pintu” kemahnya).

Setahun sesudah perkenalan dengan Yoshi-san tersebut, media dunia a.l. majalah TIME dan QST, majalah amatir terbitan ARRL/American Radio Relay League edisi May, 1984) memberitakan bahwa pada 13 Februari 1984 Naomi “menghilang” di kebekuan (dan kegelapan) udara di lereng Mt McKinley, gunung tertinggi di Kutub Utara (Arctic) …., jauh di utara Alaska sana.

Pada kontak (radio) terakhir dengan pilot pesawat yang membawa juru foto yang “menjejaki”nya, Naomi menyebutkan bahwa dia SUDAH dalam perjalanan turun dari puncak Mt McKinley (yang kali ini mau ditaklukkannya LAGI, seorang diri, di musim dingin pula, dg suhu rata-rata minus 46 deg. C), dan sedang berusaha untuk mencapai basecamp dalam 2 hari. Keesokan harinya pilot lain sempat melihatnya bergerak di ketinggian 5.100 mtr DPL – dan itulah terakhir kalinya Naomi terlihat (spotted) dalam keadaan hidup.
20 Febr cuaca sedikit membaik, dan dua orang pendaki berpengalaman diterjunkan pada ketinggian 4.300 mtr DPL untuk mengawali pencarian. Mereka tinggal di “atas” selama seminggu, dan menemukan gua yg sempat disinggahi Naomi. Mereka menemukan agenda (diary) Naomi di gua itu, dan mendapati bahwa Naomi sempat meninggalkan sebagian bawaannya untuk mengurangi beban dalam upaya pendakian ke puncak.
Tim rescuers lain yang menyusul kemudian menemukan barang-barang Naomi lainnya di ketinggian 5.200 mtr, tetapi tetap tidak ditemukan tanda-tanda kehidupan sang pendaki …
Sepotong bambu yang selalu diselipkan tegak di pundaknya (supaya bisa terlihat dari jauh, dan juga sebagai penanda kalau dia sampai jatuh kedalam lubang) di temukan di ketinggian 2.900 mtr, membuat orang berkesimpulan bahwa bambu tersebut sengaja ditinggalkan Naomi yang merasa sudah mencapai ketinggian “aman”, di mana kecil kemungkinan dia sampai terperosok ke rekahan es (crevasses) yang banyak ditemui di ketinggian yang lebih atas.
Betapapun, jasad Naomi tidak pernah diketemukan lagi ….

RIP (requiescat in pace), OM …. sebagai sesama amatir I’m very proud of you, sama bangganya (mongkok, bhs Jawa) kalau dengar nama OM Onno, OM Yono, atau yang satu generasi sebelumnya

Taufik Akbar, yang bersama Pratiwi – mikro biologist UI adalah calon-calon astronot INA yang sudah sempat di”asrama”kan di Mabes NASA sono, tapi gagal untuk sampai meng-orbit karena pada last minutes ada perubahan policy terkait situasi politik dalam negeri yang “tidak kondusip” pada waktu itu, atau barangkali suatu hari (in the very near future, I hope) nama YL Endah Triastuti disebut-sebut di percaturan “orang pinter” tingkat global (yang membuktikan bahwa tulisan Hill: "Indonesia does not have a "technology policy" TIDAK 100% benar adanya (!)
(seperti yang sudah dibuktikan oleh Prof Yohannes Suryo dengan "mencomot" bibit-bibit unggul dari seantero pelosok negeri (termasuk dari Papua, yang justru bisa dijadikan andalan), dan secara institutional oleh sejumlah sekolah, baik yang berakreditasi “International standard” maupun bukan, yang telah menghasilkan sejumlah siswa SLTP/SLTA yang bisa berprestasi dan meraih berbagai Awards bergengsi di berbagai kompetisi Internasional yang diselenggarakan di manca negara)

Amiiiiiin ….

*) syahdan, menurut kisah “yang empunya cerita”, kata Australia berasal dari kata ”ose tra lia” (harafiah: kamu tidak melihat), ungkapan kesal seorang pelaut Banda (hence sekarang ada yang namanya SAIL BANDA: lomba perahu layar international melayari perairan antara Darwin (di Northern Territory Australia) ke Kep. Banda di Maluku) yang berabad silam berdiri di tiang layar dan teriak-teriak ke rekannya di bawah, meneriakkan bahwa dia sayup-sayup melihat daratan di depan sono. Menjawab pertanyaan yang diteriakkan dari bawah: “Ahoiiiii, daratan apaaaaa ???”, dorang dengan kesal menjawab: “Aiiii, ose tra lia ……!!!”
Dan, sejak itu …. orang menamai “daratan yang jauh di laut Selatan” yang baru ditemukan tersebut sebagai Ose-tra-lia, yang (kata “yang empunya certa” lagi) oleh para bulé di salah kupingkan jadi Australia seperti yang sehari-hari kita dengar sekarang ini (percaya aja deh …. !!!)

EOM
(di dunia radio, berarti “end of message”)

Ya udah lupa om, Award Managernya mungkin punya rekordnya/catatan arsipnya.
Kalau dulu kurang menarik, mirip special QSL Card...

OK om ndut, thanks sarannya.
Siapa tahu Om UUn juga mau claim lagi.
Atau temen2 yang lain.

Om Hendra :
Menurut Kep-065/OP/KU/2009 , untuk penggalang di 14MHz adalah di 14.000 sd 14.150 :
     CW : 14.000 sd 14.150
     DATA: 14.101 sd 14.112
     SSB : 14.112 sd 14.150
kalau rame atau tidaknya , beta tidak tau....

Salam,
Daryono YD1CWZ

Dear teman2
Kami baru saja menerima masukkan dari rekan kita Walt Smith, K1QS, yg meminta kepada kita, YB stations dalam menghadapi pile up EU stations, mohon di sela-selanya, tetap memberikan kesempatan kepada stations Outside EU utk bisa memanggil.

Jadi misalnya EU Wall sdh sangat tebal, kita bs meminta mereka utk stand by bbrp menit. (EU Pse stand by for 2 minutes, any stations outside EU?)

Kira2 demikian masukkannya, dan terima kasih atensinya, happy DX-ing dan keep sharing for any DX-info.

Dani
YB2TJV

Walt Smith, K1QS wrote:
It would be nice if you would instruct YB Hams to listen for other areas when they have EU-pile up. I got so tired wasting my breath calling when they only listen for very loud stations.
Oh and I have 1400 watts to a 4 elemen monoband yagi.

73, Walt, K1QS

Om Hendra :
Menurut Kep-065/OP/KU/2009 , untuk penggalang di 14MHz adalah di 14.000 sd 14.150 :
     CW : 14.000 sd 14.150
     DATA: 14.101 sd 14.112
     SSB : 14.112 sd 14.150
kalau rame atau tidaknya , beta tidak tau....

Dulu saya pernah baca, Bandplan mode SSB di 20m di mulai dari Frek: 14.135 Mhz sampai 14.350 Mhz...

Khusus untuk Yangki Charlie hanya boleh memanggil / DX ing di frek 14.135 - 14.150 Mhz...

Koreksi jika saya salah... CMIIW....

Wajar sebuah kekawatiran, dari YB-land biasanya mengarahkan antena ke UE, sekalian ke AF, AS long path ke NA dan SA, apa lagi dalam waktu dekat menghadapi http://www.oceaniadxcontest.com/ tentu mereka berharap tetap bisa mendapat stasiun dari YB-land yang makin banyak DX-ers nya.
selamat di pile-up

Tnx de YB1LZ

Ini sering sekali terjadi, saya mendengar YB stn dengan bagus signalnya
biasanya di 20M, dan running EU pileups, tapi so far
kalau saya panggil di sela2 selalu terdengar karena saya selipi bhs Indo
spt selamat malam or kalau saya tahu op nya saya sebut namanya,

Satu lagi untuk YC kalau memang betul boleh di 20M tapi dibawah 150 or even
YB yang kadang2 mengudara di ssb antara 14.100-150
bisa split untuk NA dengan listening di atas 150. Kadang 2 ada nih spot
satu dua tapi biasanya digital mode yg baru tuh di 14.100-110

Steve, W2FB, always looking for QSO with YB land--- Hi..Hi..

Hallo Pak Dani,

Aku kenal dgn walt juga, bahkan bbrp kali qso dgn dia,
Ya betul, aku sdh pake cara gitu klo sdh di pile-up EU, kadang disela sela aku juga bilang opportunity outside EU, kadang lgsg NA/SA,
Tp ya namanya EU (zoo ?) Kebanyakan dari UA/UR-land ya bandel

Good of ur sharing,

Wah this is news to me,
kalau YC memang boleh SSB di 20M, ayo dong YC pada muncul,
kita bisa split ya kalian mancar di 14.135-150 pilih freq kosong dan pilih
freq untuk listen up for USA stn,
kalau EU dan Canada boleh sih SSB di bawah 150, but not USA.
Ayo, kapan termasuk DQT ya, ditunggu lho.

Wah this is news to me,
kalau YC memang boleh SSB di 20M, ayo dong YC pada muncul,
kita bisa split ya kalian mancar di 14.135-150 pilih freq kosong dan pilih freq untuk listen up for USA stn,
kalau EU dan Canada boleh sih SSB di bawah 150, but not USA.
Ayo, kapan termasuk DQT ya, ditunggu lho.

Steve, W2FB

3695. YC QRV 20M

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-09-11 01:06:59 UTC
From: Djoko Marjono Susilo

Dear teman-teman,

Melalui KEPUTUSAN KETUA UMUM ORGANISASI AMATIR RADIO INDONESIA
Nomor : KEP-065/OP/KU/2009, TENTANG: PEMBAGIAN DAN PENGGUNAAN SEGMEN BAND FREKUENSI AMATIR RADIO
memungkinkan Penggalang untuk bekerja di 20m band

20 Meter
14.000 - 14.350 MHz CW
14.070 - 14.099 MHz Data
14.100 MHz International Beacon Frequency Note C
14.101 - 14.112 MHz Data
14.112 - 14.350 MHz SSB
14.230 - 14.235 MHz SSTV
14.300 MHz Center of Activity for Emergency Note E

Band ini untuk tingkat Penggalang dan Penegak
Khusus untuk tingkat Penggalang hanya dibenarkan menggunakan segmen 14.000 – 14.150 MHz

Band 20meter bagi dxer adalah jalan raya untuk dxing.

Bagi penggalang alokasi tersebut kelihatannya sempit sekali jika menggunakan mode SSB, dan ada beberapa negara yang tidak memperbolehkan untuk bekerja dengan mode SSB pada frequency tersebut.

tetapi jangan kuatir kita dapat mensiasati dengan dengan bekerja split, dengan QRV di alokasi tersebut dan QSX di 14.300.
jadi waktu CQ kita dapat tambahkan, CQ DX, CQ DX, de YCXXX Listening up 14.300

semoga dengan demikian makin banyak YC dapat Contact dengan banyak DX Station.

73 Happy DXing

Djoko

PS: jika nanti di pile up station EU jangan lupa sering-sering kita kasih kesempatan Outside EU

iya ya Steve,

YC bisa siasati split ya, ide yg cerdik.
Klo aku mancar YC2LSR boleh ga ya? Hehehehehehh
Klo up grade pasti ga boleh, kalo down grade? , heheheh ...
Pasti jadi new entity nih,

Seno Laser

Good idea OM Joko..

Semoga teman penggalang akan lebih giat ber DX di 20M SSB dgn cara split utk ke NA

Dan utk yang baru mau coba jangan ragu utk bertanya, dgn sukarela kami siap membantu berbagi pengalaman.

OM Djoko & OM Imam,
Terima kasih, itulah salahsatu alasan saya bergabung dg YBDXC.
Dapat pengetahuan, pengalaman, share dari member lainnya.
Minggu depan insya Allah coba bikin antenna, karna sekarang masih di kaki gunung Rinjani.

73 es tnx

Good idea OM Joko..

Semoga teman penggalang akan lebih giat ber DX di 20M SSB dgn cara split utk ke NA

Dan utk yang baru mau coba jangan ragu utk bertanya, dgn sukarela kami siap membantu berbagi pengalaman.

Subject: [YBDXC_News] YC QRV 20M

Dear teman-teman,

Melalui KEPUTUSAN KETUA UMUM ORGANISASI AMATIR RADIO INDONESIA
Nomor : KEP-065/OP/KU/2009, TENTANG: PEMBAGIAN DAN PENGGUNAAN SEGMEN BAND FREKUENSI AMATIR RADIO
memungkinkan Penggalang untuk bekerja di 20m band

20 Meter
14.000 - 14.350 MHz CW
14.070 - 14.099 MHz Data
14.100 MHz International Beacon Frequency Note C

14.101 - 14.112 MHz Data
14.112 - 14.350 MHz SSB
14.230 - 14.235 MHz SSTV
14.300 MHz Center of Activity for Emergency Note E

Band ini untuk tingkat Penggalang dan Penegak
Khusus untuk tingkat Penggalang hanya dibenarkan menggunakan segmen 14.000 – 14.150 MHz

Band 20meter bagi dxer adalah jalan raya untuk dxing.

Bagi penggalang alokasi tersebut kelihatannya sempit sekali jika menggunakan mode SSB, dan ada beberapa negara yang tidak memperbolehkan untuk bekerja dengan mode SSB pada frequency tersebut.

tetapi jangan kuatir kita dapat mensiasati dengan dengan bekerja split, dengan QRV di alokasi tersebut dan QSX di 14.300.
jadi waktu CQ kita dapat tambahkan, CQ DX, CQ DX, de YCXXX Listening up 14.300

semoga dengan demikian makin banyak YC dapat Contact dengan banyak DX Station.

73 Happy DXing

Djoko

PS: jika nanti di pile up station EU jangan lupa sering-sering kita kasih kesempatan Outside EU

Kalo bisa split nya sampe ke atas 14.225 (higher much better),lebih banyak dari USA yg bisa panggil ..soalnya itu batas bawah buat yg General class ....

Lower limit freq (SSB Mode) for W land:
14.150 - Extra
14.175 - Advance
14.225 - General

Info tambahan:
21.200 - Extra
21.225 - Advance
21.275 - General

Jangan terlalu dekat dgn lower limit freq. nya ... yg di W land akan kena tegur (tertulis teguran nya, bisa di suspend IAR nya nanti), 5kc or higher from the lower limit freq. is much better :)

Wow, ya itu splitnya lebar sekali memakan spectrum HF sampai 15Kc, nah ini ternyata sudah biasa
kalau kita perhatikan major dxpedition termasuk 7O6T dan HK0NA juga sering menggunakan 10-20kc
tidak hanya di SSB tapi juga kadang2 RTTY dari 14.080 listening up sampai di atas .95
Tidak ada peraturan jadi ya terserah operator nya, kalau operator yg skilled sebenarnya 5-10 sudah lebih dari cukup

OM Steve,
Sorry mau nimbrung & tanya juga.
Bila QSO dilaksanakan dengan split 15KHz, mungkin gak masalah karena range frekwensi antara kedua stasiun bisa digunakan orang lain tapi bila ada stasiun DX-pedition yang CQing dan listening 5-15kHz yg maksudnya menyebar yg pile up pada range itu - mungkin itu seperti memonopoli, karena sudah bisa dipastikan sampai dengan 15kHz di atas frekwensi kerjanya pasti padat.

Apakah ada peraturan ITU/IARU atau badan lainnya yg membatasi frekwensi utk penggunaan semacam itu, karena rasanya memang lebih mudah menyebar/spreading ratusan/ribuan yg pile up pada spectruk yang lebih lebar. Mungkin gak ada ya ?

OM Hendro, itu dia masalahnya tidak ada peraturan,
jadi bbrp MEGA DXpedition seenaknya saja (sebenarnya ini tergantung
kemampuan operator dalam menangani pileups) split dan
lebar sekali spektrum yg dipakai sampai kadang2 lebih dari 15Kc.
Ya pasti padat sekali disitu, sama seperti kalau lagi kontest, apalagi
CQWW, lha kalau kita tidak ikut kontes susah cari freq bersih,
karena itu untung ada WARC bands 12,17,30m yang tidak dipakai untuk kontes,
jadi selalu "bebas kontes"
73 dan semoga bisa segera mengudara dan kita bisa kontak
steve, w2fb

3710. http://www.ybdxc.net/2012/09/n1mm-permulaan.html

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-09-11 17:26:13 UTC
From: Yb land Dx club
Topic: 3710 Message: 3710

http://ina-dxer.blogspot.com/2009/12/di-sini-saya-mencoba-untuk-sharing.html
N1MM Permulaan.

Di sini saya mencoba untuk sharing mengenai N1MM software secara globalnyanya saja pada pengoperasian WINDOWS XP, yang mudah-mudahan dapat bermanfaat bagi rekan, dan semoga ilmu yang didapat bisa di amal, namun bila terjadi kekurang kiranya sudi rekan untuk memperbaikinya melalui email : ina.dxer@..., semoga bermanfaat bagi rekan-rekan yang ingin berkecimpung di radio amatir.

Dan yanng perlu diketahui bahwa program ini bukan merupakan program untuk logbook jadi tidak bisa melakukan pencetakkan qslcard atau pengecekan qslcard yang sudah dikirim/ diterima karena itu ini bukan program harian, Aplikasi program ini digunakan untuk yang biasa melakukan kontest sebagai log dalam penggunaan kontest seperti WPX, WW Contest, CQDX Contest dll.

Aplikasi program ini digunakan untuk pelaksanaan kontest, dimana para perserta diwajibkan mengirimkan hasil dari kontest dengan cara konvert file hasil dari kontest yang dibutukan secara otomatis, kemudian file tersebut akan di kirim via e-mail dari pelaksanaan kontest yang ada di luar negeri.

Aplikasi program ini juga dapat digunakan untuk kontest dalam negeri namun kita mengerti trik dan cara tambahan dalam penggunaan dan pelaksanan yang baik, serta melakukan lebih dahulu, langkah-langkah ekperimen lainnya agar tidak terjadi error-coretions, disebabkan karena program ini digunakan untuk standar internasional kontest di dunia amatir radio.

Namun yang jelas program ini sangat menarik untuk digunakan bagi rekan-rekan di amatir radio yang akan menggunakan. Dengan program ini dapat melakukan penghandelan terhadap duplikasi dan score lainnya yang dapat menjadi lebih cepat untuk mengkoreksi untuk menang.

Good Luck for the contest.....

Tentang Software N1MM

Langkah Pertama.

Instalasi untuk pertama kali pada software N1MM untuk bagi yang belum pernah menggunakannya. Download dan instal file ini ber nama "N1MM-FullInstaller.exe" dan dapat di download padahttp://n1mm.hamdocs.com/tiki-index.php?page=Base+Install dan yang harus di instal adalah :

- N1MM Logger.
- Grayline program.
- Download help file
- Download Manual
- Desktop Shortcut
- Quick Launch Shortcut
- DLPORTIO port driver

Finish

Catatan :
Ini berlaku pengulangan instalasi bila terjadi pengembangan sampai beberapa versi jauh anda tidak melakukan perubahan/updating.

Langkah Ke-dua. Instalasi untuk meng-update.
Install Update "N1MM-newexeVx.xx.xx.exe"
Catatan : - harus selalu update sebelum melaksanakan contest.
- [http://n1mm.hamdocs.com/tiki-list_file_gallery.php?galleryId=8]

Update juga File CTY.dat versi terbaru.

Catatan :
Ini berlaku pengulangan instalasi setiap saat akan mengikuti kontest. namun bila tidak biasa terdapat error dalam tengah perjalanan.

Langkah ke-tiga.
Instalasi DLPORTIO
- http://n1mm.hamdocs.com/tiki-searchresults.php?highlight=DLPORTIO&where=pages&search=Go

Langkah Berikutnya.

Langkah ini adalah suatu pilihan bila di perlukan yaitu bila anda ingin mengunakan morse dengan automatic ptt ataupun menggunakan suara computer untuk melakukan dx mode ssb dengan automatic ptt. Anda harus membuat suatu rangkai yang menghubungkan antara computer dengan radio komunikasi anda (Interface PC ke Radio. Bagi awalnya anda harus mengerti dahulu sedikitnya tentang susunan pin pada RS-232 dan IRQ pada Comport PC anda , karena ini berkaitan dengan pengaturan software N1MM pada saat mengkonfigurasi Hardware yang terdapat di menu N1MM.

IRQ yang terkait pada komputer anda dapat dilihat pada waktu start-up komputer dengan menekan F-8 yang akan memasuki BIOS daripada komputer anda. Catatan IRQ code yang digunakan oleh sesuai comportnya(multi I/O).

Dibawah ini bentuk RS-232 dengan konektor DB-9 karna komputer yang baru sudah tidak lagi menggunakan RS-232 dengan konektor DB-25.

Pin yang perlu anda perhatikan adalah pin 4 Dan pin 7 Karena pin ini dapat bertukar fungsi dalam pengunaan antara pin untuk PTT dan pin CW bila menggunakan software N1MM.

Rangkaian di bawah ini adalah rangkaian schema sederhana yang dapat di modifikasi entah baik mana saja anda akan lakukan.

Sedangkan untuk rangkaian hubungan audio PC dan audio Radio, Harus ada penambahan potensio agar input dari radio dengan PCatau Output PC Speaker ke Mic Radio anda tidak terjadi overload dan harus ditambahkan juga transformer audio 600Ohm:600Ohm atau biasa dikenal 1:1(1 banding 1), keuntungan dapat bila terjadi sort atau overload transformer ini akan putus.

Beberapa Contoh Interface Lainnya

http://ina-dxer.blogspot.com/2009/12/setelah-lakukan-instalasi-untuk-pertama.html

N1MM Mengenal Konfigurasi.

Untuk Pertama Kali.

Setelah lakukan Instalasi untuk pertama kali berjalan lakukan pengisian data ini dengan benar karena nama, alamat dllnya akan mempengaruhi saat anda melakukan konversi data saat setelah selesai contest, seperti contoh di layar dibawah ini :

Data ini dapat di rubah melalui cara .....

Segala pilihan konfigurasi terdapat di layar entri seperti tampilan dibawah ini. Dan yang pertama-tama anda harus pilih adalah "Config"

LAYAR ENTRI

Langkah Berikutnya
Langkah untuk mengatur atau mengkonfigurasi kebutuhan pada saat pelaksanaan saat software ini berjalan setelah anda memilih config terdapat beberapa pilihan antara lain :

KONFIGURASI FILE

KONFIGURASI FUNGSI TOMBOL

KONFIGURASI WINKEY

KONFIGURASI AUDIO
Konfigurasi mempengaruhi terhadap peralatan sound card apa yang kita pergunakan terhadap input dan output dari suatu audio, penerimaan dalam bentuk/mode CW atau RTTY atau pengiriman audiu RTTY atau PHONE(SSB) saat transmiting.

KONFIGURASI HARDWARE
Konfigurasi ini mengatur cara kerja port I/O (input/output) yang kita inginkan, atau lebih dikenal dengan port RS-232 dengan konektor DB, namun konektor DB-25 sudah tidak terdapat lagi pada komputer yang baru, komputer yang baru hanya terdapat DB-9. Ini memungkinkan bila dibutukan tambahan port pada komputer dapat menggunakan card slot, tapi maximal 4 port perhatikan IRQnya agar tidak bertabrakan komunikasi dengan port lainnya. Anda juga bisa menambahkan dengan menggunakan USB sebagai port tambahan dengan menggunakan interface USB TO DB-9(RS-232). Penambhan port ini biasa bermanfaat bila menggunakan lebih dari 1 radio atau interface selector antena atau rotator controler dengan softwarenya.

Bila "Set" di klik akan mucul layar dibawah ini :

Untuk mengisinya sesuiakan DTR dan RTS dengan pin yang set pada RS-232, CW/PTT Port Addr sesuai dengan konfigurasi port anda dengan PCnya. Seperti pada contoh gambar port addr diset 3E8 yang artinya 3E8 alamat IRQ ini dikenal oleh komputer anda adalah port yang ke 3.

KONFIGURASI LAINNYA

KONFIGURASI MODE CONTROL

KONFIGURASI DIGITAL MODE
Untuk bentuk digital anda harus mengkonfigurasi bentuk di bawah ini, pilihan MMTTY mode dalam pilihan AFSK dikarenakan anda menggunakan voice digital untuk CW, RTTY dan lainnya karena memasukan suara antara radio ke souncard atau sebaliknya. Bila anda menggunakan RTTY jangan lupa mendownload MMTTY.EXE dan letakan pada tempatnya seperti lihat kolom paling bawah.

KONFIGURASI ANTENA
Konfigurasi ini dapat melakukan seletor antena yang terkoneksi dengan port interface termasuk dengan softwarenya.

http://ina-dxer.blogspot.com/2009/12/layar-entri.html
N1MM Info Pengoperasian

Click Jalankan N1MM

Setelah mengatur configurasi anda, kemudian sebaiknya jangan langsung running, keluar lebih dahulu artikata me-restart kembali untuk masuk ke aplikasi ini. Setelag running atur posisi layar agar mudah mengoperasikannya pada saat kontest. Seperti tampak contoh tampilan di bawah ini.

bila anda memliki koneksi fasilitas internet memunculkan tampilan layar untuk dx-spot seperti pada gambar atas pojok kiri dan kanan atau tampilan seperti dibawah ini dengan cara menyiapkan fasilitas telnet sebelumnya.

Setelah ini menyiapkan semua pada tampilan pada layar, langkah yang harus disiapkan adalah set database, set kontest yang diinginkan untuk diikuti.

Sebelum melakukan contest yakinkan dan pastikan download update dan fasilitas update sudah terinstal semua. Bila belum melakukan download update jangan dilanjutkan untuk pelaksanaan kontest.

Catatan: Pastikan untuk selalu memuat paling terbaru (dan benar) paling baru CTY.DAT sebelum memasuki kontes. Download file terbaru negara dari Internet menggunakan 'Download terbaru negara file (wl_cty.dat) (Internet) 'di menu Tools DAN impor ke arusdatabase menggunakan 'Import country list from downloaded file'.
Log umum adalah kontes: DX. Untuk melakukan keduanya CW dan SSB dalam 'kontes' ini memilih modus Campuran. Memilih CW SSB atau hanya akan memungkinkan modus yang dipilih.

Kemudian anda perlu memahami sedikit tentang bagaimana N1MM Logger daftar QSO. Logger daftar QSO dalam bentuk database Access 2000. Beberapa contest dapat disimpan dalam database yang sama. Dalam database ini informasi contest disimpan dalam dua tabel. Tabel pertama untuk contest, dan satu lagi table untuk informasi contest ditampilkan di bagian Log Spesifikasi Lomba. Dalam tabel kedua tanggal mulai untuk kontes disimpan.

Sebelum awalnya anda melakukan perubahanan terhadap databasecopy-kan lebih file : ham.mdb, tempham.mdb, dan master.dtamenjadi zz-ham.mdb, zz-tempham.mdb, dan zz-master.dta, bila anda tidak melakukannya akan muncul error yang menyatakan file sudah ada. Barulah anda lakukan perubahan data tersebut pahami dahulu keterangan dibawah ini.

NEW DATABASE atau NEW DATABASE
• ☐ New Database

Untuk membuat log database yang baru. Mengubah nama yang diusulkan (new.mdb) menjadi berarti nama untuk penggunaan atau isi dari database baru. Contojh misalkan untuk kontes luar negeri anda berikan nama kontesdx.mdb atau sebaliknya kontesdlm.mdb. untuk kontes dalam negeri. Mulai sekarang database ini akan dibuka secara default saat startup program. Gunakan Open Database untuk memilih Database yang akan menjadi database default untuk

membuka. Banyak kontes dapat disimpan dalam satu database. Selalu gunakan database terpisah untuk menguji versi baru dari program dan membuat backup secara teratur dari direktori logger N1MM dengan seluruh isinya tetapi setidaknya file database (*. mdb) dengan 'real' kontes QSO's.Begitu memilih "New Database" anda harus mengisi nama data base tersebut, seperti tampilan layar di bawah ini :

• ☐ Open Database.
Mengunakan database yang ada untuk mengunakan log dari database yang ada. Sebuah pilihan bisa dibuat dari database sudah dibuat. Banyak kontes dapat disimpan dalam satu database.

Peringatan: Semua informasi pengaturan seperti info stasiun, cluster telnet, fungsi dll informasi kunci adalah disimpan dalam database saat ini. Ketika membuat sebuah database baru informasi ini akan disalin ke yang baru. Perubahan selalu disimpan dalam database terbuka saat ini. Jadi, ketika membuka database semua informasi yang tersimpan lama harus diperiksa jika masih berlaku dan berubah dimana dibutuhkan. Hal ini dapat dilakukan sebagian otomatis dengan menggunakan fungsi ekspor dan impor untuk packet tombol telnet / dan tombol fungsi.

Setelah mengisikan nama database yang baru atau memilih data base yang ada makan akan dilanjutkan dengan muncul layar dibawah ini :

Anda dapa memilih DX untuk start awalnya.

Setelah anda memenuhi ketentuan diatas ini. Barulah dapat membuat log kontest yang baru atau menggunakan yang anda gunakan log yang sudah ada dengan menggunakan "NEW LOG IN DATA BASE" atau "OPEN LOG IN DATABASE".

• ☐ NEW LOG IN DATA BASE.

Ketika log kontes baru sama sekali, hal ini dapat dilakukan dengan cara memilih : “File” --> “New Log in database” (Pilih Baru).

NEW LOG IN DATA BASE (Pertama kali install)

Tanggal mulai ini tidak mempengaruhi contest apa yang terkait dengan contest itu. Jika log qso anda sementara contest tertentu adalah pilihnya, qso itu adalah berhubungan dengan yang sedang malaksanakan contest, tidak peduli apa tanggal qso atau contest. Tanggal kontes hanya digunakan untuk membantu anda mengidentifikasi contest tertentu.

• ☐ OPEN LOG IN DATABASE
Ketika memulai log kontes lama (yang sudah ada), hal ini dapat dilakukan dengan cara memilih “File” -- > “Open Log in database” (Menggunakkan kontes Log yang ada) '.

OPEN LOG IN DATABASE

Catatan Penting : Bila memilih log dari sebuah contest perhatikan “Sent Exchange”. Format ini pengisiannya sesuai dengan ketentuan format/Roll dari Contest yang ada. Bila rollnya adalah nomor urut maka Sent Exchange-nya start awal 001 maka nilai Sent Exchange-nya harus O“Nol”. Bila dipergunakan pertukaran lokal atau propinsi seperti yang terjadi didalam contest local ini harus disesuaikan dengan roll dari log database yang ada yang kira-kira mirip dengan format kontest lokal . Dan perlu diingat bahwa “Sent Exchange” jangan sekali-kali diberikan RS(T), contoh kontes lokal 59001(FiveNine Zero Zero One)

Log Type : Buatlah pilihan yang tepat untuk kontes

Start date : Tanggal hari pertama kontes

Previous Contest : Ini akat terisi tabel daftar contest yang pernah anda ikuti atau yang anda akan gunakansebagai ajuan dari contest yang akan diikuti.

Operator Category: Buat pilihan kondisi operator dalam pelaksanaan kontes.
SINGLE−OP, SINGLE−OP−ASSISTED.☐MULTI−ONE, MULTI−TWO, MULTI−MULTI, SCHOOL−CLUB, CHECKLOG, SINGLE−OP−PORTABLE, ROVER(station petualang), MULTI−UNLIMITED, MULTI−LIMITED

Band Category : Buat pilihan kondisi band yang di ikuti oleh operator kontes.
☐ALL,☐160M,☐80M,☐40M,☐20M,☐15M,☐10M,☐LIMITED

Power Category: Power yang digunakan
HIGH “>100Watt”, ☐LOW “<100watt”, style="font-weight: bold;">Mode Category : Kondisi bentuk kontes yang di ikuti : CW, SSB, RTTY,☐MIXED

Overlay Category : Make a choice for your situation.
Choices are: ☐N/A, ☐ROOKIE, ☐BAND−LIMITED, ☐TB−WIRES (tri−bander and wires), ☐OVER−50, ☐HQ -- Overlay kategori pengajuan log saat yang tepat. Dalam CQ-WPX, CW and, CQ−WPX−SSB, overlay kemungkinan kombinasi kategori dari ROOKIE, BAND−LIMITED, TB−WIRES. dalam STEW−PERRY,category overlay may be OVER−50. In IARU−HF, category, overlay may be HQ.

Tombol : Import Section List : Mengimpor bagian file kontes untuk kontes yang dipilih.
•☐Bagian daftar ini digunakan untuk menentukan MULTIPLIERS untuk kontes yang akan ditampilkan di window multipliers.
•☐Tombol ini hanya ditunjukkan saat kontes memiliki daftar pilihan.
•☐Nama milis akan ditampilkan saat menekan itu (menyimpan file) seperti IOTA.SEC
•☐Memperbarui file ini dapat dilakukan dengan editor teks seperti 'Notepad' saat ketika aturan telah berubah dan bagian yang perlu di update.

Tombol: Show Rules (Diperlukan Akses Internet): Membuka website dari sponsor kontes di Internet dimana aturannya dapat ditemukan.

Sent Exchange : Kontes-tergantung, kebanyakan angka, zona, negara dll
•☐Masukkan pertukaran tanpa RS (T)!.
•☐Hasilnya akan baris RST tambahan dalam file output (Cabrillo, output file generik)!.
•☐Program ini akan memberikan peringatan ketika RST (sama informasi) akan dimasukkan.
Peringatan: "Jangan menaruh signal report di Sent Exchange. Ini akan menyebabkan output cabrillo salah”.

Sent Exchange : INGAT, jangan masukkan laporan sinyal sebagai bagian dari pertukaran ini pada halaman setup.

Operators : Masukkan di sini semua callsigns dari operator. Mengklik tombol 'Update Ops dari Log 'akan lakukan ini untuk Anda (yang paling berguna setelah kontes)
Update Ops from Log - Mengklik tombol ini akan mentransfer semua operator dari kontes login di bagian operator.

Soapbox comments : Berikan komentar Anda pada kontes, hasil, propagasi dll, teks ini akan dihapus ketika anda memilih sebuah kontes baru.

Master.DTA Filename : Tampilkan file master.dta dipilih untuk kontes spesifik-spesifik (Bukan contoh kontes-spesifik). Misalnya semua pihak QSO akan menggunakan master.dta nama file yang sama. Default untuk master.dta.

Tombol Change memberikan kemungkinan untuk memilih file master.dta berbeda untuk tujuan kontes jenis ini.

Ok – Mengizin dialog ini disimpan isi.

Help – Menampilkan file bantuan pada jendela ini.

Cancel – Meninggalkan dialog ini tanpa disimpan isi.

KETERANGAN BERIKUTNYA

• ☐ Copy This Contest to another database - Salin Contest ini ke Database lain.
Salin informasi tombol dan QSO's dari kontes saat ini untuk database lain. Database harus ada, jika tidak, buatkan terlebih dahulu dengan 'New database'.

• ☐ Repairing a corrupted database (Internet)
Perbaikan database rusak (Internet) - Ini adalah link ke situs Web Microsoft tentang cara untuk memperbaiki database Access rusak.Sebuah program untuk memperbaiki dapat di-download di sana(Jetcomp.exe). File ini juga dapat men-download dari situs web N1MM bawah item menu 'File lainnya'.

* Import

A. (- import) File ham.mdb
(Jangan dihapus penggunaannya copy dengan nama lain)
file default database dimana setiap contest disimpan.
- Antennas ‘Code,Antenna,Band,Port,Offset,Bidirectional’
- BandModeFrequency’RadiNr,Mode,Frequency’
- Callhist
- Contest
- ContestInsance
- CTYDAT
- CtyPrefix
- DXLOG
- Lookup
- PacketSpots
- PacketSpotsTest
- Prefixes
- SectionsWorked
- Setting
- Station
- ValidCalls

Dialog Configurer atau Configurer seperti yang kita sebut sering memiliki banyak tab dengan pengaturan program mempengaruhi perilaku program. Hati-hati dalam mendirikan semua item pada tab yang berbeda. Semua pengaturan yang diingat oleh program dalam "logger.ini N1MM" *. Menjaga versi yang berbeda dari file ini adalah cara cepat untuk beralih antara konfigurasi program. Fungsi informasi kunci, cluster telnet, panggilan sejarah, dan informasi tentang negara yang disimpan dalam database ham.mdb dan setiap database baru Anda mungkin telah dibuat.

Jika Anda belum dicentang "Sembunyikan ekstensi untuk jenis file yang dikenal" pada Windows Explorer Pilihan, Anda tidak akan melihat "N1MM Logger.ini". Anda akan melihat "N1MM Logger" dengan Jenis "Konfigurasi Pengaturan". Jangan bingung oleh file "N1MM Logger.ini.init". Hal ini digunakan oleh program selama instalasi. Ini tidak boleh diubah

oleh pengguna program.

B. (- import) File hamapct.mdb
- PacketSpots
- PacketSpotsTest
- Prefixes
- SectionsWorked
- Setting
- Station
- ValidCalls

C. (- import) File hamtemp.mdb
- PacketSpots
- PacketSpotsTest
- Prefixes
- SectionsWorked
- Setting
- Station
- ValidCalls

D. (- import) File New.mdb
Buat data base baru, digunakan setelah dicopykan sebagai content dari contest dan di import CTY.DAT yang baru. (new.mdb jangan dirubah dan digunakan)
- Antennas ‘Code,Antenna,Band,Port,Offset,Bidirectional’
- BandModeFrequency’RadiNr,Mode,Frequency’
- Callhist
- Contest
- ContestInsance
- CTYDAT
- CtyPrefix
- DXLOG
- Lookup
- PacketSpots
- PacketSpotsTest
- Prefixes
- SectionsWorked
- Setting
- Station
- ValidCalls

E. (- import) Backup.
Semua database (*. mdb) file > Di file database semua kontes dengan QSO, tetapi juga fungsi tombol konten, informasi, dll Kompres Stasiun database untuk mendapatkan mereka kecil.
Simak Baca secara fonetik

http://ina-dxer.blogspot.com/2009/12/mengenal-layar-entry-sorri.html
N1MM Mengenal Layar Entry

MENGENAL LAYAR ENTRY

Layar entry di atas ini dipersiapkan untuk pengoperasian saat kita melakukan contest, namun di sini penjelasan untuk pengunaan hanya 1 tranceiver dan 1 operator. N1MM sofeware ini dapat berkerja dengan multi radio, dan software ini juga dapat dikoneksi dengan computer lain melalui sistim jaringan yang adadengan menggunakan IP-Address, namun fasilitas ini biasa dipergunakan untuk contest multiuser untuk yang sudah expert dengan menggunakan multiradio, dan dengan multiantena. Bisanya pilihan pada set-up awalnya adalah “MULTI TO MULTI” pada pengisian di “Operator Category”.

Di dalam system bar dibawah ini bila kita lihat angka 14200,00 CW Manual A ini berarti sedang aktif pada mode CW di frekwensi 14.200 Mhz pada layar entry A (Radio A).

Mode dapat diatur dengan mengetik CW, USB, LSB, SSB, RTTY, AM, FM, DIGI, PSK atau SSTV ke kolom callsign. Misalkan "SSB" Maka sistem bar di atas akan berubah menjadi SSB, misalkan juga kita menuliskan 21250 maka sistem bar di atas akan berubah menjadi 21250 yang berarti saat ini sedang bekerja di 21250, biasanya dalam aktifitas seperti ini dipergunakan untuk sprint contest. Sedang kolom zone ini bisa berubah saat memilih bentuk contest yang dipergunakan, kolom ini kaitannya dengan "Sent Exchange".

Ada dua tempat dimana callsign bisa ditampilkan dalam Window Entry, di bidang Panggilan dan pada frame-callsign.
•☐ Merah - Single Multiplier. Contoh: CQWW - QSO adalah baik zona atau negara multiplier (satu pengganda)
•☐ Hijau - ganda atau lebih baik Multiplier. Contoh: CQWW - QSO adalah zona dan pengganda negara (dua pengganda)
•☐ Blue - Kontak baru

Fitur kolom callsign/exchange
• Space Bar – memindahkan kursor ke posisi posisi terakhir kursor berada di sebelum meninggalkan bagian nama panggilan atau Exchange
•☐ Tab – Memindahkan cursor ke kolom berikutnya.
•☐ Shift−Tab − Memindahkan cursor ke kolom sebelumnya
•☐ Home − Memindahkan cursor ke kolom seawalnya
•☐ End − Memindahkan cursor ke kolom terakhir
• Question mark (?) – Mengirimkan?, Dan akan menyebabkan? disorot bila anda masuk kembali ke field/kolom. Misalnya N? MM akan mengirimkan apa yang diketik, tetapi secara otomatis sorot? sehingga Anda dapat menggantikannya. Sebuah ganda, seperti di DL? K? A akan? Menyorot semua teks di antara dan termasuk? tanda. Yang pertama kali memasuki keystroke akan mengganti semua tiga karakter.
•☐ Left/Right Arrow – Menindahkan cursor ke kiri atau ke kanan 1 kolom sesudah atau sebelumnya.
•☐ Backspace – Menghapus karater atau memberi space di kirinya.
•☐ Delete − Menghapus karate di kanannya.
• Shift−Home – akan menyoroti dari titik penyisipan kursor ke rumah (awal) dari textbox.
•☐ Shift−End − akan menyoroti dari titik penyisipan kursor ke akhir textbox.

•Shift−arrow − akan menyoroti lebih terang

Ada dua tempat dimana callsign bisa ditampilkan dalam Window Entry, di kolom callsign dan pada frame-callsign.
•☐ Merah - Single Multiplier. Contoh: CQWW - QSO adalah baik zona atau negara multiplier (satu pengganda)
•☐ Hijau - ganda atau lebih baik Multiplier. Contoh: CQWW - QSO adalah zona dan pengganda negara (dua pengganda)
•☐ Blue - Kontak baru.

Fitur Lainnya
Ketika callsign yang dimasukkan info tentang negara (bantalan, jarak dll) ditampilkan tepat di atas status bar.
•☐ Ketika callsign yang dimasukkan dan stasiun adalah dupe(duplikat) pindah ke frekuensi lain akan otomatis mengosongkan isian callsign (dan tempat stasiun pada bandmap itu)
•☐ Jika dalam callsign diketik ada tanda tanya (Anda tidak mendapatkan panggilan lengkap yang pertama waktu), kursor menyoroti?, sehingga ketika Anda mengetik, ia akan menggantinya. Ketika di Masukkan Mengirim Pesan (ESM) mode? di bidang Masukkan callsign tidak memindahkan fokus ke Efek lapangan tetapi menyoroti tanda tanya. Sebuah callsign dengan tanda tanya di dalamnya tidak dapat penggal!
•☐ Mengklik pada panel Exchange akan memiliki efek yang sama seperti menekan Space saat kursor adalah di dalam kolom callsign.
•☐ Ketika kedua bandmaps frekuensi tertutup dan mode yang ditampilkan pada judul bar sebelum nama kontes.
•☐ Ketika tuning band dan sebuah stasiun di bandmap yang berada dalam jangkauan tuning, panggilan ini akan ditempatkan pada Window Entry di kolom callsign. Ketika kolom callsign kosong, memberi ruang akan meng-copy Window Entry kolom callsign ke kolom callsign.Juga klik pada callsign dalam rangka callsign akan menempatkan callsign ini ke kolom callsign, menggantikan sesuatu yang sebelumnya ada. Jarak tuning dapat diatur dalam configurer (tab Lain).
•☐ Atur Frekuensi di lakukan di kolom callsign - Frekuensi dari VFO (A) layar entry A dapat ditetapkan oleh masuknya frekuensi atau offset ke kolom callsign. Desimal poin dan koma adalah diperbolehkan dalam (split) frekuensi pada panel callsign. Menempatkan / di depan frekuensi atau offset akan menetapkan VFO kedua (B). Juga frekuensi Split dapat diatur di sini. Dan ini memliki tehnik mendalam yang harus dipelajari lagi, lihat bab Dasar Fungsi untuk perubahan frekuensi dan contoh split frekuensi.

•☐ Wipe = Alt+W − Menghapus informasi tentang kontak saat ini (sama dengan Ctrl + W).
•☐ Log It = Enter − Menulis kontak ini ke database. Dinonaktifkan bila dalam modus reedit.
•☐ Edit – Merubah tambahan informasi pada station yang dihubungi.
• ☐Mark = Alt+M –Tandai ini frekuensi dalam sebagai Bandmap yangdigunakan. Yakni Anda tidak ingin mengambil waktu untuk memasuki panggilan dari stasiun yang menggunakan frekuensi ini.
•☐ Store = Alt+O – Menyimpan kontak station dalam Bandmap mana akan ditampilkan dalam huruf tebal, panggilan ini juga akan ditempatkan pada frame callsign.
•☐ Spot it = Alt+P − Spot kontak pada sekarang ini packet / Telnet terkoneksi
•☐ Buck − Tampilkan informasi tentang panggilan saat menggunakan database callsign Buckmaster.
Catatan:
hamcal32.dll harus dalam start-up dan database callsign juga harus diatur dengan benar di File - Tab dari Configurer. Jika hamcall32.dll tidak ditemukan akan digunakan www.qrz.com untuk menemukan panggilan.

• ☐ Esc - Menghentikan pengirim CW atau file wav yang sedang berjalan. Juga menghentikan pemutaran rekaman kontak.
•☐ F1 s/d F12 - Diatur sesuai seting yang diinginkan, pengaturannya dapat dilakukan dengan cara - Klik kanan mouse pada tombol untuk mengubah label atau perintah (masuk ke menu label atau perintah) yang kita inginkan. Bila tombol ini masih kurang untuk label atau melakukan perintah dapat ditambahkan fungsi S&P mode dengan menggunakan Shift+F1 s/d Shift+F12. Perbedaannya adalah bila anda cukup menekan tombol F1 saja dengan ini harus menekan tombol Shift+F1 untuk melaksanakan perintah yang anda inginkan. Untuk pengaturan fungsi ini anda harus mengerti

fungsi-fungsi macro untuk pengisian label atau perintah.
•☐ Kolom ranning - Pemberian tanda contang akan mengaktikan waktu ulang untuk transmiting sesuai dengan pengisian kolom delay/waktu ulang dibawahnya.
•☐ Status Bar Informasi (posisi paling bawah - Merupakan panel Informasi yang sedang berjalanan
• Setelah memasukkan callsign - Negara, Zone, Benua
• Jika - Pesan (seperti pesan error, hasil dari perintah dll)

FUNGSI LAINNYA
•☐ Ctrl+P − Spot stasiun dimasukan dalam kolom callsign sebagai tempat untuk cluster aktif sambungan, baik packet atau telnet. Anda akan diminta untuk komentar. Jika tidak ada stasiun masuk dalam kolom callsign, stasiun login terakhir sesi ini akan terlihat. Macro diterima dalam komentar yang dikirim.

•☐ Ctrl+O − Ubah callsign dari operator. Jika Anda adalah multi-user, Anda akan diminta untuk operator pada callsign pertama dilognya. Standarnya adalah callsign dalam dialog informasi stasiun. Memasuki "OPON" di kolom callsign juga akan meminta prompt untuk callsign seorang operator.

Auto−call completion − panggilan selesai - Saat Anda mengetik callsign di kolom callsign, jika sebuah kecocokan unik untuk log anda atau untuk jendela pengecekan panggilan terjadi, karakter yang tersisa di sebut ditambahkan untuk apa yang sudah Anda ketik. Mereka akan disorot, sehingga jika Anda melanjutkan untuk mengetik, anda akan mengganti karakter yang akan ditambahkan secara otomatis.

•☐ Auto CQ − Alt + R Tombol berhenti CQ untuk memberikan CQ sekali atau berulang. On / off pada status bar menentukan apakah CQ berikutnya akan masuk ke mode mengulang. Satu-satunya cara untuk menghentikan mengulang (pertengahan aliran), dan untuk mendapatkan benar-benar keluar dari itu, adalah untuk menekan Escape.
- Ctrl + R -- menentukan periode ulang di detik atau milidetik.
- Alt + R -- putaran ulang untuk mode on atau off. (Jika mode ulangi aktif, selalu akan mengulangi CQ (CQ perlu suatu tempat di judul atau teks dari tombol fungsi), Jika mode ulangi tidak aktif, CQ tidak akan mengulangi. A 'R' akan ditampilkan dalam status LED "merah" ketika repeat mode adalah aktif.)
- Timer pengulangan untuk CW dan SSB adalah untuk interval dari ketika anda menghentikan pengiriman CQ sampai CQ resume.)

•☐ Shift+Ctrl+Fx − Rekam pesan dalam MODE SSB untuk tombol fungsi yang ditugaskan. Menekan Shift + Ctrl + Fx lagi berhenti merekam. Fx bisa di configur di tombol F1 s/d F12.

•☐ Ctrl+Alt+Fx − Rekam DVK memori eksternal 1 sampai 4. Fx bisa dikonfigurasi pada tombol F1 s/d F4. Sebuah DVK eksternal harus dihubungkan dan dikonfigurasi pada port LPT.

•☐ Enter sends messages − yang disebut 'Enter mode' atau mode 'ESM'. Kontak normal keseluruhan (CQ & S & P) dapat ditangani dengan tombol Enter.

•☐ Automatically Spot all S&P QSO's − Spot kontak secara otomatis saat Anda log itu (hanya ketika dalam bentuk S&P).

•☐ Quick Edit" (Ctrl+Q/Ctrl+A). − Cara cepat mengedit QSO ini yang sudah bekerja sebelumnya dalam Log.
- Ctrl+Q − menuju 1 qso sebelumnya
- Ctrl+A − menuju 1 qso sesudahnya
- Enter − membawa perubahan log yang dibuat kembali ke kondisi normal.
- Escape − tidak membawa perubahan log yang dibuat dan kembali ke kondisi normal.
- Jika kotak teks dalam Window Entry berwarna biru, Anda berada dalam bentuk "Quick Edit", juga "QuickEdit" akan ditampilkan sebagai judul keterangan callframe ketika kembali mengedit QSO's. Quick Edit mulai mengedit dengan item disorot dan Anda dapat bergerak maju atau mundur dari sana.

- Disana tidak ada pengecekan apakah isi yang dimasukkan adalah berlaku/benar seperti dilakukan ketika QSO secara normal dimasukkan. Jadi, periksa secara langsung apa yang anda ketik.
•☐ Call Stacking − Ini adalah fitur untuk 'mengingat' callsigns dengan frekuensi mereka dan kemudian cara cepat kerja mereka. Ketika mengambil yang 'tumpukan' callsign radio di set ke stasiun. Contoh :(41)

•☐ Using both VFOs when 'Running' − Ketika gunakan VFO utama untuk mengirim dan yang lain untuk menerima (mode split) sesudah masing-masing di log QSOnya RX frekuensi akan dibuat sama dengan TX (VFO utama) frekuensi. Itu ada di sana untuk mdibiarkan anda menggunakan kontrol frekuensi utama sebagai RIT. Ini me-reset setelah setiap QSO selesai.

•☐ Automatic antenna selection - dapat digunakan. Antena harus diatur pada tab Antena dari dialog Configurer dan dapat dikendalikan menggunakan sebuah kotak eksternal pada port paralel. Bila Anda menekan Alt-F9, Anda akan beralih melalui semua antena UNTUK BAND. ITU. Jika hanya ada satu, maka toggle tidak akan terjadi. Bila Anda mengubah band, switch antena akan berubah ke antena dengan kode terendah untuk band itu. Antena yang dipilih akan ditampilkan di papan status.

•☐ Alt+' (Alt+single quote) - beralih antara luas dan sempit filter untuk modus yang dipilih (SSB, CW dan mode Digital). Hot key ini akan bekerja apakah Anda telah mengubah kode filter atau tidak. kode Filter dapat diatur di menu klik kanan bandmap.

•☐ Pause - penukaran radio dan kecocokan keyboard untuk radio.

•☐ Sebuah pesan peringatan akan ditampilkan jika pengguna mencocokan jauh sebelum dilog sesuatu QSO dalam Window Entry dengan benar Exchange dimasukkan.

•☐ Validasi Kolom Exchange :
- CQ Zone-- hanya diizinkan -- angka, tab, space, backspace
- Section --- hanya diizinkan -- huruf / angka
- Exchange- hanya diizinkan -- huruf / angka
- Grid ----- hanya diizinkan -- huruf / angka
- Power --- hanya diizinkan -- huruf / angka

•☐ Panggil fungsi pengecekan K1TTT telah dilaksanakan. Ketika callsign yang dimasukkan akan diperiksa terhadap pola file untuk dilihat apakah callsign yang masuk adalah callsign mungkin. Sebuah peringatan akan diberikan di Window Check ketika hal ini tidak benar. Pemeriksaan dalamnya dilakukan dengan menggunakan satu set aturan dalam CALLSIGN.PAT file. Perhatikan bahwa fungsi pengecekan panggilan hanya bekerja untuk HF (tidak ada WARC) dan hanya untuk CW dan SSB. Informasi lebih (41)

•☐ Ketika perintah SH / DX dimasukkan dalam kolom callsign ini diteruskan ke jendela packet untuk diproses.

•☐ Tampilan jendela ketika frekuensi radio diubah - Fungsi ini akan membawa program atas ketika frekuensi radio berubah. Hal ini hanya terjadi bila ada program lain di atas logger N1MM seperti dengan Internet browser, e-mail client dll
- radio adalah terpasang (untuk mendapatkan perubahan frekuensi dari).
- Ketika N1MM logger diminimalkan tidak akan terjadi.
- Fungsi ini adalah perilaku standar dan selalu diaktifkan.

http://ina-dxer.blogspot.com/2009/12/mengenal-system-file-n1mm-ham.html
N1MM Info System

MENGENAL SYSTEM FILE N1MM

• ☐ File : master.dta --> C:\Program File\N1MM Logger

Update Master Callsign database (Download Master.dta). Salin file ini di 'folder Program' tersebut. logger N1MM mendukung master.dta CT-format file.

• ☐ File : cty.dta --> C:\Program File\N1MM LoggerDownload dan update file negara terbaru (Download Cty.dat atau wl_cty.dat). Jangan lupa untuk mengimpor file negara ke database di bawah Tools!

• ☐ File : ham.mdb --> C:\Program File\N1MM Logger

Default database file (jangan hapus) --> C:\Program File\N1MM Logger

• ☐ File : new.mdb --> C:\Program File\N1MM Logger
Default database file yang digunakan ketika sebuah database baru dibuat oleh user (jangan hapus).

• ☐ File : *. MDB --> C:\Program File\N1MM Logger

Database file dibuat ketika memilih 'File / New Database'. Menghapus file ini berarti kehilangan semua kontes QSO di dalamnya. Ini praktik yang baik untuk dibuat.

Catatan: database adalah akses tunggal 2000 file database. Ini memiliki ekstensi. Mdb. Dalam setiap database diselenggarakan nol atau lebih umum atau kontes log. Untuk saat ini, hanya satu kontes atau log umum dalam sebuah database dapat dilihat atau diedit pada satu waktu. Pilih Yang Contest Log - Pilih kontes yang ada atau membuat kontes baru (dalam database saat ini). Info lebih lanjut dalam bab 'Pilih Log Jenis Dialog'.

•New Database - Membuat database log baru. Mengubah nama yang diusulkan (new.mdb) menjadi nama yang berarti bagi penggunaan atau isi dari database baru. Mulai sekarang database ini akan dibuka secara default saat startup program. Gunakan Open Database untuk memilih Database yang akan menjadi database default untuk membuka. Banyak kontes dapat disimpan dalam satu database. Selalu gunakan database terpisah untuk menguji versi baru dari program dan membuat backup secara teratur dari direktori logger N1MM dengan semua itu isi tapi setidaknya dengan file database (*. mdb) dengan kontes 'nyata' QSO's ..

N1MM Logger.ini
Windows Settings, radio, pengaturan port, RTTY pengaturan dll yaitu segala sesuatu di Configurer tetapi juga kontes terakhir yang digunakan adalah disimpan dalam file Logger.ini N1MM.

Wav file
Yang dapat digunakan oleh program (SSB mode). Mereka berada di WAV direktori tersebut (untuk tombol fungsi) dan dan dalam direktori Letter (mengirim callsigns dll). Untuk mengaktifkan wav file harus diletakan direktori wav file dengan meletakan callsign

direktori di dalamnya. Contoh : wav\{OPERATOR}\cq.wav, tanda ini "{" atau "}" harus digunakan sebagai bentuk macro yang nantinya akan digunakan dalam fungsi F-KEY. dan OPERATOR menunjukan callsign anda sedangkan cq.wav adalah file koleksi salah satu audio anda yang akan dipancarkan. Anda disini harus membuat rekaman audio seluruh alfanumerik 1 per 1, Callsignnya, QTHnya, RSnya, Repeatnya dll yang dibutukan untuk audio transmiting.

Rekaman QSO adalah disimpan dalam subdirektori di bawah direktori program logger N1MM (dan bisa menjadi sangat besar).

Latter file (untuk mode CW dan RTTY)

Laporan singkat Hamfair Tokyo 2012
YB3DIK, P Yusnanto

Atas himbauan Bp. President YBDXC YB4IR dan saya sebagai anggota YBDXC, saya dihimbau secara singkat membuat laporan kunjungan ke Hamfair Tokyo 2012 pada tgl. 25 & 26 Agustus 2012.

Berangkat dari Surabaya 24 Agustus, bersama anggota YBDXC # 074. Hanya berdua saja, karena teman2 yang sedianya berangkat pada mengundurkan diri termasuk teman2 dari Jakarta.

Transit di KL 5 jam dan sempat ditemani dan dijamu oleh teman dari MARS 9M2RS Haji Abdul Rashid Bin Sutan adalah Technical Advisor Seanet Malaysia dan 9M2NZ Mohd Rashid A Gani (beliau2 ini sudah sering ke Indonesia untuk Hamfair). Saya sampaikan sedikit penjelasan tentang keberadaan YBDXC kepada mereka

Sampai di Tokyo jam 23:00 local time, dijemput oleh teman Jepang JH1HRJ Kazuaki Oya San.

25 & 26 Agustus, dengan ditemani Pak Syarif Hidayat JG1WCT dari KBRI Tokyo dan JH1HRJ, kami mengunjungi Hamfair digedung Tokyo Big Sight, Ariake. Bukan main anggota Ham Radio dari seluruh dunia tumplek bleg ditempat tsb. melimpah ruah, antrian masuk ke Hamfair sampai diluar gedung.

Kami kunjungi Club Station 8J1A setasiun kegiatan selama Hamfair berlangsung dan mengadakan special call disemua frekuensi. Saya merasa kagum melihat perlengkapan radio di club tsb. dengan radio2 type terbaru, kok tidak ada radio jadul ya ? Maklum radio saya hanya TS430S. Kapan ya saya/kita punya club station seperti mereka ? Tangeh lamun.

Kemudian ditrima baik dan penuh dengan rasa kekeluargaan di Club Fuyo Radio Amateur JI1YTF dan malamnya diundang dinner party direstoran Ginza Shinbansi dipusat kota Tokyo. Juga kami diundang malam itu diclub DXer BBQ. Saya diberi kesempatan untuk say "Hello" kepada mereka dan sedikit menjelaskan keberadaan YBDXC. Suasana sangat santai, penuh dengan kegembiraan dan betul2 saya rasakan persahabatan/persaudaraan sesama ham radio antar bangsa.

Sempat eyeball QSO dengan DV1NLO, XV9BAE, KH2F, XV3AA, 3W3A, A71BR, YB0AKM, XV3NF, UA0LE, KH2JU, JW/JQ2GYU dll. sambil tukar menukar QSL card.
Oleh Seanet Convention Bureau JA1BRK Yonemura Tachio (Chairman) kita diundang nanti di YOKOHAMA pada 5 - 7 Oct. 2013. Insya Allah teman2 bisa hadir.

Pulang ke Surabaya 29 Agustus, lewat Osaka (tidak jadi kepabrik ICOM) dengan Shinkansen, mampir di lokal Namba dan Izumisano. Di Bea Cukai Juanda tidak ada masalah walaupun kita bawa beberapa TX baru. Ma kasih OM Syarif.

Iki lho cak enake melok ORARI, weteng gak luwe, kancane sak jagad, nang endi2 free, hi, hi, hi.

Demikian Pak Imam Raharjo YB4IR semoga berkenan dan mohon maaf bila ada kekliruan..

OM Steve,
Pada beberapa DXpedition saya sangat salut karna telinga/pendengaran beberapa operatornya hebat, walaupun mungkin juga dengan tambahan bantuan perangkat yg yahud.
Kesempatan utk bisa didengar mereka buat saya kadang tipis sekali, jadi kesempatan itu "agak" membesar bila mereka gunakan split - gak sanggup deh kalo simplex, karena kadang sulit utk monitor DX station yg kita buru itu, apalagi usaha agar panggilan kita didengarnya.

Nah, kalo ketemu dg operator yg "receivingnya" kurang mantap dan kita juga agak ragu apkh sdh 100% QSL sedangkan yg pile up sdh langsung nerkam - jadi galau.

Kejadiannya : Dg Spratly Isl. utk 15M saya jadi 2 kali wkd dan keduanya masuk di log/QSL cardnya. Dengan /Martinique FM2AN QSL card saya dpt balasan dg ctatan NOT IN THE LOG.
Yang bikin agak lega DXpedition bisa kita lihat hasil QSO kita di CLUBLOG, tapi kadang khan beberapa hari kemudian baru merek upload, padahal kita juga takut keburu mereka QRT atau prop sdh gak OK lagi. HI.

Judul: Re: Bls: [YBDXC_News] 20M

OM Hendro, itu dia masalahnya tidak ada peraturan,
jadi bbrp MEGA DXpedition seenaknya saja (sebenarnya ini tergantung kemampuan operator dalam menangani pileups) split dan
lebar sekali spektrum yg dipakai sampai kadang2 lebih dari 15Kc.
Ya pasti padat sekali disitu, sama seperti kalau lagi kontest, apalagi CQWW, lha kalau kita tidak ikut kontes susah cari freq bersih,
karena itu untung ada WARC bands 12,17,30m yang tidak dipakai untuk kontes, jadi selalu "bebas kontes"
73 dan semoga bisa segera mengudara dan kita bisa kontak
steve, w2fb

YB Land DX Club 1st ANNIVERSARY CERTIFICATE

YB Land DX Club 1st ANNIVERSARY CERTIFICATE

YB Land DX Club is pleased to announce its one year anniversary on 13th of September 2012. To commemorate this special event, a special short term Certificate of Merit will be issued.

Only contacts with permanent YB stations between September 13 0000Z - October 31 2359Z 2012 will count.
Only mixed mode and mixed band will be offered. All contacts on HF bands (160-10M) using Phone, CW, or Digital mode will count toward the certificate. Cross band or repeater QSO does not count.

For DX Stations a minimum of 50 points is required to qualify for the basic certificate

Points are assigned as follows:
YBDXC President YB4IR: 30 pts
YBDXC Officers (YB1AR, YB2DX, YB2TJV, YB0SAT, YF1AR): 20 pts
YBDXC members: 15 pts
YB stations non YBDXC member: 10 pts

For a complete list of current YBDXC members as follows:
YB0NDT, YB0MWM, YB0COU, YB0AI, YB0DJ, YB0NFL, YB0DPO, YB0EIN, YB0PAH, YB0MZI , YB0MJY,
YC0OHG, YC0QR YE0ANA,
YB1FWO, YB1TJ, YB1WR, YB1UUN, YB1HK, YB1ALL, YB1EBA, YB1MBA, YB1KIZ, YB1BS, YB1FIH,
YB1ACN, YB1PT, YB1ND, YB1AD, YC1DML, YC1BJX, YC1UUU, YC1BRS, YD1XUH, YE1AA, YF1HDF
YB2LSR, YB2WB, , YB2UTX, YB2VVD, YB2DDT, YB2ECG, YB2AA, YB2CPO, YB2EUZ, YB2BBY,YB2VTO,
 YB2DI,YC2WBF, YC2VEJ, YC2LEV
YB3GE, YB3MM, YB3KM, YB3DIK, YB3GXS, YB3PXF, YB3JBJ,
YB4TRY,
YB5QZ, YB5OUB,
YB6LD, YB6EN, YB6HJE, YB6DE, YC6LAY, YB6JRT, YC6EI
YB7KNV, YE7YE, YB7XO,
YB8EL, YB8FL, YB8VM, YB8UF, YB8TAF, YB8BRI, YB8HZ, YB8BJU,YC8EMH,
YB9AY, YC9CCS, YC9BEC, YB9WZJ, , YC9AOS, YC9DEB YC9MDX,

To claim the Certificate of Merit, you need to send your log extracts by email to QSL Manager YB2DX email: yb2dx@...

There is no cost, and the certificate will be emailed in PDF form ready to be printed and framed.

Good luck and see you on the bands. 73

YB4IR Imam
President

*) Untuk YB Land station selain mengumpulkan minimal 50 point juga harus ber QSO dengan minimal 3 station DX (cantumkan semua data QSO pada logsheet)

Dear All,
To commemorate one year anniversary of
YB Land DX Club, a special short term certificate of merit will be
issued for contacting YBDXC members as well as other amateurs from YB
land between September 13 and October 31, 2012.

Members of YBDXC and also all YB amateur radio stations are assigned points and you must obtain a minimum 50 points to qualify for the certificate.

The award in
PDF electronic form which you can download and print is FREE. QSL card
are not required, but you will need to send log entries by email to
sponsor.

For further details please check out their website:http://www.facebook.com/l/zAQHqLHQC/www.ybdxc.net/2012/09/yb-land-dx-club-1st-anniversary.html

ZD9UW

A DX'pedition to Tristan da Cunha, the world's most remote inhabited island, by G3ZAY and M0VFC.
September 2012

2012-08-31: Latest news

We (G3ZAY and M0VFC) have secured places on the "Baltic Trader" travelling to Tristan da Cunha on 20th September from Cape Town. We expect to have about 7 days on the island from 27th September though this could be curtailed by bad weather. We don't expect to have time to cover all bands, and probably will not operate on 1.8 or 50MHz. We will operate as ZD9UW.

Logs will be uploaded to ClubLog and LoTW shortly after the operation (or during, if an Internet connection is available), and cards will be handled by OQRS, direct to M0VFC, or via email bureau requests. Please try to avoid sending inbound cards via the bureau.

We would like to try and raise some extra funds for the Tristan da Cunha Educational Trust Fund, and plan to take some QSL cards to the island. Anyone willing to donate $25 (maximum of 100 donors) will receive a direct card mailed from Tristan for their first two QSOs (the rest to be posted at no extra cost to the recipient on return to the UK).

We'll add details of how to donate shortly - check back here soon, or email M0VFC.

Welcome to ZD9UW
On 17th September 2012, Martin G3ZAY and Rob M0VFC will leave England and start our journey for Tristan da Cunha - the most remote inhabited island in the world. The first leg takes us to Cape Town, where we board the MV "Baltic Trader" and embark on a seven day journey over the South Atlantic Ocean. Weather permitting, we should arrive on Tristan around the 27th September, where we will operate from until the 4th October before returning to Cape Town.

It promises to be the adventure of a lifetime!

Latest news
Nearly ready...
With less than a week to go, it's time for some final preparations: gathering equipment together, packing suitcases, swapping clothes for more radio gear, re-packing suitcases, and so on. Definitely a combination of excitement and slight nervousness now!

Remember to sign up for the special Trust Fund QSL card before 19th September, and get your card posted from the island.

Goals
We will be on Tristan for approximately one week only, so our main goal is to allow as many

people as possible to get ZD9 in their log at least once, rather than concentrating on those aiming to work us on multiple slots. Please remember this before asking for specfic bands or modes.

Bands & antennas
We expect to operate on all bands from 80m to 10m. Our antennas will primarily be 1/4wave verticals using fibreglass poles. We'll use an 18m Spiderbeam pole for 80m, 12m on 40m, and 10m poles on the higher bands.

There's unlikely to be time for 160m operation, as we can probably give more people the chance to work us on the higher bands. We will have a small 6m antenna with us, and will be operational on 6m if the band is reasonably open. We may run a beacon if we're able to.

Modes
Martin will concentrate on CW, and Rob on SSB. Rob will also be active on RTTY if time and pile-ups permit.

Note that RTTY isn't either of our strong points, so be patient with us!

When one of the radios isn't manned, we'll try and run WSPR, so look out for ZD9UW on WSPRnet.

Propagation
You can use Club Log's excellent propagation tools to find the best times and bands to work us on. Go to our expedition page, then click "Geo Propagation" to see preditions between your location and Tristan.

Internet & DX Cluster access
We will not have Internet or DX Cluster access while operating. Please avoid asking questions in cluster spots - we won't see them.

Online QSL Requests
This is our preferred method for both direct and bureau QSLs.

Direct QSLs
Direct QSLs should use the ClubLog OQRS above (with PayPal donation to cover postage costs), or be sent to:

Robert Chipperfield
13 Harlestones Road
Cottenham
Cambridge
CB24 8TR
England
Bureau requests
Please use the ClubLog OQRS above to request your card. There is no charge for bureau cards. Alternatively, please email M0VFC (address listed on QRZ.com). Please do not send your card via the bureau system - we don't need your card, and it only puts undue load on the system. There is no ZD9 QSL bureau!.

Judul: October 2012 QST - Digital Edition / SPECIAL DXING ISSUE

October 2012 QST - Digital Edition - Go Now>

Dear ARRL Member,

The digital edition of October QST is available now! Go to this link and start reading: October 2012 QST.

Special DXing Issue…

* Build a shared apex loop array antenna to boost your receive performance.
* Read about the fascinating HKØNA DXpedition to Malpelo Island.
* Get tips on how to make the most of modern DX spotting networks.
* Learn the real story of the historic 1954 DXpedition to Navassa Island.
* Find out why so many amateurs are eager to make contact with the Sovereign Military Order of Malta.
* …and much more!Enjoy Content You Won’t Find in the Print Edition…

* Watch video overviews of the Alinco DJ-V57T and Kenwood TH-K20A handheld transceivers.
* Listen to galactic noise on 10 meters.
* See extra photos of the HKØNA Malpelo Island DXpedition.
* Listen to the Hendricks QRP Kits Scout Regen receiver.And, don’t forget that all ARRL members have access to every issue of QST. After you’ve enjoyed reading this month’s issue, you can browse the entire QST archive (every issue since 1915) by visiting www.arrl.org/qst. Look for the links to the digital and print archives.

73,

Steve Ford, WB8IMY
Editor

What is a digital edition?
The digital edition of QST is a web-based edition of the journal...a way to read and interact with the current issue of QST anytime, anywhere. It simulates the look and feel of

our printed version, complete with page flipping, indexing and easy ways to move around to get to the content you want. You can choose to read it online, or download the entire issue to your laptop. Each issue includes unique, digital-edition-only content such as video, audio features and extra content. Members can also access the digital archive for access to previous issues.

How do I access the digital edition?
Members must have a valid ARRL website login to access this benefit. You can always find a link to the current digital edition and archives at www.arrl.org/qst.

To login or register, go to www.arrl.org/myarrl.

Forgot password? Go to www.arrl.org/forgot-password to reset your password.

Not a member? Join today and get access to the current digital edition, now.

Need help? Visit the digital edition help page for frequently asked questions. Need more help? Contact Member Services by telephone 860-594-0200 or 888-277-5289 (US only) or email circulation@....

Go Green. Go Digital-Only.
You can choose to opt-out* of the mailed, print edition of QST at any time. Complete our online opt-out form. Due to the lead time required to prepare QST for mailing, you may receive one last printed issue.
* Disclaimer: Choosing to opt-out of the print edition of QST is voluntary and will not result in a refund or reduction of ARRL membership dues. Any savings will be used to extend the ARRL's reach in the areas of public service, education, advocacy, technology and membership.

About this email
You are subscribed to receive monthly notification of the digital edition of QST. If you have an ARRL website user account, you can manage all of your e-mail preferences at www.arrl.org/myarrl.

3729. Bls: [YBDXC_News] http://www.mulandxc.org WAPC Rules Worked All Provinces(WAPC) of Ch ina DX Contest 1.Objective Amateurs around the world can work any other amateurs during the 24 hour contest period, while contacts wi th Chinese provinces, municipal cities, auton omous regions, and special administration zon es are encouraged. 2.Contest Date First Sat urday of October, within China's Golden Wee k national holidays. The first WAPC contest will be hold in 2012 Oct. 6, from 0000-2359 U TC. A testing contest will be running on thir d Saturday of April, 2012, It is 21 April 201 2 from 0000-2359UTC.logs and records will be filed but no awards will be issued. 3.Bands and modes In 5 amateur bands: 80-40-20-15-10 meter; WARC band excluded.CW, SSB, and the m ixed of the two modes. 4.Categories Power l imits are defined as following High, above 10 0 watts and up to legal limit of licensee;Low , 100 watts or less, while greater than 5 wat ts;QRP, 5 watts or less.The following categor ies are currently available: High: Mixed all band; CW all band; SSB all band. Mixed 10 me ter; Mixed 15 meter; Mixed 20 meter; Mixed 40 meter; Mixed 80 meter. Low: Mixed all band; CW all band; SSB all band. Mixed 10 meter; M ixed 15 meter; Mixed 20 meter; Mixed 40 meter ; Mixed 80 meter. QRP: Mixed all band. Rema rks: No multi-player category. A participant can operate and enter in multiple single band categories. An all band participant will be automatically entered in each single band cat egory he worked, and competing with other sin gle band participants and be eligible for tha t single band award. Single band participant operating other bands during the contest are encouraged to submit their logs for more than one band to aid in the log-checking process. 5. General Rules 5.1 Transmitters and rece ivers must be located within a 500-meter diam eter circle, or within the property limits of the station licensee's address. Antennas m ust be physically connected by wires to the t ransmitters and receivers. 5.1.1 All categor ies of entrants are allowed to use packet and WEB clusters, skimmer, RBN etc. 5.1.2 Remot e control of transmitting or receiving device is not allowed. 5.1.3 Self-spotting is not allowed. Soliciting contacts by telephone, te lex, internet, packet mail during and before the contest is forbidden. 5.2 Only one signa l can be transmitted at any given time. 5.2. 1 Operating, logging,and spotting functions m ust be performed only by participant himself, any auxiliary transmitting or receiving from other operators is not allowed. 5.3 All mix ed mode participants can contact same station both on CW and SSB. IARU recommended frequen cies are encouraged for contest QSOs, cross m ode QSO is not allowed. 5.4 Mixed all band Q RP participants are encouraged to sign they c all with the /QRP suffix. 6.Exchange Using CQ

Bravo or CQ China as a shorthand to initia te your contest. For CW, using CQ B. 6.1 Non -Chinese station: signal report with serial n umber, start from 001. eg. 59(9) + 001. 6.2 Chinese station: signal report with a two ch aracter shorthand forChina’s provinces Lis t of Chinese provinces, municipal cities,auto nomous regions, and special administration zo nes(source from: China National standards ser ies GB/T 2260-2007). AHAnhui Sheng*1 BJ Beij ing Shi*2 CQChongqing Shi FJ Fujian Sheng GD Guangdong Sheng GS Gansu Sheng GX Guangxi Zhu angzu Zizhiqu*3 GZ Guizhou Sheng HAHenan Shen g HB Hubei Sheng HE Hebei Sheng HIHainan Shen g HK Hongkong Tebiexingzhengqu*4 HL Heilongji ang Sheng HN Hunan Sheng JL Jilin Sheng JS Ji angsu Sheng JX Jiangxi Sheng LNLiaoning Sheng MOMacau Tebiexingzhengqu NM Nei Mongol Zizhi qu NX Ningxia Huizu Zizhiqu QH Qinghai Sheng SCSichuan Sheng SDShandong Sheng SHShanghai S hi SN Shaanxi Sheng SX Shanxi Sheng TJ Tianji n Shi TW Taiwan Sheng XJ Xinjiang Uygur Zizhi qu XZ Xizang Zizhiqu(Tibet) YN Yunnan Sheng Z J Zhejiang Sheng Notes: 1 Province 2 Municip al city 3 Autonomous region 4 Special Adminis tration Zone, SAZ. BS7 is considered in HI, B Q9 is considered in TW. 7. Calculating QSO p oints 7.1 For Chinese stations: QSO with th e 34 Chinese provinces, municipal cities, aut onomous regions, and special administration z ones: 10 points QSO with other Asian DXCC ent ity: 3 points. QSO with other continent: 5 po ints. 7.2 For Non-Chinese stations: QSO wit h Chinese station: 10 points. QSO with same D XCC entity: 1 points. QSO with different DXCC on your own continent: 3 points. QSO with ot her continent: 5 points. 7.3 Marine and airb orne mobile stations are not count as multipl ier, but worth 5 point for any participant. 8. Dupe 8.1 Dupes are contacts made with the same station on the same band and mode. If t he first contact between stations is valid, d upes have 0 points value. If the first contac t is not valid, second (dupe) contact is acce pted. 8.2 Dupe contacts are not penalized; o ne does not have to mark them in the log subm ission. Moreover, entrants are strictly recom mended to leave DUPES in the log file. PLEASE DO NOT DELETE DUPES! 9. Multipliers Two ty pes of multipliers are available, provincial and DXCC entity: Provincial: Each different Chinese provinces, municipal cities, autonomo us regions and special administration zones, contacted on each band, is counted as one(1) multiplier, despite of the modes worked. That is, only 34 Chinese provincial multipliers a re available on each band. DXCC entity: Each different DXCC entity contacted on each band , is counted as one(1) multiplier, despite of the modes worked. BY, BV, VR2, XX9, BS7, BQ9 each count as one multiplier. 10. Total Sco res The

total scores is the result of total QSO points multiplied by the sum of the provi ncial and DXCC entity multipliers. 11. Log s ubmission requirements We need electronic co ntest logs! 11.1 Please submit your Cabrillo format contest log to this contest committee . Using N1MM as a log tool is strongly encou raged. It is available at: http://www.muland xc.org/wp-content/uploads/2012/03/mulandxc.ra r In case of a failed download, a new downlo ad site may be pointed in the contest rule pa ge in: http://www.mulandxc.org Also WINTEST can be used in WAPC though it works only in YO-DX mode this time, and the score may be no t accurate. In cases of that WINTEST was used , the final score has to be re-calculated aft er we received the log. 11.2 Time in all the logs must be UTC. 11.3 Contest log must inc lude the contest exchanges, i.e. signal repor t with shorthand of provinces, municipal citi es, autonomous regions and special adminstrat ion zones, or serial numbers. 11.4 The file name of the contest log should be your_contes t_callsign.log. 11.5 No paper log will be ac cepted. 11.6 If the submitted log can not be correctly convertied to the text format, it will be treated as invalid. 11.7 The file he ader of the submitted contest log must contai n the intended categary and full mail address including country name, this will be the add ress used for awards and/or certifications. 11.8 Calculation of the total scores is not n ecessary in the log, it will be officially ca lculated by committee designated software. 1 2.Deadline of log submission 12.1 All logs h ave to be submitted before 31 Oct. 2012. 12. 2 Logs can be submitted via email: mulandxc@g mail.com. Make sure the contest call and cate gory is included in the subject line. 13. Aw ards 13.1 Chinese participants: A certificat e of first, second, and third place in Bravo land will be issued to each categories list i n section 4. 13.2 Non-Chinese participants: A first place certificate will be issued for each categaries in each country. 13.3 Amateu rs who worked all 34 Chinese provinces, munic ipal cities, autonomous regions and special a dminstration zones within one contest, will r eceive a special WAP award. Amateurs who work ed all 34 Chinese provinces, municipal cities , autonomous regions and special adminstratio n zones outside of contest, is eligible for W APC award. WAPC awards progrom details will b e announced soon. 14.Penalties Following pe nalties are counted as triple good QSO points . *incorrectly logged calls(bad call) *incor rectly logged exchange numbers *QSO not in ot her station’s log(NIL) QSO is neither count ed nor penalized for the following: *other st ation incorrectly logged entrant’s call *ot her station incorrectly logged entrant’s ex change number *QSO time in entrant’s log an d other station’s log difference is more th an 3 minutes *QSO bands or modes in entrant ’s log and other station’s log

differ. *d upe QSO which is not in the other station’s log. 15. This rule is made by Mulan DX Club . Awards infomation will be published after each year’s Spring festival on club websit e: http://www.mulandxc.org. Mulan DX Club’s decision is final. http://www.mulandxc.org

WAPC Rules
Worked All Provinces(WAPC) of China DX Contest

1.Objective

Amateurs around the world can work any other amateurs during the 24 hour contest period, while contacts with Chinese provinces, municipal cities, autonomous regions, and special administration zones are encouraged.

2.Contest Date

First Saturday of October, within China’s Golden Week national holidays.

The first WAPC contest will be hold in 2012 Oct. 6, from 0000-2359 UTC. A testing contest will be running on third Saturday of April, 2012, It is 21 April 2012 from 0000-2359UTC.logs and records will be filed but no awards will be issued.

3.Bands and modes

In 5 amateur bands: 80-40-20-15-10 meter; WARC band excluded.CW, SSB, and the mixed of the two modes.

4.Categories

Power limits are defined as following High, above 100 watts and up to legal limit of licensee;Low, 100 watts or less, while greater than 5 watts;QRP, 5 watts or less.The following categories are currently available:

High:
Mixed all band; CW all band; SSB all band.

Mixed 10 meter; Mixed 15 meter; Mixed 20 meter; Mixed 40 meter; Mixed 80 meter.

Low:
Mixed all band; CW all band; SSB all band.
Mixed 10 meter; Mixed 15 meter; Mixed 20 meter; Mixed 40 meter; Mixed 80 meter.

QRP:
Mixed all band.

Remarks: No multi-player category. A participant can operate and enter in multiple single band categories. An all band participant will be automatically entered in each single band category he worked, and competing with other single band participants and be eligible for that single band award. Single band participant operating other bands during the contest are encouraged to submit their logs for more than one band to aid in the log-checking process.

5. General Rules

5.1 Transmitters and receivers must be located within a 500-meter diameter circle, or within the property limits of the station licensee’s address. Antennas must be physically connected by wires to the transmitters and
receivers.

5.1.1 All categories of entrants are allowed to use packet and WEB clusters, skimmer, RBN etc.

5.1.2 Remote control of transmitting or receiving device is not allowed.

5.1.3 Self-spotting is not allowed. Soliciting contacts by telephone, telex, internet, packet mail during and before the contest is forbidden.

5.2 Only one signal can be transmitted at any given time.

5.2.1 Operating, logging,and spotting functions must be performed only by participant himself, any auxiliary transmitting or receiving from other operators is not allowed.

5.3 All mixed mode participants can contact same station both on CW and SSB. IARU recommended
frequencies are encouraged for contest QSOs, cross mode QSO is not allowed.

5.4 Mixed all band QRP participants are encouraged to sign they call with the /QRP suffix.

6.Exchange

Using CQ Bravo or CQ China as a shorthand to initiate your contest. For CW, using CQ B.

6.1 Non-Chinese station: signal report with serial number, start from 001. eg. 59(9) + 001.

6.2 Chinese station: signal report with a two character shorthand forChina’s provinces

List of Chinese provinces, municipal cities,autonomous regions, and special administration zones(source from: China National standards series GB/T 2260-2007).

Notes:
1 Province
2 Municipal city
3 Autonomous region
4 Special Administration Zone, SAZ.
BS7 is considered in HI, BQ9 is considered in TW.

7. Calculating QSO points

7.1 For Chinese stations:

QSO with the 34 Chinese provinces, municipal cities, autonomous regions, and special administration zones: 10 points QSO with other
Asian DXCC entity: 3 points. QSO with other
continent: 5 points.

7.2 For Non-Chinese stations:

QSO with Chinese station: 10 points.
QSO with same DXCC entity: 1 points.
QSO with different DXCC on your own continent: 3 points.
QSO with other continent: 5 points.

7.3 Marine and airborne mobile stations are not count as multiplier, but worth 5 point for any participant.

8. Dupe

8.1 Dupes are contacts made with the same station on the same band and mode. If the first contact between stations is valid, dupes have 0 points value. If the first contact is not valid, second (dupe) contact is accepted.

8.2 Dupe contacts are not penalized; one does not have to mark them in the log submission. Moreover, entrants are strictly recommended to leave DUPES in the log file. PLEASE DO NOT DELETE DUPES!

9. Multipliers

Two types of multipliers are available, provincial and DXCC entity:

Provincial: Each different Chinese provinces, municipal cities, autonomous regions and special administration
zones, contacted on each band, is counted as one(1) multiplier, despite of the modes worked. That is, only 34 Chinese provincial multipliers are available on each band.

DXCC entity: Each different DXCC entity
contacted on each band, is counted as one(1) multiplier, despite of the modes worked. BY, BV, VR2, XX9, BS7, BQ9 each count as one multiplier.

10. Total Scores

The total scores is the result of total QSO points multiplied by the sum of the provincial and DXCC entity multipliers.

11. Log submission requirements

We need electronic contest logs!

11.1 Please submit your Cabrillo format contest log to this contest committee.

Using N1MM as a log tool is strongly encouraged. It is available at:

http://www.mulandxc.org/wp-content/uploads/2012/03/mulandxc.rar

In case of a failed download, a new download site may be pointed in the contest rule page in:

http://www.mulandxc.org

Also WINTEST can be used in WAPC though it works only in YO-DX mode this time, and the score may be not accurate. In cases of that WINTEST was used, the final score has to be re-calculated after we received the log.

11.2 Time in all the logs must be UTC.

11.3 Contest
log must include the contest exchanges, i.e. signal report with shorthand of provinces, municipal cities, autonomous regions and special adminstration zones, or serial numbers.

11.4 The file name of the contest log should be your_contest_callsign.log.

11.5 No paper log will be accepted.

11.6 If the submitted log can not be correctly convertied to the text format, it will be treated as invalid.

11.7 The file
header of the submitted contest log must contain the intended categary and full mail address including country name, this will be the address used for awards and/or certifications.

11.8 Calculation
of the total scores is not necessary in the log, it will be officially calculated by committee designated software.

12.Deadline of log submission

12.1 All logs have to be submitted before 31 Oct. 2012.

12.2 Logs can be submitted via email: mulandxc@.... Make sure the contest call and category is included in the subject line.

13. Awards

13.1 Chinese participants: A certificate of first, second, and third place in Bravo land will be issued to each categories list in section 4.

13.2 Non-Chinese participants: A first place certificate will be issued for each categaries in each country.

13.3 Amateurs who worked all 34 Chinese provinces, municipal cities, autonomous regions and special adminstration zones within one contest, will receive a special WAP award. Amateurs who worked all 34 Chinese provinces, municipal cities, autonomous regions and special adminstration zones outside of contest, is
eligible for WAPC award. WAPC awards progrom details will be announced soon.

14.Penalties

Following penalties are counted as triple good QSO points.

*incorrectly logged calls(bad call)
*incorrectly logged exchange numbers
*QSO not in other station’s log(NIL)
QSO is neither counted nor penalized for the following:
*other station incorrectly logged entrant’s call
*other station incorrectly logged entrant’s exchange number
*QSO time in entrant’s log and other station’s log difference is more than 3 minutes
*QSO bands or modes in entrant’s log and other station’s log differ.
*dupe QSO which is not in the other station’s log.

15. This rule is made by Mulan DX Club.

Awards infomation will be published after each year’s Spring festival on club website: http://www.mulandxc.org. Mulan DX Club’s decision is final.

WAPC Rules

Worked All Provinces(WAPC) of China DX Contest

1.Objective

Amateurs around the world can work any other amateurs during the 24 hour contest period, while contacts with Chinese provinces, municipal cities, autonomous regions, and special administration zones are encouraged.

2.Contest Date

First Saturday of October, within China’s Golden Week national holidays.

The first WAPC contest will be hold in 2012 Oct. 6, from 0000-2359 UTC. A testing contest will be running on third Saturday of April, 2012, It is 21 April 2012 from 0000-2359UTC.logs and records will be filed but no awards will be issued.

3.Bands and modes

In 5 amateur bands: 80-40-20-15-10 meter; WARC band excluded.CW, SSB, and the mixed of the two modes.

4.Categories

Power limits are defined as following High, above 100 watts and up to legal limit of licensee;Low, 100 watts or less, while greater than 5 watts;QRP, 5 watts or less.The following categories are currently available:

High:

Mixed all band; CW all band; SSB all band.

Mixed 10 meter; Mixed 15 meter; Mixed 20 meter; Mixed 40 meter; Mixed 80 meter.

Low:

Mixed all band; CW all band; SSB all band.

Mixed 10 meter; Mixed 15 meter; Mixed 20 meter; Mixed 40 meter; Mixed 80 meter.

QRP:

Mixed all band.

Remarks: No multi-player category. A participant can operate and enter in multiple single band categories. An all band participant will be automatically entered in each single band category he worked, and competing with other single band participants and be eligible for that single band award. Single band participant operating other bands during the contest are encouraged to submit their logs for more than one band to aid in the log-checking process.

5. General Rules

5.1 Transmitters and receivers must be located within a 500-meter diameter circle, or within the property limits of the station licensee’s address. Antennas must be physically connected by wires to the transmitters and

receivers.

5.1.1 All categories of entrants are allowed to use packet and WEB clusters, skimmer, RBN etc.

5.1.2 Remote control of transmitting or receiving device is not allowed.

5.1.3 Self-spotting is not allowed. Soliciting contacts by telephone, telex, internet, packet mail during and before the contest is forbidden.

5.2 Only one signal can be transmitted at any given time.

5.2.1 Operating, logging,and spotting functions must be performed only by participant himself, any auxiliary transmitting or receiving from other operators is not allowed.

5.3 All mixed mode participants can contact same station both on CW and SSB. IARU recommended

frequencies are encouraged for contest QSOs, cross mode QSO is not allowed.

5.4 Mixed all band QRP participants are encouraged to sign they call with the /QRP suffix.

6.Exchange

Using CQ Bravo or CQ China as a shorthand to initiate your contest. For CW, using CQ B.

6.1 Non-Chinese station: signal report with serial number, start from 001. eg. 59(9) + 001.

6.2 Chinese station: signal report with a two character shorthand forChina’s provinces

List of Chinese provinces, municipal cities,autonomous regions, and special administration zones(source from: China National standards series GB/T 2260-2007).

Notes:

1 Province

2 Municipal city

3 Autonomous region

4 Special Administration Zone, SAZ.

BS7 is considered in HI, BQ9 is considered in TW.

7. Calculating QSO points

7.1 For Chinese stations:

QSO with the 34 Chinese provinces, municipal cities, autonomous regions, and special administration zones: 10 points QSO with other

Asian DXCC entity: 3 points. QSO with other

continent: 5 points.

7.2 For Non-Chinese stations:

QSO with Chinese station: 10 points.

QSO with same DXCC entity: 1 points.

QSO with different DXCC on your own continent: 3 points.

QSO with other continent: 5 points.

7.3 Marine and airborne mobile stations are not count as multiplier, but worth 5 point for any participant.

8. Dupe

8.1 Dupes are contacts made with the same station on the same band and mode. If the first contact between stations is valid, dupes have 0 points value. If the first contact is not valid, second (dupe) contact is accepted.

8.2 Dupe contacts are not penalized; one does not have to mark them in the log submission. Moreover, entrants are strictly recommended to leave DUPES in the log file. PLEASE DO NOT DELETE DUPES!

9. Multipliers

Two types of multipliers are available, provincial and DXCC entity:

Provincial: Each different Chinese provinces, municipal cities, autonomous regions and special administration

zones, contacted on each band, is counted as one(1) multiplier, despite of the modes worked. That is, only 34 Chinese provincial multipliers are available on each band.

DXCC entity: Each different DXCC entity

contacted on each band, is counted as one(1) multiplier, despite of the modes worked. BY, BV, VR2, XX9, BS7, BQ9 each count as one multiplier.

10. Total Scores

The total scores is the result of total QSO points multiplied by the sum of the provincial and DXCC entity multipliers.

11. Log submission requirements

We need electronic contest logs!

11.1 Please submit your Cabrillo format contest log to this contest committee.

Using N1MM as a log tool is strongly encouraged. It is available at:

http://www.mulandxc.org/wp-content/uploads/2012/03/mulandxc.rar

In case of a failed download, a new download site may be pointed in the contest rule page in:

http://www.mulandxc.org <http://www.mulandxc.org/>

Also WINTEST can be used in WAPC though it works only in YO-DX mode this time, and the score may be not accurate. In cases of that WINTEST was used, the final score has to be re-calculated after we received the log.

11.2 Time in all the logs must be UTC.

11.3 Contest

log must include the contest exchanges, i.e. signal report with shorthand of provinces, municipal cities, autonomous regions and special adminstration zones, or serial numbers.

11.4 The file name of the contest log should be your_contest_callsign.log.

11.5 No paper log will be accepted.

11.6 If the submitted log can not be correctly convertied to the text format, it will be treated as invalid.

11.7 The file

header of the submitted contest log must contain the intended categary and full mail address including country name, this will be the address used for awards and/or certifications.

11.8 Calculation

of the total scores is not necessary in the log, it will be officially calculated by committee designated software.

12.Deadline of log submission

12.1 All logs have to be submitted before 31 Oct. 2012.

12.2 Logs can be submitted via email: mulandxc@.... Make sure the contest call and category is included in the subject line.

13. Awards

13.1 Chinese participants: A certificate of first, second, and third place in Bravo land will be issued to each categories list in section 4.

13.2 Non-Chinese participants: A first place certificate will be issued for each categaries in each country.

13.3 Amateurs who worked all 34 Chinese provinces, municipal cities, autonomous regions and special adminstration zones within one contest, will receive a special WAP award. Amateurs who worked all 34 Chinese provinces, municipal cities, autonomous regions and special adminstration zones outside of contest, is

eligible for WAPC award. WAPC awards progrom details will be announced soon.

14.Penalties

Following penalties are counted as triple good QSO points.

*incorrectly logged calls(bad call)

*incorrectly logged exchange numbers

*QSO not in other station’s log(NIL)

QSO is neither counted nor penalized for the following:

*other station incorrectly logged entrant’s call

*other station incorrectly logged entrant’s exchange number

*QSO time in entrant’s log and other station’s log difference is more than 3 minutes

*QSO bands or modes in entrant’s log and other station’s log differ.

*dupe QSO which is not in the other station’s log.

15. This rule is made by Mulan DX Club.

Awards infomation will be published after each year’s Spring festival on club website: <http://www.mulandxc.org/> http://www.mulandxc.org. Mulan DX Club’s decision is final.

OM Bambang,
Sudah di jakarta sejak 17.00 WIB kemarin.
DI Gili T, XYL gak betah cuma lihat pemandangan sumur, jadi tiba dari lombok/bangsal siang kembali ke lombok besok paginya - gak sempat lihat ex QTH YB9IOTA.

Lagi ngobrak-abrik gudang & junkbox cari2 bahan yg mungkin bisa dibuat antenna, hemat2 sikitlah sapa tau ada harta karun yg ditemukan di gudang. Sementara malahan nemu power trafo ex dulu kalo gak salah 2x450V 300mA. HI.

Selamat ya OM Zen,

Saya kejar dari tadi sampe dia naik ke 21.3** malahan ketutup signal kuat QRN/Radar..
Sempat dengar dia lagi CQing 21.265MHz dan QSX up 5 - waktu saya set disitu ternyata digaNTI DOWN 5.

Masih blm berhasil, sementara signal Z81A makin mengecil.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 9th-September, through Sunday, 16th-September there were 219 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5W, 5Z, 6W, 6Y, 7P, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E5/n, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH8/s, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ4, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T30, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YJ, YL, YN, YO, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3A, MONACO (Update). Nobby, G0VJG, will be active as 3A/G0VJG between October 1-5th. Activity will be on the HF bands using 100 watts and SSB only. QSL via G4DFI (not G0VJG).

3D2C, CONWAY REEF (Press Release #3). Paul, N6PSE, sent out the following on September 10th [edited]: "DXpedition to Conway Reef as 3D2C -- It is with great excitement that we announce that our preparations for a large multi-national DXpedition to Conway Reef are going according to plan. We now have 19 operators from all over the globe to participate in this tent and generator operation.

Conway Reef is located in the South Pacific Ocean and is #35 on Club Log's most wanted DXCC list.

The bulk of our equipment has arrived and is staged in Suva, Fiji. ICOM is shipping the IC-7600 rigs to us this week, and they will travel with the team to Suva. Our advance team is arriving in Suva on September 21st to commence with equipment testing and loading on our vessel, the venerable Island Dancer II.

The main Team is meeting in Lami Bay, Suva, and departing by ship to Conway Reef on September 24th. The Team expects to arrive at Conway Reef and become active on September 26th. We will complete our Dxpedition on October 5th, 2012, and return to Suva.

The main goals of this DXpedition are to work every amateur radio operator who needs Conway Reef for a new DXCC country. In addition, we will be active on all bands from 1.8 MHz to 144 MHz, including the 5 MHz and 50 MHz bands.

We will be active on CW, SSB and RTTY. Special attention will be made to work far away stations such as Europe and Africa during those periods when propagation permits. The propagation window for EU and Africa is very brief at times and signals may be weak, so we ask everyone in the honored HAM SPIRIT to stand by when asked so that we may fulfill this need. Our destination will have a wide range of options and possibilities.

We will use our Satellite phones to upload our logs on a daily basis to our on-line log. We will upload to LOTW approximately six months following the DXpedition.

Our team consists of these Operators: Hrane/YT1AD (Leader), Aleksej/UA4HOX (Co-Leader-Operations), Paul/N6PSE (Co-Leader-PR & Fundraising), David/WD5COV, Vasily/RW4NW, David/AH6HY, Alan/K6SRZ (Team Physician), Alan/AD6E, Sergej/RZ3FW, Craig/K9CT, Stan/LZ1GC, George/N6NKT, Peter/PY5CC, Mike/K6MKF, Jim/K9JM, Miguel/PY3MM, Luciano/PY5KD, Dragan/YT3W and Tevita/3D2TR. Our Pilot Stations are: Aca/YU1AA, Toma/YU1AB and Andre/V51B.

We wish everyone good propagation, and we hope that you enjoy working the 3D2C Team.

We are very grateful to INDEXA, NCDXF and all of the Clubs and individuals who have provided monetary support for this Dxpedition. We sincerely hope we can satisfy your needs!

At this time, we are seeking additional Club and Individual Sponsors to help us defray the costs of carrying out this DXpedition. Donations can be made via the 3D2C web page. OQRS will be available upon completion of the DXpedition.

Our official website is <http://www.yt1ad.info/3d2c/index.html>
3D2C Team"

4O, MONTENEGRO. Chab, YT7WA, will be active as 4O/homecall from the Village of Buljarice between now and September 23rd. Activity will

be on BPSK and QPSK.

4S, SRI LANKA. A group of JA operators are now active from Trincomalee in eastern Sri Lanka using individual callsigns until September 20th. Activity will be on all bands and modes. Operators mentioned are Hiroshi/JA3HBF (4S7HBG), Toru/JR3QHQ (4S7QHG), Nakasako/JA3UJR (4S7UJG), Ryo/JG3DOG (4S7DOG), Ikuo/JA3TJA (4S7TAG), 7M3FMR (4S7TEG), Kunio/JH3LSS (4S7LSG) and Tatsuo/JA3ARJ (4S7ARG). By the way, the JA team also activated Pigeon Island in the Sri Lanka's Coastal Island IOTA Group (AS-171) this past Sunday for a few hours. QSL via their home callsigns or via the instructions of the operator.

5H, TANZANIA. Noel, WB0VGI, informs OPDX that he will arrive in Tanzania on September 18th. However, he will be settling in and touring the country first before operating. He suspects that he will not be able to operate until at least October 8th, and will be active as 5H3NP from Iringa until December 15th. His plan is to operate 20/15/10 meters initially. Noel will have to build a WARC band antenna if he can find the room. Operations will be on CW, SSB and PSK. QSL via his home callsign.

5W & KH8, SAMOA AND AMERICAN SAMOA (Update). John, N7CQQ, sent out the following press release on September 12th [edited]: "We plan to depart Western Samoa (5W) on or about the 18th of September and join the party at a Trade Winds hotel in American Samoa. The gang from Swains should be arriving a day or two following our arrival back in American Samoa [AS] (KH8). Party will begin. We will see them off from the airport.

N7CQQ (5W0QQ) and N6XT (5W0XT) will continue to operate from AS until our planned departure on October 1st. We expect (or will try to) setup our station at the Trade Winds hotel for the remainder of our stay. We might also have access to the AH8LG station for QRO operation. We will set up for 60 meter operation from Western Samoa (WS) also. As soon as we set up a schedule for 60 meters, it will be posted here on your favorite DX news source.

PS: A special thank you to Atsuo, 5W1SA, for opening his home/ham station and very generous support while in Western Samoa. He drove us around and showed us the ropes here until we felt comfortable to do it on our own. Atsuo has a computer and wireless internet business here in Samoa.

Atsuo is forming a Ham Club here for visiting hams from around the world. We have contributed a donation to get him started. His plan, on the one acre hill top, is to get the property surveyed, the weeds cut, haul in some crushed rock and then obtain a 20 foot shipping container. I offered to purchase half of a shipping container to help get Atsuo started. (I might get my Call Sign on the side of the container?)

We have made plans to return to Western Samoa next year to build antennas and work on the site. This is an aggressive schedule for Samoa; I will keep you posted on the progress.

Atsuo will be putting up a Web page to post pictures and progress notes. The Web site will have suggested lodging sites, logistic information, car rental info, licensing info, and a list of the Charter Members of the Samoa Ham Club. I will add a section to the Web site to give details of

our attempt to visit Tokelau, ZK3.
  So here is your chance to make the DXCC program stronger by getting a world class ham site going on Samoa.
      N7CQQ (n7cqq@...) (atsuo@5w1sa.com)"

9H, MALTA. Gus, ON6KE, will be active as 9H3AK from Gozo (EU-023) between September 22-28th. Activity will be holiday style on 40/30/20 meters operating QRP (2-5 watts) CW. Suggested frequencies are 7030/7040, 10106/10116 and 14060 kHz. QSL only via LoTW and eQSL and LoTW. He states, "NO Bureau" and "no printed QSL, sorry".

A7, QATAR. Members of the Qatar Amateur Radio Society are heading for the beach again for a Multi-Operator/Multi-Transmitter entry in the CQWW DX SSB Contest (October 27-28th). This year the A73A team will include Ali/A71BX, Rashid/A71AD, Abdulla/A71CV, Khalid/A71CO, Mohammad/A71EL, Saif/A71AM, Ali/A71BZ, Ibrahim/A61ZX, Khalid/A61BK, Dave/K5GN,N5OT, David/N6AN, Larry/N6TR and Aoli/HA1AG. QSL via EA7FTR.

A SLICK CERTIFICATE FROM THE AZORES NINE ISLANDS HUNT ORGANIZERS! [edited] Press Release from Martti, OH2BH, dated September 14, 2012: "While this special activity will feature a hunt to work the maximum number of Azores islands, the Organizing Committee has today released the copy of a beautiful certificate available to all who manage to contact all 9 islands during the weekend of September 28-30th, 2012. The certificate will be sent by E-mail to those eligible for the Certificate of Merit presented as part of this release and shown at <http://azores-islands-hunt.com/>
  This new element will add to the grand prizes (2) of free travel to the Azores that are to be given out on October 15 as part of a lucky draw.
  Also, the renowned Club Log will be featured as a window to all 9 islands logs almost real-time with special software combining all nine islands logs into one overview.
  We kindly ask you to pass the Nine Islands banner to your favorite webmaster and ask him to link it to <http://azores-islands-hunt.com/>."
ADDED NOTE: The certificate can also be seen on the Northern Ohio DX Association's FaceBook page (see URL below).

BX5, TAIWAN (AS-020). Jimmy, BX5AA, from Changhua City, Taiwan (WLOTA 0022), will be active during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-All/High-Power entry. Jimmy states that BX5 is a rare prefix for Taiwan (CQ 24). QSL via BX5AA, direct (see QRZ.com). Visit his Web page at: http://blog.yam.com/bx5aa

BY, CHINA. Look for the YinZhou Middle School Amateur Radio Club Station, located in NingBo City, Zhejiang Province, to be active as BY5CD during the CQWW DX SSB Contest (October 27-28th) as a Multi-Op/All-Band entry. Their station consists of 2x Yaesu FT-2000 with stacked antennas for 40m and above. They also have 80m 4 SQ, 160m full size Slope with Beverage, and will use legal limit power. QSL via BD4HF, direct or by the Bureau (May take a long time!). OM and YL operators mentioned are Jack/BA4ALC, Ding/BA7MG, Bai/BH1DYK, Wei/BD1QXU, BG4AHK, Chen/BA7NO, Jordan/BA7MY, Mark/BD4FM, Esa/OH7WV, Takao/JE2LPC, Fan/BA1RB, Lu/BA5FB, Bojan/BA5BJ,

Robin Le/BD5CHU and Chenxing/BD4HF.

FO, FRENCH POLYNESIA (IOTA Op). Alain, F4GYP, will be active as FO/F4GYP from several French Polynesian Islands between October 19th and November 6th. The islands mentioned are Tahiti (OC-046, DIFO FO002), Mehetia (OC-046, DIFO FO009), Moorea (OC-046, DIFO FO010) and Raiatea (OC-067, DIFO FO012) [probably during the weekend of October 27-28th for Raiatea]. He will be also be active on Motu Nono (OC-046, DIFO FO131) with the special callsign TX4FO. No specific date; it depends on the weather conditions. Activity will be on SSB and on 40/20 meters possibly 10 meters also. QSL via F4GYP, direct or by the Bureau.

IOTA NEWS.....

AS-025. Valery, RA0SS, is now active as RA0SS/0 from Kunashir Island possibly for one month depending on transport. Activity has been mainly on 30 and 20 meters.

AS-043. Operators Suehiro/JI1PLF, Mitsuo/JA1UNS, Hisashi/7N1GMK and Takeo/7L4PVR will be active as homecall/1 from Hachijo Island between October 13-16th. Activity will be on 160-6 meters using CW, SSB and RTTY. QSL via their home callsign, direct or by the Bureau.

EU-054. Operators Raffaello/IT9ATF, Sal/IT9BXR, Renato/IT9NPR, Pippo/IT9PPG, Antonino/IT9RDG and Pino/IT9WDC will be active as IF9A from Favignana Island (IIA TP-011, MIA MI-025, WLOTA LH-1545) for the CQWW DX SSB Contest as (October 27-28th) as a Multi-Single entry. Activity will be on all bands and modes outside of the contest. QSL via IT9ATF, direct or by the Bureau.

EU-057. Volkert, DL6BE, will be active as homecall/p from Oehe Island (DID/GIA O-019) between October 29th and November 4th. Activity will be on the HF bands on, or near, the usual island and IOTA frequencies. QSL via his home callsign.

NA-046. Larry, K4KGG, is now active as K4KGG/1 on Martha's Vineyard Island until September 18th. Look for him around 2200z on primary on 14260 kHz SSB, but he may also work the other IOTA SSB frequencies on 10, 15, and 40m. QSL via K4KGG, direct or by the Bureau.

NA-067. Glenn, NY4NC, will be active as homecall/p from Ocracoke Island (USI NC001S, WLOTA 0466, Hyde County), North Carolina, between September 17-21st. Activity will be mainly on 40/20 meters operating QRP CW. QSL via direct to his home callsign.

OC-160. Aki, JA1NLX, will be active as homecall/VK4 from Hamilton between October 18-23rd. Activity will be on 40-10 meters using CW and SSB. QSL via JA1NLX. There is a OQRS on:
http://www.ne.jp/asahi/ja1nlx/ham/VK4_2012.html

JW, SVALBARD. Operators Kjell/LA9HH and Karl/LA8DW will be active as JW9HH and JW8DW, respectively, from Svalbard Islands until September 19th. Activity will be on the HF bands using CW and SSB. They were both active this past weekend as JW5E during the SAC Contest. QSL JW8DW via LA8DW and JW9HH via LA9HH, direct or by the Bureau. QSL via JW5E (see QRZ.com).

K6, UNITED STATES (Special Event). Mark, KM6HB, for the 8th straight year, will operate as special event station, K6P, between September 21-23rd. Activity is to commemorate "National POW-MIA Recognition Day" (Every 3rd Friday in September as stipulated by the Congress) and "Honor and remember those that have served and are still waiting to come home". Mark states, "Please stop by on the air and help us remember and honor those that having given so much for freedom." Suggested SSB frequencies are: 7250, 14253 and 18150 kHz (+/- QRM). They will operate from the Southern California area. QSL for a two sided picture QSL card via KM6HB: Mark McMullen, P.O. Box 27271, Santa Ana, California 92799, USA. Logs will be uploaded to EQSL and LoTW.

KH2/NH2, GUAM. Dave, N2NL, will once again be active as NH2T from Guam (OC-026) during the CQWW DX RTTY Contest (September 29-30th) and both the CQWW DX SSB Contest (October 27-28th) and CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Bnad/High-Power entry. He is expected to be here until the summer of 2013. Dave will be active (outside of contests) as KH2/N2NL and during all contests as NH2T. QSL via LoTW or via W2YC. For more information, including a station description, you can visit his Blog Page at: http://www.n2nl.net

KH6BZF PROPAGATION FORECAST/REPORT (September 17-23rd)....
Sep/17th AN-HN Sep/20th HN Sep/22nd HN
Sep/18th HN-AN Sep/21st HN Sep/23rd AN
Sep/19th AN

SOLAR REFERENCE KEYS/INDEXES AND GEOMAGNETIC REFERENCE

NORMALITY	GEOMAG	K Values	Alpha
AN - Above Normal	Quiet	K=0-1	0-7
HN - High Normal	Unsettled	K=2	8-15
LN - Low Normal	Active	K=3	16-29
BN - Below Normal	Minor Storm	K=4	30-49
DIS - Disturbed	Major Storm	K=5	50-99
VRY DIS - Very Disturbed	Severe Storm	K=6-9	100-400

KP2, U.S. VIRGIN ISLANDS. Jeff, K5WE, will be active as KP2/K5WE from St. Croix beginning September 17th until 26th. Activity will be on all bands, mostly CW, maybe some RTTY. QSL via his home callsign.

NH8, SWAINS ISLANDS. By the time you read this, the NH8S team on Swains Island is now QRT and in the process of tearing down their camp for a possible early departure. They were expected to be active until September 18th. However, San, K5YY, Swaim's 60m pilot, informs us on Saturday that the team has had "much bad weather conditions, antennas down, operators

sick and tired and dehydrated and with some wounds requiring medical care."
  The NH8S team has made a total of 105455 QSOs with 26010 Unique callsigns (43126/SSB, 54128/CW and 8201/RTTY). Breakdown by Continent: 522/AF, 2/AN, 28620/AS, 29509/EU, 43091/NA, 2663/OC and 1048/SA. The NH8S team recommends to QSL via OQRS by ClubLog for both direct or Bureau QSLs.
  PLEASE NOTE: They will activate the OQRS system after the DXpeditions ends -- on or about Saturday, 22-September-2012. Complete instructions will be provided on the NH8S QSL page. Direct QSLs can be mailed to: Swains Island DXpedition, P.O. Box 5005, Lake Wylie, SC 29710, USA. Bureau QSLs go to AA4NN (but use the OQRS - it is faster). QSL via LoTW (Logs will be posted 6 months after the conclusion of the DXpedition). There will not be any QSLs via eQSL.
  For more details on the NH8S operation, see the Web site at: http://nh8s.org

OH0, ALAND ISLAND. Raimo, OH3BHL, will be active as OH0KAG during the CQWW DX RTTY Contest (September 29-30th) as a Single-Op/Single-Band (40m) entry. QSL via LoTW. There will be part time operations if 10m is not open.

P4, ARUBA. Helmut, DF7ZS, will once again be active from Aruba (SA-036) (probably from P40V's QTH), possibly as P40Z between October 17-21st. He plans to be active in the Worked All German Contest [WAG] (October 20-21st). Helmut informs OPDX that outside of the contest he will be active on 17/12 meters. QSL via DF7ZS.

PJ6, SABA. Mike, G4IUF (ISWL Member), will once again be active as PJ6/G4IUF from Isle House, Windwardside, Saba Island (NA-145, WFF PAFF-027, WLOTA 2043) between October 1st and November 1st. Activity will be holiday style on the HF bands using CW and SSB. QSL via his home callsign, direct or E-mail for Bureau request (see QRZ.com).

REPUBLIC OF KOSOVO (To Be On The Air Soon!). Excerpts from the IARU Region 1 Web page reports: "Monday, September 10, 2012 marked the end of supervised independence of the Republic of Kosovo, a European country with a population of 2 million, and the beginning of its status as a fully sovereign state." It also states, "Kosovo is now an independent country, which must be honored as such. As of today, a total of 91 countries, including most of the industrialized world, such as USA, Japan, Germany, the United Kingdom and France along with the Benelux and Nordic countries, have recognized the Republic of Kosovo. These powers have endorsed the final settlement, the fulfilment of which is now celebrated in Kosovo's capital Prishtina. An Amateur Radio working group headed by IARU Region 1 President Hans Blondeel Timmerman, PB2T, and including IARU Region 1 Executive Committee Member Nikola Percin, 9A5W and Mission Goodwill Kosovo Coordinator Martti Laine, OH2BH, together with their associates are in the final stages of assisting Kosovo's Telecom Authorities in drafting regulations governing Amateur Radio in Kosovo, to bring the original Kosovar operators and their re-vitalized Amateur Radio Association back to the international community. <http://www.voanews.com/content/supervised-independence-ends-in-kosovo/1505339.html>" The IARU Region 1 Web page is at: http://www.iaru-r1.org

SU55, EGYPT (Special Event). Members of the Egyptian Radio Amateur Society for Development (ERASD) will activate special event station SU55J from Cairo between October 18-22nd. The ERASD will be celebrating 55th World Scout Jamboree On The Air (JOTA 55) and also participate in the event. QSL only direct to SM5AQD. Visit the Egyptian Radio Amateurs Society Facebook page to learn of upcoming activities and all news about ERASD at: https://www.facebook.com/pages/The-Egyptian-Radio-Amateurs-Society-For-Development-ERASD/118552214859517

T30, WESTERN KIRIBATI. Melody, T30MK, is a native living on Tarawa Atoll (OC-017) in Western Kiribati. He states on QRZ.com, "I will be pleased to contact colleagues from all over the world. Please, be patient when contacting me as T30 is a highly requested entity. I will try to offer all colleagues the chance to confirm a contact with Western Kiribati." So far, we have not seen any QSNs on the DXClusters, but we will keep you informed.

T30, WESTERN KIRIBATI (3rd Press Release - T30PY/T30SIX). "We are working on the last minute logistic issues as well as on final preparation of our operation. Although Air Pacific has changed our flight schedule multiple times, we are confident that we can keep up with the announced schedule. The first station should be on the air in the first GMT hours of October 16th. Then we will gradually have all 4 stations running. The quality and even the availability of local Internet need to be confirmed. Our goal is to upload logs in Clublog daily as well as send news to the community periodically. The current DXpeditions in the Pacific area give us additional information about the likely local propagation behavior on HF. We emphasize that we plan to have Low Band stations in every SR/SS as well as the 6m station on EME on every MR/MS. We are grateful for the support received from many individuals, clubs and companies. Support is key for the success of this enterprise.
  73, T30PY / T30SIX Team <http://www.mdxc.org/t30py>"

T33, BANABA. A 14 member team of operators led by Jay/W2IJ and David/N1EMC is being planned for a DXpedition to Banaba for March/April 2013. A license has been issued (T33A), landing permission obtained and charter boat organized. The team's plan is to have 6 active stations on 160-10 meters using CW, SSB and RTTY for approximately 12 days (including two weekends) returning to Tarawa on April 10, 2013. Operators mentioned are Jay/W2IJ, David/N1EMC, Arnold/N6HC, John/N7CQQ, Charlie/W6KK, Mike/N9NS, Paul/W8AEF, Cliff/KD6XH, Jay/AA4FL, Franz/DK1II and Carlos/EA1IR. They have 3 places remaining for interested operators. For more details in joining the DXpedition, drop an E-mail to Banaba[at]T33A.com. Look for more details to be forthcoming.

T8, PALAU. Hisashi, JF2SKV, will be active as T88KV from Koror Island (OC-009) between October 26-30th. Activity will be on the HF bands using CW, SSB and the Digital modes. He will also be in the CQWW DX SSB Contest October 27-28th) as a Single-Op/All-Band entry. QSL via his home callsign. For more info, visit the following URLs: http://www.facebook.com/jf2skv
                                                http://blog.goo.ne.jp/skv_2006

TA, TURKEY. Gab, HA3JB, will be active as TA/HA3JB from Turkey between September 22nd and October 2nd. Activity will be on 80-10 meters using CW, SSB and the Digital modes. He will also be in the CQWW DX RTTY Contest (September 29-30th) as a Single-Op/Single-Band (??) entry. QSO is valid for the IPA Award. QSL via the CBA or his OQRS at:
                        http://www.ha3jb.com/oqrs.html

VK9C & VK9X, CHRISTMAS ISLAND. Sadao "Dan", JA1PBV, will once again be active as VK9XS from Christmas Island (OC-002) between now and September

20th. Activity will be on the HF bands, 80-6 meters using CW and RTTY, with a focus on NA and SA. Dan will use a IC-7000, DM-330MV, X200PC and wire antenna. See his setup from last operation at: http://ito110.com He is expected to move to Cocos Keeling Island (OC-003) and be active as VK9CS between September 21-28th. QSL via his home callsign.

VP2M, MONSERRAT. Martin, G4XUM, will be active as VP2MXU between October 23-30th. He should be active in the CQWW DX SSB Contest (October 27-28th). QSL via G3NKC.

VP9, BERMUDA. Les, N1SV, will once again be active as VP9I for the 2012 CQWW DX SSB Contest (October 27-28th). Before the contest, look for VP9/N1SV starting on October 24th on all bands. QSL VP9I via N1HRA and VP9/N1SV via his home callsign.

YB, INDONESIA (Special Certificate). To commemorate the one year anniversary of the YB Land DX Club, a special short term certificate of merit will be issued for contacting YBDXC members as well as other amateurs from YB land between September 13th and October 31st, 2012. Members of YBDXC and non member YB amateur radio stations are assigned points, and you must obtain a minimum 50 points to qualify for the certificate. The award in PDF electronic form which you can download and print is FREE. QSL cards are not required, but you will need to send log entries by E-mail to sponsor. For further details, please check out their Web site at the following URLs: http://www.ybdxc.net

Z8, SOUTH SUDAN (Update). Jim, K7QI, reports on QRZ.com that he has received his callsign, as well as Diya, YI1DZ. Their callsigns are Z81A (Jim) and Z81D (Diya) and are good for one year. Jim is now living and working in Juba, while Diya is a UN WFP telecom worker there. The two operators will soon meet and pool their resources together to help bring Amateur radio to South Sudan. Jim states on QRZ.com that "most all of Juba has no electricity and the house I've rented is the same. My company is in the process of ordering 2 generators. I am scheduled to fly back home on 25th of September 2012, and will return to Juba around late October or early November. I still need to select HF equipment and VHF equipment, and will bring the equipment back with me once I've selected the equipment. I am a member of AMSAT back home, and am planning on becoming active on AMSAT from here. Once I am set up and operating, I plan on being highly active, and will be on just about everyday. So please be patient, and I will be on very soon." Meanwhile, Diya, Z81D, has a station already set up and ready to go. Jim states, "Thanks to his kindness, we both will be using his station until I can get my station set up." By the way, Diya was heard on the air for the first time on September 13th, around 1745z operating 17 meters SSB. The QSL Manager for Z81A is Frank Remington, K7GSE. Please send S.A.S.E. with 2 green stamps or 1 valid IRC to Frank. The QSL Manager for Diya, YI1DZ (Z81D), is Stefan, OM3JW.

To see pictures of both licenses and Diya's radio shack located at Nyakuron South, Juba, see "DX-World.net" at:
http://dx-world.net/2012/z81a-z81d-republic-of-south-sudan
ADDED NOTE: Both operators are now active and have been on 20, 17 and 15 meters SSB.

ZL7, CHATHAM ISLAND. Hiro, JF1OCQ/W1VX/ZL1WY, will be active as ZL7A from the Chatham Islands (OC-038) between November 1-9th. Activity will be on 80-6 meters using CW, SSB and the Digital modes, with an emphasis on 80 and 6 meters. A beacon will be on 50.117 MHz around the clock. Hiro will use a TS-590S w/ACOM1000 into a Husler vertical for HF, and a FT-100 without a Linear Amp into 4 element yagi for 6 meters. QSL via JF1OCQ, direct (see QRZ.com) or by the Bureau (E-mail requests available) or LoTW. NO eQSL. For more details, see: http://w1vx.net/pedition/zl7/2012ZL7.htm

ZL9, CAMPBELL ISLAND (Update/Press Release)[edited]. The following was release by Ed, VK2ARE, Australian publicity Officer for ZL9HR, on Sunday, September 9th: "MONSTER ANTENNA! - The HARAOA president and DX'Pedition leader Tommy, VK2IR, has just finished construction of a 40 meters, 2 element Moxon antenna – yes that's right a two element 40 meters beam is gong on the ZL9HR DX'Pedition to Campbell Island (IOTA OC-037) for the activation between November 28th and December 9th. The element length is 15 ½ metres long! To see the construction of this monster simply search for ZL9HR on Youtube: http://www.youtube.com/?watch?v=ZuJo9LGOS7I
http://www.youtube.com/?watch?v=BJVvtc2ptvw
http://www.youtube.com/?watch?v=xbEOlxcTVZ8
http://www.youtube.com/?watch?v=t-17FjlBQfQ
http://www.youtube.com/?watch?v=WO6lwNXMjCM
http://www.youtube.com/?watch?v=5W7p5Qkz3nI

The fitting out of the four shipping containers to take all the equipment has also been finished, and they are being packed. All of this is on schedule to be ready to be shipped out of Sydney in just a few days around the 15th of September.

The team is also delighted to have received several more sponsors, both commercial, associations and clubs and individuals – all of which are listed on the web site at ZL9HR.com. Again a great vote of thanks to all of the sponsors without whom this DX'Pedition could not take place.

So where will ZL9HR operate? On which bands and which modes? While the aim is to operate on as many bands as possible and try to give as many amateurs as possible the chance to work this rare DX location, your vote on the website will affect some of the plans – so if you haven't already done so, please go and vote for your preferred mode and band by going to ZL9HR.com and clicking on the survey button at the top of the home page. Presently 10m is by far the most requested band followed by 160m, as for modes CW leads Digital followed by Sideband.

Please refer to the web site ZL9HR.COM for the full, up-to-date information about this major DX'Pedition to the Great Southern Ocean.

73 from Ed VK2ARE Australian publicity Officer for ZL9HR"

3D2C, Conway Reef DXpedition 2012
September 24th 2012 till October 5th 2012
Our team continues its activities in Central and Southern Pacific. For 2012
We booked the beautiful island of the Pacific, we wanted to activate the last
year, but we preferred the island of Rotuma with 3D2R CALL. Now our team
unanimously decided that the Conway Reef is our next point. We already have
CALL: 3D2C.

Conway Reef
Conway Reef, known since 1976 by its Fijian name "Ceva-I-Ra" or "Theva-i-Ra" Reef, is a coral reef of atoll type 450 km southwest of the Fiji Islands, but part of the Republic of Fiji. It is 2.5 km long in an east-west direction. On the middle of the reef is a small sand cay , 1.8 meters high and about 320 meters long and 73 meters wide, with a land area of two hectares. A stranded wreck of a coaster lies 240 meters south of the center of the cay, and the wreck of a fishing vessel lies on the northeast end of the reef. The reef is uninhabited apart from a number of birds which appear to have almost no fear of humans. Administratively, the reef it is part of Western Division , Fiji , and of Nadroga-Navosa province. In 1838 the Royal Navy Captain Drinkwater Bethune of HMS /Conway/ first came across the reef and recorded it however it was first mapped by the British several years later by Captain Denham of HMS /Herald/ . Three shipwrecks (1979, 1981 and 2008) have occurred on the reef. The most recent being a Chinese fishing vessel (Shin Sheng No.165) It was reported in 1983 that there was some vegetation on the cay, but it was bare by 1985. The cay currently has some vegetation about 3m high. While there are no other gaps larger than 75 km between Fiji islands (except Rotuma Island , which is politically but not geographically part of Fiji), Conway Reef lies 450 km to the southwest of the main Fiji complex. The closest land to Conway Reef lies 275 km WSW (Hunter Island in the French territory of New Caledonia). Hunter Island is also claimed by Vanuatu . Access to the island should only be attempted at high tide in a shallow draft tender. Extreme care must be taken to navigate the coral heads

Planned Travel Dates:
Departure to Conway reef from hotel Novotel Lami bay, Suva, Fij is:
September 24 th 2012 at 06,00 PM (18,00 local time).
Part of our team, 5 person with Alex UA4HOX coming via Seoul and will be in hotel in Suva, Friday, September 21st 2012. Main group coming via Los Angeles, departure september 22nd at 23,00 fromLAX and arriving in Nadi at 06,00 AM September 24th. Team will travel from Nadi to Suva with few rental car's.
Return from Conway Reef is night, October 5/6 th 2012.
Our boat Island Dancer II
If You like to see more info abou Our transportation from Suva to Conway Reef see this URL
http://www.sere.com.fj/sere.html

3D2C team will be QRV from Conway Reef on 2m and 6 EME with WSJT65 A,B,C on next FRQ:
50.375 MHz and 144.375 MHz
BEACON 50 MHz 50.095 MHz

We are accepting donations to help support the Conway Reef DX-Pedition. We expected the total cost to be approximately $134,000.00 USD.

For “Platinum” donations $1,000 USD and greater, your club logo, company name or personal name will be added to the QSL Card and our web site.
For “Gold” donations $500 USD and greater, your club logo, company name or personal name will be added to the QSL Card and our web site.
For “Silver” donations less than $500 USD and at least $100 USD, your club logo, company name or personal name will be added to the 3D2C web site.
For “Regular” donations less than $100 USD and at least $15 USD, your personal name will be added to the 3D2C web site.How to donate?
By check to The Intrepid-DX Group
3052 Wetmore Dr, San Jose, CA 95148 USA

Or Via PayPal to WD5COV@...

Each team member pay 5.450 US $. 5.350 US$ is trip cost and 100 US $ donation to build stations3D2TR, Tevita Rokobaro in Suva. In Fiji currently is active only few amateur radio OP's. Our donation is a contribution to the increased amateur activity of this beautiful Pacific Island.

QSL via YT1AD
YT1AD
Dr Hrane Milosevic
36206 Vitanovac
Serbia - EU
For direct QSL please send: QSL + SAE + SASE (1US$ for normal post, 2US$ for Airmail)
QSL via BURO: only send QSL card.

T30PY & T30SIX Would Like To Thank…
16/09/12 | News

In one month, the first Dits and Dots will be transmitted from T30PY/T30SIX stations. We will always be grateful to all the help we have received so far from many individuals, clubs and companies, which contributed to this project. Even before we accomplish our goal, we would like to thank fellow friends who have not necessarily been displayed in the sponsors section of our website, but without whom, we would never get to where we are;

In alphabetic order
Atilano Oms, PP5EG - Bill Smith, W9VA - Erwin Hubsh, PY2QI – George Wallner, AA7JV – Gerben Menting, PG5M – John Manus, W1JJ - Jacek Kubiak, SP5DRH – Jacek Marczewski, SP5EAQ - Jose Carlos Marques, N4IS - Kaboterenga Romatoa, NoCall – Keetia U Yee-On, NoCall – Lance Collister, W7GJ - Max Laconca, IK8LOV – Mamiro Yoshizawa, PY2DM – Rocky Peters, 3D2DD – Steve Silverman, KB3SII - Tevita Rokobaro, 3D2TR – Thomas Carlsson, PY2ZXU

Thanks guys
T30PY/T30SIX Group

3rd Press Release – T30PY / T30SIX
16/09/12 | News

We are one month away from the start of our operation. PY2DM, Mamiro and PY5HSD, Herminio joined the group due to personal priorities of the former members.
We are working on the last minute logistic issues as well as on final preparation of our operation. Although Air Pacific has changed our flights schedule multiple times, we are confident that we can keep up with the announced schedule. The first station should be on the air in the first GMT hours of Oct 16th. Then we will gradually have all 4 stations running.
The quality and even the availability of local Internet need to be confirmed. Our goal is to upload logs in Clublog daily as well as send news to the community periodically.
The current DXpeditions in the Pacific area give us additional information about the likely local propagation behavior on HF. We emphasize that we plan to have Low Band stations in every SR/SS as well as the 6m station on EME on every MR/MS.
We are grateful for the support received from many individuals, clubs and companies. Support is key for the sucess of this enterprise.

73,
T30PY / T30SIX Team
http://www.mdxc.org/t30py

T30PY Group Gathers To Perform Field Testing On Stations And Antennas
24/08/12 | News

From August 17th thru August 20th the T30PY/T30SIX team gathered at PW2D contest station. We were hosted by PY2DM, Mamiro who made us feel home. The “freezing” 6 degrees Celsius min temperature was a warm day for PY3MM and an extinction of life for PY7XC and PY7ZY.

The team managed to assemble the five verticals that will be used in the Dxpedition, including the two low band ones. Four complete stations were assembled and successfully tested.

The 160m cap hat vertical with a customized tuner on the bottom, even with a relatively poor ground system, has performed extremely well. So did the quarter wave vertical for 80m. With the actual salt water mounting, the performance will be even better.

A strong point has been the opportunity for socializing. Old buddies met and new friendships were built.

The team will carry all the necessary material as checked baggage. So, each member returned home with its share of excess weight.

Our good friend and experimented ham Thomas, PY2ZXU/SM0CXU showed up as well to give us a hand.

Part of the countless challenges were overcome. Now, new challenges ahead.

Radiohaus Support
27/07/12 | News

We would like, again, to thank Radiohaus for the donations. We understand that amateur radio market is growing fast in Brazil, and this support is necessary from the major groups, in order to become part of it.

Congratulations to Radiohaus (a brazilian company) and, of course, all of our sponsors.

T30PY & T30SIX team

New Release From T30PY & T30SIX DXpedition
27/07/12 | News

Preparation of antennas and gear progress successfully. Between August 17 -19 the whole team will gather at PW2D contest station to test antennas and stations that will be used in the expedition. At this time each one will carry back home the items that will be transported as individual baggage in the airlines. Unfortunately excess baggage cost is a main concern mainly within the pacific islands flights and, consequently, any donation, even tiny ones, is highly regarded.

As previously announced the group is very committed to put a meaningful effort on Low Bands and Six meters.

We would like to thank Clubs, Companies and individuals for the donations we have received so far, making this Dxpedition possible.

Our QSL policy has also been improved to better match people’s needs. Six different QSO confirmation possibilities are available including a fast track for donors.

T30PY & T30SIX team

Another Day Of Work: 80 And 160m Antennas
09/07/12 | News

On July 8th, 2012, PY2XB, PY2PT and PY2WAS have met at PY2XB's to evaluate the antennas for 80 and 160m. Two 18m fiberglass master poles from Spiderbeam will be used for both the antennas with two fixed antenna couplers in their basis.

There will be also 2 antennas dedicated to reception only, which will improve the chances of the team in the low bands. All arrangements have been followed to enhance the performance of the team in Tarawa, next October. In August, all members of the team will be meeting in the countryside of Sao Paulo at PY2DM – Mamiro's contest station so that all gears, antennas, linear amps and accessories may be exhaustively tested during an entire weekend. We will be back soon with more news…

A Lot Of Work!
01/07/12 | News

Alex, PY2WAS, Fred, PY2XB and Ricardo, PY2PT have assembled, wired and tested the two SteppIR BigIRs antennas which will be used in the expedition. The one with the 80m Kit will be used at Site A and the regular one at Site B.

Members will keep on preparing the antennas and material for the Dxpedition which includes an additional S9 vertical, a 80m vertical, a TB vertical and two crossed pennants RX antennas. It is a very time consuming operation once one of our main goals is to keep overall weight to a minimum.

50MHZ EME Confirmed !
05/06/12 | News

We are glad to announce that we will work 50MHz EME from Western Kiribati. We would like to thank Mick, W1JJ for the appropriate antenna donation and Lance, W7GJ for the technical support.

Mick is sending to PY7XC/ PY7ZY a M2 6M7JHV antenna. The 7th area call folks will do the testing, tuning, packing and taking the antenna to Tarawa.
There will be no elevation, so we will profit from moonset and moonrise periods. Power level will be around 500W. Skeds for these periods will be welcome.

AA7JV Meeting-News
13/05/12 | News

George, AA7JV meets at his house in Miami with Fred, PY2XB and N4IS, Carlos. George and Carlos are experienced low band operators. Carlos has developed the RX Waller Flag Antenna and George has developed a series of successful Low Band antennas mounted on the water in DXpeditions. DXers may remember George's operations from VK9GMW, TX3A, 5K0T, VK9WWI and others where George put an outstanding signal on 160/80m. George and Carlos became our advisors for low band antennas. Thanks guys!

T30PY Is The Logo Of The Month In The URE Magazine
20/04/12 | News

Radioaficionados is the official Magazine of URE (Unión de Radioaficionados Españoles), the Spanish Amateur Radio Association. Each month is choosen the nicest logo used among the most important DXpeditions and mentioned as The Logo Of The Month.

The Logo of the Month in the last issue of Radioaficionados is the T30PY one!

T30PY Team is very grateful for this nice award to the Spanish Amateur Radios and URE.

To download the full page showing the logo of the month click on the Radioaficionados Magazine cover, below.(more…)

Breaking News Of Apr 17, 2012
17/04/12 | News

We are proud to announce that PY2AAZ Fabio has joined the team in the last weekend.

Now, the T30PY / T30SIX team has 10 members and according to our bi-weekly teleconferences and planning program, we are confident that there will be a great job in Tarawa Island. Actually T30PY / T30SIX members are: PP1CZ – Leo, PT2OP – Orlando, PY2AAZ – Fabio, PY2PT – Rick, PY2WAS – Alex, PY2XB – Fred, PY3MM – Miguel, PY4BZ – Fernando, PY7XC – Jim and PY7ZY – Xavier

T30PY / T30SIX – W. Kiribati DXpedition
13/03/12 | News

We proudly announce a DXpedition to Tarawa Island, Western Kiribati, from Oct 16 to 25, 2012, when two call signs will be used: T30PY for use from 10 to 160m and T30SIX on 6m. It is expected to have 3 stations running simultaneously on HF and one on six meters. The following modes will be used: SSB, CW and RTTY. EME on six meters may be possible, but not yet confirmed.

The team, at this time, is formed by the following Brazilian ham ops: PT2OP – Orlando, PY2PT – Rick, PY2XB – Fred, PY2WAS – Alex, PY4BZ – Fernando, PY7XC – Jim, PY7ZY – Ciro, PY3MM – Miguel and PY1KN – Marcelo.

The DXpedition website will be launched in a couple of days at http://www.mdxc.org/t30py/, supported by the Mediterraneo DX Club. Considering the high cost of logistics, donations are welcome to help the team to support all related costs. There will be a donation button in the site, for which the donor may click and use Paypal to accomplish it.

T30PY/T30SIX Team

T30PY & T30SIX – A Dream Comes True
10/03/12 | News

We, all the team, believes that Dxpedition was already in our hearts since we became hams. Not only for the wonderful, distant and friendly country, but for the wonderful, distant and friendly country where a large group of Brazilian hams will provide contacts to friends around the world on all HF bands and 6 meters, and different modes.

This is a great achievement!

In fact, the Dxpedition started to be built last year, after the return of the team leader (Alex – PY2WAS) and the team members (Ric – PY2PT and Fernando – PY4BZ) from the Dxpedition to Mayotte Island (TO2FH). In that Dxpedition we everytime asking each other: “which would be the next…?”

After a couple of weeks that the guys above came, the friends Anderson (PY2TNT), Fabio (PY2AAZ) and the great and experienced Fred (PY2XB) enjoyed the group. So, we started to

discuss the places to go: Eritrea, Laos, Camboja, etc.

In the beginning of the process, after a lot of conferences, we have found some difficulties with dates, licenses, and other personal issues but we did not give up and kept the conversation to find a great place the share with the ham world.

During these days, specifically on a beautiful Friday evening, the teal leader (Alex – PY2WAS) called Ricardo (PY2PT) and said: “Ric, I talked all afternoon with Fred (PY2XB) and the other team guys and we have a place – the beautiful Tarawa, in Western Kiribati (T30)!”

“Oh my God”, said Ric (PY2PT). The location was defined! Alex (PY2WAS) and Fred (PY2XB) explained that would be fantastic about the location, the propagation conditions, the period of dxpedition and the possibility to explore 6 meters and to form a large group of Brazilian hams.

And the saga began…We started to invite different brazilian operators, from different parts of the country. Unfortunately, for personal issues, Anderson (PY2TNT) had to give up of the project.

Great friends joined the team: PT2OP (Orlando); PY7XC (Jim); PY7ZY (Ciro); PY3MM (Miguel); and, PP1CZ (Léo). After that all the guys, led by Alex (PY2WAS), been focused to provide a brilliant Dxpedition to the ham world.

Thanks to all and will be an honor to talk with each ham around the world.

T30PY and T30SIX team

Kiribati

Kiribati (pronounced Kiribas) is an independent republic within the Commonwealth of Nations, located in the central Pacific Ocean, about 4,000 km (about 2,500 mi) southwest of Hawaii, and his permanent population is just over 100.000 (2011).

It is part of the division of the Pacific islands that is known as Micronesia. Kiribati consists of 33 coral islands divided among three island groups: the Gilbert Islands, the Phoenix Islands, and the Line Islands.

The area now called Kiribati has been inhabited by Micronesians speaking the same Oceanic language since sometime between 3000 BC and AD 1300. The area was not isolated; invaders from Tonga, Samoa, and Fiji later introduced Polynesian and Melanesian cultural aspects, respectively. Intermarriage tended to blur cultural differences and resulted in a significant degree of cultural homogenization.

The islands were first sighted by British and American ships in the late 18th and early 19th centuries. The main island chain was named the Gilbert Islands in 1820 by a Russian admiral, Adam von Krusenstern, and French captain Louis Duperrey, after a British captain named Thomas Gilbert, who crossed the archipelago in 1788 when sailing from Australia to China.

In 1892 the Gilbert Islands consented to become a British protectorate together with the nearby Ellice Islands. They were administered by the Western Pacific High Commission based in Fiji. Together they became the crown colony of the Gilbert and Ellice Islands in 1916. Christmas Island (or Kiritimati) became part of the colony in 1919 and the Phoenix Islands were added in 1937.

The Gilbert and Ellice Islands gained self-rule in 1971, and were separated in 1975 and granted internal self-government by Britain. In 1978 the Ellice Islands became the independent nation of Tuvalu. The Gilbert Islands became independent as Kiribati on 12 July 1979.

All of the islands of Kiribati are atolls (ring-shaped islands with central lagoons) except for the island of Banaba in the Gilbert Islands, which is a raised limestone Island. Of the 33 islands of Kiribati, 21 are inhabited. Most of the population is concentrated in the capital of Kiribati, Tarawa, an atoll in the Gilbert Islands (west part of the island).

Kiribati has a total land area of 811km2. The islands extend about 3,900 km (about 2,400 mi) from east to west. From north to south they extend about 2,100 km (about 1,300 mi), straddling the equator. Kiritimati (also called Christmas Island), one of the Line Islands, occupies 609km2 and has the largest land area of any atoll in the world.

The majority of tolls is barely more than six meters above sea level and surrounded by barrier reefs creating picturesque lagoons for fishing, snorkeling, scuba diving, swimming and other water sports.

Kiribati is 12 hours ahead of GMT – 2 hours ahead of Tokyo and 22 hours ahead of Honolulu, on the other side of the international dateline.

Some of the islands of Kiribati, especially in the remote Line Islands, were formerly used by the United States and United Kingdom for nuclear weapons testing including hydrogen bombs in the late 1950s and early 1960s.

Tarawa Atoll and others of the Gilbert group were occupied by Japan during World War II. Tarawa was the site of one of the bloodiest battles in US Marine Corps history. Marines landed in November 1943; the Battle of Tarawa was fought at Kiribati’s former capital Betio on Tarawa Atoll.

Even with all the beauties, Kiribati is expected to be the first country in which all land territory disappears due the global warming. In June 2008, the Kiribati president Anote Tong said that the country has reached “the point of no return”; he added: “To plan for the day when you no longer have a country is indeed painful but I think we have to do that.”

As sea levels continue to rise, the government of Kiribati is negotiating a deal with Fiji to evacuate the entire population to areas of Fiji that the Kiribati government would buy. The area of Fiji proposed for resettlement is the second largest Fijian island of Vanua Levu. The mass migration is expected to include younger, skilled workers first, and then the rest of the population would follow over a period of years.

Kiribati High Definition Teaser from ThriveHD on Vimeo.

Setup

T30PY/T30SIX will be active from two different sites.

Here are the equipments of each location:
Site A
100w HF transceiver
Tokyo Hy-Power HL-550Fx
RigExpert Interface
Big IR SteppIR 6-80m mounted near the water

Site B
3x 100w HF transceivers
3x Tokyo Hy-Power HL-550Fx
3x RigExpert interfaces
Big IR SteppIR 6-40m mounted near the water
43 Ft S9 Vertical mounted near the water
160m vertical mounted inside the lagoon
80m vertical mounted inside the lagoon
2x Crossed Pennants RX antennas
8 ele 6m Yagi

Frequency Chart

T30PY Frequency/Mode Plan
T30SIX Will Be Used On 50MHz

Note 1
The CW listening frequency will always be up (except on 160m), starting at just 1kHz or 2kHz up depending on the pile-up size.
On 160m we will be listening 5 down for WW and 10 down for Japan. QSX will be announced.

Note 2
We may use alternative frequencies depending on QRM, if necessary.

Note 3
6M : 50110 will be used for propagation checking calls. We will move to 50120 SSB and 50102 CW as soons as activity peeks up. EME: the frequency will be 50.198 MHZ WSJT-JT65A. T30SIX will transmitt the first sequence.

QSL Policy

Confirmations may be obtained in 6 ways:
DONATION EQUAL OR GREATER THAN 20.00 US$ – Donors in this category will have QSOs uploaded in LOTW within 15 days after the end of the DXpedition. Also if paper QSL is needed please email QSO data and mailing address to T30PY.QSL.FOR.DONORS@.... Cards will be mailed with priority for donors without any additional cost. Expectation to mail the cards is early December 2012.
OQRS paper card direct – The online request at the bottom of this page will enable an estimation to reply of about 2-3 months. DXers are encouraged to request QSLs through OQRS. OQRS guidance is described below. If you just need LOTW confirmation, please let us Know in the comments. We will upload your QSOs within 2 months after the end of DXpedition.
DIRECT – Please enclose US$ 2.00 or 1 IRC, plus SAE (Self-Addressed Envelope). Estimation to reply: at least, 3 months.
BUREAU – Estimation to reply: at least, 2 years.
LOTW - Logs will uploaded in 6 months after the end of the DXpedition.MDXC Members - QSL VIA H.Q.

QSLs shall be sent to PY2PT, the DXpedition Manager:

PY2PT
RICARDO RODRIGUES
P.O. Box: 42066
SÃO PAULO, SP 04082970

Brazil

All QSLs with valid QSOs in log will be replied, independently of the way …

OQRS – ONLINE QSL REQUEST SYSTEM

AVAILABLE JUST AFTER THE END OF T30PY DXpedition

Sponsors

This Dxpedition is a very expensive initiative, considering the number of people and equipments to be transported.

Therefore, your support would be really welcome. Any donation from US$ 20.00 on, will have the QSL of the donor ready to go, just after the Dxpedition and there will be no need to apply for it via OQRS, direct or bureau. It will be directly shipped to your QRZ.COM address with the QSOs achieved by you with T30PY/T30SIX. Thus, you have your QSL granted with no additional effort, except for doing the QSO(s) and in addition, provide us a kind and valuable support to be afford of all costs to be paid. Naturally, this initiative about the QSLs abovementioned is restricted to ham ops (individuals)only, as it is not able to cover the associates of a DX club.

Donations may be achieved using the following ways:
PAYPAL: t30py.dxpedition@gmail.com
TUTORIAL: To achieve any donation by Paypal, you must have an account at Paypal. It is very easy to create an account, as long as you have an international credit card. In the event you have that account you should: (i) click the “donation” button herein, (ii) insert your account e-mail at paypal, (iii) insert the value of the donation and Gotcha! You did !
CREDIT AT A BANK ACCOUNT On behalf of:

Hasil Akhir Stasiun-stasiun Indonesia dalam Kontes DX CQWW SSB, 2011

Selamat atas peraihan skor Anda!

YE1ZAW, klubstasiun Orari Lokal Subang, Jawa Barat (profilnya dapat dilihat pada QRZ.COM), yang dioperasikan (dalam kategori M/S) oleh tim RadioLand dkk anggota Lokal Subang dari Gunung Malang, Subang, Jawa Barat telah membuat debut tersendiri karena belum setahun didirikan, telah mendapat sertifikat kontes internasional.

Pada kontes ini, perolehan jumlah DXCC-nya sedikit lebih unggul dari perolehan YB1C, stasiun kontes Orari Daerah Jawa Barat.

Insyaallah, YE1ZAW juga sudah bisa klaim 100 DXCC Award dari ARRL. Selamat.

Ayo, yang lain (juga) pasti bisa!

Jangan bersikap pasif atau - bahkan - negatif. Proaktif-lah. Lebih cepat, lebih baik.

Tulis komentar Anda pada blog ini. Berguna untuk memberi semangat berkompetisi kepada para anggota Orari di Lokal Anda.

3746. http://www.ybdxc.net/2012/09/z81a-i-am-first-amateur-licensed-in.html

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-09-18 01:43:25 UTC
From: Yb land Dx club
Topic: 3746 Message: 3746

http://www.qrz.com/db/Z81A

I am the first amateur licensed in South Sudan. South Sudan gained their independance in July 2011, and ITU-R1 have given South Sudan a group of call signs, whichare;
Z80A - Z89Z
Z82XA - Z89XZ
Z82XXA - Z89XXZ
I am now living and working in Juba and wanting to get my ham license here, I had no idea I would be walking into a whole new beginning. After several weeks of meetings and signatures with the Ministry of Telecommunications and Postal Services offices. I finally came to the Deputy Director for Spectrum. What a great guy! It was with him that I discovered no one has their license. Right there, I decided to volunteer to do what I can to help establish amateur radio for South Sudan however; unknown to me at the time, there was another amateur radio operator working for the UN here and we would soon meet and pool our resources together to help bring Amateur radio to South Sudan. Diya is a great guy and is now licensed as (Z81D).
I've been a licensed ham in the States (K7QI) for 38 years now, and a life member and huge supporter of ARRL, I felt that maybe my years of experience would help bring Amateur radio to South Sudan. A huge thank you goes out to ARRL and their assistance and support that I needed to guide me to through the proper channels to finally reach Region 1 where South Sudan really belongs and needs to align with. The Directors, Deputy Directors at the Ministry of Telecommunications and Postal Services are a great bunch of guys! And I greatly appreciate their friendship.
OPERATION:
Frank and I are getting hammered by hams via email about wanting to contact South Sudan. Please be patient. This Country is in the building stage. For example, most all of Juba has no electricity and the house I've rented is the same. My company is in the process of ordering 2 generators. I am scheduled to fly back home on 25th of September 2012, and will return to Juba around late October or early November. I still need to select HF equipment and VHF equipment, and will bring the equipment back with me once I've selected the equipment. I am a member of AMSAT back home, and am planning on becoming active on AMSAT from here. Once I am set up and operating, I plan on being highly active, and will be on just about everyday. So please be patient, and I will be on very soon.
The Really Good news!! Diya (Z81D) has a station already setup and ready to go. Thanks to his kindness, we both will be using his station until I can get my station setup.
I would also like to thank one of theguys from the ST0R expedition. He is in contact with me and giving me great advice. Thank you Paul for all the kind words, and support. I am the first perminate amateur radio operator in South Sudan, and slowly ramping up to become a highly active operator, and goal will be to help everyone who wants South Sudan to get a contact.

QSL INFORMATION
My QSL manager is Frank Remington (K7GSE). Please Send S.A.S.E. with 2 green stamps or 1 valid IRC to Frank. If you are unclear, please contact Frank.

http://dx-world.net/2012/the-republic-of-kosovo-soon-on-air/

Z60K – The Republic of Kosovo now on air

Provisionally The Republic of Kosovo - pending news from ARRL. This DXCC is temporarily marked as a current DXCC entity in Club Log in order to allow the expedition log search features to function correctly. Approval for this operation will come from ARRL alone.

On September 17, shortly after 17z, international and local ops started operating as Z60K from near Pristina, Kosovo on both 20 and 17m SSB. Operators included 9A9A, MD0CCE, OH2BH and OH2TA. Local TV recorded the moment live on air. QSL via G3TXF.

An Amateur Radio working group headed by IARU Region 1 President Hans Blondeel Timmerman, PB2T and including IARU Region 1 Executive Committee Member Nikola Percin, 9A5W and Mission Goodwill Kosovo Coordinator Martti Laine, OH2BH together with their associates are in the final stages of assisting Kosovo’s Telecom Authorities in drafting regulations governing Amateur Radio in Kosovo, to bring the original Kosovar operators and their re-vitalized Amateur Radio Association back to the international community.

Ah, OM Seno cuma numpang aja sih - seperti naik bus umum.
OM Joy - sama2 maaf lahir & batin kalo ada salah2 posting. HI.

DX station yg masih blom berhasil akhir2 ini : Z81A, 5W0QQ padahal signalnya lumayan kuat saya dengar.
Kemarin YB0MWM saya dengar jelas sdh worked, ternyata masih ragu OM Har-nya.

Saya pernah baca artikel di QST, memang kadang sering terjadi setelah kita melakukan QSO dg DX station dan setelah DX itu di pile up lagi oleh yg lain - kita jadi waswas - apakah dia sudah nulis di lognya callsign kita dengan benar...
Padahal mereka juga tidak menghendaki adanya dupes, jadi kita yg sdh wkd jangan ikutan di pile up lagi, cuma nambah2 QRM.

15 September 2012 A.R.I. DX Bulletin

No 1115

==========

*** 4 2 5 D X N E W S ***

**** DX INFORMATION ****

==========

Edited by I1JQJ & IK1ADH

Direttore Responsabile I2VGW

3B9 - A nine-operator team from Switzerland will be active as 3B9SP from Rodrigues Island (AF-017) on 16-23 October. They plan to have three stations active on 160-6 metres CW, SSB and RTTY/PSK31. QSL via HB9ACA, direct or bureau (an OQRS for either direct and bureau cards will be activated on Club Log), and LoTW "within 6 months after the DX operation". Further information can be found at http://hb9fr.ch/3b9sp

9A - OK1HWS, OK1IEC, OK1IPS, OK1JAX, OK1JK, OK1JRA, OK1MRK and OK1UXH will be active as 9A8OK from Palagruza Vela (EU-090) from 29 September to 6 October. QSL via OK1HWS, direct or bureau. [TNX rsgbiota.org]

9H - Gus, ON6KE will be active as 9H3AK from Gozo, Malta (EU-023) on 22-28 September. He will operate CW QRP on 20, 30 and 40 metres. QSL via eQSL and LoTW; "no printed QSL", he says.

BY - A group of Chinese operators will be active on 40-10 metres as BY1WXD/0 from a location near Lhasa in the Tibet Autonomous Region from 27 September to 7 October. They will participate in the first WAPC(Worked All Provinces of China Contest), to be held on 6 October (00.00-23.59 UTC, see www.mulandxc.org for further information). QSL via BA4TB. [TNX NG3K]

CE - Luis, CX1EK will be active again as CE2/CX1EK until 20 September. He operates mainly CW on 10 and 12 metres. QSL direct to Luis Matho, 2303 Nordok Place, Alexandria VA 22306, USA. [TNX CX1EK]

CT9 - DJ6QT, DJ3IW, DM3BJ, DK1MM, DK1QH, DK4QT, DL1YFF, E73Y and S56A will be active as CT9/homecall from Madeira (AF-014) from 20 September to 4 October. QSL via home calls. They will participate in the CQWW RTTY Contest as CR3L (QSL via DJ6QT). [TNX NG3K]

CY0 - All remains on schedule for WA4DAN/CY0 and AA4VK/CY0 to start operating from Sable Island [425DXN 1111] around 23 UTC on 8 October. However, weather and flying conditions will dictate the actual schedule. Activity will be "highly focused" on 10, 12 and 15 metres, "where the most demand for CY0 exists." Bookmark www.cy0dxpedition.com for further information and updates.

DL - DB5BZ, DK7LV, DL2VFR, DL4BBH and DL7UXG will be active as DM50IOTA from Fehmarn Island (EU-128) on 21-23 September. They will operate CW and SSB on the HF and VHF bands. QSL via bureau or direct (see

qrz.com). [TNX rsgbiota.org]

F - Special event call TM34CDXC is active until 22 September for the 34th Convention of the Clipperton DX Club, this year to be held in Granville, Normandy on 21-22 September. QSL via F5CWU (OQRS at www.f5cwu.net) and LoTW.

FO - Alain, F4GYP will be active as FO/F4GYP from French Polynesia from 19 October to 6 November. He plans to visit Tahiti (OC-046), Mehetia (OC-046), Moorea (OC-046) and Raiatea (OC-067, probably on 27-28 October). He will also be QRV as TX4FO from Motu Nono (OC-046) near Tahiti. Activity will be on 40, 20 and possibly 10 metres SSB. QSL via F4GYP, direct or bureau. [TNX F6AJA and Les Nouvelles DX]

FR - Willi, DJ7RJ will be active as FR/DJ7RJ from Reunion Island (AF-016) from 26 September till 21 October. He will operate CW and SSB on 160-10 metres, with special attention to the low bands for US and JA. QSL via home call. [TNX AA1M]

HB0 - Philippe ON4ACP, Erik ON4ANN, Jose ON4CAU, Erik ON4CCV, Walter ON8CW, Cedric ON4CKM, Marc ON4CJY and Rudi ON6MI will be active as HB0/homecall from Liechtenstein on 18-22 September. They will operate SSB and CW on 80-10 metres. QSL via ON4ANN, direct or bureau. Further information at http://users.telenet.be/on4ann

I - Max, IZ2LTW will be active as IA5/IZ2LTW from Elba Island (EU-028) on 15-22 September. He plans to be QRV on HF ans 6 metres. QSL via home call. [TNX Hamradioweb]

KH8 - John, N7CQQ (5W0QQ) and Ron, N6XT (5W0XT) plan to leave Samoa on or about 18 September. Then will be active from American Samoa (KH8) until 1 October. [TNX The Daily DX]

SM - SM3CER, SM3EAE and SM5SIC will be active from SI9AM (the King Chulalongkorn Memorial Amateur Radio Society, www.si9am.se) in Ragunda on 15-16 September, including an entry in the Scandinavian Activity Contest (SAC) CW. Outside the contest they will be on 160-10 metres CW and SSB. QSL via SM3CVM, direct or via bureau.

SU - Special station SU55J will be active on 18-22 October during "Egypt 2012", an event organized by the Egyptian Radio Amateur Society for Development (ERASD) in cooperation with the Arab Scout Region, which includes participation in the 55th Jamboree On The Air. QSL via SM5AQD. Please contact Said Kamel, SU1SK (su1sk[@]amsat.org) for details on the event. [TNX IARU Region 1]

UA - Valery, RA0SS is currently active as RA0SS/0 from Kunashir Island (AS-025). He has a vertical for 20m and a dipole for 30m, and he expects to remain there until early October. [TNX DX World]

V6 - Madison, W5MJ will be active as V63MJ from Pohnpei (OC-010), Micronesia on 15-22 September. He will operate CW on 40-10 metres, and possibly 80m. QSL via home call. [TNX ARRL DX Bulletin]

VK9 - Dan, JA1PBV will be active as VK9XS from Christmas Island (OC-002) on 16-20 September and again on 28-29 September, and as VK9CS from Cocos-Keeling (OC-003) on 21-28 September. QSL via home call. [TNX DX World]

VK9X - Pekka, OH2YY will be joined by Pekka, OH1TV during his 6-12 October activity from Christmas Island [425DXN 1111]. They will

operate SSB and CW as VK9XM with two stations on 40-10 metres. QSL via OH2YY, direct or bureau.

W - Glenn, NY4NC will be active from Ocracoke Island (NA-067) on 17-21 September. Primary operation will be on 40 and 20 metres CW QRP. QSL direct to home call. [TNX rsgbiota.org]

W - A group of operators from the Kennehoochee Amateur Radio Club (www.w4bti.org) will be active as K4D from Sand Island Lighthouse on Dauphin Island (NA-213) on 25-30 September. They will operate CW, SSB and digital modes. [TNX NG3K]

Z8 - DX World reports that the first two amateur radio operators in the Republic of South Sudan to receive Z8 licenses are James Pratt K7QI (Z81A, QSL via K7GSE) and Diya Al Sadi YI1DZ (Z81D, QSL via OM3JW). Both of them live and work in Juba. Jim will be back home on 25 September, he will return to Juba around late October or early November. "Once I am set up and operating", he says, "I plan on being highly active, and will be on just about everyday". For the time being, he can use Diya's station.

ZD9 - Weather permitting, Martin G3ZAY and Rob M0VFC should arrive on Tristan da Cunha [425DXN 1113] around 27 September, and be active as ZD9UW until 4 October. Their main goal is "to allow as many people as possible to get ZD9 in their log at least once, rather than concentrating on those aiming to work us on multiple slots". They expect to be QRV on 80-10 metres CW (Martin) and SSB (Rob), with some RTTY if time and pile-ups permit. There's unlikely to be time for 160m operation ("we can probably give more people the chance to work us on the higher bands"), but they will have a small 6m antenna and will be operational if the band is reasonably open. QSL via OQRS on Club Log (for both direct and bureau cards); traditional direct cards should be sent to M0VFC. Further information, including how to help the Tristan da Cunha Educational Trust Fund and receive a direct QSL card from the island, can be found at www.zd9uw.org.uk. [TNX G3ZAY]

ANTENE DELTALOOP 15 M BAND

YB1FWO, Syarif Hidayat

Antene deltaloop ini dipasang vertikal dengan feed poin berada pada posisi terendah, dengan pemasangan seperti ini maka polarisasinya adalah horizontal.

Gambar 1.

Apabila perakitan telah selesai maka set antene akan terlihat seperti pada gambar dibawah ini.

Gambar 2 : Kit lengkap.

Ukuran satu sisi dari antene deltaloop ini yg terbuat dari tubing teleskopik adalah 486 cm sehingga dua sisi antene yang terbuat dari tubing aluminium total panjangnya adalah 972 cm. Tambahan sisi horizontal atas dibuat dari bahan stainless steel berdiameter 1 mm sepanjang 476 cm, sehingga apabila dijumlahkan maka panjang total antene deltaloop ini adalah 1446 cm.

Bahan aluminium tubing yg diperlukan adalah sesuai tabel dibawah:

Tubing Aluminium diameter (mm)	ukuran (cm)	panjang efektif (cm)	jumlah
25	50	50	2
22	100	86	2
19	100	86	2
16	100	88	2
13	100	88	2
10	100	88	2
panjang satu sisi 1/4 lambda	>>	486	

Tabel 1 : Dimensi Aluminium tubing

Mengingat bahwa di Indonesia sistem ukuran adalah Inchi (bukan cm), maka dimensi bisa disesuaikan. Diameter 25 mm hampir sama dengan 1 inch, jadi dimensi aluminium tubing bisa disesuaikan menjadi ukuran sb : 1 inch, 7/8, ¾, 5/8, ½, dan terakhir ukuran 3/8 inch.

Yg dimaksud panjang efektif adalah panjang aluminium tubing tsb dikurangi oleh overlap (bagian yg masuk ke tubing yg diameternya lebih besar, misalnya tubing diameter 22 mm, masuk (ovelap) sebanyak 14 cm ke tubing berdiameter 25 mm, sehingga panjang efektifnya tinggal 86 cm. Untuk menahan bagian yg masuk tsb, pada tubing bagian yg lebih kecil bisa dipasang paku rivet pada posisi 14 cm. Namun apabila diperlukan bisa juga langsung dipasang mur tancap. Sebagaimana terlihat di gambar dibawah :

Gambar 3

Untuk braket mounting dibuat dari bahan plat aluminium ukuran sekitar 30 cm x 10 cm dengan ketebalan sekitar 6 mm. Plat tersebut harus dibuatkan lobang untuk dudukan U klem. Klem untuk memegang elemen terbesar (paling bawah) adalah U klem berukuran sekitar 40 mm dg diameter 6 mm (diameter lobangnya dibuat 7 mm). Lubang pada plat tersebut harus diatur sedemikian rupasehingga nantinya sudut antara elemen kiri dan kanan sebesar sekitar 65 derajat. Plat dan klemnya terlihat Seperti pada gambar 4

Gambar 4 : Mounting Bracket

Untuk elemen yg paling bawah (diameter 25 mm sepanjang 50 cm) harus dibuatkan isolator agar tidak short dengan mounting tersebut. Isolator dapat dibuat dari potongan pipa pvc (pralon) dng diameter dalam 25 mm se panjang 3 sd 4 cm. Cincin pralon ini dimasukkan ke dalam pipa aluminium seperti terlihat pada gambar dibawah.

Gambar 5 : elemen terbesar dan isolator pvc

Setelah elemen terbawah dipasang pada mounting maka akan terlihat seperti pada gambar di bawah :

Gambar 6

Apabila mounting dan elemen dari tubing sudah tersusun, maka kita bisa pasangkan elemen yg terbuat dari wire untuk posisi vertikal diatas. Panjang wire dengan ukuran diameter 1 mm tsb adalah 476 cm, apabila tidak ada kawat stainless steel, maka kawat tembaga biasa atau kawat speaker juga bisa dipergunakan. pada ujungnya kawat tsb dipasang terminal untuk mengikatnya di elemen tubing paling atas seperti terlihat pada gambar berikut:

Gambar 7: wire dan tubing bagian atas.

Mengingat bahwa impedansi pada feed poin dari antene jenis ini ada pada kisaran 120 sd 200 ohm, maka harus disiapkan balun untuk menyesuaikan impedansi. Untuk antene yg saya pergunakan dipakai balun 4:1 yg konstruksinya terbuat dari cincin ferit (saya pakai merek TDK) diameter sekitar 2 cm yg dililit secara bifillar oleh kawat tembaga email 1 mm sebanyak 8 sd 10 lilitan. Hasilnya kemudian disimpan didalam pipa pvc diameter 4 cm. Sebagian rekan jepang membuat balun dengan perbandingan 2,4:1 dan hasilnya juga relatif sama , didapatkan swr yg rendah sepanjang band 15 M.

Gambar 8 : balun dan isinya.

Setelah terpasang maka mounting dan balun akan terlihat sbb

Gambar 9 : mounting dan balun posisi terpasang.

Antene ini sudah saya pergunakan lebih kurang setahun terakhir, dibandingkan dengan V dipole, antene deltaloop relatif lebih senyap karena noise floornya lebih rendah. Seringkali ada station dx yg tidak terdengar dg V dipole, masih bisa didengar dengan baik dengan antene loop ini. Gain antene ini 1,5 dBd. Antene ini juga mempunyai rentang bandwidth yg lebar, di seluruh band 15 meter SWR nya berada dibawah 1:1,5. Antene ini juga mampu menangani power sampai 500 watt.

Gambar 10 : Deltaloop 15 M dan V Dipole 20 M saling tegak lurus.

YB1FWO, Syarif Hidayat - September 2012

DXNL 1798 - Sep 19, 2012
DX Newsletter

3D2/CR, CONWAY REEF, OC-112
A few members of the "World Wide DX Group" will provide a new DXCC and band points as 3D2C from Sep 24 until Oct 5. They will focus on Europe and ask everybofy to respect that during the band openings to EU. Activity will be in CW, SSB, RTTY, SSTV and PSK31 on 160m-2m. The OPs will be: Hrane,YT1AD, Aleksej,UA4HOX, Paul,N6PSE, David,WD5COV, Vasily,RW4NW, David,AH6HY, Alan,K6SRZ, Alan,AD6E, Sergej,RZ3FW, Craig,K9CT, Stan,LZ1GC, George,N6NKT, Peter,PY5CC, Mike,K6MKF, Jim,K9JM, Miguel,PY3MM, Luciano,PY5KD, Dragan,YT3W, and Tevita,3D2TR. Pilot stations are Aca,YU1AA, Toma,YU1AB and Andre,V51B.
QSL via YT1AD, OQRS, ClubLog. See also: http://www.yt1ad.info/3d2c

4S, SRI LANKA, AS-003
A Japanese group stays in Trincomalee at the east coast of Sri Lanka until Sep 20. Hiroshi,JA3HBF (4S7HBG), Toru,JR3QHQ (4S7QHG), Ryo,JG3DOG (4S7DOG), Nakasako,JA3UJR (4S7UJG), Ikuo,JA3TJA (4S7TAG), 7M3FMR (4S7TEG), Kunio,JH3LSS (4S7LSG), and Tatsuo,JA3ARJ (4S7ARG), will be QRV in all modes on all bands.
If you were lucky you worked them also from Pigeon Island (AS-171).
QSLs via homecalls or as instructed by the operator.

5H, TANZANIA
Noel,WB0VGI, will be in Tanzania from Sep 18 and plans to tour the country first before operating. So expect him on the bands not earlier than Oct 8 (until Dec 15) signing 5H3NP from Iringa in CW/SSB/PSK on 20m/15m/10m. He has to build a WARC antenna as well. QSL via homecall.

6W, SENEGAL
Enrico,IK2FIL, will be QRV as 6V7X from Le Calao using his Elecraft K3 plus amp from Sep 24 until Oct 4. He plans to join the upcoming WWDX RTTY Contest (Sep 29/30) in the single Op/low power category.
QSL via GlobalQSL, LoTW, eQSL. See also: http://6v7x.jimdo.com

9M2, WESTERN MALAYSIA
Piju,9M2PJU, will be active as 9M2PJU/p in CW on 15m/20m from the Pertak dam in Kuala Kubu Bharu from Sep 22-24. His callsign is also good for the "Diamond DXCC Award Challenge" of the ARRL.
QSL via homecall, unfortunately only direct.
See also: http://www.arrl.org/active-stations

CE, CHILE
Luis,CE2/CX1EK, is working mainly in CW on 10m and 12m until Sep 20.
QSL unfortunately only direct to: Luis Matho, 2303 Nordok Place,

Alexandria, VA 22306, USA.

F, FRANCED
The special event station TM34CDXC is active until Sep 22 from the 34rd Convention of the Clipperton DX Club in Granville.
QSL via F5CWU (OQRS), LoTW. See also: http://www.f5cwu.net/oqrs

G, ENGLAND
The South Lancs Amateur Radio Club will be QRV as GB1BAS from the site that was Bickershaw & Abram Station, which closed 48 years ago, for the Railways On The Air (ROTA). They will work on 80m/40m/20m/10m/2m/70cm on Sep 22/23. QSL via bureau. See also: http://www.slarc.co.uk

---

The Ryder Cup will take place in the USA on Sep 28-30. Dick,G3VSQ, will be QRV as GB39RC in CW/RTTY on 10m/15m/20m/40m from Verulam Golf Club in St. Albans (Loc IO91UR) until Sep 30. QSL via G3VSQ, LoTW, eQSL.

HB0, LIECHTENSTEIN
Philippe,ON4ACP, Erik,ON4ANN, Jose,ON4CAU, Eric,ON4CCV, Marc,ON4CJY, Cedric,ON4CKM, and Walter,ON8CW, will be QRV in SSB and CW on 80m-10m signing HB0/Homecalls from Sep 19-22 with emphasis on the high bands.
QSL via ON4ANN. See also: http://users.telenet.be/on4ann

KH8, AMERICAN SAMOA, OC-045
Juergen,DJ2VO, had to return to American Samoa because he became sick on the trip to Swains Island (NH8S). He may use the station of the deceased KH8LG as KH8/DJ2VO starting around Sep 15 but has to clean up the station before.

KP2, US VIRGIN ISLANDS, NA-106
Jeff,KP2/K5WE, is making pile-ups on all bands working from St. Croix mostly in CW and some RTTY until Sep 26. QSL via homecall.

ON, BELGIUM
The special event station ON68POL is active until Sep 30 and remembers the liberation of the bridgehead of Rijkevorsel by the "Polar Bears" 68 years ago. Increased activity has been announced for the weekend on Sep 22/23.
QSL via bureau.

T30, WESTERN KIRIBATI, OC-017
Melody,T30MK, is a resident on the Tarawa atoll (OC-017) in Western Kiribati. He is looking forward to QSOs with radio friends around the world but asks for patience during the QSO.

TA, TURKEY
Gab,TA/HA3JB, will be QRV in CW, SSB and digital modes on 80m-10m between Sep 22 and Oct 2. He will join the upcoming WWDX RTTY Contest in the SOSB category. QSOs with him are also good for the IPA award.
QSL unfortunately only direct (OQRS). See also: http://www.ha3jb.com

UA0, ASIATIC RUSSIA, AS-025
Valery,RA0SS/0, is working from Kunashir Island (AS-025) until the beginning of October using a vertical on 20m and a dipole for 30m. QSL via homecall.

V6, MICRONESIA, OC-010
Madison,W5MJ, is active as V63MJ from Pohnpei Island (OC-010). Listen for him in CW on 40m-10m (maybe also 80m) until Sep 22. QSL via W5MJ.

VE, CANADA
The Mississauga Amateur Radio Club plans to use the club call VE3MIS in SSB on 7.210 kHz and 14.250 kHz from the "Halton County Radial Railway Museum" on Sep 22. QSL via VE3TKI.
See also: http://www.marc.on.ca and http://www.hcry.org

VK9X, CHRISTMAS ISLAND, OC-002 / VK9C, COCOS KEELING ISLANDS, OC-003
Sadao,JA1PBV, is working as VK9XS from Christmas Island (OC-002) until Sep 20 and once again from Sep 28-29. He also plans to show up as VK9CS from the Cocos Keeling Islands (OC-003) from Sep 21-28. he works in CW and plans to focus on NA and SA. QSLs via JA1PBV.
Logsearch is available at: http://ito110.com

W, USA
Mark,KM6HB, will activate the special event station K6P for the eighth time in a row during the "National POW-MIA Recognition Day" from Sep 21-23. The 3rd Friday in September was set
by the American Congress
in order to remember the prisoners and missing soldiers.
QSL via KM6HB, unfortunately only direct, LoTW, eQSL.

Z8, SOUTH SUDAN
The first two Z8 licenses habe been issued on Sep 13:
Z81A: James Pratt,K7QI, QSL via K7GSE
Z81D: Diya Al Sadi,YI1DZ, QSL via OM3JW
Diya has set up his station already in Nyakuron South, Juba and James may use it as well.

Republic of Kosovo "on air" soon: The supervised independence of Kosovo ended on Sep 10. Kosovo has two million inhabitants and the capital is Pristina. So far, 91 countries including U.S., Japan, Germany, France, Great Britain, the Benelux and Nordic countries have recognized the Republic of Kosovo under
international law.
An Amateur Radio working group headed by IARU Region 1 President Hans Blondeel Timmerman,PB2T, and including IARU Region 1 Executive Committee Member Nikola Percin,9A5W, and "Mission Goodwill Kosovo" Coordinator Martti Laine,OH2BH, together with their associates are in the final stages of assisting Kosovo's Telecom Authorities in drafting regulations governing Amateur Radio in Kosovo, to bring the original Kosovar operators and their re-vitalized Amateur Radio Association back to the international community. See also: http://www.voanews.com/content/supervised-independence-ends-in-kosovo/1505339.html and http://www.iaru-r1.org

Electronic journals online: Old electronic journals including the QST have
been put online: http://www.rsp-italy.it/Electronics/Magazines

DARC performance diplomas and DARC Contest Logbook (DCL) popular abroad:
Foreign radio amateurs are increasingly using the excellent opportuni-
ties for easy
application of the German DARC performance diplomas using
the DARC Contest Logbook and are particularly fond of the combination
of the DCL with LotW and eQSL.
VE3FWA thanks DF8AA, manager of the WAE award, with following words:
"Some remarks on the DCL. What you have created here is incredible.
No-one but the DARC can connect eQSL, LotW and Contestlog to apply for
diplomas. Really great! It is also a pleasure to use. Otherwise I would
have not been able to collect all the
necessary QSL cards for the DARC
awards. Thank you for setting up this system. 73! Ed, VE3FWA"
In his "SV5DKL amateur radio blog" SV5DKL even presents his recently
received EU-DX-D 1000
Trophy, his Europe RTTY Diploma (EURD) and other
DARC awards that he could apply for only by using
the DCL. This is not
only a good achievement but also proof to the excellent
acceptance of
the DARC Contest Logbook.
See: http://sv5dkl.blogspot.de/2012_08_01_archive.html
This might be also an additional motivation for award collectors to
participate in a contest since many logs are uploaded to the DCL as
well. As a result the
application of awards is very much simplified.
The DARC Contest Logbook can be found at: http://www.dxhf.darc.de/~dcl

E40VB QSL status: The E40VB QSLs were mailed on Sep 13. Documentation was
sent to the ARRL by the end of July but DXCC approval is still pending.

OPs wanted: Three more operators are wanted for a major international
DXpedition to Banaba Island (T33) in March/April 2013.
If you are interested to join please send an e-mail to: Banaba@...

Short term award: The "YB Land DX Club" issues a special award to celebrate
his first anniversary. See also:
http://www.ybdxc.net

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Sep 23:   BARTG Sprint 75
Sep 24:   DIG-PA Contest
Sep 29/30: CQ WWDX Contest, RTTY

IOTA   compiled by Klaus, DL7UXG (e-mail: iota@...)

Lighthouse Weekend: The "Adriatic DX Team" has organised an Italian Light-
    house Weekend on Sep 22/23. More information can be found at:
    http://digilander.libero.it/adriaticdxteam

Island activities:
AF-014, CT3, Madeira Archipalego: Walter,DJ6QT, Goetz,DJ3IW, Kalle,DM3BJ,
    Stefan,DK1MM, Horst,DK1QH, Dieter,DK4QT, Boris,E73Y, Mario,S56A, and
    Hans-Juergen,DL1YFF, will be QRV as CT9/homecalls from Santana on
    Ilha da Madeira (DIP MA-001, PIP MD-001, DPRN FF-101, WLOTA 053,
    WFF CTFF-030) between Sep 20 and Oct 4. This will include a multi-multi
    entry in the WWDX RTTY Contest (Sep 29/30) as CR3L.
    QSLs via homecalls and for CR3L via DJ6QT (direct/bureau).
    See also: http://www.cq3l.de

AF-032, 5H, Zanzibar Island: Harald,DL7VSN, will be QRV again from Zanzibar
    signing 5H1HS from Sep 23 until Oct 13. He also plans a short trip to
    "Lazy Lagoon Island" (no IOTA) as 5H1HS/3. QSL via DL7VSN.

EU-023, 9H, Malta group: Gus,ON6KE, plans to show up again from the island
    of Gozo (MIA MM-004, WLOTA 046, Loc JM76cb) from Sep 22-28. He will
    sign 9H3AK in CW on 40m/30m/20m using QRP.
    QSL via ON6KE (only LoTW and eQSL).

EU-028, IA5, Tuscany Region Group: Max,IA5/IZ2LTW, is staying on Elba Island
    until Sep 22 and hands out IOTA points on HF and 6m. QSL via homecall.

EU-069, EA5, Columbretes Islands: A few members of the "Invoker Team" will
    be QRV as EG5INT from Columbretes Island from Sep 20-24. The team
    includes George,EA2TA, Christian,EA3NT, Ramon,EA3OR, Raul,EA5KA, and
    Guillermo,EA5MON, and the station will be active on all HF bands.
    QSL only direct via EA5KA.

EU-128, DL, Schleswig-Holstein State East group: Klaus,DL7UXG, Ric,DL2VFR,
    Henning,DB5BZ, Friedrich,DL4BBH, and Matthias,DK7LV, will be active as
    DM50IOTA from Fehmarn Island (GIA O-001, WLOTA 0637) from Sep 21-23.
    They plan to work in SSB/CW on HF and VHF. QSL via DM50IOTA (d/B).
    See also: http://www.iota-expedition.com

NA-067, W4, North Carolina State East Group: Glenn,NY4NC/p, is working in CW
    mainly on 40m/20m running with QRP power from Ocracoke Island (NA-067,
    USi NC001S, WLOTA 0466, Hyde county) until Sep 21. QSL via homecall.

NA-213, W4, Alabama State Group: OPs of the Kennehoochee Amateur Radio Club
    will use the special callsign K4D in CW, SSB and digital modes from the
    Sand Island lighthouse on Dauphin Island from Sep 25-30.

QSL via bureau, LoTW, eQSL. See also: http://www.w4bti.org

OC-019, KH6, Hawaiian Islands: Tommy,VK2IR, Peter,VK2NN, and their families will stay on Hawaii from Sep 22 until Oct 6 and plan to work in holiday style as KH6/homecalls on 40m-10m during this time. QSL via VK2IR.

OC-045, KH8, Tutuila Island: John,KH8/N7CQQ, and Ron,KH8/N6XT, will be QRV on the HF bands from Tutuila Island (USi AS-007S, WLOTA 4385) between Sep 20 and Oct 1. QSLs only direct via homecall.

AS-194, JA6, Senkaku Islands (Japan): On Sep 14 the tensions between Japan and China escalated. Six Chinese patrol boats have entered the waters of the Senkaku Islands (known as Diaoyu) which are controlled by Tokyo and claimed by Beijing. It is very likely that this is the end of a planned activation of one of the most wanted IOTAs for a long time.

3754. Lowongan kerja

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-09-19 09:45:41 UTC
From: Karsono Suyanto
Topic: 3754 Message: 3754

Dear Kawan2 YBDXC, selain membicarakan DX ing, berikut ini saya coba forward recruitment dari kantor saya, mudah2an putra putri bapak-ibu sekalian bisa ikut berpartisipasi melamar lowongan yang ada di tempat saya bekerja.

Regards:

Karsono Suyanto (YBØNDT)

Rekrutmen Indocement September 2012

19 September 2012 - PT Indocement Tunggal Prakarsa Tbk. (“Indocement”) membuka lowongan tenaga kerja untuk posisi Management Trainee (Lulusan S1), Trainee (Lulusan D3) dan Apprentice (Lulusan SMK) yang proses seleksinya akan kami laksanakan pada bulan Oktober 2012.
Kami informasikan pula bahwa dengan dibukanya lamaran secara Online, maka kami tidak lagi menerima lamaran secara langsung.
Lamaran akan kami buka pada tanggal 20 September s/d 7 Oktober 2012.
Persyaratan:
A. Management Trainee
1. Lulus Sarjana (S1), Jurusan:
A. Akuntansi
B. Geologi
C. Kimia Murni
D. Komunikasi
E. Manajemen Pemasaran
F. Manajemen Transportasi
G. Teknik Industri
H. Teknik Elektro (Arus Kuat & Arus Lemah)
I. Teknik Informatika
J. Teknik Kimia
K. Teknik Mesin (Konstruksi & Konservasi Energi)
L. Teknik Pertambangan
M. Teknik Sipil
2. Tidak Buta Warna
3. Tinggi Badan minimal 160 cm
4. IPK Minimal 2,75
5. Berbahasa Inggris Aktif (Lisan dan Tulisan)
6. Usia maksimal 26 Tahun (per 31 Januari 2013)
7. Bersedia ditempatkan di semua lokasi pabrik Indocement
8. Lulus rangkaian tes seleksi yang diadakan Indocement

B. Trainee
1. Lulus Diploma 3 (D3), Jurusan:
A. Teknik Elektro (Arus Kuat & Arus Lemah)
B. Teknik Kimia
C. Teknik Mesin

2. Tidak Buta Warna
3. Tinggi Badan minimal 160 cm
4. IPK Minimal 2,75
5. Berbahasa Inggris Aktif (Lisan dan Tulisan)
6. Usia maksimal 24 Tahun (per 31 Januari 2013)
7. Bersedia ditempatkan di semua lokasi pabrik Indocement
8. Lulus rangkaian tes seleksi yang diadakan Indocement
C. Apprentice
1. Lulus Sekolah Menengah Kejuruan (SMK), Jurusan:
A. Kimia Analis
B. Teknik Elektro (Arus Kuat & Arus Lemah)
C. Teknik Mesin Produksi
D. Teknik Sipil
2. Tidak Buta Warna
3. Tinggi Badan minimal 160 cm
4. Usia maksimal 21 Tahun (per 31 Maret 2013)
5. Bersedia ditempatkan di semua lokasi pabrik Indocement
6. Lulus rangkaian tes seleksi yang diadakan Indocement

Persyaratan dan pendaftaran untuk masing-masing posisi dapat diakses melalui website Indocement www.indocement.co.id > Sumber Daya Manusia > Lowongan Kerja.
Untuk informasi lebih lanjut dapat menghubungi Bagian Rekrutmen dengan alamat email recruitment@...
Untuk mengirimkan lamaran secara online, khusus untuk kalangan internal Indocement silakan klik disini.

3755. Trs: The first HamQTH newsletter

----- Pesan yang Diteruskan -----
Dari: Free hamradio callbook <info@...>
Kepada: hsjoedho@...
Dikirim: Rabu, 19 September 2012 21:53
Judul: The first HamQTH newsletter

Hello,

this is the first email where I'd like to inform you about news at
HamQTH.com (http://hamqth.com) in last few months.

June:

HamQTH celebrates the first birth day. We have over 171 000 visitors,
more than 1 million page views, and 9 382 registered users. More
details and how HamQTH was improved is described at my website
http://www.ok2cqr.com/hamradio/hamqth/187-hamqth-one-year-anniversary

July:

HamQTH was mentioned in What's new column in CQ magazine as a Page of
the month. Thanks to Caojian, BD4UJ we have HamQTH translated into
Chinese which is the 14th language supported by HamQTH. The site has
new forum (http://forum.hamqth.com) which is fully integrated.

September

Thanks to donations I received from HamQTH users
(http://hamqth.com/donations.php) I was able to buy new much faster
server. The website is now faster and I can add more functions.
Actually, I already did it and added HamQTH statistics
(http://hamqth.com/statistics.php) and spot search
(http://hamqth.com/spot_search.php). More will come soon. If you want
to see all news added to HamQTH, please visit News page
(http://hamqth.com/news.php).

We have almost 50 times more users using XML search than web visitors
every day. It's fine, but please encourage others to register at
HamQTH and update their profiles. Without that, XML search won't be
accurate. Thank you!

Please look at your profile http://hamqth.com/YC0QR - keep it
up-to-date and let others to know that HamQTH exists!

73 Petr, OK2CQR

If you don't want to get this email in the future, please click to
http://hamqth.com/nonews.php?id=ebaaade6ff6e7c7ced3292c5a3cf8ffd9f7e8ce0

SB DX @ ARL $ARLD039
ARLD039 DX news

ZCZC AE39
QST de W1AW
DX Bulletin 39 ARLD039
From ARRL Headquarters
Newington CT September 20, 2012
To all radio amateurs

SB DX ARL ARLD039
ARLD039 DX news

This week's bulletin was made possible with information provided by NC1L, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

CONWAY REEF, 3D2. A large group of operators will be QRV as 3D2C from September 24 to October 5. Activity will be on 160 to 2 meters, including 60 meters, using CW, SSB, RTTY, SSTV and PSK31. QSL via YT1AD.

MONTENEGRO, 4O. Chab, YT7WA is QRV as 4O/YT7WA from the Village of Buljarice until September 23. Activity is on the HF bands using BPSK and QPSK. QSL to home call.

ZANZIBAR, 5H. Harald, DL7VSN will be QRV as 5H1HS from September 23 to October 13. This includes being QRV as 5H1HS/3 during a short trip to Lazy Lagoon Island, no IOTA. QSL to home call.

SENEGAL, 6V. Enrico, IK2FIL will be QRV as 6V7X from Le Calao from September 24 to October 4. Activity will be on the HF bands. This includes an entry in the upcoming CQ WW RTTY contest as a Single Op/Low Power entry. QSL via operator's instructions.

WEST MALAYSIA, 9M2. Piju, 9M2PJU will be QRV as 9M2PJU/p from the Pertak dam in Kuala Kubu Bharu from September 22 to 24. Activity will be on 20 and 15 meters using CW. QSL direct to home call.

FEDERAL REPUBLIC OF GERMANY, DA. A group of operators will be QRV as DM50ITA from Fehmarn Island, IOTA EU-128, from September 21 to 23. Activity will be on the HF and VHF bands using CW and SSB. QSL via bureau.

SPAIN, EA. A group of operators are QRV as EG5INT from Columbretes Island, IOTA EU-069, until September 24. Activity is on all HF

bands. QSL direct to EA5KA.

AMERICAN SAMOA, KH8. Ron, N6XT and John, N7CQQ are QRV as KH8/home calls from Tutuila Island, IOTA OC-045, until October 1. Activity is on the HF bands. QSL direct to home calls.

US VIRGIN ISLANDS, KP2. Jeff, K5WE is QRV as KP2/K5WE from St. Croix until September 26. Activity is on all HF bands using mainly CW and possibly some RTTY. QSL to home call.

LEBANON, OD. John, OD5RW is again QRV on 80 to 10 meters, including 2 meters and 70 cm, using CW, SSB, RTTY, SSTV and a variety of other digital modes, including D-Star. QSL via K8NA.

BELGIUM, ON. Special event station ON68POL is QRV until September 30 in remembrance of the liberation by the "Polar Bars" of the bridgehead of Rijkevorsel. QSL via bureau.

CURACAO, PJ2. Jeoff, PD4JOF is QRV as PJ2/PD4JOF until September 29. QSL to home call.

TURKEY, TA. Gab, HA3JB will be QRV as TA/HA3JB from September 22 to October 2. Activity will be on 80 to 10 meters using CW, SSB and various digital modes. This includes being an entry in the upcoming CQ WW RTTY contest. QSL to home call.

ASIATIC RUSSIA, UA0. Valery, RA0SS/0 is QRV from Kunashir Island, IOTA AS-025, until the beginning of October. Activity is on 30 and 20 meters. QSL to home call.

VANUATU, YJ. Rod, YJ8RN is QRV as YJ8RN/p from Loh Island, IOTA OC-110. Activity is mainly on 20 meters using SSB. His length of stay is unknown. QSL to home call.

SOUTH SUDAN, Z8. Jim, K7QI and Diya, YI1DZ now hold calls Z81A and Z81D, respectively. Activity may be on 160 to 10 meters as conditions allow. QSL Z81A via K7GSE and Z81D via OM3JW.

THIS WEEKEND ON THE RADIO. The NCCC Sprint CW Ladder, AGB NEMIGA Contest, DIG-PA Contest, FOC CW QSO Party, AGCW VHF/UHF CW Contest, BARTG Sprint 75 and the 222 MHz Fall Sprint are all on tap for this weekend. The SKCC CW Sprint and CWops Mini-CWT CW Test are scheduled for September 26. Please see September QST, page 79 and the ARRL and WA7BNM Contest websites for details.

SB PROP @ ARL $ARLP038
ARLP038 Propagation de K7RA

ZCZC AP39
QST de W1AW
Propagation Forecast Bulletin 38 ARLP038
From Tad Cook, K7RA
Seattle, WA September 21, 2012
To all radio amateurs

SB PROP ARL ARLP038
ARLP038 Propagation de K7RA

Average daily sunspot numbers dropped this week, from 83.1 in the September 6-12 week, to 56 in the recent September 13-19 period. Average daily solar flux declined from 118.9 to 101.4.

The latest forecast shows predicted solar flux at 115 on September 21-22, 120 on September 23-25, then 125 on September 26-27, 130 on September 28, and 140 on September 29 to October 1. On October 2 it drops to 135, 130 on October 3-5, 125 on October 6-7, 120 on October 8, and 115 on October 8-9. Flux values then dip below 100 on October 14-16, and peak again around 140 on October 25-28.

The predicted planetary A index is 12 on September 21-22, 10 on September 23 and 5 on September 24-28, 10 again on September 29, 5 on September 30 through October 2, 10 on October 3, 8 on October 4-5, and 5 on October 6-11.

The Czech Propagation Interest Group geomagnetic forecast this week comes to us from Petr Kolman, OK1MGW. They see quiet to unsettled geomagnetic activity September 21-22, mostly quiet September 23, quiet September 24-26, mostly quiet September 27, quiet to unsettled September 28-29, quiet to active September 30 through October 1, active to disturbed October 2, quiet to active October 3, quiet to unsettled October 4-5, quiet October 6-8, and quiet to unsettled October 9-11.

Carol Milazzo, KP4MD/W6 in Citrus Heights, California wrote in about WSPR mode for weak signal work on 2 meters. She says, "California 2 meter WSPR study group stations on 144.4905 MHz can be heard throughout the state of California from Redding at the north end of the central valley down to San Diego. Joe Taylor K1JT's WSPR mode allows stations with modest power and antennas to participate in weak signal VHF propagation experiments. Some of our data is posted on http://www.qsl.net/kp4md/144_mhz_wspr.htm."

Scott Avery, WA6LIE of Salinas, California writes: "I was very disappointed in last week's ARRL VHF/UHF contest. We got skunked on 6 meters to local only, but worked all the locals on 2 meters on up.

"A few weeks ago I started experimenting with WSPR. Interesting to see what your station hears, and who hears you. Anyway, most of my WSPR work has been on 2 meters. Though WSPR is not too popular yet, I have had some pretty amazing results. Running 20 watts to a 13 element horizontally polarized beam up 40', I usually select Norcal or Socal to aim.

"Most of the stations are in the SF bay area, but a few new ones popped up in LA and San Diego area.

"Beaming south, I still hear a few stations 100 miles plus to the north. To the south N3IZN in Fallbrook is working me at 340 miles away, and N6KOG at 387 miles several times a day (via tropo?). More stations and experiments are needed. It would be nice to see more WSPR stations up on VHF/UHF."

For more info on WSPR, visit http://wsprnet.org/ and http://physics.princeton.edu/pulsar/K1JT/.

Rich Zwirko, K1HTV wrote on September 14, about what happened in September 6: "I got up early and called CQ on CW on 144.330 MHz. An announce message was made of the DX Cluster. I logged into the ON4KST.ORG 144/432 website and notified the guys of my transmissions. A suggestion was made that I transmit on JT65A, which I started to do on 144.325 MHz. Three EI stations and G4LOH participated on the European end of the path. Eventually, when I had to QRT at 1200Z, VE1SKY in NS and K1TEO in CT joined in the test. But as far as I know, no Trans-Atlantic QSO was made. An additional attempt may be made early UTC Saturday by stations in W1 and VE1/9/VO. FYI, G4LOH was the holder of the IARU Region I 2 Meter distance record 4041 km record for 4 years with a QSO with D44TD. M0VRL added 75 miles to the record working D44TD in August of 2011. Some day, with an assist from Hepburn maps, ON4KST chat rooms and DX Cluster, two Hams will win the Brendan trophies for completing a 2 Meter QSO between Europe and the Americas (North or South)."

Rich included this article from the August 2002 issue of QST:

http://www.arrl.org/files/file/Technology/tis/info/pdf/0208036.pdf.

Dave Clemons, K1VUT of Middleboro, Massachusetts wrote: "In the ARRL VHF Contest on 6 meters, on September 8, I worked both LU9EHJ and PY1RO from EMA FN41. I believe these might have been a combination of TEP and Es since it appears that the QSOs might not have been equal distance from the equator on both ends. (Or I could be geographically challenged! Either way it was very nice to get that far south on 6 meters.)"

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for September 13 through 19 were 44, 44, 53, 77, 51, 61, and 62, with a mean of 56. 10.7 cm flux was 99.1, 100.5, 97.5, 97.3, 101.5, 104.3, and 109.8, with a mean of 101.4. Estimated planetary A indices were 6, 5, 6, 7, 6, 8, and 14, with a mean of 7.4. Estimated mid-latitude A indices were 6, 5, 5, 7, 6, 7, and 13, with a mean of 7.

http://g4foc.org/qso-party

THE FOC QSO PARTY

The next FOC QSO Party is on 22 Sept 2012 (changed from 6 Oct)

Here are the results from the FOCQP on 31 May 2012

Here are the results from the FOCQP on 22 Oct 2011

Here are results from the FOCQP on 14 May 2011

The First Class CW Operators Club, with its roots, history and management in the UK, promotes good CW operating, activity, friendship and socialising via its worldwide membership of 500. The aim of the Club is to foster and encourage a high standard of CW operating ability and behaviour on the amateur radio bands.

The FOC QSO Party is held twice a year and is open to all radio amateurs world-wide. It's not a contest but, rather, an activity day in memory of Bill Windle, G8VG (SK), a past Chairman of FOC who was very keen that we should all be as active as possible on the bands. Stations participating in the BWQP should call "CQBW," in memory of Bill.
Event
Open to all stations worldwide. FOC members contact members and non-members. Other stations contact FOC members only.

Duration
00:00Z to 23:59Z.

Categories

* FOC members: Make as many member and non-member QSOs as possible.
* Non-members: To contact as many FOC members as possible.

Exchange

* All Stations: Call "CQBW."
* FOC members: RST, Name & FOC Number.
* Non-members: RST & Name.
You are encouraged to have at least short chats with other stations.

Frequencies

* CW portions of all bands except WARC bands, which are excluded.
* Operating windows are from .015 to .040.

Scoring

* FOC members: Total QSOs and total FOC QSOs, counted once per band. For example: 302/177 would indicate total QSOs/total FOC member QSOs.

* Non-Members: Report total QSOs with FOC members, counted once per band.

Awards

* Certificates will be awarded to the station on each continent reporting the highest number of QSOs.
* Certificates will be awarded in both categories – members and non-members.

No logs or verification are required. Send your report to: kz5d@... no later than 14 days after the event.
Results will be posted on the FOC Web site and published in the FOC’s quarterly magazine, FOCUS.

About

An international team will visit 5 islands belonging to Papua New Guinea between 19 October and 4 November.

The team will be:

G3KHZ Derek
SM6CVX Hans
HB9BXE Hans-Peter
K5WQG Eddy
DL6KVA Axel
Non-ham Stig Nyman

M/V Barbarian will convey the team, starting from Kokopo in New Britain on 18 November sailing via Kavieng to Emirau.

Schedule

The islands to be activated by the full team will be:

The main team fly home on 6th November. Hans and Stig then continue to Buka on the M/V Barbarian to Buka. The remaining journey will be by air.

OM Hans - YB2DX,
Terima kasih nih sudah membuka jalan utk berhasil worked dengan TR8CA.
Receiving saya agak terganggu QRM seperti signal swedang tuning tanpa henti - dan saya agak panik....
(norak ya..?).

Mumpung 10M lagi agak terbuka dan TR8CA lumayan kuat CQing tapi blm manggil AS/OC - mangkanya saya kadang coba nyelak2 tapi gagal.

Untung YB2DX berhasil nyolek, sehingga dia menoleh ke YB land dan saya serta YC1ELI juga wkd.

Dr OM,
Nampaknya Emirau Islands/OC-103 P29VCX termasuk berlokasi di Bismarck Archipelago, jadi bisa jadi tambahan entity dalam Diamond DXCC, kecuali dari Papua New Guinia utk yang satunya.

Siang tadi saya sudah terima Diamond DXCC dari ARRL berbarengan dengan QSL card dari A25JK-Botswana. Alhamdulillah.

Tapi sayang malam ini masih blom berhasil monitor signal dari YE7E-Pontianak yg sedang ramai di pile up.

No 1116

==========

*** 4 2 5 D X N E W S ***

**** DX INFORMATION ****

==========

Edited by I1JQJ & IK1ADH

Direttore Responsabile I2VGW

3D2_cr - Announced frequencies for the 3D2C operation from Conway Reef [425DXN 1105] are as follows:

CW	1822	3503	7005	10105	14025	18075	21025	24895	28025
SSB	1835	3795	7082	-	14190	18150	21295	24950	28495
RTTY/PSK31	1835	3582	7035	10145	14081	18100	21081	24920	28081
SSTV	-	3723	7035	-	14230	-	21335	-	28680

3D2C will be QRV also on 6m and 2m EME (50375 and 144375), and on 60m SSB (5403.5). Nineteen operators (3D2TR, AD6E, AH6HY, K6MKF, K6SRZ, K9CT, K9JM, LZ1GC, N6NKT, N6PSE, PY3MM, PY5CC, PY5KD, RW4NW, RZ3FW, UA4HOX, WD5COV, YT1AD and YT3W) expect to arrive at Conway Reef and become active on 26 September, and to complete the DXpedition on 5 October. Special attention will be made to work far away stations such as Europe and Africa during those periods when propagation permits. Plans are to update their on-line log on a daily basis. QSL via YT1AD, direct or bureau, and LoTW "approximately six months following the DXpedition". Log search and further information at www.yt1ad.info/3d2c/index.html

5H - Harald, DL7VSN will be active from Tanzania between 23 September and 13 October. He will operate as 5H1HS from Zanzibar Island (AF-032) and as 5H1HS/3 from Lazy Lagoon Island (not IOTA). QSL via home call. [TNX DX World]

I - Dario, IK4MED will be active as IA5/IK4MED from Elba Island (EU-028) on 22-26 September. QSL via home call, direct or bureau. [TNX rgsbiota.org]

JT - Takeshi, JA6EV and his wife Sanae, JJ6GVX will be active as JT1EV and JT1GVX from the Ulaanbaatar DX Club station until 26 September, and again on 2-8 October. QSL via JA6EV. [TNX The Daily DX]

LU - Celebrating the 25th anniversary of Radio Club San Justo (LU7FJ), a group of operators will be active as L25FJ from Natural Reserve El Palmar on 22-23 September (maybe until the 24th). They will operate SSB, CW and digital modes on 80, 40, 20, 15, 10 and 6 metres, with two stations on the HF bands and one on 6m. QSL via LU7FJ.

OJ0 - Pasi, OH3WS will be active as OJ0W from Market Reef (EU-053) on 23-28 September. He will be QRV in his spare time on 40-10 metres.

QSL via home call, direct or bureau. [TNX The Daily DX]

SM - Frank, DL2SWW and Gabi, DF9TM will be active respectively as SD7W and SD7M from Hasslo Island (EU-138) until 26 September. QSL via home calls. [TNX rsgbiota.org]

SV9 - Bodo, DF8DX will be operate mainly CW as SV9/DF8DX from Crete (EU-015) on 1-7 October. He also plans a side trip to Dia Island (EU-187) on 3-4 October. He will not overnight on the island, and will be QRV as SV9/DF8DX/p "as long as the battery lasts". QSL via home call, direct or bureau. [TNX rsgbiota.org]

T33 - An expedition to Banaba Island (OC-018) under the callsign T33A is being organized by W2IJ and N1EMC. Plans are to depart Tarawa (T30) on 25 March 2013 and return on 10 April, with about 12 days on Banaba. Activity will be on 160-10 metres CW, SSB and RTTY with six stations and 14 operators. Current team members include AA4FL, DK1II, EA1IR, KD6XH, N1EMC, N6HC, N7CQQ, N9NS, W2IJ, W6KK and W8AEF; three more experienced DXpeditioners are being sought. If willing to join the group. email Banaba[@]T33A.com

TA - The TC Special Wireless Activity Team (www.tcswat.org) and the Giresun Radio Amateurs and Nature Sports Club will be active as TC2ZLH from Zonguldak Lighthouse on 29-30 September. QSL via TA1HZ.

W - Wayne, K9YNF reports he will be active as K9YNF/4 from Bogue Banks (NA-112) on 21-26 October. Look for him around 14260 and 18128 kHz SSB and 14070.15 and 7035 PSK31. QSL to K9YNF.

YB - Joppy, YB8XM has plans to be QRV from Babar Island (OC-271, new one for IOTA) starting on 2 November for six days [425DXN 1113]. Shu, JN6RZM (jn6rzm[@]nifty.com) is collecting donations by Paypal to purchase a better antenna for him. [TNX JN6RZM]

ZD9 - Martin, G3ZAY has been forced to cancel his onward journey from Cape Town to Tristan da Cunha [425DXN 1115]. Rob, M0VFC will still continue, and be active as ZD9UW (http://zd9uw.org.uk). He will concentrate primarily on SSB with some RTTY. This is now a single operator activation: the goal is still to enable as many people as possible to work ZD9 for the first time, so the number of bands he can activate will be limited (mostly on the higher bands).

ZL7 - Hiro, JF1OCQ reports he will be active as ZL7A from the Chatham Islands (OC-038) on 1-9 November. He will operate CW, SSB and digital modes on 80-6 metres, with an emphasis on 80 and 6m (beacon on 50117 kHz). QSL via home call, direct or bureau (e-mail requests for bureau card to jf1ocq[@]arrl.net), and LoTW.

2O12L ---> The London amateur radio station for the Olympic and Paralympic Games (www.2o12l.com) went QRT at 21.33 UTC on 9 September. The Cray Valley Radio Society team made 69,644 QSOs - which is believed to be a new world record for a special event station - in 223 DXCC countries (166

participating Olympic countries) during their 47-day operation. [TNX M0MCV]

AZORES NINE ISLANDS HUNT ---> The organizers of the "Azores Nine Islands Hunt" (http://azores-islands-hunt.com/) have announced that a certificate will be available to all who manage to contact all 9 islands during the weekend of September 28-30. The certificate will be sent by email to those eligible after the event.

DXCC NEWS ---> The following 2012 operations have been approved for DXCC credit: 3B8/IW5ELA (Mauritius), 9A8VB (Croatia), 4O7VB (Montenegro), E40VB (Palestine), E7/UA4WHX (Bosnia-Herzegovina), EY8/UA4WHX (Tajikistan), JY8VB (Jordan), UN/UA4WHX (Kazakhstan), YU9VB (Serbia), Z38VB (Macedonia) and ZA/UA4WHX (Albania). [TNX NC1L]

KOSOVO ---> On 17 September, shortly after 17 UTC, international and local operators started activity as Z60K from near Pristina. Reports indicate that this callsign will be in use for the Amateur Radio Association of Kosovo (SHRAK). QSL via G3TXF and logsearch on Club Log. Reports also indicate that the first eleven individual licenses have been issued (Z61AA, Z61AB, Z61AJ, Z61AS, Z61DD, Z61DX, Z61FF, Z61LA, Z61NS, Z61VB and Z61XO), and that individual visitor licensing is now in place, with the first visitor license issued to 9A6AA as Z6/9A6AA. The website for the local Telecommunications Regulatory Authority is at www.art-ks.org

NH8S ---> High heat conditions, lack of sleep, sunburns and mosquito bites took a toll on the team on Swains Island, and NH8S went QRT at 7 UTC on 16 September, earlier than planned. They made 105,455 QSOs with 26,010 unique callsigns (statistics can be found on www.nh8s.org). The Online QSL Request System (OQRS) has been activated, and it can be used for either direct or bureau cards.

YB LAND DX CLUB ---> To celebrate the first anniversary of the YB Land DX Club (http://www.ybdxc.net/2012/09/yb-land-dx-club-1st-anniversary.html) a special short term certificate of merit (free of charge) will be issued for contacting YBDXC members as well as other amateurs from Indonesia between 13 September and 31 October. [TNX YBDXC]

+ SILENT KEYS + Sean Smith, KG4WSS was one the of the four Americans, including the US ambassador, who were killed in the attack on the US Consulate in Benghazi on 11 September.

OM Hans,

Just wondering, saya kirim application buat yb-land-dx-club-1st-anniversary award kok ngga ada beritanya.
Is it acceptable? Rejected? or something else?

Saya kirim tgl 9/16/2012, lewat email anda.

73,

Iwan - YB1/W7NZ

The Cass Award
Too Many Awards
Well, I dreamed I saw the lights on the cluster flashing,
>Saying something about a spot.
>There were call signs listed and
>Callers calling
>And alarms were going off.
>There was a pileup building
>On the band
>That was growing like a fire.
>Hear the DX station pound the key
>On fourteen oh two three.
>Hear the DX station pound the key
>On fourteen oh two three.
One of the Local QRPers came by the other day with purpose in his stride and a glare in his eye. It was a warm, spring day, and we were sitting on the verandah with the window open. There was mostly hissing as the rig scanned a rather dead band. It was one of those lulls in the afternoon when the bands take a rest before the early evening flurry of activity. As we watched the QRPer beat his way up the hill we had the usual twinge of anxiety. We never really understood it, but we suspected it was a bit of the residual fight or flight primordial protection. For while these Local QRPers sometimes bring amusement and even a bit of newfound DX information, they often cause enough aggravation to make it wise to exit before the show begins.
We waited a bit too long, as the QRPer made eye contact, and our escape was blocked. This one was a bit overweight, sleek of head, and wearing a baseball cap. He made his way up the steps and flopped into the chair beside us, needing a few seconds to catch his breath before he began. This one seemed to be carrying the weight of a heavy load on his shoulders. "Tell me", he said, staring at us with his beady little eyes, "Why do the pileups never die down? Why is it after 10, 12, even 15 days the hordes are still calling?"
We looked at him with the usual poker face and said, "How so? Things always are crazy the first few days, but after a week no matter how rare, the din subsides and the spread narrows.
It was like we threw gasoline on a fire! "Not always true!" he shouted at us, leaning closer and waving his finger in the air. "When I first started there were more DXers and more Hams than today. And now it seems that every time there is a new one on, the pileups are bigger and they last days longer! I hear the same calls on every band and every mode working the DXpedition over and over! It isn't fair. I have a tribander and a 500 watt amp, and still I have to fight for hours to try to get a contact. Sometimes for days! And I know most of the calls in the pileup have worked the DX before! Some of them are #1 Honor Roll, and still they are in there calling and calling! Why is that?
We thought about it for a bit and then said, "You missed that rare one that was activated a few weeks ago, right?" NO!!" was the quick retort, "Not at all!!" I got them on the third day on 20 CW and then a backup on 17 phone, but I spent endless hours calling and calling. He was S9 most of the time, but I heard stations calling him who I know had it confirmed

from 15-20 years ago, and others who I heard work them an hour earlier on 20 phone! I checked the Internet log and some of them had them worked 6-7 times the first day! 40 phone, 40 CW, 30 RTTY, 17 CW, 15 phone, 10 CW! Why do they need to keep calling and calling and making it harder for me? They have monobanders and stacks and big amplifiers, and all that sophisticated software that sets off alarms when the DX shows on any band or mode they haven't logged them on. At the end of one of the operations last year, I saw a few calls that had 26-27 QSOs with the same DXpedition!! Why do they do this?

Are they duping them on the same band and mode?, we asked. No, but you only need one CW QSO and one phone QSO and one digital QSO to satisfy the DXCC. So what is the point of working them on 160 through 10 on CW? And on 160 through 10 on phone? And 160 through 10 on RTTY or PSK or whatever other mode they show up on? And 160 is really tough, so if you happen to get lucky enough to log them on 160M CW, why are there DX Cluster comments begging for 160 SSB? It makes no sense!

We were starting to see the point the QRPer was making and, although we were pretty sure of the answer, we decided to get a second opinion. So we hauled the Local QRPer up the hill a bit further to consult with the Old Timer. The Old Timer had his amp apart on the bench and was replacing the plate choke. Resonates on 25 MHz and I nearly burnt it out trying to tune this thing for 12, he explained, so I'm moving it up to 26-27 MHz. I need full power for all the bands and this thing was designed before we had 30/17/12.

The QRPer didn't seem interested in the amp redesign, and launched right into his story, with pacing back and forth and wiping the sweat off of his upper lip. Occasionally he stopped to stare at the Old Timer to make sure he was listening. The Old Timer was winding his plate choke and checking it with his grid dip meter.

He looked at the choke with a slight smile of satisfaction. Then he turned to the QRPer and said, "How many have you got worked and confirmed?" The QRPer stopped for a second, and then replied, "It is number 281 worked and I have 277 confirmed. Why?" The Old Timer added half a turn of wire, made a final measurement and put the choke down on the bench. "I've got all 340 confirmed, and with deletions, I think I'm somewhere around 366. Know why I'm working on this amp?" The QRPer stopped pacing and answered, "So you can work DX on 12 meters." "Right", the Old Timer replied.

The QRPer scratched his head and said, "But if you have all of them worked, why do you need them on 12? You have them on other bands . . . wait! I get it! You are after 12 meter DXCC, right?" "Nope, got that with 100 watts 5 years ago." "Then why work them on 12 if you already have 12 meter DXCC?" The Old Timer looked back and stated the obvious, "The DXCC Challenge. Only have 168 on 12."

Enlightenment! The QRPer jumped up and exclaimed, "I get it! The reason for the big pileups on every band is because everyone is chasing the DXCC Challenge! OK, it still makes my life difficult, but I see the reason." Then his face took on a puzzled look and he said, "But wait a minute! Red-Eyed Louie has well over 300 on 12, and I hear him in there chasing every DXpedition. Chasing stuff I know he has verified by the DXCC Desk on 12 meters. Why is he doing that?" We had the answer for that, and before the Old Timer could speak, we simply said, "CQ DX Marathon.".

The QRPer stepped back and looked at us. He wasn't happy. "That's the one that starts over every year at zero! Another award to contend with. OK, so that adds to the pileups too. But why are there DXers in there calling on every mode on every band?" We spoke in unison with The Old Timer "Leader boards."

Son of a Gun! The QRPer threw his baseball cap on the floor, clenched his fists and screamed, "So I have to compete with the regular DXers, the DX Challenge guys, the CQ DX Marathon and now this Leader board thing!! That's not fair! There are too many awards.

We thought for a moment and said, "There is no award for the Leader board. It's just a competition to see who can get their call into the on-line logs the most, and who can do it

the fastest.
"This is ridiculous!", the sleek-headed QRPer yelled. "All you bored old fellows are tying up the DX to get awards that are less important than the basic DXCC! And in some cases, there is no award at all! No wonder I can't get through for a week." He glared at us and let out a growl of exasperation and frustration. "How can we fix this?" The Old Timer shrugged and said, "It isn't broken. There is nothing to fix. DX IS! Who told you that the basic, mixed DXCC was the most important award? Just remember, son, that DX IS!
"What do you mean? You two have been saying that forever and it makes no sense! DX IS! DX IS! What does that mean? I want to work everything on the DXCC list, and that's what is important. He threw up his arms in frustration, stomped, out and ran down the hill. The Old Timer looked at the crumpled baseball cap on the floor, "Hope he doesn't sunburn his head. We turned to the Old Timer and said, "Good thing we didn't mention WPX. Lot of those DXpeditions get new prefixes. Some of the fellows are looking for new zones too." The Old Timer picked up his plate choke and looked at it carefully. Then he said, "Lot of the DXers who have thousands of QSLs never send in for any awards, either." We nodded in agreement, "For many of the QRPers, this is the hardest of the Eternal Enigmas to understand, and one of the biggest Mysteries of the Ages. It isn't the chase to work them all, or to fill in bands and modes. Or to get an award to put on the wall. It's to understand that DX IS!
And with that we left the Old Timer to work on his amp. We walked back down to the house and into the shack to wait for the polar path to open to Asia. Some times things can't be put into words, and this was one of them. DX IS! Follow the advice of Lord Baden Powell, the Hero of Mafeking, and Be Prepared. Be prepared for big pileups. Huge pileups with a lot of familiar calls!
by Paul VE1DX

Cass, WA6AUD
Hugh Cassidy, or "Cass" as he was known, began the West Coast DX Bulletin (WCDXB) 1968, publishing it for 11 years, every week, without missing one . . . and he and his XYL Virginia did it alone! That's right, a two person publishing team who used the cover "The Marin County DX Group." At its peak, the WCDXB had a circulation of 3200 . . . 2600 in the US, Canada and Mexico and 600 overseas. This was all done by hand by these two people! Their equipment in the shack consisted of a Multilith 1250 offset printing press, a big camera and a processor for making the paper printing plates.
The WCDXB had the usual DXpedition information and propagation forecasts, etc. However, what made it unique was Cass's editorial every week where he put a humorous spin on the DX events of the day. He did this by inventing a unique writing style, along with a number of fictitious characters that argued about DXing, DXpeditions and almost anything else that was controversial at the time. In the limelight were the Local QRPers. They were not QRP operators in the true sense . . . in fact many of them had respectable linear amplifiers and a few even had monobanders to go with the extra power. They were deemed to be DXers with country totals somewhere between 100 and 150. They had enough experience to ask the right questions, but never really understanding the answers. The Locals had the interest, energy and motivation. They wanted to know everything about DXing, and they were the ones who were always seeking the true meaning of DX IS, trying to understand
the Mysteries of the Ages, the Inevitable Truths and the Eternal Enigmas of DXing.
The Old Timer knew everything about DX and DXing. He had everything worked, and had grown up with amateur radio. It was rumored he was there when the first DXCC QSO was made in 1945. He never tired of DXing and was always ready for the next new one. The old Timer had all the answers, but it was difficult to get him to share them with the QRPers. The Old Timer was both patient and impatient at the same time, realizing that in many cases if you had to ask the question, you wouldn't understand the answer! Sunspot Louie watched the

solar flux and the Ap index. His cousin, Red-Eyed Louie, was forever spending long days and nights tuning the bands . . . he always knew where the DX was, when it was on, etc. His legendary red eyes came from scanning the dials looking for DX to report, and, more recently, from watching DX Cluster screens. There was the Legion of Handwringers, the malcontents who were forever finding something to worry and complain about. The Hero of Mafeking, a relative of Baden Powell, was always around prior to DXpeditions warning the Deserving DXers to "Be prepared!"

The Palos Verdes Sundancers were the ones who brought on the solar cycles . . . they first appeared near the bottom of Cycle 20 when QST was reporting the possibility of another Maunder Minimum. There was historical evidence that there was a time some hundreds of years ago when there were no sunspots for a period of about seventy years. This fact was discovered by someone named Maunder, hence the name. In order to prevent such a dire reoccurrence, the Palos Verdes Sundancers got out their grass skirts and the big bass bongo, Big DX, and danced up the sunspots every 11 years or so. The problem with the Sundancers was that after they got the flux up, they lost interest and stopped dancing This plunged us into another cycle minimum and they had to be coaxed into doing it all over again.

Terms such as The Great Days of DXing, Only The Deserving, Be a Believer, and of course DX IS! all came from the wit and wisdom of Hugh Cassidy and the WCDXB. We still hear these phrases today being used by seasoned DXers and newcomers alike, some perhaps not even aware of their origin. Nevertheless, they have become part of the DX experience, jargon exchanged by true-blue DXers in their quest for just one more new one!

In 1979, Hugh Cassidy decided to cease publication of the WCDXB. In his own words, "In simple truth, the bulletin was taking all our time every day of the week. There were times when I would work until two or three in the morning on the bulletin and then go right back to work when we arose in the morning." When Hugh ceased publication, there were other editors who claimed they were the successor to Cass. This is not entirely true. Again, in Hugh Cassidy's own words: "On the WCDXB, I was the only editor. I ran its course and knocked it on the head when I got to the point where I had to end it. If some say they are the successor, it is not quite true. One group wanted to buy the mailing list, I sold that. I never did sell the bulletin." Cass went on to be the DX Editor for CQ Magazine for 10 years.

WA6AUD was elected to the CQ Magazine DX Hall of Fame not a DXpeditioner, but because of his literary contributions to DXing. And this honor was well deserved. Absolutely.

We miss the WCDXB. WA6AUD's legacy lives on in the minds of the Deserving True-Blue DXers, who, for the most part, have come to understand the true meaning of DX IS! Cass made us laugh at ourselves. He made us think about DXers and DXing! He showed us our strengths and weaknesses, and most of all, he made us better DXers.

* The State of DXing - a story by Cass from the 1979-05-23 issue of the West Coast DX Bulletin
* DX Stories - written in Cass' style by Paul VE1DX

RULES

The Cass Award will be presented each March to the single-operator DXpedition that during the previous year worked the most unique callsigns.

* To qualify as a DXpedition, the operation must
* take place in a single DXCC entity in which the operator does not reside or own property
* use radio transmitting and receiving equipment brought to the operating site from outside the DXCC entity
* use antennas either brought to the operating site from outside the DXCC entity or constructed from local materials

* To qualify as a single-operator DXpedition, all QSOs must be have been made by one operator.
* If a submitted log encompasses QSOs made over an interval longer than 4 weeks, only QSOs from the first 4 weeks will be counted unless a later starting date and time is specified.
* Logs must be completely uploaded to Club Log before 0000Z on February 1st.
* Logs will be checked against a list of known active callsigns; callsigns not found in this list for which positive confirmation cannot be obtained will not count toward this award.

SUBMITTING A LOG

To submit your DXpedition's log for the 2012 Cass Award,
1. If you don't have a Club Log account for your DXpedition's station callsign, create one.
2. Login to the Club Log account for your DXpedition's station callsign.
3. In the Navigation bar, click Settings.
4. Click the Cass Award button .
5. After reviewing the Cass Award rules, check the I have read and accept the rules of the Cass Award box.
6. Submit your DXpedition's log by exporting an ADIF file from your logging application and uploading it to your DXpedition's station callsign account in Club Log before 0000Z on February 1st. Each QSO record in this file must include the following fields:
* CALL
* QSO_DATE
* TIME_ON
* BAND
* MODE
7. Send an email message declaring your participation to Submission@... ; if your log encompasses QSOs made over an interval longer than 4 weeks and you wish to specify a start time other than that of the first QSO, specify this start time in the message.
A running leaderboard for the 2012 Cass Award is available here .

WINNERS

The first annual Cass Award winner - for the year 2012 - will be announced in March 2013.

CONTRIBUTORS
Contributions to the Cass Award have been made by:
* Art N4PJ
* Club Log (Michael G7VJR)
* Dave K1ZZ
* Duncan KF6ILA
* DXLab (Dave AA6YQ)
* Franco 3A2MW
* In honor of Elmer "Bud" Frohart W9DY, the first Elmer (Bill W9OL)
* In honor of his XYL Ruth, who supported their hobby 110% (Brendan G4DYO)
* Jeff KE9V
* Jerry K3BZ
* Networks & More! (Jamie W2QO)
* Paul VE1DX
* Ray W2RS
* Rick K8GI

The State of DXing

From the 23 May 1979 issue of The West Coast DX Bulletin by Hugh Cassidy, WA6AUD

Often when one collects a reasonable number of DXCC counters, possibly a bare minimum of three hundred or so, the time is right for some contemplation of the State of DXing and the parlous future of it. Last week one of the local QRPers came steaming up the hill to demonstrate, placards and commotion and everything else, all this being one of our fine old California traditions.

“I’m here to protest the ranks of DXers infiltrated by the Undeserving,” the QRPer proclaimed, “it is high time to stop the slide to anarchy and return to the good days we had when Gus Browning and Don Miller were really producing some real rare DX.” We had to know more.

“I’m talking,” the QRPer roared on, “about the fellow who comes in on top of a DX station to advise some of the other stations that he is out of the band. And there is the fellow who comes in right on top of the DX station’s frequency to ask where he is listening, and asking this usually when there is a wild uproar going on twenty kaycees up the band. And the idiot who keeps asking for QSL information even though it is given and repeated about every 5 QSOs. Can’t these jerks listen?”

We were beginning to understand things a little and suspected this QRPer was really working the DX these days and also doing a lot of listening. “Anything else,” we inquired, hoping to soothe the throb of indignation, but he was not finished . . . yet. “And don’t forget the one who comes on the DX frequency to endlessly ask the DX’s location. Even the obvious ones they ask about. What’s wrong with these fellows, anyways?” Son of a Gun, what could we say to all this when everyone knows that these things do happen. But we had a true-blue Deserving type who asked questions needing answers and obviously worried about how the State of DXing was going.

“Sometimes we hear similar things on the two-meter repeaters,” we said, “maybe not exactly the same, but the same tactics. Why do you suppose they are there?” The QRPer put down his sign to lean on it and think. “The only thing I can figure,” he said, is that they are doing it to disrupt things,” and we knew that he soon would be quieting down. “Don’t you think that maybe they are doing the same thing on twenty that they are doing on two?” we asked, “and that every reaction they hear is an encouragement to try harder.”

It was startling but still a pleasure to see the changes come. The QRPer smashed his sign against the ground, retaining only the handle. “You are right”, he said, “and from now on I will be quiet but saving this club should I meet up with one personally.” And with that he started down the hill, but stopped before going too far. “Tell me”, he said, “How did you ever figure that out?”

Actually we didn't. "The Old Timer had to advise us on this," we admitted, "he did this years back. About the time Gus Browning and Don Miller were out on their trips." For actually though the characters change, the theme is often repeated and encouraged. It's one of the Mysteries of the Ages and the Eternal Enigmas of DXing!

http://www.ve1dx.net/Stories/stories.html

DX Stories by Paul, VE1DX
Written in the style of my friend, Hugh Cassidy, WA6AUD (SK)

The stories below are based on the characters and writing style developed by Hugh Cassidy, WA6AUD (SK) , the editor of the West Coast DX Bulletin from 1968 until 1979. I never met Hugh Cassidy in person, but we spoke many times on the telephone and exchanged numerous letters. In November 1996, Hugh Cassidy sent me his entire collection of WCDXB files, all original copies totalling about 550 issues. For that, I am eternally grateful and I thank WA6AUD for allowing me to be the custodian of over a decade of his contributions to DXing and amateur radio.

While I'm no Hugh Cassidy, I found it easy to copy the writing style and use the characters he'd invented in the WCDXB to get my message across. Now and then, an interesting, controversial, or just plain funny topic surfaces in the DX world. If I have the time and inclination, I write about it

Hugh Cassidy, or "Cass" as he was commonly referred to, began the West Coast DX Bulletin 1968. It has been reported that he did this, in part, as an effort to explain Don Miller, W9WNV, to the DX community. While this may be partially true, Hugh told me "Our arrival on the scene was more coincident than an attempt to jump into the Don Miller dispute." Nonetheless, Hugh was a straight shooter on that topic. In the late sixties, the WCDXB reported the Miller saga in a neutral manner. Unlike other publications of the day, Hugh made no attempt to editorialize the issue or give it any spin. In later years, he did make his feelings known on W9WNV in true Cass style.

WA6AUD published the WCDXB for 11 years, every week, without missing one . . . and he and his XYL Virginia did it alone! That's right, a two person publishing team who used the cover "The Marin County DX Group." At its peak, the WCDXB had a circulation of 3200 . . . 2600 in the US, Canada and Mexico and 600 overseas. This was all done by hand by these two people! Their equipment in the shack consisted of a MULTILITH 1250 offset printing press, a big camera and a processor for making the paper printing plates.

The WCDXB had the usual DXpedition information and propagation forecasts, etc. However, what made it unique was Cass's editorial every week where he put a humorous spin on the DX events of the day. He did this by inventing a unique writing style, along with a number of fictitious characters that argued about DXing, DXpeditions and almost anything else that was controversial at the time. In the limelight were the Local QRPers. They were not QRP operators in the true sense . . . in fact many of them had respectable linears and a few even had monobanders to go with the extra power. They were deemed to be DXers with country totals somewhere between 100 and 150. They had enough experience to ask the right questions, but never really understanding the answers. The Locals had the interest, energy and motivation. They wanted to know everything about DXing, and they were the ones who were always seeking the true meaning of DX IS, trying
to understand the Mysteries of the Ages, the Inevitable Truths and the Eternal Enigmas of DXing.

The Old Timer knew everything about DX and DXing. He had everything worked, and had grown up with amateur radio. It was rumored he was there when the first DXCC QSO was made

in 1945. He never tired of DXing and was always ready for the next new one. The old Timer had all the answers, but it was difficult to get him to share them with the QRPers. The Old Timer was both patient and impatient at the same time, realizing that in many cases if you had to ask the question, you wouldn't understand the answer! Sunspot Louie watched the solar flux and the Ap index. His cousin, Red-Eyed Louie, was forever spending long days and nights tuning the bands . . . he always knew where the DX was, when it was on, etc. His legendary red eyes came from scanning the dials looking for DX to report, and, more recently, from watching DX Cluster screens. There was the Legion of Handwringers, the malcontents who were forever finding something to worry
and complain about. The Hero of Mafeking, a relative of Baden Powell, was always around prior to DXpeditions warning the Deserving DXers to "Be prepared!"

The Palos Verdes Sundancers were the ones who brought on the solar cycles . . . they first appeared near the bottom of Cycle 20 when QST was reporting the possibility of another Maunder Minimum. There was historical evidence that there was a time some hundreds of years ago when there were no sunspots for a period of about seventy years. This fact was discovered by someone named Maunder, hence the name. In order to prevent such a dire reoccurrence, the Palos Verdes Sundancers got out their grass skirts and the big bass bongo, Big DX, and danced up the sunspots every 11 years or so. The problem with the Sundancers was that after they got the flux up, they lost interest and stopped dancing This plunged us into another cycle minimum and they had to be coaxed into doing it all over again.

Terms such as The Great Days of DXing, Only The Deserving, Be a Believer, and of course DX IS! all came from the wit and wisdom of Hugh Cassidy and the WCDXB. We still hear these phrases today being used by seasoned DXers and newcomers alike, some perhaps not even aware of their origin. Nevertheless, they have become part of the DX experience, jargon exchanged by true-blue DXers in their quest for just one more new one!

In 1979, Hugh Cassidy decided to cease publication of the WCDXB. In his own words, "In simple truth, the bulletin was taking all our time every day of the week. There were times when I would work until two or three in the morning on the bulletin and then go right back to work when we arose in the morning." When Hugh ceased publication, there were other editors who claimed they were the successor to Cass. This is not entirely true. Again, in Hugh Cassidy's own words: "On the WCDXB, I was the only editor. I ran its course and knocked it on the head when I got to the point where I had to end it. If some say they are the successor, it is not quite true. One group wanted to buy the mailing list, I sold that. I never did sell the bulletin."

Finally, I will mention that, to my knowledge, WA6AUD is the only person ever elected to the CQ Magazine DX Hall of Fame who was not a DXpeditioner. He was so honored because of his literary contributions to DXing. And this honor was well deserved. Absolutely.

We miss the WCDXB. WA6AUD's legacy lives on in the minds of the Deserving True-Blue DXers, who, for the most part, have come to understand the true meaning of DX IS! Cass made us laugh at ourselves. He made us think about DXers and DXing! He showed us our strengths and weaknesses, and most of all, he made us better DXers.

Pagi tadi 24/09/2012 - abt 00.27 UTC.
Di 10M ada E51AND CQing - saya mengharap dan menduga Andy masih di North Cook Island tapi setelah lihat di QRZ.com ternyata sudah di Rorotonga/South Cook Island sejak 22/09/2012.

Di pile up yg masih tidak begitu ramai ada beberapa station memanggil Andy, termasuk satu station dari Columbia (HK6SNJ).
Saat Andy menerima satu station lain, HK6SNJ tetap berusaha memanggil sehingga Andy bilang : "Pse HK6SNJ standby..".

Rupanya penerimaan signal Andy di Colombia kurang baik sehingga waktu diminta standby, HK6SNJ mengira dipanggil dan dia lalu memberikan report etc. Padahal E51AND tidak mengacuhkan lagi dan tetap melanjutkan QSO dg stasiun lainnya. Mungkin karna receivenya masih hawar2 HK6SNJ lanjut lagi main tabrak dan "thanks & 73", tapi Andy tetap tidak mendengar atau mungkin juga tidak menggubris, malahan tak lama kemudian malahan QRT.

Beberapa saat kemudian muncul spot dari HK6SNJ di DX Watch yg jadinya seperti konfirmasi/klarifikasi atau asi2 lainnya dari HK6SNJ.

The State of DXing

From the 23 May 1979 issue of The West Coast DX Bulletin by Hugh Cassidy, WA6AUD

Often when one collects a reasonable number of DXCC counters, possibly a bare minimum of three hundred or so, the time is right for some contemplation of the State of DXing and the parlous future of it. Last week one of the local QRPers came steaming up the hill to demonstrate, placards and commotion and everything else, all this being one of our fine old California traditions.

“I’m here to protest the ranks of DXers infiltrated by the Undeserving,” the QRPer proclaimed, “it is high time to stop the slide to anarchy and return to the good days we had when Gus Browning and Don Miller were really producing some real rare DX.” We had to know more.

“I’m talking,” the QRPer roared on, “about the fellow who comes in on top of a DX station to advise some of the other
stations that he is out of the band. And there is the fellow who comes in right on top of the DX station’s frequency to ask where he is listening, and asking this usually when there is a wild uproar going on twenty kaycees up the band. And the idiot who keeps asking for QSL information even though it is given and repeated about every 5 QSOs. Can’t these jerks listen?”

We were beginning to understand things a little and suspected this QRPer was really working the DX these days and also doing a lot of listening. “Anything else,” we inquired, hoping to soothe the throb of indignation, but he was not finished . . . yet. “And don’t forget the one who comes on the DX frequency to endlessly ask the DX’s location. Even the obvious ones they ask about. What’s wrong with these fellows, anyways?” Son of a Gun, what could we say to all this when everyone knows that these things do happen. But we had a true-blue Deserving type who
asked questions needing answers and obviously worried about how the State of DXing was going.

“Sometimes we hear similar things on the two-meter repeaters,” we said, “maybe not exactly the same, but the same tactics. Why do you suppose they are there?” The QRPer put down his sign to lean on it and think. “The only thing I can figure,” he said, is that they are doing it to disrupt things,” and we knew that he soon would be quieting down. “Don’t you think that maybe they are doing the same thing on twenty that they are doing on two?” we asked, “and that every reaction they hear is an encouragement to try harder.”

It was startling but still a pleasure to see the changes come. The QRPer smashed his sign against the ground, retaining only the handle. “You are right”, he said, “and from now on I will be quiet but saving this club should I meet up with one personally.” And with that he started down the hill,
but stopped before going too far. “Tell me”, he said, “How did you ever figure that out?”

Actually we didn’t. “The Old Timer had to advise us on this,” we admitted, “he did this years back. About the time Gus Browning and Don Miller were out on their trips.” For actually though the characters change, the theme is often repeated and encouraged. It’s one of the Mysteries of the Ages and the Eternal Enigmas of DXing!

DX Stories by Paul, VE1DX
Written in the style of my friend, Hugh Cassidy, WA6AUD (SK)

The stories below are based on the characters and writing style developed by Hugh Cassidy, WA6AUD (SK) , the editor of the West Coast DX Bulletin from 1968 until 1979. I never met Hugh Cassidy in person, but we spoke many times on the telephone and exchanged numerous letters. In November 1996, Hugh Cassidy sent me his entire collection of WCDXB files, all original copies totalling about 550 issues. For that, I am eternally grateful and I thank WA6AUD for allowing me to be the custodian of over a decade of his contributions to DXing and amateur radio.

While I’m no Hugh Cassidy, I found it easy to copy the writing style and use the characters he’d invented in the WCDXB to get my message across. Now and then, an interesting, controversial, or just plain funny topic surfaces in the DX world. If I have the time and inclination, I write about it

Hugh Cassidy, or “Cass” as he was commonly referred to, began the West Coast DX

Bulletin 1968. It has been reported that he did this, in part, as an effort to explain Don Miller, W9WNV, to the DX community. While this may be partially true, Hugh told me “Our arrival on the scene was more coincident than an attempt to jump into the Don Miller dispute.” Nonetheless, Hugh was a straight shooter on that topic. In the late sixties, the WCDXB reported the Miller saga in a neutral manner. Unlike other publications of the day, Hugh made no attempt to editorialize the issue or give it any spin. In later years, he did make his feelings known on W9WNV in true Cass style.

WA6AUD published the WCDXB for 11 years, every week, without missing one . . . and he and his XYL Virginia did it alone! That’s right, a two person publishing team who used the cover “The Marin County DX Group.” At its peak, the WCDXB had a circulation of 3200 . . . 2600 in the US, Canada and Mexico and 600 overseas. This was all done by hand by these two people! Their equipment in the shack consisted of a MULTILITH 1250 offset printing press, a big camera and a processor for making the paper printing plates.

The WCDXB had the usual DXpedition information and propagation forecasts, etc. However, what made it unique was Cass’s editorial every week where he put a humorous spin on the DX events of the day. He did this by inventing a unique writing style, along with a number of fictitious characters that argued about DXing, DXpeditions and almost anything else that was controversial at the time. In the limelight were the Local QRPers. They were not QRP operators in the true sense . . . in fact many of them had respectable linears and a few even had monobanders to go with the extra power. They were deemed to be DXers with country totals somewhere between 100 and 150. They had enough experience to ask the right questions, but never really understanding the answers. The Locals had the interest, energy and motivation. They wanted to know everything about DXing, and they were the ones who were always seeking the true meaning of DX IS, trying
to understand the Mysteries of the Ages, the Inevitable Truths and the Eternal Enigmas of DXing.

The Old Timer knew everything about DX and DXing. He had everything worked, and had grown up with amateur radio. It was rumored he was there when the first DXCC QSO was made in 1945. He never tired of DXing and was always ready for the next new one. The old Timer had all the answers, but it was difficult to get him to share them with the QRPers. The Old Timer was both patient and impatient at the same time, realizing that in many cases if you had to ask the question, you wouldn’t understand the answer! Sunspot Louie watched the solar flux and the Ap index. His cousin, Red-Eyed Louie,
was forever spending long days and nights tuning the bands . . . he always knew where the DX was, when it was on, etc. His legendary red eyes came from scanning the dials looking for DX to report, and, more recently, from watching DX Cluster screens. There was the Legion of Handwringers, the malcontents who were forever finding something to worry and complain about. The Hero of Mafeking, a relative of Baden Powell, was always around prior to DXpeditions warning the Deserving DXers to “Be prepared!”

The Palos Verdes Sundancers were the ones who brought on the solar cycles . . . they first appeared near the bottom of Cycle 20 when QST was reporting the possibility of another Maunder Minimum. There was historical evidence that there was a time some hundreds of years ago when there were no sunspots for a period of about seventy years. This fact was discovered by someone named Maunder,
hence the name. In order to prevent such a dire reoccurrence, the Palos Verdes Sundancers got out their grass skirts and the big bass bongo, Big DX, and danced up the sunspots every 11 years or so. The problem with the Sundancers was that after they got the flux up, they lost interest and stopped dancing This plunged us into another cycle minimum and they had to be coaxed into doing it all over again.

Terms such as The Great Days of DXing, Only The Deserving, Be a Believer, and of course DX IS! all came from the wit and wisdom of Hugh Cassidy and the WCDXB. We still hear these phrases today being used by seasoned DXers and newcomers alike, some perhaps not even aware of their origin. Nevertheless, they have become part of the DX experience, jargon exchanged by true-blue DXers in their quest for just one more new one!

In 1979, Hugh Cassidy decided to cease publication of the WCDXB. In his own words, “In simple truth, the bulletin was taking all our time every day of the week. There were times when I would work until two or three in the morning on the bulletin and then go right back to work when we arose in the morning.” When Hugh ceased publication, there were other editors who claimed they were the successor to Cass. This is not entirely true. Again, in Hugh Cassidy’s own words: “On the WCDXB, I was the only editor. I ran its course and knocked it on the head when I got to the point where I had to end it. If some say they are the successor, it is not quite true. One group wanted to buy the mailing list, I sold that. I never did sell the bulletin.”

Finally, I will mention that, to my knowledge, WA6AUD is the only person ever elected to the CQ Magazine DX Hall of Fame who was not a DXpeditioner. He was so honored because of his literary contributions to DXing. And this honor was well deserved. Absolutely.

We miss the WCDXB. WA6AUD’s legacy lives on in the minds of the Deserving True-Blue DXers, who, for the most part, have come to understand the true meaning of DX IS! Cass made us laugh at ourselves. HK6SNJ memang begitu om Hen.. Saat saya ikut Worked All Europe Contest kemaren, dia minta di log... Padahal saya bilang: I'm hunting station from Europe .. Only Europe...

Plz log this QSO.. Katanya..

Yah udah saya tulis saja di kertas... Dan sdh saya kirimi dia qsl card direct...

Semangatnya dia luar biasa lho. Tapi yah itu tadi... Suka nabrak... Hahhahahahaha..

OM Ndut,
Kalo seperti itu masih mendinganlah, kesempatan ketemu stasiun Indonesia yg buat dia mungkin jarang2 bisa ketemu. Tapi khan memang ada QSO, walaupun maksa. HI

Nah, waktu dengan Andy/E51AND ini jadi lucu, si Andy ngomong dengan siapa - dia ikut nyahut walowpun gak nyambung.
Mungkin karna gak jelas tapi dia sempat dengar callsignya disebut Andy, maka dia selesaikan QSOnya dg report dan terakhir tnx 73 mungkin juga sambil doa : "Semoga E51AND mendengar dia".

Ini masuk categori "blind call" dong ya ?

73,
hen-yc0qr

HK6SNJ memang begitu om Hen.. Saat saya ikut Worked All Europe Contest kemaren, dia minta di log... Padahal saya bilang: I'm hunting station from Europe .. Only Europe...

Plz log this QSO.. Katanya..

Yah udah saya tulis saja di kertas... Dan sdh saya kirimi dia qsl card direct...

Semangatnya dia luar biasa lho. Tapi yah itu tadi... Suka nabrak... Hahhahahahaha..

http://www.ybdxc.net/2012/09/the-state-of-dxing-dx-stories-by-paul.html

Pagi tadi 24/09/2012 - abt 00.27 UTC.
Di 10M ada E51AND CQing - saya mengharap dan menduga Andy masih di North Cook Island tapi setelah lihat di QRZ.com ternyata sudah di Rorotonga/South Cook Island sejak 22/09/2012.

Di pile up yg masih tidak begitu ramai ada beberapa station memanggil Andy, termasuk satu station dari Columbia (HK6SNJ).
Saat Andy menerima satu station lain, HK6SNJ tetap berusaha memanggil sehingga Andy bilang : "Pse HK6SNJ standby..".

Rupanya penerimaan signal Andy di Colombia kurang baik sehingga waktu diminta standby, HK6SNJ mengira dipanggil dan dia lalu memberikan report etc. Padahal E51AND tidak mengacuhkan lagi dan tetap melanjutkan QSO dg stasiun lainnya. Mungkin karna receivenya masih hawar2 HK6SNJ lanjut lagi main tabrak dan "thanks & 73", tapi Andy tetap tidak mendengar atau
mungkin juga tidak menggubris, malahan tak lama kemudian malahan QRT.

Beberapa saat kemudian muncul spot dari HK6SNJ di DX Watch yg jadinya seperti konfirmasi/klarifikasi atau asi2 lainnya dari HK6SNJ.
No worked guy..!

Gud DX

COLOANE ISLAND

Coloane is one of the two main islands of the Macau Special Administrative Region, located directly south of Macau's other main island, Taipa, and east of Hengqin Island of Zhuhai in Guangdong province.

Coloane was known in Cantonese as Gau Ou Saan; the Portuguese name is derived from the Cantonese pronunciation of Gwo Lou Waan (過路環, lit. "Passing-road Ring").

Coloane has an area of 8.07 km² (4-km long) and is 5.6 km from the Macau Peninsula. It is connected to Taipa by a 2.2 km land-fill bridge, the Estrada do Istmo, however land reclamation has physically connected the two islands and a new town called Cotai has been built between Taipa and Coloane, which is home to the Cotai Strip and many other casinos under development.

The narrowest part of Coloane is 300 metres. The highest points in Macau are eastern and central Coloane, with the highest point being the 171-metre Alto de Coloane. The northern shore of the island is 4.5 m deep, and is the site of the Macau Deepwater Port. The eastern Hac Sa Beach and the southern Cheoc Van Bay are popular swimming beaches. At Baía de Hác Sá there is a Portuguese restaurant called "Fernandos", famous amongst locals in Macau and tourists from Hong Kong.

From the Song Dynasty onwards and until the Portuguese arrival in 1864, Coloane was a sea salt farm for China. After their arrival, the Portuguese made Macau an important trading port, but Coloane remained deserted, which was used as a base by pirates until 1910. The island has become more populated after the Estrada do Istmo was finished in 1969.

QSL INFO

You can send your QSL-card via BUREAU or DIRECT.

QSL manager: Antonio Cannataro IZ8CCW

Antonio Cannataro
Via Don Minzoni 24
87040, Marano Marchesato – CS -Italy

To receive XX9TTT QSL-card is required an appropriate SASE or SASE+IRC or SAE+$ (USD) for direct mail return.

Consider that in Italy postage rate for letters are:
€ 0.75 for 20 gr. letter to Europe;
€ 1.60 for 20 gr. letter to USA;
€ 2,00 for 20 gr. letter to Oceania & South America.

QSLs without an appropriate contribution will be answered via bureau.

If you send your QSL via direct, please don’t send also via bureau and vice versa.

Thank you so much!

OM,
Judul lengkapnya "Confirming QSOs - Am I in His Log ?" - potongan artikel yg ditulis Bernie/W3UR pada kolom How's DX di QST - December 2011.
Karena cukup menarik, saya kutip tulisannya, kalo disadur takut salah terjemahannya :

Everyone who has been DXing for more than a few minutes has worked a DX station then afterward wonder to themselves and even to others "was that a good QSO?".
Whether on SSB,CW,RTTY or the other digital modes, it happens. The DX station will say something like "W3U YOU ARE 599".
You come back and give your full call one or more times, hoping the DX station gets it this time, and then give the DX station a report back. This is immediately followed by the DX station sending TU or thank you as he continues along his way through the pileup.
Seconds later you are left scratching (HI-QR) your head wondering did he get my full call sign correct or not?. All he said was thanks and went back to the pileup. Even your friends won't be able to help you to know for sure that the DX station indeed got your full call.

So how do you make sure the DX station gets your full correct call sign? Here's a trick I learned from my good friend and next door neighbor Frank Donovan, W3LPL. Never, and I mean NEVER, give the DX station a signal report until you know he has your call sign correctly. So when the DX station say, for example, "W3U YOU ARE 599", call him again giving only your call sign and not a report. Wait for him to give your full call and report again. Once you are sure he has your full and complete call sign then give the report. If everyone in the pileup of the DX station did this, the DX operator would eventually figure it out.

The DX station on the other hand is not at fault for sending W3U YOU ARE 599. After all he may not have not copied the full call sign and it is his job to keep the pileup moving. Sending W3U? just gets many to continue calling because some don't listen carefully enough. Instead the DX station need to get as much of the call sign as possible and then give the report to keep the rest in the pileup "thinking and having the feeling" that this op knows how to operate. At the same time it is extremely important for the DX station to send the full call sign of the station he just workwed and some kind of confirmation such as TU on CW or THANK YOU on Phone.

Semoga benar menarik dan bisa jadi salahsatu trick yg bisa kita gunakan dalam DXing untuk menghindari note dari DX station : "SRI U R NOT IN MY LOG".

DXNL 1799 - Sep 26, 2012
DX Newsletter

3A, MONACO
Nobby,5A/G0VJG, will be active from Monaco without his XYL from Oct 1-5. QSL via G4DFI.

5H, TANZANIA
Arne,OH2NNE, will be active as 5H2DK from Moshi (Loc KI86qq) using an Icom 706 MKIIG, SG-500 (100 watts amplifier), A3S tribander (10/15/20m) and dipoles from Oct 2-17. There may be also sporadic activity using a portable setup from different locations from Oct 18-27. This will be a one man operation in SSB only. European stations are asked to call 5 up and all others 10 up. QSL via homecall.

5Z, KENYA
Sig,NV7E, will take part in the upcoming WWDX RTTY Contest (Sep 29/30) as SOABHP signing 5Z4EE from Nairobi. He announced to join also the WWDX SSB Contest (Oct 27/28) and the WWDX CW Contest (Nov 24/25). QSL via homecall, preferably direct or via bureau.

BY, CHINA
Members of the Dongcheng District Radio Club (BY1WXD) will be QRV as BY1WXD/0 from the Tibet Autonomous Region (near Lhasa, Loc NL59hi) between Sep 27 and Oct 7. OPs will be: Che,BA7CK, XiangQian,BA9TX, Xu,BA8IK, Donghui,BD2FW, Gu,BD4TS, Zheng,BD5FFK, Ampear,BD5QDM, Youjun,BD5SO, Li,BD9GQ, Lin,BG0GE, BG3MTK, BG5TOW, Lihua,BG6MA, Nalan,BG9API, and Xiaolei,BG9XE. Operation will take place in CW/SSB/RTTY/PSK on 40m-6m with two IC-7000 and SpiderBeams.

CT3, MADEIRA ISLANDS, AF-014
Members of the Rhein Ruhr DX Association (RRDXA) will be QRV again from Santana on Ilha da Madeira (AF-014, DIP MA-001, PIP MD-001, WLOTA 0053, WFF CTFF-030, DPRN FF-101) signing CR3L in the multi-OP category of the WWDX RTTY Contest (Sep 29/30). QSL via DJ6QT.
See also: http://www.cr3l.de

FO, FRENCH POLYNESIA
Didier,F6BCW, is going to visit several Polynesian islands between Oct 2 and Nov 8. He will use a straight key only running 100 watts into a dipole:

Oct 2-6:	Tahiti	(OC-046), no or little operation
Oct 6-15:	Huahine	(OC-067), 7-28 MHz
Oct 15-19:	Raiatea	(OC-067), 18/14/10 MHz
Oct 19-22:	Tahaa	(OC-067), 18/14/10/7 MHz
Oct 22-26:	Maupiti	(OC-067), 18/14/10 MHz

Oct 22-Nov 8: Huahine (OC-067), 7-28 MHz
Didier has applied for a special callsign but if he does not get it he will use FO/F6BCW. QSLs via F6BCW after his return.

JA, JAPAN, AS-007
The special event station 8J7NPMG celebrates the "25th All Japan Health and Welfare Festival" (Nenrin-pic) from Miyagi (JCG 06013) and Sendai (JCC 601) in Miyagi prefecture on Honshu Island (AS-007, WLOTA 2376) until Oct 16. QSL via bureau.

JT, MONGOLIA
Takeshi,JA6EV, and his XYL Sanae,JJ6GVX, are active on the bands as JT1EV and JT1GVX from the Ulaanbaatar DX Club clubstation until Sep 26 and from Oct 2-8. QSL via JA6EV.

KP2, US VIRGIN ISLANDS, NA-106
Bob,NQ3X, and his XYL are moving to St. Croix by the end of this month. He plans to show up on all HF bands as KP2/NQ3X as soon as possible. QSL via homecall, preferably direct, LoTW or eQSL.

LX, LUXEMBURG
Werner,DC8QT, Peter,DL2YCA, Peter,DF7EME, Burkhard,DF8XC, Frank,DL8LR, Helmut,DF7ZS, and Philippe,LX2A, plan to join the Multi 2 category of the CQWW RTTY Contest as LX7I from Eschdorf. QSL via LX2A.
See also: http://www.lx2a.com

OD, LEBANON
John,OD5RW, is working in CW, SSB, RTTY, SSTV and other digital modes including D-Star on 80m-70cm again. QSL via K8NA.

PJ2, CURACAO, SA-099
Jeoff,PJ2/PD4JOF, is on the air until Sep 29. QSL via homecall.

P4, ARUBA, SA-036
Helmut,DF7ZS, will be on honeymoon during October but plans to take part in the WAG Contest as P40Z from the shack of P49V on Aruba. He may work also some QSOs before and after the contest. QSL via homecall.
See also: http://www.df7zs.de

Jim,W4TMO, and Bert,N4CW, want to participate in the WWDX RTTY Contest as P40G. The log will be uploaded to the LoTW.

SP, POLAND
The special event station HF28JP remembers the priest Jerzy Popieluszko who was murdered in 1984. Activities will take place from Oct 1-19. QSL via SP2KFL. See also: http://www.sp2kfl.org/index.php/dyplom-hf28jp

TF, ICELAND, EU-021
Members of the "Tango Fox Radio Foxes" (Andres,TF3AM, Seli,TF3AO, and Jon,TF3PPN) will sign TF2RR in the WWDX RTTY Contest. QSL via TF3AO.

VP9, BERMUDA ISLANDS, NA-005
Ray,VP9/ND8L, and Jamie,VP9/WW3S, will be QRV from Sep 27 until Oct 1.

They plan to join the upcoming WWDX RTTY Contest as VP9I from the QTH of Ed,VP9GE. If the conditions are good enough they will focus on 30m, 17m and 12m before and after the contest.
QSLs for VP9I via N1HRA, for VP9/ND8L direct via homecall or LoTW, for VP9/WW3S direct via homecall or LoTW.

ZA, ALBANIA
Petr,ZA/OK1FCJ, Pavel,ZA/OK1DX, and David,ZA/OK6DJ, want to show up in CW, SSB and RTTY on 160m-10m (incl. WARC bands) from Sep 27 till Oct 3. They will take part in the WWDX RTTY Test as ZA/OL8R. Their equipment includes Elecraft K3 and Kenwood TS850, a SpiderBeam (20m/15m/10m), a vertical for 40m-10m, a dipole for 80m and a longwire for 160m.
QSLs for ZA/OL8R and ZA/OK1FCJ via OK1DRQ, ZA/OK1DX via OK1DX, ZA/OK6DJ via homecall LoTW, eQSL.

ZS, SOUTH AFRICA
Bernie,ZS4TX, announced to join the WWDX RTTY Contest in the SOABHP category. The log will be uploaded to the LoTW.

DXCC: Following DXpeditions of 2012 were approved for DXCC credit:

3B8/IW5ELA	(Mauritius)
9A8VB	(Croatia)
4O7VB	(Montenegro)
E40VB	(Palestine)
E7/UA4WHX	(Bosnia Hercegovina)
EY8/UA4WHX	(Tajikistan)
JY8VB	(Jordan)
UN/UA4WHX	(Kazakhstan)
YU9VB	(Serbia)
Z38VB	(Macedonia)

Republic of Kosovo "on air" soon (update): Z60K near Pristina commenced amateur radio operation on Sep 17 shortly after 1700 UTC. The call has been issued to the clubstation o the Amateur Radio Association of Kosovo (SHRAK). QSL via G3TXF and logsearch at ClubLog. The first individual licenses were issued as well (Z61AA, Z61AB, Z61AJ, Z61AS, Z61DD, Z61DX, Z61FF, Z61LA, Z61NS, Z61VB and Z61XO) and 9A6AA received the first guest license (Z6/9A6AA).
Since the Kosovo is neither a member of the United Nations nor does it have a callsign block allocated by the ITU Kosovo does not meet the established requirements of the DXCC program at this time. The website of the local PTT is online already.

SILENT KEY: Sean Smith,KG4WSS, was one of the four Americans who was killed in the storming of the US consulate in Benghazi on Sep 11.
Our condolences and sympathy are with Seans family and friends.
We do not want to be sad that we lost him, but grateful that we could get to know him as a radio friend. We will always keep him in memory.

LINKS: Current SOTA activities (mountain summits) are announced at:
    http://www.sotawatch.org

    Detailed information about current VHF activities can be found on the
    VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Sep 23   BARTG Sprint 75
Sep 24   DIG-PA Contest
Sep 29/30 CQ WWDX RTTY DX Contest

IOTA   compiled by Klaus, DL7UXG (e-mail: iota@...)

Island activities:
AF-004, EA8, Canary Islands: Rob,EA8/DL7VOA, will be QRV mainly in CW
    working holiday style from the west coast of Tenerife between Sep 30
    and Oct 6. QSL via homecall.

AF-029, ZD9, Tristan da Cunha Islands: Depending on the weather Rob,M0VFC,
    will be active as ZD9UW from Tristan da Cunha between Sep 27 and Oct 4.
    Rob works in SSB on 80m-10m. Activities on 160m and 6m are not planned.
    If time and pile-ups permit he may work also in RTTY. An OQRS system
    (for direct and bureau QSLs) will be offered as well.
    See also: http://www.zd9uw.org.uk

AS-136, BY4, Shanghai Province group: Dale,BA4TB/4, Mi,BD4TQ/4, Tim,BD4TJ/4,
    Ni,BD4TR/4, and Zhou,BG4TVT/4, will be QRV from Heng Sha Island in all
    modes on 40m-10m from Oct 1-4. QSLs via homecalls.

EU-002, OH0, Aland Island: Following activities from Aland (WFF OHFF-037,
    WLOTA 1373) were announced for the WWDX RTTY Contest:
      - Marko,OH8KVY, will be QRV as OH0I in the SOSB 20m category.
        QSL via OH3BHL (d).
      - Juha,OH9MM, will be QRV as OH0Z in the SOSB 15m class. QSL via W0MM.
      - Raimo,OH3BHL, will show up as OH0KAG in der SOSB 40m category.
        QSL via OH1KAG (d).

EU-003, CU1/2, Eastern group; EU-089, CU8/9, Western group; EU-175, CU3-7,
    Central group: A large group of 18 international HAMs together with
    11 local HAMs will activate the nine populated islands of the Azores
    from Sep 29 (1200 UTC) until Sep 30 (1200 UTC). Some activities will
    start already on Friday, Sep 28, after the stations were set up:
        CU1ARM (Ilha de Santa Maria, EU-003, DIP AZ-001, WLOTA 2978)
        CU2ARA (Ilha Sao Miguel, EU-003, DIP AZ-002, PIP AC-002, WLOTA 2016)
        CU3URA (Ilha Terceira, EU-175, DIP AZ-003, PIP AC-003, WLOTA 0524)
        CU4ARG (Ilha Graciosa, EU-175, DIP AZ-004, PIP AC-004, WLOTA 0113)
        CU5AM (Ilha Sao Jorge, EU-175, DIP AZ-005, PIP AC-005, WLOTA 1004)
        CU6GRP (Ilha do Pico, EU-175, DIP AZ-006, WLOTA 1321)
        CU7CRA (Ilha do Faial, EU-175, DIP AZ-007, WLOTA 1830)
        CU8ARF (Ilha das Flores, EU-089, DIP AZ-008, PIP AC-008, WLOTA 0947)
        CU9AC (Ilha do Corvo, EU-089, DIP AZ-009, WLOTA 0707)
    Following frequencies were announced:

CW: 7000-7015 kHz, 18080-18090 kHz, 14050-14065 kHz
SSB: 7175-7195 kHz, 18120-18135 kHz, 14250-14275 kHz
Those stations making a QSO with at least five different islands can join a lottery for a free trip to the Azores. Additionally, the first 25 operators making QSOs with all nine islands will be eligible for a second lottery. The lottery will be drawn on Oct 15.
All QSOs will be confirmed with a special QSL via bureau.
Direct QSL requests can be sent to CU2CE.

EU-172, OZ, Jylland East and Fyn group: Mike,OZ/DG5LAC, will be active in SSB on 80m-10m from Langeland (DIA FY-019, WLOTA 0590) between Sep 29 and Oct 5. QSL via DG5LAC.

Heiko,OZ/DG0OGM, Dieter,OZ/DK1AW, Lutz,OZ/DL3ARK, Peter,OZ/DL4AMK, Joachim,OZ/DJ2AS, and Mario,OZ/DL5ASE, are working in SSB, CW, RTTY and BPSK on 160m-10m from Aro (DIA JY-03, WLOTA 0973, Loc JO45vg) until Sep 29. QSLs via homecalls.

NA-023, VP2V, British Virgin Islands: Steve,VP2V/AA7V, will be QRV from Virgin Gorda (WLOTA 0347) from Sep 26 until Oct 1 (incl. WWDX RTTY). QSL via NR6M (direct/LoTW).

NA-029, VY2, Prince Edward Isl. Province Group: Bob,VY2/WC3O, Pat,VY2/NK3P, Bob,VY2/K3RMB, Steve,VY2/KB3EYY, and Tony,VY2/KB3HGJ, are going to visit Prince Edward Island from Sep 26 until Oct 1 and plan to operate in CW, SSB and RTTY on 80m-10m. They will sign VY2/WC3O in the upcoming WWDX RTTY Contest. QSLs via K3MJW.

NA-145, PJ5/PJ6, Saba and Sint Eustatius: Mike,PJ6/G4IUF, will be active in holiday style from Saba (WFF PAFF-027, WLOTA 2043) between Oct 1 and Nov 1. QSL via G4IUF.

Bureau QSLs can be requested via e-mail. See QRZ.com.

NA-213, W4, Alabama State group: Eight HAMs from the Atlanta region plan
to activate Sand Island lighthouse (ARLHS USA-723, TWLHD WLH K-141,
Loc EM50XE, USi AL002S) as K4D in all modes on HF from Sep 26-30.
QSL via W4BTI. See also: http://www.w4bti.org

OC-026, KH2, Guam Island: Dave,N2NL, will sign NH2T in the WWDX RTTY Contest
from Yigo (Guam Island, USi GU003S WFF KFF-110, WLOTA 0064). He also
plans to take part in the SSB and CW parts of the WWDX Contest.
QSL via W2YC. See also: http://www.n2nl.net

OC-134, ZL, South Island: Members of the Quake Contesters Group will be QRV
as ZL3X from Sumner/Christchurch (WLOTA 0342, Loc RE66JK) during the
WWDX RTTY Contest. QSL via ZL3APH (direct/LoTW).

NON IOTA: TC2ZLH lighthouse Zonguldak: The TCSWAT team and the Giresun Radio
Amateurs and Nature Sports Club will activate Zonguldak lighthouse
(Loc KN51VL) as TC2ZLH on Sep 29/30. QSL via TA1HZ.
More information about the WEBLOTA award can be found at:
http://www.tcswat.org/awards/WEBLOTA

WFF: Jacques,F6BAX/p, will be QRV from FFF-101 from Sep 27 until Oct 3.
This is a first activation. QSL via homecall.

3776. Bls: [YBDXC_News] Am I in his log ?

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-09-25 06:19:15 UTC
From: hendro s.joedho
Topic: 3773 Message: 3776

Iya OM Busan,
Ini intinya - harusnya tadi di hi-lite.

Kemarin saya kontak lagi dg Denmark (OZ2PBS) di 10M mengharapkan conforming via LoTW karena sudah setahun QSL saya di 10M tidak berbalas dari OZ3BEN.
Rupanya dia gunakan logging yg terhubung ke QRZ.com (cmiiw) jadi langsung tahu nama saya yg berarti juga dia tidak salah membaca call sign saya.

Tapi pada akhir QSO dia sempat salah nyebut call sign saya, sehingga buru2 saya ulang lagi menyebut call sign. Dia tertawa dan minta maaf karena slip of tongue - sayapun baru sadar cuma salah sebut di akhir itu saja - karna sebenarnya sudah in the log. Tapi daripada nunggu confirm di LoTW gak muncul2.

Judul: Re: [YBDXC_News] Am I in his log ?

Never, and I mean NEVER, give the DX station a signal report until you know he has your call sign correctly
At the same time it is extremely important for the DX station to send the full call sign of the station he just worked and some kind of confirmation such as TU on CW or THANK YOU on Phone

Subject: [YBDXC_News] Am I in his log ?

OM,
Judul lengkapnya "Confirming QSOs - Am I in His Log ?" - potongan artikel yg ditulis Bernie/W3UR pada kolom How's DX di QST - December 2011.
Karena cukup menarik, saya kutip tulisannya, kalo disadur takut salah terjemahannya :

Everyone who has been DXing for more than a few minutes has worked a DX station then afterward wonder to themselves and even to others "was that a good QSO?".
Whether on SSB,CW,RTTY or the other digital modes, it happens. The DX station will say

something like "W3U YOU ARE 599".
You come back and give your full call one or more times, hoping the DX station gets it this time, and then give the DX station a report back. This is immediately followed by the DX station sending TU or thank you as he continues along his way through the pileup.
Seconds later you are left scratching (HI-QR) your head wondering did he get my full call sign correct or not?. All he said was thanks and went back to the pileup. Even your friends won't be able to help you to know for sure that the DX station indeed got your full call.

So how do you make sure the DX station gets your full correct call sign? Here's a trick I learned from my good friend and next door neighbor Frank Donovan, W3LPL. Never, and I mean NEVER, give the DX station a signal report until you know he has your call sign correctly. So when the DX station say, for example, "W3U YOU ARE 599", call him again giving only your call sign and not a report. Wait for him to give your full call and report again. Once you are sure he has your full and complete call sign then give the report. If everyone in the pileup of the DX station did this, the DX operator would eventually figure it out.

The DX station on the other hand is not at fault for sending W3U YOU ARE 599. After all he may not have not copied the full call sign and it is his job to keep the pileup moving. Sending W3U? just gets many to continue calling because some don't listen carefully enough. Instead the DX station need to get as much of the call sign as possible and then give the report to keep the rest in the pileup "thinking and having the feeling" that this op knows how to operate. At the same time it is extremely important for the DX station to send the full call sign of the station he just workwed and some kind of confirmation such as TU on CW or THANK YOU on Phone.

Semoga benar menarik dan bisa jadi salahsatu trick yg bisa kita gunakan dalam DXing untuk menghindari note dari DX station : "SRI U R NOT IN MY LOG".

Huuuu.....,
Capek euy manggil 3D2C - Conway Reef dari tadi siang.

Selamat buat rekan yang sudah berhasil worked, tinggal hunting di band lainnya.
Saya sudah nyoba ndompleng di frekwensinya OM Yongki-YB0COU yg berhasil dipanggil - tapi masih tak terdengaR olehnya.

Siang tadi signalnyta cukup kuat sampai hilang sama sekali lihat di VOACAP memang tdk memungkinkan = biru tua tidak ada tanda2 yhg menggembirakan.
Tapi sore ini terdengar jelas lagi dan intip di VOACAP memang agak berubah ada merah/coklatnya di jam tadi - sekarang goodbye lagi deh.

Ya, mudah2an OM Uun.
Kadang sih memang suka ketawa sendiri (???).

Seringkali ada DX station yg mati2an saya panggil - agak susah maksudnya terima signal dia juga lemah - tapi setelahnya justru signal dia menguat.
Beberapa kali juga ada yg bikin saya ikut di big pileup, akhirnya alhamdulillah berhasil worked - eh, besok2nya muncul lagi agak sepi peminat. HI

Kadang tergoda utk panggil lagi ikutan di pileup - tapi mikir juga "cuma nambah2 QRM" - kasihan.

Kalo saya sudah dapat 2 bands - sementara ini sudah cukup deh... xixixxi terang aja ya ?

Ya, mudah2an OM Uun.Kadang sih memang suka ketawa sendiri (???).
Seringkali ada DX station yg mati2an saya panggil - agak susah maksudnya terima signal dia juga lemah - tapi setelahnya justru signal dia menguat.Beberapa kali juga ada yg bikin saya ikut di big pileup, akhirnya alhamdulillah berhasil worked - eh, besok2nya muncul lagi agak sepi peminat. HI
Kadang tergoda utk panggil lagi ikutan di pileup - tapi mikir juga "cuma nambah2 QRM" - kasihan.
Kalo saya
sudah dapat 2 bands - sementara ini sudah cukup deh... xixixxi terang aja ya ?

From: hendro s.joedho
Topic: 3791 Message: 3791

Dear OM,

Di 28,460MHz ada St. Vincent - J8/PE1IGM, tapi sepertinya "gak laku/valid" untuk DXCC karena onboard operation.
Jadi ingat QSL card saya dari Costarica TI8AA yg ditolak DXCC Desk, karena menurut DXCC onboard op padahal gak ada penjelasannya.

Kalo PE1IGM ini sudah wanti2 bahwa QSL dia mungkin gak laku utk DXCC

quote :

Read this before you emailAll contacts are made when we are on anchor in a bay or harbor. Several bays where we anchoring are surrounded by land and in many cases (like St. Georges, Grenada Port Lois Marina J3 and Bequia J8) we are only 7 feet away from the dock.

Why has this qso no value for the DXCC award?

The ARRL has an rule (NR8):
8. All stations contacted must be "land stations." Contacts with ships and boats, anchored or under way, and airborne aircraft, cannot be counted. For the purposes of this award, remote control operating points must also be land based. Exception: Permanently docked exhibition ships, such as the Queen Mary and other historic ships will be considered land based.

So if I had moved my station from the boat to the concrete dock 7 feet away a qso has a value for the DXCC, but I refuse to do so as this rule is, in my opinion, a useless stupid rule, which only may have value on uninhibited islands and reefs.

Rule 8 was put into place to prevent cheating after some incidents that happened in the 70’s, so 40 !!!!! years ago, so in my opinion it is time to change this rule.

Reply-To: dxatlas_group-owner@yahoogroups.com
Subject: [dxatlas] New software: Pileup Runner

Pileup Runner is a simulator of DX pileups. It is intended for the DX-pedition operators and those who are curious how the pileup looks and sounds at the DX side.

Compared to Morse Runner, which is a contest simulator, Pileup Runner has an extra dimension: frequency. In this program just working the callers is not enough. To be successful, you also have to tune your receiver through the pileup in a smart way.

The program is freeware, currently in the beta stage. Grab a copy at (http://www.dxatlas.com/PileupRunner)!

http://www.dxatlas.com/PileupRunner/
Pileup Runner 1.1 beta

Pileup simulator for Windows 95/98/ME/NT4/2000/XP/Vista/7-32bit/7-64bit.
This program is for DX-pedition operators, not for DX'ers.
 Download Pileup Runner FREEWARE

QUICK START
//-- 1. Start the program. 2. If you have more than one audio device in your system, click on Settings / System in the menu and select the device to use in the Output Audio Device drop-down list. Click on OK. It is recommended that you use your headphones instead of the speakers, this makes copying CW much easier. My own machine has two soundcards, one feeds the speakers for Windows sounds, music, etc., the other one feeds the headphones and is used by all of my Ham applications. 3. Press F9 to start the audio. While the audio is running, click on Settings / Radio in the menu, and adjust Audio Gain and CW Pitch. Now press F1 to start transmission, and adjust the Sidetone Gain and Keyer Speed settings. Click on Run / Stop Pileup in the menu to stop the audio. You can keep the Radio Settings dialog open if you want, and change the settings on the fly while working the
pileup. 4. You are ready to work the pileup. Click on Run / Start Pileup, click on OK to accept the default parameters of the pileup, and the DX'ers will start calling you right away. Copy and type in a callsign and press the ";" key on the keyboard to send the call and 599. Once the DX'er answers, press "." to send TU UP and write the QSO to the log.
//-- // PILEUP SETTINGS //--
The Pileup Settings dialog that opens when you start a pileup allows you to set the parameters of the pileup. DX-pedition Callsign: Enter any callsign you want there. Operator's Callsign: Be sure to enter your own home callsign in this field. Number of Callers: Enter a value between 1 and 1000. One of the advantages of a simulated pileup is that all of its characteristics, such as the number of calling stations and signal strength of each station, are always known. Using this software, you will quickly learn how to determine the actual number of callers in the pileup just by looking at the waterfall display. Average SNR, dB: This is a parameter that you can change to simulate different propagation conditions. The values between 3 dB and 30 dB are accepted. 30 dB sounds like 10m in 1978, while 3 dB sounds more like 160m in 2012. The SNR is computed the same way as in CW Skimmer. Difficult Continent: Select either AS, EU, or NA as difficult continent (SA, AF and OC always count as difficult). The signals from the difficult continents are weaker than from the easy ones, but a QSO with such continent adds 3 points to your score, while a normal QSO gives you only 1 point. Session Length: Enter the length of your session, in minutes. The pileup will stop automatically after the time entered in this field. Of course, you can click on Pileup / Stop to terminate the session at
any time and get your score. Record I/Q WAV file: If this checkbox is ticked, the program records your session in the I/Q format that can be played back in CW Skimmer and many other SDR programs. 48 kHz of spectrum are recorded. Practice/Competition: Only the Practice mode is currently implemented.

//-- //
NAVIGATION
//-- Pileup Runner has the same waterfall display as CW Skimmer, and its navigation commands are a subset of the Skimmer commands. Use the PageUp and PageDown keys to scroll the display one page up or down. Click on the waterfall display or on the frequency scale to tune the receiver to the frequency under the mouse cursor. The button with arrows near the frequency display, when clicked with the left and right mouse buttons, performs the PageUp and PageDown commands respectively. The green
rectangle on the frequency scale represents the passband of your receiver with the light green triangle marking the center frequency. Drag the passband rectangle with the mouse vertically to change the bandwidth of your filter. The red triangle marks your transmit frequency, the pileup starts 1 kHz above it. Unlike CW Skimmer, the Runner has a second, slow waterfall display. The mouse clicks on that display work the same way as on the main display. You can change the width of the slow display, or hide it completely, by dragging the splitter between the display and frequency scale. Drag the frequency scale vertically with your mouse to see the signals above and below the current screen. Drag the waterfall display to the right with your mouse to see the signals that have already scrolled away. This puts the pileup in the pause state, as if you clicked on Run / Pause Pileup in the menu. Click on Pause Pileup to resume the session.
//-- //
SENDING MESSAGES
//-- The messages can be sent either by clicking on the buttons under the callsign input box, or by pressing the F keys. The following messages are supported: F1 = QRZ DE <my_call> UP F2 = 599 F3 = TU UP F4 = <my_call> F5 = <his_call> F6 = NIL F7 = AGN The mapping between the F keys and the messages can be changed in the Settings dialog. The following shortcuts are easier to use than the F keys, epecially for those with keyboarding skills: '\' = QRZ DE <my_call> UP ';' = <his_call> + 599 '.', '+', '[', ',', <Ins.> = TU UP + <Write to log> To abort transmission, press the Escape button. To clear the callsign input box, press Ctrl-W or Alt-W. To write the QSO to the log, press Enter, or click on the Save button. If the callsign in the Callsign box has changed after it was sent last
time, the '.', '+', '[', ',' and <Ins.> keys automatically re-send the callsign before finishing the QSO. HINT: To answer a call quickly, you can type in the callsign prefix and press the ";" key. While the program is sending the prefix, type in the rest of the callsign. The ESM (Enter Sends Message) mode allows the operator to perform different tasks at different stages of the QSO by pressing the same key (<Enter>). This mode can be turned on and off in the Settings dialog using the ESM checkbox. At the initial stage, when the Callsign box is empty, the <Enter> key sends the QRZ message. Once the callsign is entered, the same key sends his callsign + 599. After you copy the "exchange" and press the space key, <Enter> sends TU UP and writes the QSO to the log. The message buttons corresponding to the current function of <Enter> have red labels.
//-- //
LOGGING
//-- The log panel shows the last 5 QSO, including the time, callsign, frequency, continent, SNR and a QSO status symbol. The following status symbols are used: + Valid QSO, 1 point * Valid QSO, 3 points - Incorrect callsign (0 points). The correct one is shown in the braces. (space) The QSO is not in the correspondent's log: either he is still copying your message, or he is waiting for your final TU, or the call you have entered is completely wrong and there is no such station in the pileup. The full session log is saved in the ADIF format at the end

of the session, in case you want to use your favourite log analysis tools to generate statistics, or perhaps do some research. The results of every session are added to the History file, a plain text file that can be opened using the File / History command.
//-- // DATA FOLDERS //--
Since Windows no longer allows the programs to write in their own folder, Pileup Runner stores its data in a special data folder designated by Windows. The location of this folder is different on every machine. Use the menu commands under Files to open the folders containing the I/Q WAV recordings and ADIF logs, and to access the History file.
//-- // DXERS' CALLSIGNS //--
The list of DXers' callsigns has been produced by Michael G7VJR from his ClubLog data (MNI TNX!). These are real calligns of the real DX'ers who worked a certain minimum number of DX-peditions in the last few years. Be prepared to hear many familiar calls in
the pileup! You can even work yourself if you are lucky enough.
//-- // DSP CHAIN //--
When the program generates the audio for you and plots the waterfall display, it does not cheat. The I/Q stream containing all signals is generated first, then this stream is processed by the code similar to that in CW Skimmer, as if it were received from a radio. The processing includes filtering, AGC, FFT, key click canceling, etc. This ensures that the quality of the audio and waterfall graphics is the same in a simulation and on the air.
//-- // PILEUP BEHAVIOUR //--
The simulated pileup tries to model many features of the real pileups. The DX'ers copy your signals
most of the time, but sometimes they cannot copy their own call, or accept an incorrectly sent call, or miss your transmission completely. You will notice that they use all kinds of variations on the "599 TU" theme, from plain "599" to something like "BK DE XX0XXX TU 599 599 GL 73 DE XX0XXX TU E E". Be patient and do not send your final TU until your correspondent finishes sending his message, or you may end up being not in his log. The DX'ers do their best to work you, but their skill levels are different. Some of them just keep calling blindly on the same frequency in a hope that you will eventually tune at their signals, some at least monitor their own TX frequency and QSY when necessary to ensure that their signal is more or less in the clear, but there are also experienced DX'ers who try to figure out your listening frequency, and they often succeed in this. As soon as your correspondent sends 599 to you, some of the experienced DX'ers know where
you are listening, and tune to, or near, that frequency. Do not listen on the same frequency for too long, unless you want to have half of the pileup squeezed in the passband of your receiver.
//-- // TIPS AND TRICKS
//-- Since Pileup Runner has the same waterfall display as CW Skimmer, you can use all tricks that you would use if you were running a pileup with the Skimmer. Here are a few for you to try. The QSO with the difficult continents are more valuable than with the easy ones, which is also true for a real DX operation. Since you get 3 points for a difficult continent, you can spend up to 3 times more time on such QSO and still have a better score. Find a 3-point station on the waterfall visually while your correspondent is sending 599 to you, then click-to-tune to that station while you are
sending TU UP. Look for the weak signals on the waterfall as these are often 3-point

stations. Learn to read Morse Code visually on the waterfall. With some practice, you will be able to visually copy all signals that you can copy aurally, including the high-speed and very weak ones. This skill has multiple uses, from finding the 3-point stations to verifying the calls you copy by the ear, to making a QSO with a station that is not even in your passband. Indeed, you can copy the callsign visually and answer the station, then copy his 599, again visually, and save the QSO to the log, all without hearing the station. If you use this technique to work a station a few kHz away from where you are listening, those who are chasing your QSX frequency will move there (well, at least some of them), allowing you to work a few more stations in the clear. Do not neglect the Page Up command. The pileups are often much thinner near the top than at the bottom, be sure
to page through the whole pileup and always work in the areas with a low concentration of the callers. As has already been said, staying on the same listening fequency for more than a feq QSO is a sure way to cause problems to both your callers and yourself. Even if you did not have time to find a good new frequency in advance, just tune 2-3 kHz up or down, this requires only a single mouse click on the waterfall. The slow waterfall available in Pileup Runner may give you a rough idea of where in the pileup the density of the stations is low. Never send AGN: many impatient callers consider it a synonym of QRZ.
//---------- // BETA FEEDBACK
//---------- Remember that this is a beta, many design decisions are not final yet, and your feedback can make a difference. Please send your comments to alshovk@... 73 Alex

OM Zen, gak usah khawatir - no problem for your portable operation.

On board operation yg gak valid utk DXCC = operation di atas kapal baik yang MM/maritime mobile maupun sedang lego jangkar/buang sauh - kecuali kapal yg sudah fixed lokasinya, gak berlayar lagi seperti yg dijadikan monumen, musium dll.

PE1IGM ini katanya sebenarnya lego jangkar cuma 2 meteran dari daratan, kaLO saja dia pindahkan stasiunnya ke dock kapal yg di darat itu - baru diakui oleh DXCC.
Tapi dia ogah dan menganggap aturan itu "bodoh". HI

Don't worry be happy.

Dear OM,

Di 28,460MHz ada St. Vincent - J8/PE1IGM, tapi sepertinya "gak laku/valid" untuk DXCC karena onboard operation.
Jadi ingat QSL card saya dari Costarica TI8AA yg ditolak DXCC Desk, karena menurut DXCC onboard op padahal gak ada penjelasannya.

Kalo PE1IGM ini sudah wanti2 bahwa QSL dia mungkin gak laku utk DXCC

quote :

Read this before you emailAll contacts are made when we are on anchor in a bay or harbor. Several bays where we anchoring are surrounded by land and in many cases (like
St. Georges, Grenada Port Lois Marina J3 and Bequia J8) we are only 7
feet away from the dock.

Why has this qso no value for the DXCC award?

The ARRL has an rule (NR8):
8. All
stations contacted must be "land stations." Contacts with ships and
boats, anchored or under way, and airborne aircraft, cannot be counted.
For the purposes of this award, remote control operating points must
also be land based. Exception: Permanently docked exhibition ships, such as the Queen Mary
and other historic ships will be considered land
based.

So if I had moved my station from the boat to the concrete dock 7 feet away a
qso has a value for the DXCC, but I refuse to do so as this rule is, in
my opinion, a useless stupid rule, which only may have value on
uninhibited islands and reefs.

Rule 8
was put into place to prevent cheating after some incidents that
happened in the 70’s, so 40 !!!!! years ago, so in my opinion it is time to change this
rule.

OM Zen,
Untuk DXCC memang tidak valid, tapi kalo gak salah ada award khusus utk MM ini.
Yang pasti valid utk DXCC, juga Nusantara Award, YBDXC adalah YB3MM. HI

http://www.airlinkexpress.org/

Airlink Express

INTRODUCTION

Airlink Express is a user friendly digital mode software package for the Amateur Radio Operator. The software is compatible with Microsoft Windows XP, Microsoft Windows Vista, and Microsoft Windows 7. It offers PSK, MFSK and RTTY digital modes with logging and macro capabilities. If you have ever used the Digipan software you will be immediately familiar with Airlink Express.

With the release of Windows Vista and Windows 7, Microsoft introduced a new sound architecture. Airlink Express is developed to support this new sound architecture, yet it maintains complete backward compatibility with Windows XP. Airlink Express brings back the familiar volume slider interface you've become used to from older Windows versions.

The DSP engine used in Airlink Express is MMVari by Makoto Mori, JE3HHT. This engine is very flexible and decodes as well, if not better, than any other soundcard mode engine currently available. It is used by many other software products like Logger32 and the N1MM contest logger.
FEATURES

These are just some of the features available in Airlink Express:
Automatic Multi Channel Display with PSKReporter capability
Country, Continent, Distance and Bearing Information
PSK, QPSK, MFSK and RTTY
Radio Control (CAT)
Center Bandpass Tuning
True FSK Keying
Macros
Bandpass Filters
Logging with ADIF Import and Export
Replay Last 60, 30, or 15 Seconds
Error free sending and receiving text and binary files (using ARQ)

SCREENSHOTS

As you can see from the screenshots below, Airlink Express has a very familiar look and feel to people who are used to the Digipan software.

When you turn on the advanced features, like multi channel decoding and the extra log bar, the screen changes somewhat, but is still intuitive.

The logbook appears when you click on the logbook icon.

SYSTEM REQUIREMENTS

The minimum system requirements are based on my own tests. Airlink Express may be able to run on an even slower processor or even less memory, but I have no means to test that.
Operating System: Microsoft Windows XP Service Pack 3, Microsoft Windows Vista, Microsoft Windows 7, or Microsoft Windows 8
(Several people have indicated that they are able to run Airlink Express on Windows 2000 Service Pack 4, and even older versions of Windows.)
Processor: 1GHz or better
Memory: 512Mb or more
Storage Space: 10 Mb
Other: Microsoft .Net Framework 2.0
(Airlink Express will install this for you, if needed.)

Internet connection (only if Airlink Express needs to install .Net Framework 2.0.)

SUPPORTED RADIOS FOR COMPUTER CONTROL

Airlink Express will work with any radio. However, Airlink Express can only read the frequency and mode from the following radios for logging purposes. Please contact me if you would to have a radio added that is not on the list below.
Icom: IC-271, IC-275, IC-375, IC-471, IC-475, IC-575, IC-7000, IC-703, IC-706, IC-706MkII, IC-706MkIIG, IC-707, IC-718, IC-7200, IC-725, IC-726, IC-728, IC-729, IC-735, IC-736, IC-737, IC-738, IC-7400 , IC-746Pro, IC-746, IC-751A, IC-756, IC-756Pro, IC-756ProII, IC-756ProIII, IC-7600, IC-761, IC-765, IC-775, IC-7700, IC-78, IC-7800, IC-781, IC-820, IC-821, IC-910, IC-970, IC-1271, IC-1275, IC-R10, IC-R20, IC-R71, IC-R72, IC-R75, IC-R7000, IC-R7100, IC-R8500, IC-R9000, IC-R9500
Yaesu: FT-100, FT-450, FT-747, FT-817, FT-840, FT-847, FT-857, FT-890, FT-897, FT-920, FT-950, FT-1000MP, FT-2000, FTdx9000

Kenwood: All radios that support CAT control

Elecraft: K2, K3

TenTec: Orion I, Orion II

Flex Radio: Flex-1500, Flex-3000, Flex-5000A, Flex-5000C

DOWNLOAD

It is very easy to install Airlink Express. Just download the setup program to a directory on your computer, run it and follow the instructions. The installer allows you to update from prior versions and will convert the log, macros and settings for you.

Always make a backup copy of your log (use log export function) before upgrading to a new version!

To uninstall Airlink Express, either do this from the Add/Remove Programs applet in the Control Panel or run the uninstall program from the start menu.

TIPJAR

If you would like to make a monetary contribution in support of Airlink Express to help defray some of the cost of licensing fees, web site hosting, etc, or just to say "Thank You", you can toss me a few shekels via PayPal by clicking on the "PTT" button below:

Your support is greatly appreciated!

73,

http://www.dxcoffee.com/eng/2012/09/26/kosovo-dxcc-entity/

KOSOVO, REALLY A NEW DXCC ENTITY?

For us Italians, the events of Kosovo cause us to reflect on recent stories of our country, still alive in the minds of the most young. Italy was one of the first countries in conjunction with NATO, to come to the rescue of the people of Kosovo, repressed by vile ethnic cleansing perpetrated by the Serbian regime of Slobodan Milosevic. The KFOR mission saw, and still sees to this day, many Italian soldiers dedicated to restoring peace in this Balkan territory on the other side of the Adriatic.

Anybody like me living on the Adriatic coast of Italy remembers well the noise of military aircraft departing from our bases, as well as those in the Balkans, as part of military action from our soil, missile installations on our shores with defense objectives of a sensitive nature; night lights of helicopters and planes that flewt off towards the east. For me, when still just a kid, this provided a particular sense of uncertainty.

Years, indeed decades have passed. International intervention have brought peace and stability to the Balkans. The perpetrators of these heinous crimes have been delivered to international tribunals. The Balkans are open to Europe and the wind of democracy blows even today on those lands so close to our own. Let’s review briefly the recent history of Kosovo in order to understand how it also can be problematic to that of amateur radio in that part of the world.

We had already spoken long ago, in 2010, in an articleon the various states of the Balkans formed after the dissolution of Yugoslavia. In fact, Kosovo has never been recognized as independent from Serbia, which identifies Kosovo in its legislation, as a Special Administrative Region, thus granted a particular form of autonomy. However, 17 February 2008, the Government of Kosovo unilaterally assigned itself its independence, thus demonstrating its own sovereignty. The first recognition of this authority came from the State of Costa Rica and then 91 other UN member states recognizing Kosovo as a new independent state, including the United States, Britain, France, and 22 European countries including that of Italy; with the exception of Russia and China, nations with veto power in the Security Council of the United Nations, and for these Kosovo can not currently be accepted among the countries of the UN.

In 2008, the UN decided to place the territory under the jurisdiction of a controlling body and rather than from a military base, but that of a civilian authority, moving the population towards a defined international solution. The EULEX mission, as it’s called, ended September 10 of last year, the ISG (International Steering Group) has ceased its activities stating that Kosovo has acquired full sovereignty. However, we are somehow in the presence of a unilateral decision on the part of those countries that originally recognized, as early as 2008, the sovereignty of the Kosovars. Remaining still, however, are vetoes of other countries and the opposition of Serbia which would rather include Kosovo as a territorial region of it’s own with special status.

Having explained the historical events, we can now discuss those aspects of amateur radio that interest us most. Before September 10, to operate from the region of Kosovo was in all respects comparable to operating from Serbia and prefixes used under existing regulations were precisely those as in Serbia. Following the declaration of independence, a team of amateur radio operators under the supervision of the IARU, traveled to Pristina, capital of Kosovo, to encourage and promote the establishment of a regulatory amateur body to facilitate the development of new hams. These individuals are: Hans, PB2T; Nikola, 9A5W and Emil, 9A9A, accompanied by G3TXF, N2BB, MD0CCE, OH2TA and OH2BH as instructors. At this point things continue to move at a slow pace. So, a new regulation has been approved by the government in Pristina, Kosovo. The Amateur Radio Association is founded, SHRAK, with President Ali Sabit, Z61DD and other personal licenses issued. As you've already surmised, calls were issued with the Z6 prefix. These days you can now hear on the air the first team ever assigned a call, Z60K.

Well, so far the facts, now a little something to munch on! Kosovo is not one of countries under the UN umbrella, since, as has been said, it has not yet been recognized by all countries with veto authority. To make a comparison with the recent history of South Sudan, the latter declared itself entirely independent the day after final approval by the Assembly of the United Nations. The procedure for assigning a prefix for amateur radio goes hand in hand with the Civil Aviation Authority, with this duty of the ITU (International Telecommunication Union) in tandem agreement with the ICAO (International Civil Aviation Organization). The assignment of a prefix goes hand in hand with the recognition of the sovereignty of a new state by the United Nations. Also in comparing with South Sudan, the ST0 prefix was used as a temporary one, but always with the quiet blessing of the ITU needing more time to assign a new prefix, something which then occurred a few months later.

Sure you could then invoke exceptional circumstances to justify the auto assignment of the prefix Z6, examples such as Palestine (E4) or the SMOM (1A), but we need to be clear about that. Palestine, although not part of the UN, received the prefix E4 primarily to identify the Arafat's aircrafts, not to confuse with the Israelis. So aeronautical motivation that was essential for us amateurs, for the DXCC program. For 1A instead the story is different. The block 1A-1Z is part of a series of prefix to use in case of uncertainty about the status of a territory, 1A was established for the special status of the SMOM, 1B is used for the Turks territories in Cyprus, 1S for Spratly island, always disputes between various Asian powers, 1X for some transmissions by Chechen's separatist. Then these activities are accepted by DXCC or not does not matter, and depends on the rules of the diploma, but at least they all fall into an unofficial block of prefixes repeatedly used for similar situations.

At this point one may ask what's going on in Kosovo now… a new country that indeed declared itself independent and, although not recognized by many countries, and still not part of the UN, can not be recognized by the ITU for the assignment of a regular prefix. So, what to do!? One now transmits a prefix not yet assigned, specifically Z6, maybe a prefix of series 1A-1Z would be more correct to use, on a provisional basis.

One wonders at this point if the DXCC desk can accept this possible new country and therefore accredit QSOs with these calls for the oh so famous diploma. Provided that with DXCC there are no shortcuts deferring to the previous discussion. However, having dealt with this in a roundabout way, perhaps it would be prudent to comply with the rules in place, whatever the case may be!

The above is a simple argument which I would gladly push aside for the sake of others using sensible reasoning. And if I've got it wrong, I hope you'll help me to get it right!

OM Joni,
Itu bahasa ABK.
Jadi inga' lagu Balada Pelaut = kapal bastom, ini khan kalo kapalnya = stoom ya ? cmiiw.

Thanks salam juga utk keluarga di Sorong.

>>
>>
>>Dear OM,
>>
>>Di 28,460MHz ada St. Vincent - J8/PE1IGM, tapi sepertinya "gak laku/valid" untuk DXCC karena onboard operation.
>>Jadi ingat QSL card saya dari Costarica TI8AA yg ditolak DXCC Desk, karena menurut DXCC onboard op padahal gak ada penjelasannya.
>>
>>
>>Kalo PE1IGM ini sudah wanti2 bahwa QSL dia mungkin gak laku utk DXCC
>>
>>
>>quote :
>>
>>
>>Read this before you emailAll contacts are made when we are on anchor in a bay or harbor.

>>Several bays where we anchoring are surrounded by land and in many cases (like St. Georges, Grenada Port Lois Marina J3 and Bequia J8) we are only 7 feet away from the dock.
>>
>>Why has this qso no value for the DXCC award?
>>
>>The ARRL has an rule (NR8):
>>8. All stations contacted must be "land stations." Contacts with ships and boats, anchored or under way, and airborne aircraft, cannot be counted. For the purposes of this award, remote control operating points must also be land based. Exception: Permanently docked exhibition ships, such as the Queen Mary and other historic ships will be considered land based.
>>
>>So if I had moved my station from the boat to the concrete dock 7 feet away a qso has a value for the DXCC, but I refuse to do so as this rule is, in my opinion, a useless stupid rule, which only may have value on uninhibited islands and reefs.
>>
>>Rule 8 was put into place to prevent cheating after some incidents that happened in the 70’s, so 40 !!!!! years ago, so in my opinion it is time to change this rule.
>>

Teman-teman berikut claimed scores WAEDC

www.darc.de/referate/dx/contest/waedc/en/2012/SSB/

Pada WAEDC ada DX & Club contest (lihat pada link dan artikel dibawah),
mohon sekiranya teman-teman berkenan untuk dapat menyeragamkan dalam
penulisan Clubnya menjadi YBDXC - YB Land DX Club dengan mengirimkan email
ke waedc-info@...

sehingga dengan demikian YBDXC bisa di hitung dan ikut dalam competisi CLUB
dengan mengirimkan email ke waedc-info@...

tnx es 73

Djoko YB1TJ

http://www.darc.de/referate/dx/contest/waedc/en/rules/

11 DX & Contest Club Competition

The club score is calculated by adding the final results of all
participating club members in all three WAE contests, excluding SWLs. To be
counted, the name of the club has to be indicated in the log on a separate
header line using the keyword "*CLUB*".

The club must not be an official national amateur radio club. For a club to
be listed, a minimum of three logs must be submitted.

A trophy is sponsored for the top DX (non-EU) and the top EU clubs.

For DL stations participating in the German *DARC/VFDB-Clubmeisterschaft* put
your DOK in the log on a separate header line using the keyword "*SPECIFIC*
".

ARLD040 DX news

ZCZC AE40
QST de W1AW
DX Bulletin 40 ARLD040
From ARRL Headquarters
Newington CT September 27, 2012
To all radio amateurs ARLD040

SB DX ARL ARLD040
ARLD040 DX news

This week's bulletin was made possible with information provided by KX9X, NC1L, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

MONACO, 3A. Nobby, G0VJG will be QRV as 3A/G0VJG from October 1 to 5. QSL via G4DFI.

TANZANIA, 5H. Arne, OH2NNE will be QRV as 5H2DK from Moshi from October 2 to 17. Activity will be on the HF bands using SSB. He may also be active from different locations as well. QSL to home call.

KENYA, 5Z. Sig, NV7E will be QRV as 5Z4EE from Nairobi in the CQ WW RTTY contest as a Single Op/All Band/High Power entry. In addition, he will be active in the upcoming CQ WW SSB and CW contests. QSL direct to home call.

MADEIRA ISLANDS, CT3. Members of the Rhein Ruhr DX Association will be QRV as CR3L from Santana, IOTA AF-014, in the CQ WW RTTY contest as a Multi Op entry. QSL via DJ6QT.

AZORES, CU. A large group of amateurs will be QRV from September 28 to 30 as CU1ARM, CU2ARA, CU3URA, CU4ARG, CU5AM, CU6GRP, CU7CRA, CU8ARF and CU9AC from nine populated Azores islands, IOTAs EU-003, EU-175 and EU-089, as part of a demonstration promoting the role of Amateur Radio emergency communications. Activity will be on 40, 20 and 17 meters using CW and SSB. QSL all calls via bureau or direct via CU2CE. In addition, look for Mike, KI1U to be QRV as CT8/KI1U during the CQ WW RTTY contest. He may also be active on satellite AO-27 if conditions permit. QSL to home call.

GUAM, KH2. Dave, N2NL will be QRV as NH2T in the CQ WW RTTY contest from Yigo. He also plans to be active in the upcoming CQ WW SSB and

CW contests. QSL via W2YC.

ALAND ISLANDS, OH0. In the CQ WW RTTY contest, look for Marko, OH8KVY to be QRV as OH0I as a Single Op/Single Band entry on 20 meters. Juha, OH9MM will be QRV as OH0Z as a Single Op/Single Band entry on 15 meters and Raimo, OH3BHL will be QRV as OH0KAG as a Single Op/Single Band entry on 40 meters. QSL direct via OH3BHL, W0MM and OH1KAG, respectively.

ARUBA, P4. Jim, W4TMO and Bert, N4CW will be QRV as P40G in the CQ WW RTTY contest as a Multi/Single entry. QSL via operators' instructions.

CRETE, SV9. Uli, DJ9XB will be QRV as SW9XB in the CQ WW RTTY contest as a Single Op entry. QSL to home call.

TURKEY, TA. Station TC2ZLH will be QRV from the Zonguldak Lighthouse on September 29 and 30. QSL via TA1HZ.

ICELAND, TF. Members of the Tango Fox Radio Foxes will be QRV as TF2RR in the CQ WW RTTY contest. QSL via TF3AO.

BRITISH VIRGIN ISLANDS, VP2V. Steve, VP2V/AA7V is QRV from Virgin Gorda until October 1. This includes an entry in the CQ WW RTTY contest. QSL direct via NR6M.

BERMUDA, VP9. Ray, ND8L and Jamie, WW3S are QRV as VP9/home calls until October 1. Activity is on the HF bands. They will be active as VP9I in the CQ WW RTTY contest. QSL VP9I via N1HRA and all others direct to home calls.

ALBANIA, ZA. Petr, OK1FCJ, Pavel, OK1DX and David, OK6DJ are QRV as ZA/home calls until October 3. Activity is on 160 to 10 meters using CW, SSB and RTTY. They will be active as ZA/OL8R in the CQ WW RTTY contest. QSL ZA/OL8R and ZA/OK1FCJ via OK1DRQ, ZA/OK1DX via OK1DX and ZA/OK6DJ to home call.

NEW ZEALAND, ZL. Members of the Quake Contesters Group will be QRV as ZL3X from Sumner/Christchurch in the CQ WW RTTY contest. QSL via ZL3APH.

SOUTH AFRICA, ZS. Look for Bernie, ZS4TX to be QRV in the CQ WW RTTY contest as a Single Op/All Band/High Power entry. QSL via operator's instructions.

THIS WEEKEND ON THE RADIO. The CQ Worldwide RTTY DX Contest, NCCC Sprint, Microwave Fall Sprint, Texas QSO Party and the UBA ON 6-Meter Contest are all scheduled for this upcoming weekend. The ARS Spartan CW Sprint is scheduled for October 2. The 432 MHz Fall Sprint is scheduled for October 3. Please see September QST, page 79 and the ARRL and WA7BNM Contest websites for details.

Dear All,
Mohon nama Club di seragamkan dan setelah itu dikirim ulang ke WAEDC.

Begitu juga untuk kegiatan besok di CQWW RTTY, nama clubnya juga jangan lupa ditulis.

Teman-teman berikut claimed scores WAEDC

www.darc.de/referate/dx/contest/waedc/en/2012/SSB/

Pada WAEDC ada DX & Club contest (lihat pada link dan artikel dibawah), mohon sekiranya teman-teman berkenan untuk dapat menyeragamkan dalam penulisan Clubnya menjadi YBDXC - YB Land DX Club dengan mengirimkan email ke waedc-info@dxhf.darc.de

sehingga dengan demikian YBDXC bisa di hitung dan ikut dalam competisi CLUB
dengan mengirimkan email ke waedc-info@dxhf.darc.de

tnx es 73

Djoko YB1TJ

http://www.darc.de/referate/dx/contest/waedc/en/rules/

11 DX & Contest Club Competition
The club score is calculated by adding the final results of all participating club members in all three WAE contests, excluding SWLs. To be counted, the name of the club has to be indicated in the log on a separate header line using the keyword "CLUB".
The club must not be an official national amateur radio club.For a club to be listed, a minimum of three logs must be submitted.
A trophy is sponsored for the top DX (non-EU) and the top EU clubs.
For DL stations participating in the German DARC/VFDB-Clubmeisterschaft put your DOK in the log on a separate header line using the keyword "SPECIFIC".

Dear All,
Dari data Log teman-teman yang telah mencantumkan nama YBDXC atau juga YB Land DX Club, semua sudah dikoreksi dan diseragamkan oleh pihak penyelengara Contest sebagaimana dibawah ini dengan nama "YB Land DX Club".
 Namun masih ada beberapa yang memang tidak mencantumkan nama Clubnya dan atau ada yang memang salah nama (seperti YB0COU), bahwa definisi Club dari panitia seharusnya adalah yang bukan dari Organisasi resmi.
 Untuk itu mohon dapat diperbaiki dan dikirim ulang data Lognya, supaya semua score yang dari Indonesia dapat digabung menjadi satu untuk bersaing dengan Club dari negara lain.

Dear All,
Dari data Log teman-teman yang telah mencantumkan nama YBDXC atau juga YB Land DX Club, semua sudah dikoreksi dan diseragamkan oleh pihak penyelengara Contest sebagaimana dibawah ini dengan nama "YB Land DX Club".
 Namun masih ada beberapa yang memang tidak mencantumkan nama Clubnya dan atau ada yang memang salah nama (seperti YB0COU), bahwa definisi Club dari panitia seharusnya adalah yang bukan dari Organisasi resmi.
 Untuk itu mohon dapat diperbaiki dan dikirim ulang data Lognya, supaya semua score yang dari Indonesia dapat digabung menjadi satu untuk bersaing dengan Club dari negara lain.

Siiplah OM Yongkie,
Beberapa hari ini masih gagal utk QSO dengan 3D2C di 10M maupun di 15M.
Semalam juga panggil Barbados, sekedar utk nambah2 Diamond DXCC setengah mati padahal OM Imam-YB4IR sekali panggil langsung worked.

Saya akhirnya berhasil setelah berulang mengkoreksi prefix - karna dia manggilnya YT0QR, setelah saya berhasil malahan 8P6SH memberikan kesempatan kepada "any other Indonesian station" - tapi mungkin rekan2 sudah dapat Barbados di 10M. Sebelumnya saya sudah conformed dg 8P6ER tapi tahun 2011.

No 1117

==========

*** 4 2 5 D X N E W S ***

**** DX INFORMATION ****

==========

Edited by I1JQJ & IK1ADH

Direttore Responsabile I2VGW

3A - Nobby, G0VJG will be on a "radio only trip" to Monaco on 1-5 October. He will operate SSB on the HF bands as 3A/G0VJG. QSL via G4DFI. [TNX NG3K]

3V - Alfredo, IK7JWX reports he is organizing another expedition to take place from Djerba Island (AF-083) from 27 April to 4 May 2013. Plans are to operate as TS8IT (requested call) on the HF bands and 6 metres SSB, PSK31, RTTY and CW. The current operators list includes I8LWL, IK2DUW, IK2PGM, IK6CAC, IK7JWX, IK8GQY, IS0AGY, IT9SSI, IV3FSG and IW2NLC. If you want to join the team please contact Alfredo (ik7jwx2003[@]yahoo.it).

5H - Arne, OH2NNE will be active as 5H2DK from Moshi, Tanzania on 2-17 October. He may also be QRV using a portable setup from different locations between 18 and 27 October. He will operate SSB only on 80-10 metres. QSL via home call.

5U - Christian, 5U5U (ex-TL0A) is currently active from Niamey, Niger until 15 October. On 1 October he will be joined by Paul, F6EXV (5U6E) and Jan, DJ8NK (5U8NK). They will run three stations on 160-6 metres on SSB, CW and digital modes. QSL 5U5U direct only to Christian Saint-Arroman, Chemin de Mousteguy, 64990 Urcuit, France. QSL 5U6E via F6EXV (direct, bureau and LoTW; OQRS on Club Log). QSL 5U8NK via DJ8NK (direct, bureau and LoTW; OQRS on Club Log). Further information, including operating frequencies and logsearch, can be found at www.premiumorange.com/5u-2012/

5X - A large multi-national team from the Radio Club de Provins (F6KOP) will be active from Uganda on 6-18 February 2013. Thety will have six stations active on 160-6 metres CW, SSB, RTTY and PSK. QSL via F1NGP, direct or bureau (OQRS provided by Club Log), and LoTW. Updates and further information on http://www.5x2013.com/ [TNX F5NQL]

9M2 - Shou, JA1XXI will be active as 9M2/JA1XXI from Port Dickson, West Malaysia on 5-15 October. He plans to be QRV on 20, 15, 10 and 6 metres. QSL via home call.

BY - Dale BA4TB, Mi BD4TQ, Tim BD4TJ, Ni BD4TR and Zhou BG4TVT will be active on 40-10 metres from Hengsha Island (AS-136) on 1-4 October. [TNX DX World]

C6 - Bob, W9XY will be active as C6AXY from New Providence (NA-001),

Bahamas on 4-9 November. He will operate holiday style on 40-10 metres, CW and SSB with maybe some RTTY and/or PSK31. QSL via W9XY, direct or bureau. [TNX W9XY]

C6 - Rick, K6VVA will be active as C6AVA from the Berry Islands (NA-054), Bahamas on 7-11 December. He operate mainly CW with some SSB on 40, 30, 20 and 17 metres. QSL via N6AWD, direct or bureau.

DL - Peter, DK2RMP will be active as DK2RMP/p from Usedom Island (EU-129) on 7-14 October. QSL via home call, direct or bureau. [TNX rsgbiota.org]

FH - Sam, F6AML will be active as TO2M from Mayotte (AF-027) on 4-19 October. He will operate CW and SSB on 80-10 metres. QSL via home call, direct or bureau (email requests for bureau cards can be sent to qsldxped[@]yahoo.fr). [TNX DX World]

GU - A team from the Martello Tower Group will be active as GP0PKT from Herm Island (EU-114), Guernsey on 4-8 October, 2012. QSL via G6NHU, direct or bureau. All QSOs will be uploaded to LoTW as soon as possible. Further information and logsearch at http://martellotowergroup.com/gp0pkt/

H4 - Bernhard, DL2GAC (H44MS) is returning to the Solomon Islands for a DX vacation from 18 October to 9 December. His main QTH will be Honiara (Guadalcanal, OC-047), with "short operations" from other IOTA groups (OC-127, OC-158 and OC-168) "if transportation can be arranged". QSL via home call, direct or bureau. [TNX DL2GAC]

H4 - Phil, G3SWH and Jim, G3RTE will be active as H44KW from Guadalcanal (OC-047), Solomon Islands 18-28 February 2013. They will operate CW only on 80-10 metres; plans are to have two stations on the air for as many hours every day as is possible. QSL via G3SWH, direct or bureau (OQRS for both direct and bureau cards can be found Phil's website). More nformation and updates at www.g3swh.org.uk/h44kw.html [TNX G3SWH]

HB0 - Frank, PA4N will be active as HB0/PA4N from Liechtenstein on 8-14 October. He will operate CW on 80-10 metres with a focus on Asia. QSL via home call. [TNX NG3K]

HS - Eddy, ON4AFU will be active as HS0ZJF/8 from Koh Samui (AS-101) on 7-24 October and as HS0ZJF/9 from Koh Butang (AS-126) from 26 October to 4 November. He will operate CW only on 40-10 metres with 100 watts and wire antennas. QSL via ON4AFU, direct or bureau. [TNX rsgbiota.org]

I - IT9ATF, IT9BXR, IT9NPR, IT9PPG, IT9RDG and IT9WDC will participate in the CQWW DX SSB Contest as IF9A (Multi-Single) from the island of Favignana (EU-054). QSL via IT9ATF.

KH0 - Kazuo, JH8PHT will be active as AH0KT from Saipan (OC-086) on 4-9 October. He will be QRV on 80-6 metres, with planned activity also on 10 metres FM and AM. QSL via home call and LoTW. [TNX NG3K]

OZ - Mike, DG5LAC will be active holiday style as OZ/DG5LAC from Langeland Island (EU-172) from 29 September to 5 October and from Nordjylland (EU-171) on 6-12 October. Expect activity on 80-10 metres SSB. QSL via home call, direct or bureau. [TNX rsgbiota.org]

P2 - The IOTA expedition to Papua New Guinea [425DXN 1102] has added one more group to the announced itinerary. The team includes Axel

DL6KVA, Hans-Peter HB9BXE, Eddy K5WQG, Derek G3KHZ and Hans SM6CVX; their schedule is as follows:
20-24 October P29VCX Emirau Island (OC-103)
27-31 October P29NI Tatau Island (OC-099)
2-4 November P29VPB Lihir Island (OC-069)
The main team will fly home on 6 November, while Hans will continue the trip and be active from three other groups:
6-9 November P29VCX Buka Island (OC-135)
9-12 November P29VCX Manu Island (OC-025)
12-13 November P29VCX Loloata Island (OC-240)
QSL P29NI and P29VPB via G3KHZ; QSL P29VCX via SM6CVX. Bookmark http://p29ni.yolasite.com/ for further information and updates. [TNX IZ1CRR]

PA - The earliest allotment of call letters to identify countries was made at the 1912 London International Radiotelegraphic Convention. Commemorating this centennial, special event station PB100PREFIX (www.pb100prefix.nl)will be active on 4-31 October. QSL via PB0P.

PA - Ben, DO1BEN will be active as PD/DO1BEN from Texel Island (EU-038) on 8-14 October. He will operate mainly digital modes with some SSB. QSL via home call, direct or bureau. [TNX rsgbiota.org]

PJ6 - Mike, G4IUF will be active as PJ6/G4IUF from Saba (NA-145) between 1 October and 1 November. He plans to operate CW, SSB and digital modes on 80-6 metres "most mornings and early afternoons". QSL via home call. [TNX The Daily DX]

SV - Special event station SX100A will be active on 5-7 October from the radio room of museum ship "Georgios Averof". QSL via bureau. [TNX VA3RJ]

T8 - Kiichi, JF1LUT will be active as T88IK from Palau on 5-10 October. He plans to be QRV on 17, 15, 12, 10 and 6 metres SSB. QSL via JF1LUT, direct or bureau.

V4 - Once again John, W5JON will be active as V47JA from St. Kitts (NA-104)from 12 October to 1 November. He will operate SSB on 160-6 metres, and will participate in the CQ WW DX SSB Contest. His wife Cathy (W5HAM) will also operate occasionally as V47HAM. All QSLs via W5JON and LoTW. [TNX W5JON]

VK - Aki, JA1NLX will be active as JA1NLX/VK4 from Hamilton Island (OC-160) on 18-23 October. He will operate CW and SSB on 40-10 metres. QSL via home call and LoTW. Logsearch (look for JA1NLX/VK4_2012) and OQRS for direct and bureau cards on Club Log. [TNX JA1NLX]

W - Special event callsigns N1A, N2A, N3A, N4A, N5A, N6A, N7A, N8A, N9A and N0A will be activated from each of the US call areas on 7-13 October to celebrate the 8th anniversary of the North American QRP CW Club (NAQCC). QSL via operator's instructions. Details on the event can be found at http://naqcc.info/ [TNX VA3RJ]

XX9 - Andrea, IK7YTT will be active as XX9TTT from Coloane Island (AS-075), Macau on 26-29 October. He will participate in the CQWW DX SSB Contest on 16 metres. QSL via IZ8CCW, direct or bureau. Further information cen be found at http://www.mdxc.org/xx9ttt/ [TNX Mediterraneo DX Club]

ZD9 - The "Baltic Trader" - the cargo ship that Rob, M0VFC/ZD9UW is on [425DXN 1116] has been slightly delayed. They are now expecting to reach Tristan da Cunha on 29 September.

CQ WW RTTY DX CONTEST ---> This year's event will run from 00.00 UTC on 29 September through 24.00 UTC on the 30th (rules at www.cqwwrtty.com). Please visit www.ng3k.com/Misc/cqr2012.html for the Announced Operations listing maintained by Bill NG3K. The following stations are expected to participate:

05	VP9I		Bermuda	N1HRA
05	VY2/WC3O		Canada	K3MJW
07	HQ2N	SO LP	Honduras	EA5GL
08	8P2K	SOSB 10m	Barbados	KU9C

CLUB LOG OQRS ---> "There has been an update to Club Log which may prove useful to international expedition teams (outside NA) who want to receive OQRS payments in their home currency", Michael G7VJR says. From 23 September 2012, Club Log OQRS has support for US Dollars (USD), GB Pounds (GBP), Euros (EUR), Australian Dollars (AUD) and Japanese Yen (JPY), thus

removing the overheads for expeditions who use these currencies. "In future, when you request a card from Club Log, you might be asked to pay in one of the currencies above instead of dollars. Don't forget that PayPal will show you how much you're paying in your own currency before you send funds overseas".

DXCC NEWS ---> "Congratulations to the team which helped to reintroduce Amateur Radio to Kosovo, and welcome back to the airwaves to the returning Hams. As of this time Z60K, and/or any other Z6 station, will not count for any entity for DXCC awards purposes as they do not qualify under the DXCC rules. Any future change in Kosovo's DXCC status will be announced by ARRL". [TNX NC1L]

+ SILENT KEYS + Michael Owen, VK3KI passed away on 22 September, at 75 years of age. He was IARU Region 3 Chairman and President of the Wireless Institute of Australia (WIA), and he also served as IARU Vice President from 1989-1999.
Sid T. May, ET3SID, Chairman of the Ethiopian Amateur Radio Society (EARS), passed away on 25 September. An electrical engineer, Sid established the first Ethiopian radio club in 1993. The club station ET3AA was enjoyed by many different elementary schools before it was moved to its current location, the Institute of Technology at the Addis Ababa University. Sid taught Amateur Radio licensing classes in Ethiopia for more than 15 years. He administered RSGB and ARRL license exams sessions, and got more than 120 students pass the examination.
Thirty-nine-year-old Maj. Goran Savic, YT2A (YZ1SG) lost his life on 26 September, when a Serbian military aircraft on a training flight crashed into a residential area northwest of Belgrade. If there were no causalities among the residents, it is because he made an effort not to hit buildings until the very last moment before ejecting.

QSLs received direct or through managers: 4J0SFR, 4L1MA, 4O7VB, 5T0JL, 9A205AN, 9A8VB, 9M2/R6AF/p (AS-097), 9M4SLL (AS-051), 9M6XRO, 9V1YC, A45WW/m, BX5AA, CE4WJK, CP6XE, CX2DK, CY9M, D3AA, DP0GVN, E40VB, E7/UA4WHX, EA1CYK/P (AN-010), FK8CP, GS6PYE/p (EU-108), GW3LEW, H44UD (OC-149), HB0/HB9AON, HC5VF, J68HZ, J69MV, J88CG, JG8NQJ/JD1, JY8VB, KL2HD/p (NA-039), KP2/KZ5D, MW0YVK, OH0JV, OH2DZ/p (EU-096, EU-097, EU-126, EU-184), OJ0R, P4/WA2NHA, P43A, PJ2/DF8ZH, R6AF/p (EU-185), SM/OH2DZ/p (EU-139), ST2AR, SU9VB, T88HK, T8CC, TA3J/0 (AS-099), TF/OH2DZ, TG9NX, TJ3AY, TK/DL1RTL (EU-164), TX7M, V5/DJ2HD, V85TL, VK6LW, VK9NMZ, VU2PAI, XE1ZW, XF1C (NA-165), YL2BJ, YW5PI (SA-048), Z38VB, ZA1TC, ZD7DL.

OM,
Sudah beberapa hari mencoba memanggil 3D2C dalam pileup yg begitu ketat.
Saat signalnya kuatpun, yang menurut logika saya probabilitas diterima juga besar, masih belum berhasil.
Dalam kondisi seperti ini selalu muncul - apakah perlu memiliki RF Amp. Tapi khan harganya mahal sekali, mungkin sedikit bisa membantu dg menambah ketinggian antenna - tapi repot & takut ah.

Sabtu pagi ini saya masih coba juga sampai2 isteri yg akan berhalal bihalal dengan teman2 SMAnya terpaksa anak yang antar, suarapun mulai serak, tenggorokan agak sakit.

Jangan putus asa, sambil terus coba memanggil, saya upload foto2 HBH kompleks tempat tinggal saya.
Karena range QSX cukup lebar, saya coba monitor stasiun yg berhasil dipanggil dengan maksud akan panggil disitu - tapi tak terdengar.
Akhirnya ada stasiun kuat terdengar, ah YB0AZ/OM Wisnu - langsung saya standby juga di 28,505MHz, setelah OM Wisnu worked, saya juga transmit disitu - masih gagal didengar.
Terdengar lagi 3D2C memanggil YB1..., blm selesai dia sebut saya geser cari stasiun YB1 tsb, gak ketemu yg belakangan lihat di cluster ternyata YB1UUN - worked.

Coba lagi dan lagi....., akhirnya dengan jelas BELIAU memanggil YC0QR - worked - alhamdulillah.

Serba susah ya,

- Bila mereka simplex = jangankan kita didengarnya, kitapun sulit dengar mereka.
- Bila split QSX di hanya 1 freq = adu kuatnya gak nahan
- Bila QSX rangenya lebar = capek juga "nebak" dimana dia saat itu monitor, bisa aja kita manggil terus di freq yg dia gak monitor. HI.

Alhamdulillah, tinggal coba di 15M nya.
GL OM Hen....., HI HI

OM Hen, PF akhirnya dipanggil juga.
Saya hari ini juga sempat frustrasi dari jam 05.45 manggil 3D2C di 10m tidak pernah bisa masuk. Dengan hati yang "disabar-sabarin" sambil menunggu sepi akhirnya masuk juga. Lega, ini band ke-5 yg sdh saya dapat dengan barefoot...

OM Uun,
Saya sudah beberapa hari ini cuma di 10M band aja, sempat di 15M sebentar.

Dan saya sih gak nunggu sepi, tapi justru sampai frekwensinya sepi - 3D2Cnya tak terdengar lagi.
Sempat nulis juga di guestbooknya "dekat tapi susah dicapai", HI.

Tadi agak kuatir juga karena lihat di VOACAP kemungkinan terbesar berhasil hanya di jam2 0-2UTC terus makin jelek propagationnya.

ARLP039 Propagation de K7RA

ZCZC AP40
QST de W1AW
Propagation Forecast Bulletin 39 ARLP039
From Tad Cook, K7RA
Seattle, WA September 28, 2012
To all radio amateurs

SB PROP ARL ARLP039
ARLP039 Propagation de K7RA

Average daily sunspot numbers rose this week from 56 to 81.3, and average daily solar flux increased from 101.4 to 129.7. As reported in the ARRL Letter on Thursday, September 27, the increase was expected to continue over the next few days, with solar flux peaking at 150 on September 28-29, but what a difference a single day makes.

You can see the radical change in forecasts by going to http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html and selecting the September 26 prediction, then compare it to the September 27 prediction. Instead of a solar flux on September 28 to October 1 of 150, 150, 145 and 145, the latest prediction for those days is 130, 130, 125 and 125. Each day shows a 20 point lower solar flux than the earlier prediction.

So as it is now, from the September 27 prediction, we see solar flux of 130 on September 28-29, 125 on September 30 through October 2, 120 on October 3-4, 130 on October 5, 125 on October 6-7, 120 on October 8, 115 on October 9-10, 120 on October 11, 115 on October 12-13, and 120 on October 14-15. It is then expected to rise to a peak of 150 on October 20 and 150 again on October 25-26, with the average solar flux on October 21-24 around 141.

The average planetary A index declined from 7.4 last week (September 13-19) to 4.3 this week (September 20-26). The predicted planetary A index values are 5 on every day through October 4, 8 on October 5, 5 on October 6-11, then 10 and 12 on October 12-13, and 5 on October 14-16, followed by 10 on October 17, 8 on October 18-20, and 5 on October 21-25.

As always, we get a different perspective from the Czech Propagation Interest Group and Petr Kolman, OK1MGW. They see quiet to unsettled geomagnetic conditions on September 28-29, quiet to active on September 30 and October 1, active to disturbed on October 2, quiet to active on October 3, quiet to unsettled October 4-5, mostly quiet

October 6-8, then quiet to unsettled October 9-12, mostly quiet October 13-14, quiet to unsettled October 15, and quiet to active on October 16-17.

John Parnell, K7HV has enjoyed working DX with low power, and then documenting each new country worked on video, for what he refers to as YouTube DXCC. Check out his videos at http://www.youtube.com/playlist?list=PL677A093C75EB5C55. John also reports from K7SS some great conditions on 10 meters last weekend (September 22-23). Check John's QRZ.com listing at http://www.qrz.com/db/k7hv.

We also heard of great 12 meter conditions last weekend from Chris Callicott, G4DJJ of Northumberland in England. Chris reports: "Between 1810-1850 UTC on September 22 I worked 15 stations across IL, IN, MN, OH and WI. On September 23 from 1600-1620 UTC the band opened from UK to central and SW USA, giving easy SSB QSOs with 35 stations in AZ, CA, NV, WA, IL, IN, OH, MI, WI, MN, and Mexico. All loaded up to LoTW of course!"

A little solar activity helps, and of course we have transitioned to Fall conditions, which makes a big difference. The Autumnal Equinox was last weekend on September 22 at 1449 UTC.

Angel Santana-Diaz, WP3GW of Trujillo Alto, Puerto Rico reports, "I suppose you had a big report on 10 meters this weekend! Saturday September 22 in the afternoon was really busy on 10. Got to work around 1534 UTC V5/DL3ZAD and at 1556 UTC VP9LP. Later at 1951 and 2001 UTC 7Z1TT, EA9BW and EA7QC, who told me it was around 10pm his local time. The band was teaming with life! Then on Monday, got to work JX9JKA on 12m at 1915 UTC, which is a new DXCC entity for me. On other bands worked ZB2B, T77NM, 8P6CF and OX3KQ. And the bands still are interesting, hope they are great for the CQ WW SSB."

John Kelley, K4WY of Fairfax Station, Virginia sent a tip about an article claiming that we actually reached a sunspot cycle peak last year, but that was just for the Sun's northern hemisphere. The peak for the southern hemisphere may not occur until 2014. Although the article talks about the disconnect between the two hemispheres suggesting a grand minima in our future, note the comment from Michael Proctor, a solar physicist at the University of Cambridge, who is not convinced that this will happen. "This present cycle is similar to the weak one that ended in 1913, and that was followed by a strong cycle," he says.

Read the article at, http://www.newscientist.com/article/mg21528843.700-solar-maximum-oh-you-just-missed-it.html.

John Campbell, K4NFE of Huntsville, Alabama also gave us a tip about this article.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for September 20 through 26 were 68, 74, 46, 57, 90, 121, and 113, with a mean of 81.3. 10.7 cm flux was 117.4, 116.9, 124.5, 133.6, 136.6, 139.8, and 139.2, with a mean of 129.7. Estimated planetary A indices were 9, 5, 4, 2, 2, 2, and 6, with a mean of 4.3. Estimated mid-latitude A indices were 10, 5, 3, 1, 2, 2, and 6, with a mean of 4.1.

Welcome to FISTS CW Club

FISTS supports the use, preservation and education of Morse code. The club is devoted exclusively to CW operators, CW operating and people who are passionate about Morse code.

We have three straightforward goals:
Further the use of CW (Morse Code)
Engender friendships among members
Encourage newcomers to use CW (Morse Code)

FISTS UK is the Headquarters of the FISTS Club (International Morse Preservation Society).

Interested in becoming a member?
Find out more about our history.

27 Sep 12: Pileup Runner is a simulator of DX pileups. It is intended for the DX-pedition operators and those who are curious how the pileup looks and sounds at the DX side.

Compared to Morse Runner, which is a contest simulator, Pileup Runner has an extra dimension: frequency. In this program just working the callers is not enough. To be successful, you also have to tune your receiver through the pileup in a smart way.

The program is freeware, currently in the beta stage. Grab a copy
at http://www.dxatlas.com/PileupRunner !

73 Alex VE3NEA

Interested in becoming a member?

FISTS HQ welcomes new members who have a passion for Morse Code.

Benefits of membership include:
Our popular Quarterly A5 News Booklet
Free use of the FISTS QSL Bureau
Access to our members-only area
Help and support from like minded people

The FISTS Club is one of amateur radio's fastest growing organisations. It's an unique club, founded and maintained on solid principles using radio's oldest and yet most reliable communications mode - CW! Why notjoin us?

FISTS History

The FISTS Club, (International Morse Preservation Society) was founded in 1987 by the late Geo Longden G3ZQS of Darwen, Lancashire England, after recognising a need for a club in which veteran operators would help newcomers and less-experienced operators learn and improve CW proficiency. During the first year, membership reached 300, most of whom were in

Great Britain and Europe. The original Introduction to FISTS by Geo holds as true today as it did when he wrote it. Geo also explains how he chose the name FISTS.

The North American Chapter was formed in 1990 to assist 11 members in the USA receive the newsletter and as a banking convenience. Nancy Kott WZ8C of Hadley, Michigan was named US representative, a position she still holds but she now handles the affairs of over 7,000 members in the Americas.

The Down Under Chapter (New Zealand / Australia) was formed in 1998 to provide a similar service to Australasian members, with Ralph Sutton ZL2AOH as the VK/ZL representative. From a VK/ZL membership of four, there are now over 100 members "Down Under", principally in New Zealand. The New Zealand membership is the largest in any country outside England, Wales and North America.

The East Asia Chapter was formed in 2004 by a few Taiwanese and Japanese members to provide East Asian members with various services in their native languages.

Worldwide, FISTS members number over 10,000 members, growing each month.Why not join us?

Acknowledgements: Thank you to Dennis K6DF, Bill NT9K and Billy AB4RH for permission to use photographs from their key collections.

Join or Renew

Joining FISTS is easy; we do not ask for any code proficiency level, just a love of Morse code and a desire to keep it alive.

We organise many on-air activies over the year (rather than the traditional 599 contest type activities). We also attend a number of Rallies each year where many members come and have a chat. Membership brings with it a number of benefits:
Our popular Quarterly A5 News Booklet "Key Note".
Free use of the FISTS QSL Bureau.
Access to our members-only area with details of club projects, members lookup details and free-to-use software for radio amateurs.
Help and support from like-minded people.

Ready to become a member or renew?
Used to be a member but let it lapse? Please click here to go to the Re-join page.
Never been a member? Please click here to go to the New Member page.

We look forward to you joining us!

FISTS Frequencies

This page gives details of the FISTS frequencies that you can use to monitor and contact members.

The recommended areas are the following calling frequencies plus or minus 10 kHz. If you are not using QRP (5 Watts output or less), please use the 10 kHz that avoids the QRP areas per the table.

BandFrequencyTo avoid
QRP, extend
160m 1.818 MHz
80m 3.558 MHz Down

40m 7.028 MHz Down
30m 10.118 MHz Up
20m 14.058 MHz Down
17m 18.085 MHz Down
15m 21.058 MHz Down
12m 24.918 MHz
10m 28.058 MHz Down
6m Any CW frequency
4m Any CW frequency
2m 144.058 MHz

If you're a member or not, call on these frequencies at whatever speed you're happy at, be it 5 wpm or 35 wpm, and you will most likely get a reply from one of our members. We pride ourselves on having a friendly, helpful membership that is always ready to assist the newcomer as well as veteran operators.
Notes
When calling CQ, please alternate "CQ FISTS DE ..." with plain "CQ DE ..." calls; FISTS encourages contacts between members and non-members.
When replying to a CQ, please send no faster than the caller. Don't assume if it's a G3/G2 station coming back to your call they will be comfortable at 25 wpm.
If you are asked to QRS ("send more slowly"), please do so.
It's helpful to call CQ at different speeds. Experience has shown that we have many members that are key-shy due to only high speeds being used, so you may get more replies to your CQ call if you drop your speed to below 12 wpm. Give it a try!
If taking part in a FISTS Challenge such as the Ladder, please vacate or pass on the FISTS calling frequency after 5 continuous QSO's.
Due to IARU band plan changes, the 12m frequency is now outside the recommended CW-only area.
Due to the IARU Region 3 band plan, FISTS Down Under (Australia and New Zealand) use 3.528 MHz. They also use 1.808 MHz, but in Europe this frequency is outside the CW band plan area and illegal in some countries, including the UK.

Chart

We have available a handy A4 chart of FISTS frequencies, IARU Region 1 CW band plan areas and QRP frequencies, making it easy to visualise the layout of the CW areas. You can download or print the PDF version or the Microsoft Word version.

Resources

This page provides access to various items including Key Note newsletters and resources you can use to help you learn or improve your Morse code.

Please choose one of the following:

Learning or Improving Morse
Forms and Documents Provides links to various FISTS forms and documents
Activities Results Contains Brasspounder and results documents for FISTS Activities
Key Note Archive (public) Contains Key Notes from 12 months ago to October 1987
Key Note Archive (Members' Area) Contains Key Notes back to October 1987
Measure Callsign Weight Measure the "weight" (time taken to send) of callsigns in Morse

Learning or Improving Morse

There are many options. Computer-based Morse training gives you perfectly-formed Morse code and can provide incentive by giving you scores or other feedback. However, one-on-one Morse training with a human being or live contacts on the radio can be much more fun! A good idea is to mix computer-based training with other activities involving real people. Additionally, human operators rarely send perfect Morse, so getting some practice at listening to morse sent by other people is important.

Some computer-based training allows you to type in what you hear and then provides you with scores and guides your training based on your results. This can give an incentive and sense of achievement. The downside though is that you also need to learn to type quickly and accurately. In fact, the typing in itself can become an obstacle to learning Morse and doesn't reflect real operating practice; most people handwrite brief notes and/or copy in their head only.

Try not to let "stage fright" get the better of you. It's not an exam and there are no marks out of 10! If you miss something your QSO partner sends to you, you can ask for a repeat or just bluff your way out and say there is QRM or QRN - the other person will be none the wiser!

Websites

Learn CW Online (lcwo.net)Fabian Kurz DJ1YFK provides online Morse training via his website http://lcwo.net.

You listen to Morse and then type in what you hear and are scored. A big advantage is that the only software you need is the Adobe Flash Player, which is already installed on most computers. Various features are included such as the Koch Method for new starters, Word and Callsign training for improvers.

W1AW Practice FilesThe ARRL (USA national radio society) provides copies of the W1AW Code Practice MP3 Files for various speeds between 5wpm and 40wpm in MP3 files, which you can either listen to online or download for your MP3 player. These provide a mixture of plain language (taken from the ARRL QST magazine) and callsign training. As well as the most recent files, there are hundreds of additional files available.

Hand Sending Training film (US Army)There's a very entertaining, helpful and humerous US Army training film from 1966 on hand-sending Morse and adjusting keys, entitled "INTERNATIONAL MORSE CODE, HAND SENDING". Part of the film covers American-style hand/arm positioning, but the majority of the film is very relevant to all styles of sending.

South Manchester Radio and Computing Club Practice FilesThe S.M.R.C.C. Morse Practice web page provides MP3 Morse files with text, QSOs and letter groups at 12, 18 and 25 w.p.m.

FISTS CW Course

The FISTS CW Course is a Morse code training package suitable for beginners and improvers. It comprises:
The well known K7QO course on CD to to learn the code (including files containing the texts sent).
Two practice CD's made by our own Mary G0NZA, which are great for people that want to improve from the 12 wpm level.
An A5 booklet with forty-odd pages that includes all the texts for Mary's disks.This

package is a real help to anyone that is learning Morse code and we are very happy to be able to offer it.
The price just covers the costs of having the disks mastered and printed and the booklet produced. If you would like a copy, please visit the Club Sales page.

We would like to thank Chuck K7QO and Mary G0NZA for allowing FISTS to produce these disks.

Software

G4FON's Koch Morse TrainerProbably the most popular computer program is Ray Goff G4FON's Koch Morse Trainer. This uses the proven Koch Method and provides additional features for improvers such as Word training. You can also use it to convert text files into Morse code. The program can be used to generate Windows sound (.wav) files. By installing some free MP3 software, you can also use it to generate MP3 files for your MP3 player.

RufzXP Callsign TrainerFor those who have mastered the basics, the RufzXP program by Mathias Kolpe DL4MM and Alessandro Vitiello IV3XYM provides callsign training. As you copy callsigns correctly, the speed gradually increases. You can also see how you compare to other users worldwide by looking at your place in the international RufzXPToplist (submitting your own results to the list is optional). This is quite good fun!

Morse Runner Contest TrainerThe Morse Runner program by Alex Shovkoplyas VE3NEA simulates contest pile ups with interference from other stations etc. Even if you're not interested in taking part in contests, this program can be fun and help you learn to cope when conditions get busy on the air.

Live Practice

Contacts on the AirListen out and / or call CQ at a speed that you prefer on the FISTS Frequencies. You don't need to be a member - FISTS encourages contacts between members and non-members. (However, why not join us?) For Europe, at the time of writing (September 2009), the best frequencies to meet up with FISTS members at distances of between 50 - 200 miles are on 80m around 3.558 MHz.

Pre-arranged ContactsYou can arrange contacts with other people on the air ("skeds"). Please include your location (town/city/country), what frequency bands you can use and your email address or some other means that members can use to contact you. Places you can ask are:
If you're a FISTS member, you can contact volunteers listed on the Arrange Slow Speed Morse (QRS) Contacts web page by email or telephone.
The fistscw Yahoo Group (reflector).
Ask Rob M0BPT activities@fists.co.uk to put a note in the monthly FISTS Brasspounder electronic news letter.
Ask Graham G3ZOD webmaster@... to put an item in the FISTS website news page.
Ask the Key Note editor keynote@....uk to put a note in the next quarterly FISTS Key Note magazine.
GB2CW Slow Morse TransmissionsThe RSGB (UK National Radio Society) organises slow morse transmissions on 160m, 80m, 6m and 2m from various volunteers around the UK under the callsign GB2CW. See the schedule for days, times and frequencies.

W1AW Slow Morse TransmissionsThe ARRL provides slow Morse transmissions on 160m, 80m, 40m, 20m , 17m, 15m, 10m and 2m from their headquarters station W1AW. Although some distance from Europe, W1AW is frequently audible due to good antennas. See the schedule for days, times and frequencies. Although there are copies of the transmissions available as MP3 files on the ARRL website, it's good practice reading live transmissions over the air along with the inevitable noise and interference.

RSGB Morse Tests and CertificatesThe RSGB (UK National Radio Society) now offers free Morse competency tests and certificates. Many people enjoy the challenge and satisfaction of passing a test that recognises their achievements. These are available for various speeds and are conducted by an examiner. They are not related to licence privileges in the UK or elsewhere.

G4LHI On-air Training Sessions (Huntingdon, UK)Peter G4LHI runs Morse training sessions available in the Huntingdon area at 19:30 on Mondays, 20:00 on Tuesdays & on 2M, 144.7625 MHz, which usually go on until just after 21/22:00. Have a listen & see if you can hear them & just call in on the breaks if you wish. Talk back is on FM on the same frequency. For more information, please contact Peter; his email address is available from his QRZ.COM entry.

South Manchester Radio and Computing Club 2m Practise NetS.M.R.C.C. runs a 2m Morse practise net on Monday evenings.

Books

There is a free, downloadable book entitled The Art & Skill of Radio Telegraphy. This contains much information on learning Morse to a very high standard and is essential reading for anyone with an interest in Morse code.

Another free, downloadable book is Zen and the Art of Radiotelegraphy. This is a Morse tutor book with an emphasis on the psychology.

Banyak complain dari DXers yang merasa kesulitan (banget) dalam usaha memperoleh kesempatan kontak dengan 3D2C.

Komentar2nya antara lain ada yg mengatakan :

- seperti main rolet
- range QSX yang terlalu lebar
- listening 5 to 10 up tapi ternyata sampai >20-30 kHz
- lotere DX
- after 2 hours (gak tau ya saya sampai berhari2)
- yang terakhir HB9KAI spotting & "why not splitting from 10M to 160M"

Tapi banyak juga yg berterima kasih, good ears op dll.

Pagi/siang ini YE5PQM terdengar di 15 SSB lalu beliau ragchewing dan saya tune di bawah 225 waktu kembali eh sudah ditimpa OH1WZ, 20db over S9, dibawah OH1WZ saya bisa dengar beliau panggil CQ DX.
Apakah ada yg kenal OM Har YE5PQM saya mau coba sked dgn beliau dari Pulau Batam...

Pagi ini cukup baik propagasi saya bisa kontak YB4IR di 10M RTTY dan YE2W YB0PAH di 20M RTTY
lalu juga dengar YB1UUN, YB0ECT di 10m dan akhirnya bisa contact OM Syarif YB1FWO di 20M,
new YB Station for me... thanks OM Syarif

terima kasih sebelumnya
steve, w2fb

OM Taufan,
Beneran lotere dong ya...? HI
Kalo mereka LoTW user mendingan sih, kita masukkan ke LoTW tinggal tunggu konfirmasinya, tapi kalo paper QSL - bisa rugi bandar. HI HI HI.

Kalo seperti OM Ndut yg baikhati & tidak sombong sih bagus.
Lagi kontes WAE ada dari luar EU masuk dicatat juga (walau bukan di log kontes) dan dikirimin QSL card.

Banyak complain dari DXers yang merasa kesulitan (banget) dalam usaha memperoleh kesempatan kontak dengan 3D2C.

Komentar2nya antara lain ada yg mengatakan :

- seperti main rolet
- range QSX yang terlalu lebar
- listening 5 to 10 up tapi ternyata sampai >20-30 kHz
- lotere DX
- after 2 hours (gak tau ya saya sampai berhari2)
- yang terakhir HB9KAI spotting & "why not splitting from 10M to 160M"

Tapi banyak juga yg berterima kasih, good ears op dll.

OM Taufan,
Mungkin maksudnya dia nyindir utk range QSX yg demikian lebarnya, "knapa gak sekalian QSX doi 10M - 160M"

Beberapa hari yll, waktu nyoba panggil 3D2C ini saya 2 kali tertawa sendirian :

- Di frekwensi TXnya ada stasiun JA (JN1NDY) manggil, rupanya gak perhatikan bahwa QSX up 5-10.
Lucunya atau konyolnya, ada DXer lain yg biasanya teriak2 up up up atau split, kali ini kesal juga rupanya. Dia coba bohong dg jawab disitu juga : "NDY 59", tapi si Jepang tahu itu bukan dari 3D2C - cuek tetap nyoba disitu, si jahil malahan lebih jelas lagi : "JN1NDY 59".

- Capek manggil tanpa hasil, saya buka FB lihat2 dan baca2 sambil tetap monitor 3D2C.
Tiba2 ada panggilan dia "Queen Radio" - GR banget padahal gak nyoba panggil, saya langsung ambil mike nyahut panggilan QR tadi, padahal juga entah di freq mana dia dengar QR itu.
Ternyata yg dipanggil KF0QR. Nyengir sendirian deh.

Om Hendro,
Ada satu lagi pengalaman dengan D64K stasiun dx-pedition.
Saya yakin berhasil kontak dengan dia, tapi setelah saya cek ke lognya dia
callsign saya tidak tercatat di log dia.
Dalam hati saya mungkin kemaren kontak saya yang jawab Pirate ..... kali ya.
Tapi akhirnya saya email ke QSL Managernya ternyata kesalahan masukin
callsign saya YB0MZI/6 bukan YB0MZI/4 akhirnya dia janji mau dikoreksi
katanya.

Mungkin jika ada teman-teman yg berhasil kontak tapi tidak tercatat di
Lognya bisa juga kesalahan operatornya pada waktu input callsign kita.

OM Zen,
Confirming by email. HI Tapi tepatnya klarifikasi itu ya.

Mungkin waktu saya kontak dengan Martinique/FM5AN begitu kali ya ?
Callsign saya salah didengar atau dicopy oleh OM Guy, jadi waktu saya kirim QSL card ke dia dapat balasan dari dia dg catatan "Not in the log". :-(

Enaknya kalo mereka gunakan checklog/clublog jadi kita bisa cek dulu apakah kita benar2 sudah ada di lognya mereka.

OM Zen, ajukan Diamond DXCC gak ?
Kemarin saya dapat stasiun China yg portable di Tibet BY1WXD/0 - lumayan nambah2 - masih sering muncul tuh kalo gak salah sampai Oktober 2012.

OM Zen,
Sama di worksheet yg dibikin sama JA1WWO kolom date/time jadinya ########### dan di worksheet satunya otomatis jadi angka desimal bukan format date/time.

Waktu saya apply online jadinya nulis lagi - ga majalah sih (diperbaiki saja di application form itu), tapi anehnya untuk BY1WXD/0 ini isinya koq benar ya, tertulis date & time seperti yg saya masukkan.

Subject: [YBDXC_News] 3D2C (lagi)

Banyak complain dari DXers yang merasa kesulitan (banget) dalam usaha memperoleh kesempatan kontak dengan 3D2C.

Komentar2nya antara lain ada yg mengatakan :

- seperti main rolet
- range QSX yang terlalu lebar
- listening 5 to 10 up tapi ternyata sampai >20-30 kHz
- lotere DX
- after 2 hours (gak tau ya saya sampai berhari2)
- yang terakhir HB9KAI spotting & "why not splitting from 10M to 160M"

Tapi banyak juga yg berterima kasih, good ears op dll.

Oh, gitu ya OM Uun - saya gak begitu perhatikan pokoknya sudah dapat BY = 1 entity, tapi karena utk DDXCC ini dihitung sbg satu entity tersendiri ya saya kejar dia semalam.

BY zero langka ya, sementara BY zero banyak. HI

OM Taufan,
Beneran lotere dong ya...? HI
Kalo mereka LoTW user mendingan sih, kita masukkan ke LoTW tinggal tunggu konfirmasinya, tapi kalo paper QSL - bisa rugi bandar. HI HI HI.

Kalo seperti OM Ndut yg baikhati & tidak sombong sih bagus.
Lagi kontes WAE ada dari luar EU masuk dicatat juga (walau bukan di log kontes) dan dikirimin QSL card.

GM OM Mus,
Posisi dak di QTH khan sudah cukup tinggi gak perlu tower yang tinggi lagi.

Kalo mau pake tower 3 meter (1 lgth) ada di rumah, sekedar buat tempat rotator & thrust bearing aja sih cukup deh.

OM Steve - GM,
Tadi pagi propagation di 10M lumayan bagus saya juga sempat monitor YE5PQM cukup kuat signalnya di jakarta.
Di cluster juga terlihat banyak stasiun dari NA tapi kalo saya arahkan antena ke NA sayangnya lebih kuat terima signalnya JA.

Saya bermaksud coba2 nasib utk panggil Cuba CO6LC di 10M, tapi berhubung simplex jadi susah monitornya karena tertimpa signal2 dari JA land.
Sekarang suasana kembali hening kecuali derau.., HI.

Kalo YE5PQM khan ada emailnya : ye5pqm_har@...

OM Zen,
Penyebab berdirinya banyak pagar ################ adalah karena kita menulis data time menggunakan tanda : sbg pembatas jam/menit.
Misalnya 11:13 - waktu saya tulisnya menggunakan titik (11.13) hasilnya normal.

OM Zen,
Sama di worksheet yg dibikin sama JA1WWO kolom date/time jadinya ########### dan di worksheet satunya otomatis jadi angka desimal bukan format date/time.

Waktu saya apply online jadinya nulis lagi - ga majalah sih (diperbaiki saja di application form itu), tapi anehnya untuk BY1WXD/0 ini isinya koq benar ya, tertulis date & time seperti yg saya masukkan.

OM Mei,
Kalo OM Taufan sih cukup nanem yang di TNI-AL itu, waktu panen bisa bertapa setahun, cukup hasil panennya.

Hibernasi deh, gak muncul2 disini adanya disono (DX). HI

OM Steve.
saat ini 12.11 UTC saya masih monitor di 10M yang waktu menjelang magrib tadi propagasi nampaknya bagus.
sempat coba panggil 4Z1TL yg signalnya kuat sekali 10dB over S9 - sayapun diterima bagus di dekat Tel Aviv sana.

Dimana OM Steve QRV..?

THank you OM Anton,
saya akan coba juga email beliau,

OM Hendro nanti malam coba sked di 10 or 15 or even 20 kalau mau
hari ini terbuka YB ke East Coast di 10-20 m

thanks
steve

Subject: Bls: Bls: Bls: [YBDXC_News] Nama Club yg sudah dikoreksi oleh WAEDXC

Siiplah OM Yongkie,
Beberapa hari ini masih gagal utk QSO dengan 3D2C di 10M maupun di 15M.
Semalam juga panggil Barbados, sekedar utk nambah2 Diamond DXCC setengah mati padahal OM Imam-YB4IR sekali panggil langsung worked.

Saya akhirnya berhasil setelah berulang mengkoreksi prefix - karna dia manggilnya YT0QR, setelah saya berhasil malahan 8P6SH memberikan kesempatan kepada "any other Indonesian station" - tapi mungkin rekan2 sudah dapat Barbados di 10M. Sebelumnya saya sudah conformed dg 8P6ER tapi tahun 2011.

Judul: [YBDXC_News] Nama Club yg sudah dikoreksi oleh WAEDXC

Dear All,
Dari data Log teman-teman yang telah mencantumkan nama YBDXC atau juga YB Land DX Club, semua sudah dikoreksi dan diseragamkan oleh pihak penyelengara Contest sebagaimana dibawah ini dengan nama "YB Land DX Club".
 Namun masih ada beberapa yang memang tidak mencantumkan nama Clubnya dan atau ada yang memang salah nama (seperti YB0COU), bahwa definisi Club dari panitia seharusnya adalah yang bukan dari Organisasi resmi.
 Untuk itu mohon dapat diperbaiki dan dikirim ulang data Lognya, supaya semua score yang dari Indonesia dapat digabung menjadi satu untuk bersaing dengan Club dari negara lain.

OM Djoko,
Terima kasih infonya, tapi award/diplome dari REF/France koq ada yang belum dimasukkan yah ?
Saya mau apply DUF - le Diplome de l'Univers Francophone, sudah siapkan QSL card & GCR untuk minta dicheck oleh OM Yoyok/YB0ECT - karena tanggung, blm dibawa ke beliau - sedang tunggu tambahan QSL card baru - kalo bisa datang dalam waktu dekat.

73 es tnx

OM Seno,
Saya gak tau deh, apa maksudnya dia bilang "Any other Indonesia station".

Apakah :

- YB-land masih dicari, atau
- Karena sebelumnya EU melulu, kasih kesempatan ke YB
- Mumpung antenna diarahkan ke YB-land

Siiplah OM Yongkie,
Beberapa hari ini masih gagal utk QSO dengan 3D2C di 10M maupun di 15M.
Semalam juga panggil Barbados, sekedar utk nambah2 Diamond DXCC setengah mati padahal OM Imam-YB4IR sekali panggil langsung worked.

Saya akhirnya berhasil setelah berulang mengkoreksi prefix - karna dia manggilnya YT0QR, setelah saya berhasil malahan 8P6SH memberikan kesempatan kepada "any other Indonesian station" - tapi mungkin rekan2 sudah dapat Barbados di 10M. Sebelumnya saya sudah conformed dg 8P6ER tapi tahun 2011.

Dear All,
Dari data Log teman-teman yang telah mencantumkan nama YBDXC atau juga YB Land DX Club, semua sudah dikoreksi dan diseragamkan oleh pihak penyelengara Contest sebagaimana dibawah ini dengan nama "YB Land DX Club".
 Namun masih ada beberapa yang memang tidak mencantumkan nama Clubnya dan atau ada yang memang salah nama (seperti YB0COU), bahwa definisi Club dari panitia seharusnya adalah yang bukan dari Organisasi resmi.
 Untuk itu mohon dapat diperbaiki dan dikirim ulang data Lognya, supaya semua score yang dari Indonesia dapat digabung menjadi satu untuk bersaing dengan Club dari negara lain.

GM OM Hen,
How r u ?

Bbrp kali sy on air, memang masih banyak mereka yg ngrubutin sy, terutama CW mode, mgkn jg mode lain selain Phone, baik EU, NA atau JA, YB-land masih dicari.

Satu cerita ketika XP2I (Greenland) on air YB2LSR berusaha masuk, walau signal tidak besar dibanding dgn yg lainnya, prioritas tetap pada YB2LSR sampai penyebutan call YB2LSR benar, kesimpulan sy YB-land masih dicari. Demikian jg dari EU lainnya, NA/SA.
Demikian pengalaman sy.

Kapan kita qso di 20m?
Hi...

3886. [YBDXC_News] Nama Club yg sudah dikoreksi oleh WAEDXC (fenomena prop)

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-10-01 01:20:23 UTC
From: hendro s.joedho
Topic: 3813 Message: 3886

I'm fine2 saja OM Seno, alhamdulillah.
Syukurlah kalo YB-land masih banyak yang cari, saya juga sering monitor bebverapa rekan yang CQing sibuk dipileup.
Biasanya juga stasiun yg signalnya diterima kuat menarik perhatian orang.

Nah, fenomena DX yang sampai saat ini saya belum mengerti adalah "buka/tutup" nya propagasi ke satu arah.
Maksudnya begini, seringkali saya memanggil DX station yg signalnya lumayan lemah, modulasi hawar2. Setelah sekian lama monitor dan coba panggil akhirnya saya berhasil, sepertinya signal sayapun lemah disana, seperti juga saya "tertatih-tatih" memonitor signalnya.

Nah, seringkali setelah itu signal dia menguat dan semakin jelas saya bisa monitor - hal ini kadang membuat saya berkeinginan sekalilagi panggil dia supaya lebih pasti dengan report yg lebih baik - tapi kadang berhubung rasanya bisa bikin dia kesal karena dupe, saya gak panggil lagi.

Apakah penguatan signalnya itu akibat ybs mengarahkan antennanya ke saya sewaktu berusaha monitor, tapi koq waktu QSO signal tewtap lemah.
Atau pikiran awamnya greenhorn nih (jgn ditertrawakan ya !!!) - sebelumnya spt ada tabir yg menutupi arah antara QTH saya dengan ybs, lalu ketika saya menembus dari satu sisi dan ybs dari sisi lainnya, maka tabir itu agak terkuak. HI HI HI. Whateverlah pokoke sudah worked.
Contoh teranyar : tadi pagi CO6LC di 10M dan PJ2/XE1KK di 15M.

Kalo saya boleh menertawakan diri sendiri.

73 es HI HI HI

Subject: [YBDXC_News] Nama Club yg sudah dikoreksi oleh WAEDXC (fenomena prop)

I'm fine2 saja OM Seno, alhamdulillah.
Syukurlah kalo YB-land masih banyak yang cari, saya juga sering monitor bebverapa rekan yang CQing sibuk dipileup.
Biasanya juga stasiun yg signalnya diterima kuat menarik perhatian orang.

Nah, fenomena DX yang sampai saat ini saya belum mengerti adalah "buka/tutup" nya propagasi ke satu arah.
Maksudnya begini, seringkali saya memanggil DX station yg signalnya lumayan lemah, modulasi hawar2. Setelah sekian lama monitor dan coba panggil akhirnya saya berhasil, sepertinya signal sayapun lemah disana, seperti juga saya "tertatih-tatih" memonitor signalnya.

Nah, seringkali setelah itu signal dia menguat dan semakin jelas saya bisa monitor - hal ini kadang membuat saya berkeinginan sekalilagi panggil dia supaya lebih pasti dengan report yg lebih baik - tapi kadang berhubung rasanya bisa bikin dia kesal karena dupe, saya gak panggil lagi.

Apakah penguatan signalnya itu akibat ybs mengarahkan antennanya ke saya sewaktu berusaha monitor, tapi koq waktu QSO signal tewtap lemah.
Atau pikiran awamnya greenhorn nih (jgn ditertrawakan ya !!!) - sebelumnya spt ada tabir yg menutupi arah antara QTH saya dengan ybs, lalu ketika saya menembus dari satu sisi dan ybs dari sisi lainnya, maka tabir itu agak terkuak. HI HI HI. Whateverlah pokoke sudah worked.
Contoh teranyar : tadi pagi CO6LC di 10M dan PJ2/XE1KK di 15M.

Kalo saya boleh menertawakan diri sendiri.

GM OM Hen,
How r u ?

Bbrp kali sy on air, memang masih banyak mereka yg ngrubutin sy, terutama CW mode, mgkn jg mode lain selain Phone, baik EU, NA atau JA, YB-land masih dicari.

Satu cerita ketika XP2I (Greenland) on air YB2LSR berusaha masuk, walau signal tidak besar dibanding dgn yg lainnya, prioritas tetap pada YB2LSR sampai penyebutan call YB2LSR benar, kesimpulan sy YB-land masih dicari. Demikian jg dari EU lainnya, NA/SA.
Demikian pengalaman sy.

Kapan kita qso di 20m?
Hi...

OM Seno,
Saya gak tau deh, apa maksudnya dia bilang "Any other Indonesia station".

Apakah :

- YB-land masih dicari, atau
- Karena sebelumnya EU melulu, kasih kesempatan ke YB
- Mumpung antenna diarahkan ke YB-land

Siiplah OM Yongkie,
Beberapa hari ini masih gagal utk QSO dengan 3D2C di 10M maupun di 15M.
Semalam juga panggil Barbados, sekedar utk nambah2 Diamond DXCC setengah mati padahal OM Imam-YB4IR sekali panggil langsung worked.

Saya akhirnya berhasil setelah berulang mengkoreksi prefix - karna dia manggilnya YT0QR, setelah saya berhasil malahan 8P6SH memberikan kesempatan kepada "any other Indonesian station" - tapi mungkin rekan2 sudah dapat Barbados di 10M. Sebelumnya saya sudah conformed dg 8P6ER tapi tahun 2011.

Dear All,
Dari data Log teman-teman yang telah mencantumkan nama YBDXC atau juga YB Land DX Club, semua sudah dikoreksi dan diseragamkan oleh pihak penyelengara Contest sebagaimana dibawah ini dengan nama "YB Land DX Club".
 Namun masih ada beberapa yang memang tidak mencantumkan nama Clubnya dan atau ada yang memang salah nama (seperti YB0COU), bahwa definisi Club dari panitia seharusnya adalah yang bukan dari Organisasi resmi.
 Untuk itu mohon dapat diperbaiki dan dikirim ulang data Lognya, supaya semua score yang dari Indonesia dapat digabung menjadi satu untuk bersaing dengan Club dari negara lain.

Iya, semua yang udah ngelihat saya pasti bilang top, waktu HBH alumni sma kemarin juga didapuk/ditunjuk utk mimpin doa juga karena dianggap paling TOP = Tuwir Ompong Peyot.

Cuma waktu itu yg gak pas adalah waktu si panitia yg nunjuk saya baca doa itu bilang "Kamu deh yang paling serius, jadi cocok".
Pegang kertas contekan gemetar/groggy - tapi alasan saya waktu ditanya teman "gemetar karena buyuten udah tua".

OCDX minggu depan ya, insya Allah jadi penggembira deh ya OM Ndut. Semoga banyak muncul DX station yang langka.

ORARI AWARDS PROGRAM
ORARI (ORGANISASI AMATIR RADIO INDONESIA) has the pleasure to announce herewith the issue of ORARI Awards Program, i.e.
1. The "JAKARTA AWARD" (JA/SWL-JA), for confirmed contact with, or having heard from, licensed amateurs in Jakarta (0 Call Area only), the Capital of the Republic of Indonesia.
2. The "WORKED ALL INDONESIA AWARD" (WAIA/SWL-WAIA), for confirmed contact with, or having heard from, licensed amateurs in each of the Indonesia Call Areas.
3. The "WORKED THE EQUATOR AWARD" (WTE/SWL-WTE), for confirmed contact with, or having heard from, licensed amateurs in countries along the equator.
4. The "DANAU TOBA AWARD" (DT/SWL-DT), for confirmed contact with, or having heard from, licensed amateurs in the Province of North Sumatera, Indonesia (6 Call Area).
5. The "BOROBUDUR AWARD" (BA/SWL-BA), for confirmed contact with, or having heard from, licensed amateurs in the Central Part of Java, Indonesia (2 Call Area which includes the Provinces of Central Java and Yogyakarta).
6. The "PAHLAWAN AWARD" (PA/SWL-PA), for confirmed contact with, or having heard from, licensed amateurs in the Province of East Java, Indonesia (3 Call Area).

GENERAL RULES
* ORARI Awards will be issued to licensed amateurs the world over for 2 x PHONE, 2 x CW, 2 x RTTY, mixed or single mode, mixed or single band in 80, 40, 20, 15, and 10 meter band only. SWL Award in the same category will also be available. The applicant may request endorsement for such distinction accordingly.
* To be valid, all contact or listening must be made on or after July 9, 1968.
* Claim must be accompanied by a QSL card list (GCR) furnished with the callsigns of stations worked, dates, bands and modes of contact meeting the requirements of the award concerned. Rules and requirements will be specified, when required, in each of the Award Program.
* QSL card list must be accompanied by a statement from the applicant's National Society, Club Station, or from any two amateurs other than the applicant, that the QSL cards of the contact listed are in the possession of the applicant, and that the items of the cards are correctly listed.
* A fee of US $ 8.00 (eight US Dollar only) or 16 (sixteen) IRCs will be charged per award and should be sent along with the application to the respective Awards Manager.
* For the Indonesian amateurs, a fee of Rp. 40.000,- (fourty thousands rupiahs) will be charged per award, and valid for Jakarta, Worked All Indonesia, Worked the Equator and Pahlawan Awards only.
* For the Indonesian amateurs, the Jakarta, Worked All Indonesia, and Worked the Equator award fee should be paid to Rekening Giro Pos ORARI PUSAT No. A.13.684.
* Only contact with land station within the same country will be acceptable.

JAKARTA AWARD

he he he

(ketawa ini bukan indikasi mengejek, tp merupakan keramah-tamahan seorang amatir radio seperti seno ini)
lagi .... heheheheh ....

hal yg diceritakan Om Hen itu wajar saja, banyak kemungkinannya
salah satu nya persis apa yang diuraikan Om Hen, betul sekali ....
namun jangan salah kadang ada juga yang usil,

misal : dia pake QRP, sudah tau condx ga bagus dia nge-test (asem ..)
atau pake model cw straight key yang di model2 ketukannya,
apa yang aku lakukan?
kalo pas sepi pura2nya agn...agn...???? walau sebenernya aku sudah dapet full call-nya agn agn .... sampai dia capek dulu ..... hehehehe .

apalagi kalo itu bukan new entity, hahaha ..
tapi aku tidak serta merta begitu, lihat si-kon dulu kita bisa lihat keseriusannya dia untuk qso dgn kita dilihat/didengar dari caranya dia panggil (just a feeling lah, walau kadang tidak benar).
itulah salah satu seninya ... the Art of Amateur Radio

anyhow :
Congratulation : YC0QR worked CO6LC di 10M dan PJ2/XE1KK di 15M

all the best

Subject: [YBDXC_News] Nama Club yg sudah dikoreksi oleh WAEDXC (fenomena prop)

I'm fine2 saja OM Seno, alhamdulillah.
Syukurlah kalo YB-land masih banyak yang cari, saya juga sering monitor bebverapa rekan yang CQing sibuk dipileup.
Biasanya juga stasiun yg signalnya diterima kuat menarik perhatian orang.

Nah, fenomena DX yang sampai saat ini saya belum mengerti adalah "buka/tutup" nya propagasi ke satu arah.
Maksudnya begini, seringkali saya memanggil DX station yg signalnya lumayan lemah, modulasi hawar2. Setelah sekian lama monitor dan coba panggil akhirnya saya berhasil, sepertinya signal sayapun lemah disana, seperti juga saya "tertatih-tatih" memonitor signalnya.

Nah, seringkali setelah itu signal dia menguat dan semakin jelas saya bisa monitor - hal ini kadang membuat saya berkeinginan sekalilagi panggil dia supaya lebih pasti dengan report yg lebih baik - tapi kadang berhubung
rasanya bisa bikin dia kesal karena dupe, saya gak panggil lagi.

Apakah penguatan signalnya itu akibat ybs mengarahkan antennanya ke saya sewaktu berusaha monitor, tapi koq waktu QSO signal tewtap lemah.
Atau pikiran awamnya greenhorn nih (jgn ditertrawakan ya !!!) - sebelumnya spt ada tabir yg menutupi arah antara QTH saya dengan ybs, lalu ketika saya menembus dari satu sisi dan ybs dari sisi lainnya, maka tabir itu agak terkuak. HI HI HI. Whateverlah pokoke sudah worked.
Contoh teranyar : tadi pagi CO6LC di 10M dan PJ2/XE1KK di 15M.

Kalo saya boleh menertawakan diri sendiri.

GM OM Hen,
How r u ?

Bbrp kali sy on air, memang masih banyak mereka yg ngrubutin sy, terutama CW mode, mgkn jg mode lain selain Phone, baik EU, NA atau JA, YB-land masih dicari.

Satu cerita ketika XP2I (Greenland) on air YB2LSR berusaha masuk, walau signal tidak besar dibanding dgn yg lainnya, prioritas tetap pada YB2LSR sampai penyebutan call YB2LSR benar, kesimpulan sy YB-land masih dicari. Demikian jg dari EU lainnya, NA/SA.
Demikian pengalaman sy.

Kapan kita qso di 20m?
Hi...

OM Seno,
Saya gak tau deh, apa maksudnya dia bilang "Any other Indonesia station".

Apakah :

- YB-land masih dicari, atau
- Karena sebelumnya EU melulu, kasih kesempatan ke YB
- Mumpung antenna diarahkan ke YB-land

Siiplah OM Yongkie,
Beberapa hari ini masih gagal utk QSO dengan 3D2C di 10M maupun di 15M.
Semalam juga panggil Barbados, sekedar utk nambah2 Diamond DXCC setengah mati padahal OM Imam-YB4IR sekali panggil langsung worked.

Saya akhirnya berhasil setelah berulang mengkoreksi prefix - karna dia manggilnya YT0QR, setelah saya berhasil malahan 8P6SH memberikan kesempatan kepada "any other Indonesian station" - tapi mungkin rekan2 sudah dapat Barbados di 10M. Sebelumnya saya sudah conformed dg 8P6ER tapi tahun 2011.

Dear All,
Dari data Log teman-teman yang telah mencantumkan nama YBDXC atau juga YB Land DX Club, semua sudah dikoreksi dan diseragamkan oleh pihak penyelengara Contest sebagaimana dibawah ini dengan nama "YB Land DX Club".
 Namun masih ada beberapa yang memang tidak mencantumkan nama Clubnya dan atau ada yang memang salah nama (seperti YB0COU), bahwa definisi Club dari panitia seharusnya adalah yang bukan dari Organisasi resmi.
 Untuk itu mohon dapat diperbaiki dan dikirim ulang data Lognya, supaya semua score yang dari Indonesia dapat digabung menjadi satu untuk bersaing dengan Club dari negara lain.

hehehehe,
ketawa juga -

khan boleh ngetes dulu - kira2 QRP masih nyampe gak ke YB2LSR, jangan diplonco dong OM Seno. HI

kalo soal QRP, saya pernah cheating juga.
berkutat dg EU & JA yang ampun2 kuat dan rapatnya waktu V5/DJ2HD mempersilahkan QRP station, saya masuk padahal power waktu itu kurleb 60-70 watt, worked - tapi di QSL cardnya jadi YC0QR/QRP.

Saya banyak "tertolong", kalo DX bilang "outside EU" atau mereka pakai urutan angka, atau OC only.

Pagi tadi barengan sama OM Ridha-YB6JRT koq kita manggil Curacao - PJ2/XE1KK.

Judul: Re: [YBDXC_News] Nama Club yg sudah dikoreksi oleh WAEDXC (fenomena prop)

he he he

(ketawa ini bukan indikasi mengejek, tp merupakan keramah-tamahan seorang amatir radio seperti seno ini)
lagi .... heheheheh ....

hal yg diceritakan Om Hen itu wajar saja, banyak kemungkinannya
salah satu nya persis apa yang diuraikan Om Hen, betul sekali ....
namun jangan salah kadang ada juga yang usil,

misal : dia pake QRP, sudah tau condx ga bagus dia nge-test (asem ..)
atau pake model cw straight key yang di model2 ketukannya,
apa yang aku lakukan?
kalo pas sepi pura2nya agn...agn...???? walau sebenernya aku sudah dapet full call-nya agn agn .... sampai dia capek dulu ..... hehehehe .

apalagi kalo itu bukan new entity, hahaha ..
tapi aku tidak serta merta begitu, lihat si-kon dulu kita bisa lihat keseriusannya dia untuk qso dgn kita dilihat/didengar dari caranya dia panggil (just a feeling lah, walau kadang tidak benar).
itulah salah satu seninya ... the Art of Amateur Radio

anyhow :
Congratulation : YC0QR worked CO6LC di 10M dan PJ2/XE1KK di 15M

all the best

Home

This DXped is still in the planning stages, possibly will be moved to March 2013.

Focus on :
Maximum number of different stations contacted
CW, some SSB and RTTY when things slow down
EU when possible
15 meters anticipated prime band
160 m
Location south of the Pago Pago harbor area to avoid mountain low angle cut off as possible

Equipment
2X Elecraft K3
Elecraft PA 500w
160 Inv L
Spiderbeam with 10 meter mast
80/40 via TBD

QSLs
LOTW
bureau or direct via TBD

The TL0A team is at it again, now to NIGER !
5U5U (TL0A), 5U6E (F6EXV) and 5U8NK (DJ8NK)
Niamey, Oct 1st to Oct 15th 2012

Backstory

During the Friedrichshafen 2012 HAMFEST, an informal talk between Jan DJ8NK and Paul F6EXV, along with Kan JA1BK, mentioned the desire for the TL0A team to go on an expedition together again : the 5U idea came up, and a phone call to TL0A (who hosted us in 2010 in Bangui, Central African Republic) very quickly resulted in "all arranged"... Well, not "all" was arranged, but the valuable contacts Chris made on his previous stay in Niger made up optimistics, and we started working on all arrangements in terms of visas, licenses, equipment and so forth. Now that everything is finalized, we are happy to announce this DXpedition to Niamey, the capital city of Niger.
We do promote the DX Code of Conduct !
Frequencies listed below are subject to change, depending on QRM.
This is the rainy season in Niamey. We may sometimes have to close down suddenly in case of heavy rain storm.
Frequencies

This band plan is subject to change, depending on frequency occupancy and possible QRM.
BAND CW SSB DIGI

160 1826.5 N/A N/A
80 3524 3799 N/A
40 7024 7070 7050
30 10104 N/A 10138
20 14024 14190 14080
17 18084 18150 18100
15 21024 21290 21080
12 24894 24950 24920
10 28024 28490 28080
6 50104 50150 N/A

Spliiiiit !
We will ALWAYS work split. Listen to the operator's annoucements.
Six meters, the "magic" or "tragic" band
A 4-element beam (JA1BK's donation - Thank you Kan san) will be put up. Nevertheless, we will not have a beacon on 6m. If indicators tend to make you think there could be an opening, please contact us on HF and let us know : we will be happy to try a CQ on 50.110 and see what happens...
Internet
We will endeavour to upload our logs to CLUBLOG (see the logs check page) at least once a day, depending on the internet connection efficiency. We do not plan on being connected to the cluster system.Here below is the QSL information for each call.

Please choose only one option per call (do not do an OQRS request and also send a bureau card, for example).

5U5U via direct only
CHRISTIAN SAINT-ARROMAN
Chemin de Moustéguy
64990 URCUIT
FRANCE
5U6E via F6EXV
 Log will be uploaded to LoTW shortly after the end of the operation.
OQRS : you can use OQRS for either direct or bureau requests. First go to the LOG SEARCH PAGE and click on the QSL request button at the bottom of your log search results.
DIRECT :
PAUL GRANGER
4 Impasse Doyen VIZIOZ
33400 TALENCE
FRANCE
BUREAU : make sure you clearly mark "via F6EXV".
5U8NK via DJ8NK
Log will be uploaded to LoTW shortly after the end of the operation.
OQRS : you can use OQRS for either direct or bureau requests. First go to the LOG SEARCH PAGE and click on the QSL request button at the bottom of your log search results.
DIRECT :
JAN B. C. HARDERS
P.O.Box 520410
22607 HAMBURG
GERMANY
BUREAU : make sure you clearly mark "via DJ8NK".

TT8TT News

Following our previous announce, the TT8TT team will be active from
october 3th to 16th, 2012.
The team will pay particular attention to Japan and West Coast,
as TT is the fortieth and the twenty-third place respectively in the
ranking of most-wanted.
Please, go to the survey, it is very useful to see where more attention is needed.
Many thanks

5H2DK will be QRV from Moshi, Tanzania (KI86qq) from Oct 2nd to Oct 17th 2012. We may be sporadically QRV using a portable setup from different locations on Oct 18th to Oct 27th. It will be an one man operation on SSB only.
The setup includes an ICOM 706 mkIIG boosted with an SG-500 to emit full 100W permitted, A3S tribander (10/15/20) and dipoles for 12/17/40/80 m bands. The portable setup will include the ICOM 706, an AH-4 mobile antenna tuner, a wire antenna taped to a 6m fishing stick.
Prelimanry Tx frequency plan: 3.790, 7.090, 14.250, 18.150, 21.250, 24.950, 28.450. The Rx will be same as Tx, 5up, 5-10up or 7.140 on 40m band.
In order to maximize everybodys possiblity to get into the log, we may ask Europe to call 5up and outside Europe and Scandinavia to call 10up. We will try our best to serve everybody. Please behave according to the rules in order to maximize QSO rate and minimize the number of failed QSOs.

GM OM Hen,
How r u ?

Bbrp kali sy on air, memang masih banyak mereka yg ngrubutin sy, terutama CW mode, mgkn jg mode lain selain Phone, baik EU, NA atau JA, YB-land masih dicari.

Satu cerita ketika XP2I (Greenland) on air YB2LSR berusaha masuk, walau signal tidak besar dibanding dgn yg lainnya, prioritas tetap pada YB2LSR sampai penyebutan call YB2LSR benar, kesimpulan sy YB-land masih dicari. Demikian jg dari EU lainnya, NA/SA.
Demikian pengalaman sy.

Kapan kita qso di 20m?
Hi...

OM Seno,
Saya gak tau deh, apa maksudnya dia bilang "Any other Indonesia station".

Apakah :

- YB-land masih dicari, atau
- Karena sebelumnya EU melulu, kasih kesempatan ke YB
- Mumpung antenna diarahkan ke YB-land

Siiplah OM Yongkie,
Beberapa hari ini masih gagal utk QSO dengan 3D2C di 10M maupun di 15M.
Semalam juga panggil Barbados, sekedar utk nambah2 Diamond DXCC setengah mati padahal OM Imam-YB4IR sekali panggil langsung worked.

Saya akhirnya berhasil setelah berulang mengkoreksi prefix - karna dia manggilnya YT0QR, setelah saya berhasil malahan 8P6SH memberikan kesempatan kepada "any other Indonesian station" - tapi mungkin rekan2 sudah dapat Barbados di 10M. Sebelumnya saya sudah conformed dg 8P6ER tapi tahun 2011.

Dear All,
Dari data Log teman-teman yang telah mencantumkan nama YBDXC atau juga YB Land DX Club, semua sudah dikoreksi dan diseragamkan oleh pihak penyelengara Contest sebagaimana dibawah ini dengan nama "YB Land DX Club".
 Namun masih ada beberapa yang memang tidak mencantumkan nama Clubnya dan atau ada yang memang salah nama (seperti YB0COU), bahwa definisi Club dari panitia seharusnya adalah yang bukan dari Organisasi resmi.
 Untuk itu mohon dapat diperbaiki dan dikirim ulang data Lognya, supaya semua score yang dari Indonesia dapat digabung menjadi satu untuk bersaing dengan Club dari negara lain.

3B9SP, Rodrigues DX Operation, Mauritius

Between the 16 and 23 October 2012, the Radio 7 Team, HB9FR, will activate the Island of Rodrigues, a part of the Republic of Mauritius.

Our call sign is granted and will be 3B9SP.

After having run many amateur radio contests and activities form our club station, we now would like to know how it is being on the other side of the world and of the pile up, and talking to our friends at home from a rare country.

For many years we were talking about doing a so called “DX Operation”. As we are all getting older we decided that time has now come to do it! Last year we began to think about possible destinations and it came out that Rodrigues Island could be a possibility. There wasn’t a lot of Amateur Radio activity from Rodrigues these last years. Rodrigues is easily reachable by plane, and as cost is one of our key factors this was important. At the beginning of our plans we decided that the cost of this adventure should be reasonable. So transport should be possible by plane, knowing that we sure will have weight problems as we do have to bring over the complete equipment. Our goal is to set up three amateur radio stations that can be run together on different Amateur Radio bands. Mostly one in CW, morse telegraphy, one in phone and the third running special modes like RTTY and modern phase shift keying modes (PSK31). To produce a good signal we would like
to use small 400 Watt solid state amplifiers for the CW and phone stations. Two rotary beam antennas for the frequencies above 14 MHz are also planned to be set up for these two stations. For the digital mode station we are planning to use wire antennas. Vertical antennas will be setup for the low frequency bands. The hopefully good October propagation conditions will allow us to give everybody around the world a chance to have a QSO during the eight operating days (October 16 to October 23). We don’t want to break any record in number of QSO's, we just would like to do an good job with an Amateur Radio equipment that can be easily transported without need of containers and shipping.

3B9SP Equipment:

Transceivers: 3 Elecraft K3
Power Amplifiers: 2 Elecraft KPA 500
Interfaces: MicroHam Micro Keyer II

Filters: Dunestar Multiband Switched Bandpass Filters
Antennas:
- 2 Spiderbeam 3el for 14, 18, 21, 24 and 28 MHz on Spider pole
- Verticals for 7, 10 and 14 MHz
- 1 Butternut HF2V for 7, 3.5 and 1.8 MHz
- 3 elements 50 MHz, Slim Jim 50 MHz

3B9SP QSL Info:

QSL Manager HB9ACA
Manfred Oberhofer
P.O. Box 38
1553 Chatonnaye
SWITZERLAND

QSLing order:
OQRS direct requests within Club Log
mail direct requests
OQRS buro requests within Club Log
normal buro requests (please note that both buro paths take certainly long time as always)

If possible, please use the OQRS system, which will be available after the expedition. It saves time and and cost.

QSL requests received direct by the manager will result in a direct response, subject to certain provisions.

In order to receive a direct card:
Ensure that the QSO information on your card is clear and correct. Be sure that time and date of your QSO's are in UTC.
Enclose a good quality self addressed and stamped envelope (SASE) of sufficient size and strength for the number of return cards expected. No Air Mail envelopes and no labels only please! If the postage is ok, the QSL Manager will stamp the envelope with a A-Priortity stamp. Up to eight QSO's can be confirmed on a single card.
Enclose US dollars or sufficient International Reply Coupons (IRC's) to meet postage costs. Loose Swiss stamps are also welcome. We can not use stamps or currency form other countries. The IRC's must be propely stamped. Only the new IRC's valid until december 2013 will be accepted. To read more about IRC's follow the link to the Universal Post Union, click on more and download th PDF document.

Please do not send other currencies or cheques. Applications received direct but without a self addressed envelope, an envelope wich is too small, or without sufficient postage will receive confirmations via the burerau.

The logs will be uploaded for log search, to the Club Log database. Of course, it highly depends on the internet connection possibility. If there is no internet service available, we will upload the logs, as soon as possible. If you could not find your QSO, but you are sure that it was a good contact, send an email after the expedition with the QSO details or just work us again. Manfred, HB9ACA, will then check the log for any possible error and make the correction, if necessary. In this case, please do not send direct QSL request until you got the answer about the QSO in question.

The logs will be uploaded to LotW within 6 months after the DX Operation.

About Rodrigues

Rodrigues (French: île Rodrigues) named after Dom Diogo Rodrigues is a semi-autonomous island part of the Republic of Mauritius located in the Indian Ocean, about 650 kilometres (400 mi) east of Mauritius. It is the is part of the Mascarene Islands which include Mauritius, Cargados Carajos shoals and the French island Réunion, other nearby island countries and territories include Tromelin, Agalega, Comoros, Mayotte and the Seychelles

to the far north-west. The area of Rodrigues is 108 km2. It is of volcanic origin surrounded by coral reef, and just off its coast lie some tiny uninhabited islands and islets. The island used to be the tenth district of Mauritius before it gained autonomous status in 2001 and is governed by the Rodrigues Regional Assembly. The capital of the island is Port Mathurin.

As of 2011, the island's population was about 37,922. Its inhabitants are Mauritian citizens. English is the official language of the island, though people also speak French, Indian languages and some oriental languages are also spoken, the lingua franca is Rodriguan Creole. Most of the inhabitants are of mixed African and French descent. Its economy is based mainly on fishing, farming, handicraft and a developing tourism sector.

History

From the 10th century, Arabs have been known to visit the Mascarene Islands. A12th century map supposedly contains them, and the Cantino planisphere of c.1500 and some other contemporary maps clearly show the three islands of the Mascarenes asDina Arobi (or Harobi), Dina Margabin and Dina Moraze. These are apparently corrupted transliterations or transcriptions of the Arabic Diva Harab ("Desert Island"),Diva Maghrebin ("Western Island") and Diva Mashriq ("Eastern Island"). While the second clearly refers to Réunion, sources disagree about which of the other is Mauritius and which one Rodrigues, which are both to the east of Réunion and arranged in a somewhat stylize way on these maps. However, even in its original state, Rodrigues had some karst, while Mauritius even after suffering 500 years of deforestation can by no means be called "desert" even in a colloquial sense.

The island was located again in February 1507. Part of the fleet of Afonso de Albuquerque and Tristão da Cunha, Diogo Fernandes Pereira's Cirne spotted Réunion on February 9 after a cyclone diverted their course. The other two islands were subsequently rediscovered. The initial name was Diogo Fernandes; Domingo Froizwas given as a name some years later, and by 1528 it had been again renamed after the Portuguese navigator Dom Diogo Rodrigues and has remained so since. The orthography has been less stable at first, with the name being transcribed Diego Rodriguez,Diego Roiz, Diego Ruys (or even "Diego Ruy's Island"), Dygarroys orBygarroys. Some early French sources called it Île Marianne.

Due to the island lying far off the beaten track of seafarers at that time, it received few visits. From 1601, the Dutch began visiting the island somewhat more regularly for fresh supplies of food. In 1691 the Huguenot, François Leguat and 7 companions landed on the island, intending to set up a farming colony of Protestant refugees. Farming was not successful, but there was an abundance of tortoises, turtels, birds, fish and other seafood.

During the 18th century several attempts were made by the French to develop the island. African slaves (ancestors of the present population) were brought to Rodrigues to develop stockbreeding and farming.

In 1809, after a brief battle with the French, British troops took possession of Rodrigues. And with British occupation, slavery was abolished.

In 1883, the eruption of the Indonesian volcano Krakatoa was heard at Rodrigues Island and it remains the furthest point at almost 4800 km, at which the explosion was heard. The sound was described as "the roar of heavy guns". Naval ships were ordered to investigate as it was feared the sound was due to a ship in distress firing its guns. Having been heard from about 5000 km (3000 mi) away on the other side of the Indian Ocean, the noise remains

the loudest sound in recorded history.

In 1968, Rodrigues was joined with Mauritius when it attained independence; today it is an autonomous region of Mauritius.

Climate

The isolation and location of the island give a micro climate specific to Rodrigues, with two seasons. Rodrigues enjoys a mild tropical maritime climate with persistent trade winds blowing throughout the year. Mean summer temperature is 25.9 degrees Celsius and mean winter temperature is around 22.3 degrees Celsius. The temperature difference between summer and winter is 3.6 degrees Celsius. January to March are the hottest months and August is the coolest month. The wettest month is February; September and October are the driest months. The climate is hotter and dryer than in Mauritius. Cyclones may arise from November to April, and Rodrigues is more often hit than Mauritius

Biodiversity

Rodrigues Island was characterised by endemic plant and animal species in abundance, but from the seventeenth century much of its biodiversity has been eradicated. The island was home to a now extinct species of bird, the Rodrigues Solitaire. An endemic species of bat, the Rodrigues Flying Fox is currently threatened.

T30PY & T30SIX Would Like To Thank…
16/09/12 | News

In one month, the first Dits and Dots will be transmitted from T30PY/T30SIX stations. We will always be grateful to all the help we have received so far from many individuals, clubs and companies, which contributed to this project. Even before we accomplish our goal, we would like to thank fellow friends who have not necessarily been displayed in the sponsors section of our website, but without whom, we would never get to where we are;

In alphabetic order
Atilano Oms, PP5EG - Bill Smith, W9VA - Erwin Hubsh, PY2QI – George Wallner, AA7JV – Gerben Menting, PG5M – John Manus, W1JJ - Jacek Kubiak, SP5DRH – Jacek Marczewski, SP5EAQ - Jose Carlos Marques, N4IS - Kaboterenga Romatoa, NoCall – Keetia U Yee-On, NoCall – Lance Collister, W7GJ - Max Laconca, IK8LOV – Mamiro Yoshizawa, PY2DM – Rocky Peters, 3D2DD – Steve Silverman, KB3SII - Tevita Rokobaro, 3D2TR – Thomas Carlsson, PY2ZXU

Thanks guys
T30PY/T30SIX Group

3rd Press Release – T30PY / T30SIX
16/09/12 | News

We are one month away from the start of our operation. PY2DM, Mamiro and PY5HSD, Herminio joined the group due to personal priorities of the former members.
We are working on the last minute logistic issues as well as on final preparation of our operation. Although Air Pacific has changed our flights schedule multiple times, we are confident that we can keep up with the announced schedule. The first station should be on the air in the first GMT hours of Oct 16th. Then we will gradually have all 4 stations running.
The quality and even the availability of local Internet need to be confirmed. Our goal is to upload logs in Clublog daily as well as send news to the community periodically.
The current DXpeditions in the Pacific area give us additional information about the likely local propagation behavior on HF. We emphasize that we plan to have Low Band stations in every SR/SS as well as the 6m station on EME on every MR/MS.
We are grateful for the support received from many individuals, clubs and companies. Support is key for the sucess of this enterprise.

73,
T30PY / T30SIX Team
http://www.mdxc.org/t30py

T30PY Group Gathers To Perform Field Testing On Stations And Antennas
24/08/12 | News

From August 17th thru August 20th the T30PY/T30SIX team gathered at PW2D contest station. We were hosted by PY2DM, Mamiro who made us feel home. The “freezing” 6 degrees Celsius min temperature was a warm day for PY3MM and an extinction of life for PY7XC and PY7ZY.

The team managed to assemble the five verticals that will be used in the Dxpedition, including the two low band ones. Four complete stations were assembled and successfully tested.

The 160m cap hat vertical with a customized tuner on the bottom, even with a relatively poor ground system, has performed extremely well. So did the quarter wave vertical for 80m. With the actual salt water mounting, the performance will be even better.

A strong point has been the opportunity for socializing. Old buddies met and new friendships were built.

The team will carry all the necessary material as checked baggage. So, each member returned home with its share of excess weight.

Our good friend and experimented ham Thomas, PY2ZXU/SM0CXU showed up as well to give us a hand.

Part of the countless challenges were overcome. Now, new challenges ahead.

Radiohaus Support
27/07/12 | News

We would like, again, to thank Radiohaus for the donations. We understand that amateur radio market is growing fast in Brazil, and this support is necessary from the major groups, in order to become part of it.

Congratulations to Radiohaus (a brazilian company) and, of course, all of our sponsors.

T30PY & T30SIX team

New Release From T30PY & T30SIX DXpedition
27/07/12 | News

Preparation of antennas and gear progress successfully. Between August 17 -19 the whole team will gather at PW2D contest station to test antennas and stations that will be used in the expedition. At this time each one will carry back home the items that will be transported as individual baggage in the airlines. Unfortunately excess baggage cost is a main concern mainly within the pacific islands flights and, consequently, any donation, even tiny ones, is highly regarded.

As previously announced the group is very committed to put a meaningful effort on Low Bands and Six meters.

We would like to thank Clubs, Companies and individuals for the donations we have received so far, making this Dxpedition possible.

Our QSL policy has also been improved to better match people's needs. Six different QSO confirmation possibilities are available including a fast track for donors.

T30PY & T30SIX team

Another Day Of Work: 80 And 160m Antennas
09/07/12 | News

On July 8th, 2012, PY2XB, PY2PT and PY2WAS have met at PY2XB's to evaluate the antennas for 80 and 160m. Two 18m fiberglass master poles from Spiderbeam will be used for both the antennas with two fixed antenna couplers in their basis.

There will be also 2 antennas dedicated to reception only, which will improve the chances of the team in the low bands. All arrangements have been followed to enhance the performance of the team in Tarawa, next October. In August, all members of the team will be meeting in the countryside of Sao Paulo at PY2DM – Mamiro's contest station so that all gears, antennas, linear amps and accessories may be exhaustively tested during an entire weekend. We will be back soon with more news…

A Lot Of Work!
01/07/12 | News

Alex, PY2WAS, Fred, PY2XB and Ricardo, PY2PT have assembled, wired and tested the two SteppIR BigIRs antennas which will be used in the expedition. The one with the 80m Kit will be used at Site A and the regular one at Site B.

Members will keep on preparing the antennas and material for the Dxpedition which includes an additional S9 vertical, a 80m vertical, a TB vertical and two crossed pennants RX antennas. It is a very time consuming operation once one of our main goals is to keep overall weight to a minimum.

50MHZ EME Confirmed !
05/06/12 | News

We are glad to announce that we will work 50MHz EME from Western Kiribati. We would like to thank Mick, W1JJ for the appropriate antenna donation and Lance, W7GJ for the technical support.

Mick is sending to PY7XC/ PY7ZY a M2 6M7JHV antenna. The 7th area call folks will do the testing, tuning, packing and taking the antenna to Tarawa.
There will be no elevation, so we will profit from moonset and moonrise periods. Power level will be around 500W. Skeds for these periods will be welcome.

AA7JV Meeting-News
13/05/12 | News

George, AA7JV meets at his house in Miami with Fred, PY2XB and N4IS, Carlos. George and Carlos are experienced low band operators. Carlos has developed the RX Waller Flag Antenna and George has developed a series of successful Low Band antennas mounted on the water in DXpeditions. DXers may remember George's operations from VK9GMW, TX3A, 5K0T, VK9WWI and others where George put an outstanding signal on 160/80m. George and Carlos became our

advisors for low band antennas. Thanks guys!

T30PY Is The Logo Of The Month In The URE Magazine
20/04/12 | News

Radioaficionados is the official Magazine of URE (Unión de Radioaficionados Españoles), the Spanish Amateur Radio Association. Each month is choosen the nicest logo used among the most important DXpeditions and mentioned as The Logo Of The Month.

The Logo of the Month in
the last issue of Radioaficionados is the T30PY one!

T30PY Team is very grateful for this nice award to the Spanish Amateur Radios and URE.

To download the full page showing the logo of the month click on the Radioaficionados Magazine cover, below.(more…)

Breaking News Of Apr 17, 2012
17/04/12 | News

We are proud to announce that PY2AAZ Fabio has joined the team in the last weekend.

Now, the T30PY / T30SIX team has 10 members and according to our bi-weekly teleconferences and planning program, we are confident that there will be a great job in Tarawa Island.
Actually T30PY / T30SIX
members are: PP1CZ – Leo, PT2OP – Orlando, PY2AAZ – Fabio, PY2PT – Rick, PY2WAS – Alex, PY2XB – Fred, PY3MM – Miguel, PY4BZ – Fernando, PY7XC – Jim and PY7ZY – Xavier

T30PY / T30SIX – W. Kiribati DXpedition
13/03/12 | News

We proudly announce a DXpedition to Tarawa Island, Western Kiribati, from Oct 16 to 25, 2012, when two call signs will be used: T30PY for use from 10 to 160m and T30SIX on 6m. It is expected to have 3 stations running simultaneously on HF and one on six meters. The following modes will be used: SSB, CW and RTTY. EME on six meters may be possible, but not yet confirmed.

The team, at this time, is formed by the following Brazilian ham ops: PT2OP – Orlando, PY2PT – Rick, PY2XB – Fred, PY2WAS – Alex, PY4BZ – Fernando, PY7XC – Jim, PY7ZY – Ciro, PY3MM – Miguel and PY1KN – Marcelo.

The DXpedition website will be launched in a couple of days at http://www.mdxc.org/t30py/, supported by the Mediterraneo DX Club. Considering the high cost of logistics, donations are welcome to help the team to support all related costs. There will be a donation button in the site, for which the donor may click and use Paypal to accomplish it.

T30PY/T30SIX Team

T30PY & T30SIX – A Dream Comes True
10/03/12 | News

We, all the team, believes that Dxpedition was already in our hearts since we became hams. Not only for the wonderful, distant and friendly country, but for the wonderful,
distant and friendly country where a large group of Brazilian hams will provide contacts to friends around the world on all HF bands and 6 meters, and different modes.

This is a great achievement!

In fact, the Dxpedition started to be built last year, after the return of the team leader (Alex – PY2WAS) and the team members (Ric – PY2PT and Fernando – PY4BZ) from the Dxpedition to Mayotte Island (TO2FH). In that Dxpedition we everytime asking each other: “which would be the next…?”

After a couple of weeks that the guys above came, the friends Anderson (PY2TNT), Fabio (PY2AAZ) and the great and experienced Fred (PY2XB) enjoyed the group. So, we started to discuss the places to go: Eritrea, Laos, Camboja, etc.

In the beginning of the process, after a lot of conferences, we have found some difficulties with dates, licenses, and other personal issues but we did not give up and kept the conversation to find a great
place the share with the ham world.

During these days, specifically on a beautiful Friday evening, the teal leader (Alex – PY2WAS) called Ricardo (PY2PT) and said: “Ric, I talked all afternoon with Fred (PY2XB) and the other team guys and we have a place – the beautiful Tarawa, in Western Kiribati (T30)!”

“Oh my God”, said Ric (PY2PT). The location was defined! Alex (PY2WAS) and Fred (PY2XB) explained that would be fantastic about the location, the propagation conditions, the period of dxpedition and the possibility to explore 6 meters and to form a large group of Brazilian hams.

And the saga began…We started to invite different brazilian operators, from different parts of the country. Unfortunately, for personal issues, Anderson (PY2TNT) had to give up of the project.

Great friends joined the team: PT2OP (Orlando); PY7XC (Jim); PY7ZY (Ciro); PY3MM (Miguel); and, PP1CZ (Léo). After that all the guys, led by
Alex (PY2WAS), been focused to provide a brilliant Dxpedition to the ham world.

Thanks to all and will be an honor to talk with each ham around the world.

T30PY and T30SIX team

Kiribati

Kiribati (pronounced Kiribas) is an independent republic within the Commonwealth of Nations, located in the central Pacific Ocean, about 4,000 km (about 2,500 mi) southwest of Hawaii, and his permanent population is just over 100.000 (2011).

It is part of the division of the Pacific islands that is known as Micronesia. Kiribati consists of 33 coral islands divided among three island groups: the Gilbert Islands, the Phoenix Islands, and the Line Islands.

The area now called Kiribati has been inhabited by Micronesians speaking the same Oceanic language since sometime between 3000 BC and AD 1300. The area was not isolated; invaders from Tonga, Samoa, and Fiji later introduced Polynesian and Melanesian cultural aspects, respectively. Intermarriage tended to blur cultural differences and resulted in a significant degree of cultural homogenization.

The islands were first sighted by British and American ships in the late 18th and early 19th centuries. The main island chain was named the Gilbert Islands in 1820 by a Russian

admiral, Adam von Krusenstern, and French captain Louis Duperrey, after a British captain named Thomas Gilbert, who crossed the archipelago in 1788 when sailing from Australia to China.

In 1892 the Gilbert Islands consented to become a British protectorate together with the nearby Ellice Islands. They were administered by the Western Pacific High Commission based in Fiji. Together they became the crown colony of the Gilbert and Ellice Islands in 1916. Christmas Island (or Kiritimati) became part of the colony in 1919 and the Phoenix Islands were added in 1937.

The Gilbert and Ellice Islands gained self-rule in 1971, and were separated in 1975 and granted internal self-government by Britain. In 1978 the Ellice Islands became the independent nation of Tuvalu. The Gilbert Islands became independent as Kiribati on 12 July 1979.

All of the islands of Kiribati are atolls (ring-shaped islands with central lagoons) except for the island of Banaba in the Gilbert Islands, which is a raised limestone Island. Of the 33 islands of Kiribati, 21 are inhabited. Most of the population is concentrated in the capital of Kiribati, Tarawa, an atoll in the Gilbert Islands (west part of the island).

Kiribati has a total land area of 811km2. The islands extend about 3,900 km (about 2,400 mi) from east to west. From north to south they extend about 2,100 km (about 1,300 mi), straddling the equator. Kiritimati (also called Christmas Island), one of the Line Islands, occupies 609km2 and has the largest land area of any atoll in the world.

The majority of tolls is barely more than six meters above sea level and surrounded by barrier reefs creating picturesque lagoons for fishing, snorkeling, scuba diving, swimming and other water sports.

Kiribati is 12 hours ahead of GMT – 2 hours ahead of Tokyo and 22 hours ahead of Honolulu, on the other side of the international dateline.

Some of the islands of Kiribati, especially in the remote Line Islands, were formerly used by the United States and United Kingdom for nuclear weapons testing including hydrogen bombs in the late 1950s and early 1960s.

Tarawa Atoll and others of the Gilbert group were occupied by Japan during World War II. Tarawa was the site of one of the bloodiest battles in US Marine Corps history. Marines landed in November 1943; the Battle of Tarawa was fought at Kiribati’s former capital Betio on Tarawa Atoll.

Even with all the beauties, Kiribati is expected to be the first country in which all land territory disappears due the global warming. In June 2008, the Kiribati president Anote Tong said that the country has reached “the point of no return”; he added: “To plan for the day when you no longer have a country is indeed painful but I think we have to do that.”

As sea levels continue to rise, the government of Kiribati is negotiating a deal with Fiji to evacuate the entire population to areas of Fiji that the Kiribati government would buy. The area of Fiji proposed for resettlement is the second largest Fijian island of Vanua Levu. The mass migration is expected to include younger, skilled workers first, and then the rest of the population would follow over a period of years.

Kiribati High Definition Teaser from ThriveHD on Vimeo.

Setup

T30PY/T30SIX will be active from two different sites.

Here are the equipments of each location:
Site A
100w HF transceiver
Tokyo Hy-Power HL-550Fx
RigExpert Interface
Big IR SteppIR 6-80m mounted near the water

Site B
3x 100w HF transceivers
3x Tokyo Hy-Power HL-550Fx
3x RigExpert interfaces
Big IR SteppIR 6-40m mounted near the water
43 Ft S9 Vertical mounted near the water
160m vertical mounted inside the lagoon
80m vertical mounted inside the lagoon
2x Crossed Pennants RX antennas
8 ele 6m Yagi

Frequency Chart

T30PY Frequency/Mode Plan
T30SIX Will Be Used On 50MHz

Note 1
The CW listening frequency will always be up (except on 160m), starting at just 1kHz or 2kHz up depending on the pile-up size.
On 160m we will be listening 5 down for WW and 10 down for Japan. QSX will be announced.

Note 2
We may use alternative frequencies depending on QRM, if necessary.

Note 3
6M : 50110 will be used for propagation checking calls. We will move to 50120 SSB and 50102 CW as soons as activity peeks up. EME: the frequency will be 50.198 MHZ WSJT-JT65A. T30SIX will transmitt the first sequence.

QSL Policy

Confirmations may be obtained in 6 ways:
DONATION EQUAL OR GREATER THAN 20.00 US$ – Donors in this category will have QSOs uploaded in LOTW within 15 days after the end of the DXpedition. Also if paper QSL is needed please email QSO data and mailing address to T30PY.QSL.FOR.DONORS@.... Cards will be mailed with priority for donors without any additional cost. Expectation to mail the cards is early December 2012.
OQRS paper card direct – The online request at the bottom of this page will enable an estimation to reply of about 2-3 months. DXers are encouraged to request QSLs through OQRS. OQRS guidance is described below. If you just need LOTW confirmation, please let us Know in the comments. We will upload your QSOs within 2 months after the end of DXpedition.
DIRECT – Please enclose US$ 2.00 or 1 IRC, plus SAE (Self-Addressed Envelope). Estimation to reply: at least, 3 months.

BUREAU – Estimation to reply: at least, 2 years.
LOTW - Logs will uploaded in 6 months after the end of the DXpedition.MDXC Members - QSL VIA H.Q.

QSLs shall be sent to PY2PT, the DXpedition Manager:

PY2PT
RICARDO RODRIGUES
P.O. Box: 42066
SÃO PAULO, SP 04082970
Brazil

All QSLs with valid QSOs in log will be replied, independently of the way …

OQRS – ONLINE QSL REQUEST SYSTEM

AVAILABLE JUST AFTER THE END OF T30PY DXpedition

Sponsors

This Dxpedition is a very expensive initiative, considering the number of people and equipments to be transported.

Therefore, your support would be really welcome. Any donation from US$ 20.00 on, will have the QSL of the donor ready to go, just after the Dxpedition and there will be no need to apply for it via OQRS, direct or bureau. It will be directly shipped to your QRZ.COM address with the QSOs achieved by you with T30PY/T30SIX. Thus, you have your QSL granted with no additional effort, except for doing the QSO(s) and in addition, provide us a kind and valuable support to be afford of all costs to be paid. Naturally, this initiative about the QSLs abovementioned is restricted to ham ops (individuals)only, as it is not able to cover the associates of a DX club.

Donations may be achieved using the following ways:
PAYPAL: t30py.dxpedition@...
TUTORIAL: To achieve any donation by Paypal, you must have an account at Paypal. It is very easy to create an account, as long as you have an international credit card. In the event you have that account you should: (i) click the “donation” button herein, (ii) insert your account e-mail at paypal, (iii) insert the value of the donation and Gotcha! You did !

About

An international team will visit 5 islands belonging to Papua New Guinea between 19 October and 4 November.

The team will be:

G3KHZ Derek
SM6CVX Hans
HB9BXE Hans-Peter
K5WQG Eddy
DL6KVA Axel
Non-ham Stig Nyman

M/V Barbarian will convey the team, starting from Kokopo in New Britain on 18 November sailing via Kavieng to Emirau.

Schedule

The islands to be activated by the full team will be:

The main team fly home on 6th November. Hans and Stig then continue to Buka on the M/V Barbarian to Buka. The remaining journey will be by air.

Important: in SSB, Please call me ONLY with the INTERNATIONAL SPELLING CODE
That means Alfa,bravo,chralie,delta,echo,foxtrot,golf,hotel,india,julliet,kilo,lima,mike,november,oscar,papa,etc..
This is much easier to copy for me in the pile up !

QSL Card Info:
1.Direct request via surface mail post.

Mail your qsl card and qso details to :

wim on4cit/5v7th
Waaltjes 8
3920 Lommel
Belgium

i can accept US$ and Euro's.
Please No IRC's. Funds+IRC is oké.
Do not forget to include a return air mail enveloppe with your adres.

include with your QSL Card
By direct post (in europe) = minimum 2 US$ or 1,70 Eur
By direct post (outside europe) = minimum 3 US$

2.QSL VIA BUREAU.
Mark your QSL card VIA: ON4CIT .
Notice that it sometimes takes a long time before you receive free 5v7th qsl via bureau.

3. LOTW
I wil be uploading all qso's to LOTW later this year.
This could take a wile because direct qsl is priority.

RULES FOR THE 2012 OCEANIA DX CONTEST

1. SPECIAL NOTES for the 2012 Contest

☐ Mike Mather ZL2CC is sponsoring two new plaques for the top entrants from Oceania in the PHONE and CW Single Operator 40M Band categories.
☐ The South Pacific Contest Club is sponsoring two new plaques for the top entrants from Oceania in the PHONE and CW Multiple Operator Two Transmitter categories.
☐ QRO Communications and OM Power are sponsoring two new plaques for the top entrants from Asia in the PHONE and CW Multiple Operator Two Transmitter categories.
☐ The Central Coast Amateur Radio Club Inc. is sponsoring a new plaque for the top entrant from Australia in the PHONE Single Operator LOW Power ALL Band category.
☐ The plaque that was previously sponsored by Tony Hambling VK3VTH for the top entrant from Australia in the PHONE Single Operator ALL Band category is now awarded to the top entrant from Australia in the PHONE Single Operator HIGH Power ALL Band category.
☐ Lee Moyle VK3GK is the new sponsor for the plaque awarded to the top Entrant from Asia in the PHONE Single Operator ALL Band category.
☐ Only one entry may be submitted by each operator or team of operators (Rule 6).
☐ All email logs are processed by an email robot. The robot sends an automated email acknowledgement indicating either acceptance or rejection of the log. If you do not receive this acknowledgment, or are encountering difficulty in having the log accepted, then please contact the Contest Committee at info@...
☐ Electronic logs are to be in Cabrillo format which is now generated by all popular contest logging software programs. Alternatively entrants can use the forms at http://www.b4h.net/cabforms/ to manually create and submit a Cabrillo file.
☐ Portable prefixes can be inserted either in front of or behind the home call sign, e.g., W1XXX operating in ZL could sign as ZL/W1XXX or W1XXX/ZL.
☐ If the station worked does not provide a serial number for the Oceania DX Contest, then log the received number as 001. See Rule 8. This provision allows credit for contacts with stations that are not in the contest.
☐ A reminder that Single-Op Single Band logs must record ALL contacts made by the station - both on the band chosen for the entry and on any other bands.

2. CONTEST PERIODS

PHONE Contest: 08:00 UTC Saturday 6 October to 08:00 UTC Sunday 7 October 2012CW Contest: 08:00 UTC Saturday 13 October to 08:00 UTC Sunday 14 October 2012

3. THE AIM of the contest

is to promote HF contacts with stations in the Oceania region (VK, ZL, Pacific Islands and other locations within the IARU "Worked All Continents" Oceania boundary).

4. THE OBJECT is for:

☐ Oceania transmitting stations to contact as many stations as possible both inside and outside the Oceania region.

☐ Non-Oceania transmitting stations to contact as many stations as possible inside the Oceania region. There is no penalty for working non-Oceania stations but contacts between non-Oceania stations will score no points or multiplier credits.
☐ Oceania receiving (SWL) stations to copy as many contest stations as possible both inside and outside the Oceania region.
☐ Non-Oceania receiving (SWL) stations to copy as many contest stations as possible inside the Oceania region.

5. THE BANDS that can be used are

160M, 80M, 40M, 20M, 15M and 10M (no WARC bands).

6. TERMS OF COMPETITION FOR ALL CATEGORIES

☐ Only one entry is allowed for each operator or team of operators.
☐ A different call sign must be used for each entry.
☐ High power entrants must not exceed 1500 Watts total output power, or the maximum permitted output power in their country, whichever is less, on any band. Low power entrants must not exceed 100 Watts total output power. Power is measured at the final output connector of the transmitter or associated amplifier.
☐ QSO alerting assistance (e.g., incoming packet spots) is allowed in all entry categories, but self- spotting, asking other stations to spot you, or any other form of soliciting QSOs is not allowed.
☐ All of an entrant's transmitters and receivers must be located within a 500-metre diameter circle or within the property limits of the station licensee, whichever is greater. All antennas must be physically connected by wires to the transmitters and receivers used by the entrant.
☐ Remote operation is permitted. The entry location of a remote station is determined by the physical location of the transmitters, receivers, and antennas. A remote station must obey all station and category limitations.

7. ENTRY CATEGORIES

☐ Single Operator Low Power (SINGLE-OP LP): Either All Band or Single Band. One person performs all of the operating and logging functions. Total output power must not exceed 100 Watts. Only one transmitted signal is permitted at any time.
☐ Single Operator High Power (SINGLE-OP HP): Either All Band or Single Band. One person performs all of the operating and logging functions. Only one transmitted signal is permitted at any time.
☐ Multiple Operators and Single Transmitter (MULTI-ONE): More than one person can contribute to the final score during the contest period. Only one transmitted signal is permitted at any time. A maximum of ten (10) band changes may be made in any clock hour (00 through 59 minutes). For example, a change from 20M to 40M and then back to 20M counts as two band changes. Use a single serial number sequence for the entire log.
☐ Multiple Operators and Two Transmitters (MULTI-TWO): More than one person can contribute to the final score during the contest period. A maximum of two transmitted signals is permitted at any time on different bands. Either transmitter may work any and all stations. A station may only be worked once per band regardless of which transmitter is used. The log must indicate which transmitter made each QSO. Each transmitter may make a maximum of eight (8) band changes in any clock hour (00 through 59 minutes). For example, a change from 20M to 40M and then back to 20M counts as two band changes. Use a separate serial number sequence for each band.
☐ Multiple Operators and Multiple Transmitters (MULTI-MULTI): More than one person can contribute to the final score during the contest period. No limit to transmitters, but only one transmitted signal (and running station) allowed per band at any time. Use a separate serial number sequence for each band.
☐ SWL: Short Wave Listener (Receive Only), All Band.

8. EXCHANGE: RS(T)

report plus a progressive contact serial number starting at 001 and incrementing by one for each contact. MULTI-TWO and MULTI-MULTI entries are to use a separate serial number starting at 001 for each band. If the station worked does not send a serial number for the contest, then the received number is to be logged as 001.

9. MULTIPLIER:

The multiplier is the number of different valid prefixes worked. Note that the same prefix may be counted once on each band for multiplier credit.
The prefix is the letter/numeral combination which forms the first part of the amateur call.
Examples of valid prefixes are N8, W8, WD8, HG1, HG19, KC2, OE2, OE25, LY1000, etc. Any difference in the numbering, lettering, or order of same shall count as a separate prefix.
A station operating from a DXCC country different from that indicated by its call sign is required to sign portable. The portable prefix must be an authorized prefix of the country/call area of operation. In cases of portable operation, the portable designator will then become the prefix. Example: N8BJQ operating from Wake Island would sign N8BJQ/KH9 or N8BJQ/NH9. KH6XXX operating from Ohio must use an authorized prefix for the U.S. 8th district (/W8, /AD8, etc.). Portable designators without numbers will be assigned a zero (Ø) after the second letter of the portable designator to form the prefix. Example: PA/N8BJQ would become PAØ. All calls without numbers will be assigned a zero (Ø) after the first two letters to form the prefix. Example: XEFTJW would count as XEØ.
Maritime mobile, mobile, /A, /E, /J, /P, or interim license class identifiers do not count as prefixes.
Special event, commemorative, and other unique prefix stations are encouraged to participate. Prefixes must be assigned by the licensing authority of the country of operation.

10. CONTACT POINTS:

Each QSO is credited twenty points on 160M; ten points on 80M; five points on 40M; one point on 20M; two points on 15M; and three points on 10M. Note that the same station may only be counted once on each band for contact points.

11. THE FINAL SCORE is

the sum of the Contact Points multiplied by the Multiplier (the total number of prefixes worked on all bands, noting that the same prefix can be counted once on each band).

12. AWARDS

The trophies and plaques in the following table will be awarded.
Award Recipient Sponsor
OCEANIA Ron Wills ZL2TT Memorial Trophy
OCEANIA PHONE Single-Op
40M Plaque
Top entrant from Oceania in PHONE Single
Operator ALL Band category
Top entrant from Oceania in PHONE Single
Operator 40M Band category

Radio DX Group Inc
Oceania Amateur
Radio DX Group Inc
Mirek Rozbicki VK6DXI

Certificates will be awarded to the top scoring station in each category listed under Section 7 for each IARU WAC continent and each country. A participation certificate will also be awarded to every station that makes at least one valid QSO.

The certificates will be made available on the contest web site at www.oceaniadxcontest.com for entrants to download and print at their convenience.

Printed certificates will not be delivered via the postal service except in response to specific written requests from entrants who won a category in their country and made more than 10 QSOs in that category. Written requests for printed certificates are to be addressed to the Contest Committee at info@....

Awards may be withdrawn or added at any time, and at the discretion of the Contest Committee. Refer to the Oceania DX Contest web site at www.oceaniadxcontest.com for the latest information about contest awards.

13. GENERAL LOG REQUIREMENTS:

Transmitting entries are to submit a log showing the following details for each contact - band or frequency, mode, date, time in UTC, call sign of station worked, RS(T) and serial number sent, RS(T) and serial number received. SINGLE-OP Single Band logs are to record ALL contacts made by the station - both on the band chosen for the entry and on any other bands. All logs must be submitted in date/time order.

SWL entries are to submit a log showing the following details for each contact - band or frequency, mode, date, time in UTC, call sign of 'station heard', call sign of 'station being worked', RS(T) and serial number sent by the heard station. The same call sign may appear only once in any group of 3 consecutive entries in the 'station being worked' column. Note that in the case of non-Oceania SWL entries, only Oceania call signs should appear in the 'station heard' column.

All duplicate contacts must be shown - DO NOT delete duplicate contacts. No penalty will be applied for showing duplicate contacts.

14. ELECTRONIC LOGS are

preferred and are compulsory for stations logging more than 50 contacts.
Electronic logs are to be submitted in Cabrillo format. The Cabrillo log file must include an accurately completed header (containing the summary information) and the QSO log data. All of the fields in the Cabrillo header must be completed except for the ARRL Section, Category Overlay and Soapbox lines. Failure to fill out the header correctly can result in the entry being placed in the wrong category or reclassified as a check log.
See www.oceaniadxcontest.com for the latest information on the Cabrillo log format requirements.

The log file name is to be in the form callsign.log, for example, if ZL2WB submits a log file - then it should be named zl2wb.log.

Send the log file as an e-mail attachment to ph@... (for PHONE entries)
or cw@oceaniadxcontest.com (for CW entries). Please insert only your call sign in the Subject field of the e-mail used to send your Cabrillo log. The log file must be sent as an attachment, not as text or other content within the e-mail message. Do not zip the log file and only include one log in each email submission.

All incoming email log messages are processed by an email robot. The robot sends an automated email acknowledgement indicating either acceptance or rejection of the log. If you do not receive this acknowledgment, or are encountering difficulty in having the log accepted, then please contact the Contest Committee at info@... .

Note: SWL files cannot be processed by the robot so please forward all electronic SWL files to info@... .

Entrants using paper logging, or logging software that does not produce a Cabrillo file, are encouraged to use the on-line forms at http://www.b4h.net/cabforms/ to manually create and submit a Cabrillo file.

15. PAPER LOGS:

Electronic Logs are preferred (see Rule 14 above) but if this is not possible then paper logs in the Oceania DX Contest format may be submitted, provided they contain less than 50 contacts. Each paper log is to be accompanied by a summary sheet that clearly states:

The station's call sign
Operator call sign/s
Entrant's name and mailing address (for receipt of awards) Mode and Category entered
Contact points claimed on each band
Number of multiplier prefixes claimed on each band
Total claimed score

Official log sheets and summary can be downloaded from the Oceania DX Contest web site at www.oceaniadxcontest.com. If you do not have access to the official forms then you may make your own in accordance with the general requirements outlined above and in Section 13.

Paper logs are to be are to be posted to: Oceania DX Contest, c/o PO Box 21088, Little Lonsdale Street, Victoria 8011, Australia. Only one entry is to be included in each

submission. Airmail is preferred if you are submitting a log from outside VK or ZL.

16. DEADLINE

All logs must be emailed or postmarked NO LATER than 12 November 2012. The reception of logs will be acknowledged by the email robot (for electronic submissions) and a listing of all logs received by the robot will be posted on the Oceania DX Contest web site at www.oceaniadxcontest.com.

17. DISQUALIFICATION

Violation of amateur radio regulations in the country of the contestant or the rules of the contest;
unsportsmanlike conduct; or taking credit for excessive unverifiable QSOs or multipliers will be
deemed sufficient cause for disqualification. Incorrectly logged calls will be counted as unverifiable contacts. ANY entrant that uses means, other than contacts on the permitted bands and modes, to SOLICIT, ARRANGE, or CONFIRM any contacts in the contest is unsportsmanlike and the entry will be subject to disqualification.

18. DECLARATION

Although no signed declaration is required, by submitting a log you are deemed to have agreed that:
1) you have read and understood the rules of the contest and agree to be bound by them, as well as all rules and regulations of your country which pertain to amateur radio, 2) your log entry may be made open to the public, and 3) all actions and decisions of the Oceania DX Contest Committee are official and final.

19. FURTHER INFORMATION

The latest information about the contest will be published on the Oceania DX Contest web site at www.oceaniadxcontest.com. Any questions can be emailed to info@oceaniadxcontest.com or posted to Oceania DX Contest Committee, c/o PO Box 21088, Little Lonsdale Street, Victoria 8011, Australia.

http://www.sactest.net/blog/rules/

Scandinavian Activity Contest

Rules

Rules for all participants
1. Aim of the contest

The aims of the contest are to promote amateur radio activity within Scandinavia as well as to encourage amateur radio communications between Scandinavian and non-Scandinavian amateur radio stations. Scandinavian stations will try to work as many non-Scandinavian stations as possible and vice versa.

Scandinavian stations are defined by prefixes as follows:

Svalbard and Bear Island JW
Jan Mayen JX
Norway LA – LB – LG – LJ – LN
Finland OF – OG – OH – OI
Aland Islands OFØ – OGØ – OHØ
Market Reef OJØ
Greenland OX – XP
Faroe Islands OW – OY
Denmark 5P – 5Q – OU – OV – OZ
Sweden 7S – 8S – SA – SB – SC – SD – SE – SF – SG – SH – SI – SJ – SK – SL – SM
Iceland TF

All other legal prefixes according to the ITU definition of Scandinavian prefixes are good for the contest and multipliers as well.

2. Eligible entrants

Radio amateurs all over the world are invited to participate.

3. Periods

CW: 3rd full weekend of September each year.
SSB: 2nd full weekend of October each year.
Starts 12:00:00 UTC Saturday and ends 11:59:59 UTC Sunday.

4. Sections

Scandinavian stations, other European stations, and non-European stations are placed in separate categories.

4.1 Single Op./Single TX
Single operator means that one person performs all operating, logging and spotting

functions without any external assistance. The use of DX-Cluster, Skimmer or Skimmer-like technology (such as Reverse Beacon Network, RBN) is not allowed. The station must be located in one site, with the location determined by the physical location of the transmitters, receivers, and antennas. Asking and begging stations to announce ones own call on the DX-Cluster is NOT allowed.
4.1.1 For Scandinavian stations:
Multi Band – High Power [SINGLE-OP ALL HIGH]
Multi Band – Low Power (output 100 W or less) [SINGLE-OP ALL LOW]
Multi Band – Low Power Rookie (output 100 W or less) [SINGLE-OP ALL LOW] [CATEGORY-OVERLAY: ROOKIE]
Multi Band – Low Power Tribander/Single-element (output 100 W or less) [SINGLE-OP ALL LOW] [CATEGORY-OVERLAY: TB-WIRES]
Multi Band – QRP (output 5 W or less) [SINGLE-OP ALL QRP]
Single Band [SINGLE-OP 80M] [SINGLE-OP 40M] [SINGLE-OP 20M] [SINGLE-OP 15M] [SINGLE-OP 10M]

Multi-band entrants may participate in one of the ”Tribander/Single Element” or ”Rookie” categories by adding the line CATEGORY-OVERLAY: TB-WIRES or CATEGORY-OVERLAY: ROOKIE in their Cabrillo log file. Participants in the Tribander/Single Element category shall use only one triband antenna for 10, 15, and 20 meters, and single-element antennas for 40 and 80 meters. Participants in the Rookie category must be licensed less than 3 years before the CW contest starts.

4.1.2 For non-Scandinavian stations:
Multi Band – High Power [SINGLE-OP ALL HIGH]
Multi Band – High Power Assisted [SINGLE-OP-ASSISTED ALL HIGH]
Multi Band – Low Power (output 100 W or less) [SINGLE-OP ALL LOW]
Multi Band – QRP (output 5 W or less) [SINGLE-OP ALL QRP]

The Multi Band – High Power Assisted category allows the use of DX-Cluster, Skimmer, and Skimmer-like technology (such as RBN). The station must be located in one site, with the location determined by the physical location of the transmitters, receivers, and antennas.

4.2 Multi Op./Single TX/Multi Band [MULTI-ONE]

Only one signal may be transmitted on any band at any time (running station). When operation has started on one band, the station must remain on that band for at least 10 minutes. The 10-minute period starts with the first QSO worked on that band.

Exception: It is allowed to work a QSO on another band if it is a new multiplier (multiplier station). The multiplier station is allowed to be on the air at the same time as the running station. The multiplier station must also stay on the “multiplier band” at least 10 minutes.

The use of DX-Cluster, Skimmer, and Skimmer-like technology (such as RBN) is allowed. The station must be located in one site, with the location determined by the physical location of the transmitters, receivers, and antennas. Asking and begging stations to announce ones own call on the DX-Cluster is NOT allowed.

4.3 Multi Op./Multi TX/Multi Band [MULTI-MULTI]

This category is only for Scandinavian stations. There are no restrictions on the number of transmitters. Only one signal per band is allowed at any time. All equipment, including

receivers, transmitters, and antennas must be located within a circle with a maximum diameter of 500 meters. Separate serial numbers are used for each band.

The use of DX-Cluster, Skimmer, and Skimmer-like technology (such as RBN) is allowed. Asking and begging stations to announce ones own call on the DX-Cluster is NOT allowed.

5. Frequency bands

The 3.5 – 7 – 14 – 21 – 28 MHz frequency bands may be used according to the IARU HF Band Plan. On 3.5 MHz, Region 1 stations must not transmit below 3510 kHz on CW or above 3790 kHz on SSB.

Note: On 7 MHz you may still want to work split on SSB between Scandinavia and Region 2 stations, since the Region 2 Band Plan upper frequency limit is 7300 kHz.

6. Contest exchanges

The contest exchange consists of RS(T) plus serial number starting with 001 (e.g. 59(9)001). (QSO's after 999 are numbered 1000, 1001 etc). The same station may be worked once on each band. Cross-mode and/or cross-band QSO's are not allowed. The minimum content of a valid contest QSO is a correct callsign and correct contest exchanges.

7. Scoring
7.1 For Scandinavian stations:

A two-way QSO with correct sent and received exchanges counts for QSO points.
EUROPEAN stations give two (2) points for every complete QSO.
NON-EUROPEAN stations give three (3) points for every complete QSO.
7.2 For non-Scandinavian stations:

A two-way QSO with correct sent and received exchanges counts for QSO points.
EUROPEAN stations credit their logs with one (1) point for every complete Scandinavian QSO.
NON-EUROPEAN stations credit their logs with one (1) point for every complete Scandinavian QSO on 14, 21, and 28 MHz and with three (3) points for every complete QSO on 3.5 and 7 MHz.

8. Multipliers
8.1 For Scandinavian stations:

Each worked non-Scandinavian DXCC country is valid for one multiplier for each band.
8.2 For non-Scandinavian stations:

Each worked prefix-number (Ø-9) in each Scandinavian country is valid for one multiplier for each band (e.g. SI3, SK3, SL3, SM3, 7S3 and 8S3 are all in ONE district and count for ONE (1) multiplier on each band).

Portable stations without a prefix number count for the 10th area (e.g. LA/G3XYZ counts for LAØ).

OHØ (Aland Is.) and OJØ (Market Reef) are separate call areas. SJ9 and SI9 counts for the 9th district in Sweden.

9. Final score

To calculate the final score, multiply the sum of QSO points on all bands with the sum of multipliers worked on all bands.

10. Logs

Logs must be submitted separately for CW and SSB, and the QSOs must be listed in chronological order.

By submitting a log, you agree that your log and the corresponding log checking report may be made open to the public.

Electronic submission of logs at http://www.sactest.net is required for all entrants. The website provides conversion tools and allows manual entry for those operators who have used a paper log while operating.

Use the CABRILLO format. Please ensure that you fill out all of the header information.

Please check your log for typing errors and leave all your QSOs in the log, dupes included. The log checking software will find the dupes and mark them with zero points.

11. Closing date for logs

Cabrillo logs or typed-in paper logs shall be uploaded no later than two weeks after the end of each part of the contest.

12. Awards

The top scoring station in each country, in each category, on both CW and SSB, will receive a Contest Award, provided a reasonable score is made.

Scandinavian winner stations will receive a Contest Plaque in the High-power, Low-power, Low-power Rookie, and Low-power Tribander/Single-element multi band categories.

The non-Scandinavian continental winners will receive a Contest plaque in the High-power multi band category, provided a reasonable score is made.

Depending on the number of participants, the Contest Committee may consider additional awards.

13. Scandinavian Cup

The Scandinavian Cup is a competition between the Scandinavian Regions as defined in §1. All entrants scores for both CW and SSB are accumulated to a total for each region. All logs except for checklogs are counted towards the total.A circulating trophy is awarded to the league of the region that wins the Cup.

14. Dispute

Violation of Amateur Radio Regulations in the country of the contestant or the rules of this contest, unsportsmanlike conduct and taking credit for unverifiable QSOs or multipliers may lead to disqualification.

The decisions by the Contest Committee are final and definite. The right to changes in these rules is reserved.

15. Organizer

The Nordic Radio Amateur Union (NRAU) is the organizer of the contest. Members of NRAU are EDR, FRA, IRA, NRRL, SRAL and SSA.

The contest is administered by a committee composed of one member each from Denmark, Finland, Norway and Sweden. Each national society takes sponsorship turns as indicated below:

CW: 2011 17-18 Sep, SRAL Finland
SSB: 2011 8-9 Oct, SRAL Finland
CW: 2012 15-16 Sep, SSA Sweden
SSB: 2012 13-14 Oct, SSA Sweden
CW: 2013 21-22 Sep, NRRL Norway
SSB: 2013 12-13 Oct, NRRL Norway
CW: 2014 20-21 Sep, EDR Denmark
SSB: 2014 11-12 Oct, EDR Denmark
CW: 2015 19-20 Sep, SRAL Finland
SSB: 2015 10-11 Oct, SRAL Finland
CW: 2016 17-18 Sep, SSA Sweden
SSB: 2016 8-9 Oct, SSA Sweden
CW: 2017 16-17 Sep, NRRL Norway
SSB: 2017 14-15 Oct, NRRL Norway
CW: 2018 15-16 Sep, EDR Denmark
SSB: 2018 13-14 Sep, EDR Denmark
CW: 2019 21-22 Sep, SRAL Finland
SSB: 2019 12-13 Oct, SRAL Finland

CQ WW DX Contest Rules 2012

SSB: October 27 - 28 CW: November 24 - 25
Starts 0:00:00 UTC Saturday Ends 23:59:59 UTC Sunday

I. OBJECTIVE: For amateurs around the world to contact other amateurs in as many zones and countries as possible.

II. BANDS: Six bands only: 1.8, 3.5, 7, 14, 21 and 28 MHz.

III. For all categories:

1. All entrants must operate within the limits of their chosen category when performing any activity that could impact their submitted score.
2. You must not exceed the total output power limitation of your chosen category on any band. Total output power on any band at any time is measured at the output of the active amplifier(s).
3. Operating location: All transmitters and receivers used by the entrant must be located within a single 500-meter diameter circle or within the property limits of the station licensee's address, whichever is greater.
4. All antennas used by the entrant must be physically connected by wires to the transmitters and receivers used by the entrant.
5. Only the entrant's call sign can be used to aid the entrant's score.
6. A different call sign must be used for each CQ WW entry.
7. An entrant's remote station is determined by the physical location of the transmitters, receivers, and antennas. A remote station must obey all station and category limitations of Rule III.
8. A competitor who wishes to be judged for a top score in their category must agree to a potential visitation at any time during the contest by an observer appointed by the CQ WW Contest Committee (CQ WW CC). Failure of the entrant to respond to our correspondence or to allow a CQ WW CC observer full access to the contest QTH during the full contest period may result in the competitor being removed from award eligibility for 3 years.
9. Self-spotting or asking to be spotted is not allowed.
10. Only one signal on a band is allowed at any time.
11. Remote receivers outside the limitations of Rule III.3 are not allowed. The onlyexception is public remote skimmers which are allowed for the Multi-Operator, Assisted and Xtreme categories.
12. When two or more transmitters are present on the same band, a hardware device MUST be used to prevent more than one signal at any one time; interlocking two or more transmitters on a band with alternating CQs (soliciting contacts) is not allowed.
13. Post-contest correcting of call signs by using any database, recordings or confirming QSO's is not allowed (Rule XII.2 always applies).
14. All competitors are expected to have read and to comply with the rules of the chosen category. The entrant agrees that any violation of CQ WW contest rules makes the entrant

subject to either a red or yellow card (see rule XIII).

IV.TYPES OF COMPETITION

A. Single Operator (All-Band or Single-Band): only one person (= the entrant) can contribute to the final score during the official contest period. Call sign alerting assistance of any kind places the entrant in one of the Single Operator Assisted categories. For all single operator categories, all-band or single-band, only one signal is allowed at any time; for the all-band category the operator can change bands at any time.
1. Single Operator: QSO alerting assistance of any kind is not allowed.
a. Single Operator High Power (All-Band or Single-Band): Total output power must not exceed 1500 watts on any band at any time (see III.2).
b. Single Operator Low Power (All-Band or Single-Band): Total output power must not exceed 100 watts on any band at any time (see III.2).
c. Single Operator QRP (All-Band or Single-Band): Total output power must not exceed 5 watts on any band at any time (see III.2).
2. Single Operator Assisted: Any public QSO alerting assistance is allowed for all assisted categories. This includes, but is not limited to, DX Cluster-type networks, local or remote Skimmer and/or Skimmer-like technology and reverse beacon network. A local Skimmer is one obeying Rule III.3.
a. Single Operator High Power Assisted (All-Band or Single-Band): Total output power must not exceed 1500 watts on any band at any time (see III.2).
b. Single Operator Low Power Assisted (All-Band or Single-Band): Total output power must not exceed 100 watts on any band at any time (see III.2).
c. Single Operator QRP Assisted (All-Band or Single-Band): Total output power must not exceed 5 watts on any band at any time (see III.2).

B. Multi-Operator Categories (all-band operation only): Any public QSO spotting help is allowed. Any number of operators is allowed. Total output power must not exceed 1500 watts on any band at any time (see III.2).
1. Single Transmitter (MS): Only one transmitter and one band permitted during any 10-minute period (run transmitter).Exception: One- and only one-other band may be used during any 10-minute period, if-and only if-, the station worked is a new multiplier (multiplier transmitter). The run and multiplier transmitters are governed by independent ten minute rules. Ten-minute periods are defined as starting with the first logged QSO on a band (see Rule XII.2). The multiplier station cannot call CQ (solicit contacts). Logs found in violation of the 10-minute rule may be reclassified as M2. The log must indicate which transmitter (run or multiplier) made each QSO.
2. Two Transmitters (M2): A maximum of two transmitted signals at any time on two different bands. Both transmitters may work any station.A station may only be worked once per band regardless of which transmitter is used. The log must indicate which transmitter made each QSO. Each transmitter may make a maximum of 8 band changes in any clock hour.
3. Multi-Transmitter (MM): A maximum of six transmitted signals, one per band, at any one time. Six bands may be activated simultaneously.

C. Xtreme Contesting: To encourage the development of new technologies in contesting. The rules for the Xtreme category are different from the rules presented here. For the full Xtreme rules, go to <http://www.cqww.com> and click on rules for the Xtreme category.

D. Team Contesting: A team consists of any five radio amateurs operating in any single operator category. A person may be on only one team per mode. Competing on a team will not prevent any team member from submitting his/her personal score for a radio club. A team

score will be the sum of all the team members submitting scores. SSB and CW teams are totally separate. A member of an SSB team may be on a totally different CW team. A list of a team's members must be received at CQ Headquarters by the time the contest begins. E-mail to <teams@...>, or mail or fax the list to CQ, Attn: Team Contest, 25 Newbridge Road, Hicksville, NY 11801 U.S.A.; fax 516-681-2926. Awards will be given to the top teams on each mode.

V. NUMBER EXCHANGE:

Phone: RS report plus zone (e.g., 5905). CW: RST report plus zone (e.g., 59905).

VI. MULTIPLIER:

Two types of multiplier will be used.

1. A multiplier of one (1) for each different zone contacted on each band.
2. A multiplier of one (1) for each different country contacted on each band. Stations are permitted to contact their own country and zone for multiplier credit. The Worked All Zones written rules, DXCC entity list, Worked All Europe (WAE) multiplier list and IG9/IH9, and WAC boundaries are standards. Maritime mobile stations count only for a zone multiplier.

VII. POINTS:

1. Contacts between stations on different continents are worth three (3) points.
2. Contacts between stations on the same continent but different countries, one (1) point. Exception: For North American stations only, contacts between stations within the North American boundaries count two (2) points.
3. Contacts between stations in the same country are permitted for zone or country multiplier credit but have zero (0) point value.

VIII. SCORING:

All stations: the final score is the result of the total QSO points multiplied by the sum of your zone and country multipliers. Example: 1000 QSO points × 100 multiplier (30 Zones + 70 Countries) = 100,000 (final score).

IX. AWARDS:

First-place certificates will be awarded in each category listed underSec.IV in every participating country and in each call area of the United States, Canada and Japan. All scores will be published. To be eligible for an award, a Single-operator station must show a minimum of 12 hours of operation. Multi-operator stations must operate a minimum of 24 hours. A single-band log is eligible for a single-band award only. If a log contains more than one band it will be judged as an all-band entry, unless specified otherwise. In countries or call areas where the returns justify, 2nd and 3rd place awards will be made. All certificates/plaques will be issued to the licensee of the station used.

X. TROPHIES AND PLAQUES:

Plaques and trophies are awarded for top performance in a number of categories. They are sponsored by individuals and organizations. For a current list of plaques and sponsors, or to learn how to become a sponsor, see the CQ WW DX website www.cqww.com or the CQ website: <http://www.cq-amateur-radio.com/cqwwhome.html>. A station winning a World trophy will not be considered for a sub-area award; the trophy will be awarded to the runner-up in that

area.

XI. CLUB COMPETITION:

1. The club must be a local group and not a national organization.
2. Participation is limited to club members living within a local geographic area defined as within a 275 km radius from the center of club area (except forDXpeditions conducted by members living within the defined club geographic area). Club contributions from DXpedition scores are a percentage of the number of club members on the DXpedition.
3. To be listed, a minimum of three logs (combined phone and CW) must be received from a club, and an officer of the club must submit a list of eligible members for each contest.

XII. LOG INSTRUCTIONS:

1. All times must be in UTC.
2. All sent and received exchanges are to be logged. In addition to the number exchange, the call sign sent by an entrant during a completed exchange, must be logged as sent by the entrant. All QSO exchanges must be logged upon QSO completion.
3. If submitting a paper log, you must indicate zone and country multipliers the FIRST TIME worked on each band. This is not required for electronic Cabrillo log submissions.
4. Electronic log submission is strongly encouraged. The Committee requires an electronic log for any possible high-scoring log.
By submitting a log to the CQ WW Contest, the entrant agrees to have the log open to the public. If possible, we would appreciate complete frequencies in the log (rule III.14 applies). E-mail Required Content: Please submit your log in the Cabrillo file format created by all major logging programs.
Be sure to put the STATION CALL SIGN in the "Subject:" line of each message. Your e-mail log will automatically be acknowledged by the server. You will also receive a personal access code from the server at a later time (usually in late spring). Electronic submission implies a signed declaration that all contest rules and regulations for amateur radio in the country of operation have been observed. Submit your CQ WW SSB log to <ssb@...> and your CQ WW CW log to<cw@...>.
5. Paper log submission: Use a separate log sheet for each band.
Each paper log entry MUST be accompanied by a summary sheet showing all scoring information, category of competition, and contestant's name and address in BLOCK LETTERS. Sample log and summary sheets and zone maps are available from CQ. A large, self-addressed envelope with sufficient postage or IRCs must accompany your request. If official forms are not available, make up your own, 80 contacts to the page on 8 1/2" × 11" paper or European A4. All paper log entrants are required to submit cross-check sheets (an alphabetical list of calls worked) for each band on which 200 or more QSOs were made. Send paper logs to Paper Logs, Box 481, NewCarlisle, Ohio 45344, USA. Please mark SSB or CW on the envelope.
6. QRP and Low Power stations must indicate their category on their summary sheets and state the actual maximum power output used in the comment section of their Cabrillo submission.

XIII. ACTIONS OF THE CQ WW CC

Violation of a contest rule makes the entrant subject to a red, a yellow card, a warning letter or log rejection at the discretion of the CQ WW CC (rule III.14 always applies).
A. YELLOW card: One Yellow card: entrant not eligible for an award in the entered contest. An entrant or operator issued a yellow card will be listed at the end of the published results. Two Yellow cards: An entrant receiving two yellow cards in three consecutive CQ WW DX contests is equal to a Red Card.

B. RED card: One Red card: entrant not eligible for an award in the entered contest. Entrants receiving a red card will be listed at the end of the published results. An entrant or operator receiving a Red card will be ineligible for any CQ-sponsored contest award for a period of one year beginning with the publication of the violation in CQ magazine.Two Red cards: An entry or operator receiving two Red cards within five consecutive CQ WW DX contests will be ineligible for any CQ-sponsored contest award for a period of two years beginning the month of publication of the second violation in CQmagazine. If the entrant receiving a Red card is in a multi-operator category, all listed operators are so affected.

C. Further CQ WW CC actions:

1. The entrant agrees that the CQ WW CC reserves the right to reject any entry.
2. Bad QSO: The bad QSO is removed and a penalty of three more equivalent QSOs is applied to the points only.
3. Unsportsmanlike conduct can be grounds for action by the CQ WW CC. Examples of unsportsmanlike conduct includes but is not limited to: violation of the CQ WW rules; ANY use by an entrant of any non-amateur means during the contest including, but not limited to, telephones, Internet, instant messaging, chat rooms, VoIP, or the use of any DX cluster/reflector to ARRANGE, or CONFIRM any contacts during the contest;repetitive frequency transmissions outside oflicense limitations by the entrant; post-contest modification of a log by using data sources to correct call sign/exchange errors and "rubber clocking" by the entrant.
4. Taking credit for excessive unverifiable QSOs or unverifiable multipliers may result in a Yellow or Red card at the discretion of the CQ WW CC.
5. An entrant is free to withdraw his/her submitted log for any reason prior to receiving an official letter from the CQ WW CC.
6. By submitting a CQ WW DX Contest log, an entrant agrees that the issuing of Red cards, Yellow cards, and other decisions of the CQ WW CC are official and final.
7. Disqualification actions taken by the EUHFC, the SCC RTTY Championship and the JIDXC will honored by the CQ family of contests as if a red card had been issued.
8. Questions concerning these rules should be e-mailed to: <questions@...>.

XIV. DEADLINE:

1. All entries must be sent WITHIN FIVE (5) DAYS after the end of the contest.November 2, 2012 for the SSB section and November 30, 2012 for the CW section.

2. An extension may be given if requested by e-mail (questions@...). The granted extension must be confirmed by the Contest Director, must state a legitimate reason, and the request must be received before the log mailing deadline. Logs dated after the extension deadline may be listed in the results but will be declared ineligible for an award.

Kepada Rekan2,

Mengajukan permohonan menjadi anggota YBDXC kepada YB2DX OM Hans melalui email yb2dx@... dengan persyaratan memenuhi salah satu sbb:

Dapat melampirkan copy/scan/photo award dari salah satu kontest yg berskala Internasional (skala Nasional tidak berlaku) atau

Dapat melampirkan copy/scan/photo salah satu dari DXCC Awards yang dikeluarkan oleh ARRL atau

Dapat melampirkan copy/scan/photo QSL Card yg terdiri dari minimal 5 Benua (AF, AN, AS, EU, NA, SA), (OC tidak berlaku)

Anggota diharuskan mempunyai data pada www.qrz.com

de YB4IR Imam / YB1AR Yana

Dear All,

One of the most interesting ways to use Club Log is to join your clubs, so that you can participate in your own leagues against friends. Also, if you are interested in joining in the HF or LF challenges organised by CDXC, then you can join these contests in Club Log and have your score automatically calculated by Club Log.

Note: members must add themselves to this club. Instruct them to click 'Settings' and then go to the 'Clubs' tab to join. This method allows users to opt-out (by default) of leagues and DXpedition charts. The opt-in principle is how Club Log is intended to work.

PS: Only YBDXC registered member who got the number membership will be approved.

http://www.clublog.org/edituser.php goes to settings, goes to clubs, thick YBDXC, goes to join clubs

OM,
Bagus nih ada pemisahan frequency QSX antara EU dan Non EU, probabilitas berhasil relatif lebih tinggi walowpun juga belum tentu berhasil :-(

Sayangnya untuk 5H2DK ini di Diamond DXCC masuk ke Tanzania yang bukan ex Zanzibar (5H1), karena saya sudah dapat 5H3CMG.

73 es tnx

5H2DK will be QRV from Moshi, Tanzania (KI86qq) from Oct 2nd to Oct 17th 2012. We may be sporadically QRV using a portable setup from different locations on Oct 18th to Oct 27th. It will be an one man operation on SSB only.
The setup includes an ICOM 706 mkIIG boosted with an SG-500 to emit full 100W permitted, A3S tribander (10/15/20) and dipoles for 12/17/40/80 m bands. The portable setup will include the ICOM 706, an AH-4 mobile antenna tuner, a wire antenna taped to a 6m fishing stick.
Prelimanry Tx frequency plan: 3.790, 7.090, 14.250, 18.150, 21.250, 24.950, 28.450. The Rx will be same as Tx, 5up, 5-10up or 7.140 on 40m band.
In order to maximize everybodys possiblity to get into the log, we may ask Europe to call 5up and outside Europe and Scandinavia to call 10up. We will try our best to serve everybody. Please behave according to the rules in order to maximize QSO rate and minimize the number of failed QSOs.

GM OM Hen,
How r u ?

Bbrp kali sy on air, memang masih banyak mereka yg ngrubutin sy, terutama CW mode, mgkn jg mode lain selain Phone, baik EU, NA atau JA, YB-land masih dicari.

Satu cerita ketika XP2I (Greenland) on air YB2LSR berusaha masuk, walau signal tidak besar dibanding dgn yg lainnya, prioritas tetap pada YB2LSR sampai penyebutan call YB2LSR benar, kesimpulan sy YB-land masih dicari. Demikian jg dari EU lainnya, NA/SA.
Demikian pengalaman sy.

Kapan kita qso di 20m?
Hi...

Siiplah OM Yongkie,
Beberapa hari ini masih gagal utk QSO dengan 3D2C di 10M maupun di 15M.
Semalam juga panggil Barbados, sekedar utk nambah2 Diamond DXCC setengah mati padahal OM Imam-YB4IR sekali panggil langsung worked.

Saya akhirnya berhasil setelah berulang mengkoreksi prefix - karna dia manggilnya YT0QR, setelah saya berhasil malahan 8P6SH memberikan kesempatan kepada "any other Indonesian station" - tapi mungkin rekan2 sudah dapat Barbados di 10M. Sebelumnya saya sudah conformed dg 8P6ER tapi tahun 2011.

Dear All,
Dari data Log teman-teman yang telah mencantumkan nama YBDXC atau juga YB Land DX Club, semua sudah dikoreksi dan diseragamkan oleh pihak penyelengara Contest sebagaimana dibawah ini dengan nama "YB Land DX Club".
 Namun masih ada beberapa yang memang tidak mencantumkan nama Clubnya dan atau ada yang memang salah nama (seperti YB0COU), bahwa definisi Club dari panitia seharusnya adalah yang bukan dari Organisasi resmi.
 Untuk itu mohon dapat diperbaiki dan dikirim ulang data Lognya, supaya semua score yang dari Indonesia dapat digabung menjadi satu untuk bersaing dengan Club dari negara lain.

OM Miky,
Beberapa QSL card yang saya terima dulu khan banyak yang belum mencantumkan IOTA Number-nya, jadi utk IOTA Award bolehkah QSL card semacam itu saya tempeli potongan notepad mencantumkan IOTA Number yg saya dapatkan dari IOTA Directory. Maksudnya utk memudahkan card checker waktu memeriksa QSL card yg dilampirkan. Atau cukup di GCR Listnya saja ditulis IOTA No. itu.

Untuk bisa di klaim sebagai IOTA Awards, pada QSL card HARUS ter CETAK (bukan tulisan tangan) nomor IOTA dan nama pulau/group pulaunya.

Jika tidak memenuhi syarat itu maka QSL Card akan ditolak.

OM Miky,
Iya ini salahsatu point yang menarik perhatian mereka - para IOTA Hunter/Chaser.
Kalo misalnya QSL card yang diterima itu tidak mencantumkan IOTA No. - apakah valid untuk IOTA Award ?

GM OM Hen,
How r u ?

Bbrp kali sy on air, memang masih banyak mereka yg ngrubutin sy, terutama CW mode, mgkn jg mode lain selain Phone, baik EU, NA atau JA, YB-land masih dicari.

Satu cerita ketika XP2I (Greenland) on air YB2LSR berusaha masuk, walau signal tidak besar dibanding dgn yg lainnya, prioritas tetap pada YB2LSR sampai penyebutan call YB2LSR benar, kesimpulan sy YB-land masih dicari. Demikian jg dari EU lainnya, NA/SA.
Demikian pengalaman sy.

Kapan kita qso di 20m?
Hi...

Siiplah OM Yongkie,
Beberapa hari ini masih gagal utk QSO dengan 3D2C di 10M maupun di 15M.
Semalam juga panggil Barbados, sekedar utk nambah2 Diamond DXCC setengah mati padahal OM Imam-YB4IR sekali panggil langsung worked.

Saya akhirnya berhasil setelah berulang mengkoreksi prefix - karna dia manggilnya YT0QR, setelah saya berhasil malahan 8P6SH memberikan kesempatan kepada "any other Indonesian station" - tapi mungkin rekan2 sudah dapat Barbados di 10M. Sebelumnya saya sudah conformed dg 8P6ER tapi tahun 2011.

Dear All,
Dari data Log teman-teman yang telah mencantumkan nama YBDXC atau juga YB Land DX Club, semua sudah dikoreksi dan diseragamkan oleh pihak penyelengara Contest sebagaimana dibawah ini dengan nama "YB Land DX Club".
 Namun masih ada beberapa yang memang tidak mencantumkan nama Clubnya dan atau ada yang memang salah nama (seperti YB0COU), bahwa definisi Club dari panitia seharusnya adalah yang bukan dari Organisasi resmi.
 Untuk itu mohon dapat diperbaiki dan dikirim ulang data Lognya, supaya semua score yang dari Indonesia dapat digabung menjadi satu untuk bersaing dengan Club dari negara lain.

3922. IOTA QSL Card

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-10-01 07:39:49 UTC
From: Yb land Dx club
Topic: 3813 Message: 3922

http://www.ybdxc.net/2012/07/iota-guide-to-validating-your-operation.html

C.4 THE QSL CARDS
C.4.1 QSL cards submitted must confirm two-way radio contact and specify the date, time, band and mode used.

C.4.2 QSL cards submitted must have printed on them both the call-sign and the name of the island from which the operation took place. The latter must be an island mentioned as qualifying for that IOTA group in the island listings available in the latest IOTA Directory or on the RSGB IOTA web-site. The IOTA group name and IOTA reference number are not acceptable alternatives although it is desirable that they also appear on the card, nor are geographic co-ordinates, a grid locator square or a lighthouse or castle name. The name of the island should not have been handwritten, nor should it have been added in a way that makes ambiguous the location of the station at the time of contact.

OM Miky,
Beberapa QSL card yang saya terima dulu khan banyak yang belum mencantumkan IOTA Number-nya, jadi utk IOTA Award bolehkah QSL card semacam itu saya tempeli potongan notepad mencantumkan IOTA Number yg saya dapatkan dari IOTA Directory. Maksudnya utk memudahkan card checker waktu memeriksa QSL card yg dilampirkan. Atau cukup di GCR Listnya saja ditulis IOTA No. itu.

ovember,oscar,papa,etc..
This is much easier to copy for me in the pile up !

 QSL Card Info:
1.Direct request via surface mail post.

Mail your qsl card and qso details to :

wim on4cit/5v7th
Waaltjes 8
3920 Lommel
Belgium

i can accept US$ and Euro's.
Please No IRC's. Funds+IRC is oké.
Do not forget to include a return air mail enveloppe with your adres.

include with your QSL Card
By direct post (in europe) = minimum 2 US$ or 1,70 Eur
By direct post (outside europe) = minimum 3 US$

2.QSL VIA BUREAU.
Mark your QSL card VIA: ON4CIT .
Notice that it sometimes takes a long time before you receive free 5v7th qsl via bureau.

3. LOTW
I wil be uploading all qso's to LOTW later this year.
This could take a wile because direct qsl is priority.

OM Imam,
Sedih deh saya nih. HI HI (sedih koq tertawa).
Contohnya :
Mauritius Island (jelas island) - 3B8DB (15M/1987) dan 3B8FP (10M/2011) sama2 tidak tercetak IOTA # padahal di IOTA Directory tercantum Mauritius Isl. = AF-049.
Mariana, Guam, Kerguelen, Andaman, Maldives,Galapagos, dll semuanya tertulis island.

Setelah saya check barusan, semua QSL card saya di 15M yg diajukan utk DXCC dulu termasuk GW4WJO

(Holy Isl), GU0ELF (Channel Isl) tidak mencantumkan IOTA #.
Rugi dong bandar nih....?? :-(

Ya udah apa boleh buat kalo peraturannya begitu - ntar saya lihat2 juga di IOTA Directory siapa tahu ada pengecualian untuk YB-land. ;-)

73 es tnx

Untuk bisa di klaim sebagai IOTA Awards, pada QSL card HARUS ter CETAK (bukan tulisan tangan) nomor IOTA dan nama pulau/group pulaunya.

Jika tidak memenuhi syarat itu maka QSL Card akan ditolak.

OM,
Berarti utk IOTA number gak mutlak kudu dong ya, kalo misalnya pada QSL card tersebut jelas tertulis nama pulaunya.

Seperti contoh pada QSL card saya - Andaman Island, Minami Torishima (Marcus Island), Guam (*walowpun gak ditulis Guam Isl).

Masih ada secercah harapan.

Judul: [YBDXC_News] IOTA QSL Card

http://www.ybdxc.net/2012/07/iota-guide-to-validating-your-operation.html

C.4 THE QSL CARDS
C.4.1 QSL cards submitted must confirm two-way radio contact and specify the date, time, band and mode used.

C.4.2 QSL cards submitted must have printed on them both the call-sign and the name of the island from which the operation took place. The latter must be an island mentioned as qualifying for that IOTA group in the island listings available in the latest IOTA Directory or on the RSGB IOTA web-site. The IOTA group name and IOTA reference number are not acceptable alternatives although it is desirable that they also appear on the card, nor are geographic co-ordinates, a grid locator square or a lighthouse or castle name. The name of the island should not have been handwritten, nor should it have been added in a way that makes ambiguous the location of the station at the time of contact.

OM Miky,
Beberapa QSL card yang saya terima dulu khan banyak yang belum mencantumkan IOTA Number-nya, jadi utk IOTA Award bolehkah QSL card semacam itu saya tempeli potongan notepad mencantumkan IOTA Number yg saya dapatkan dari IOTA Directory. Maksudnya utk memudahkan card checker waktu memeriksa QSL card yg dilampirkan. Atau cukup di GCR Listnya saja ditulis IOTA No. itu.

betul sekali, IOTA number TIDAK HARUS, tapi nama pulau HARUS
data harus tercetak, bukan tulisan tangan atau ditempel sticker

fyi, sekarang iota reference sudah di tetapkan walaupun belum ada yg on the air dulu, harus on air dulu, baru dikasih nomer iota

lain lubuk, lain belalang,lain dulu, lain sekarang

From: Roger Balister <g3kma@...>;

Hello Budi

The IOTA Committee has set a limit of 1200 on the number of groups on the IOTA list. The reason for this is to prevent the IOTA ‘total’ becoming an unmanageable figure. QSL cards have to be submitted for each credit claimed and there has to be a limit on the work that we ask Checkpoints to undertake. For every island that seems to be a good candidate for a separate IOTA group, there are hundreds of other similar candidates elsewhere, each with its own ardent champion! A detailed set of criteria have been used to establish the present list and, while we don’t claim that different groupings might not have been equally feasible, we believe that the present list is fair, provides a useful mix of easy and difficult groups to work and at the same time reflects decisions taken at earlier stages of IOTA Programme development. The IOTA Committee is however committed to reviewing the list every five years, the next occasion being in 2014 in celebration of
the 50th anniversary of IOTA’s launch. In the meantime, with the rare exception of the occasional new island DXCC entity group that might qualify under the rules for separate listing or of a previously declared ‘barren’ IOTA group found to possess a valid island, no new groups will be added. As for the five year reviews, we can say only that, while we do not wish to bind the hands of future IOTA Committees, we do not currently expect any changes made to be more than minimal. (extract from IOTA Directory, FAQ section).

Best regards

Roger

OM Busan,
Ada satu QSL card saya yg gak laku dong, karena bukan DXpedition tapi liburan sambil nenteng rig, maka WY5L kirim QSL card berupa postcard pemandangan di Johnston Atoll/Island, lalu distempel diisi data QSO dan ditulis tangan : fm : WY5L/KH3.

Daripada bikin masalah ya gak usah nempelin notepad IOTA #, tulis di GCRnya saja kali ya dan QSL card disusun urutan sesuai data di GCR list.

Amateur Radio Supplies Announces Giveaway to Promote Youth in Amateur Radio

Apply Online Now to be Considered for a Complete High Frequency (HF) Station

Haverhill, Mass., September 24, 2012 ☐ Amateur Radio Supplies of Haverhill, Mass., announced today a new biannual giveaway to promote youth in amateur radio DXing and contesting. "Getting on HF (high frequency) in today's economy is very challenging for many, but especially for our youth operators," said Jeff Demers, owner, Amateur Radio Supplies. "Many youth operators are unable to purchase the needed equipment to get on the air. Here at Amateur Radio Supplies, we want them to experience the joy that has propelled us in this hobby for many decades. Thus, on January 1, 2013, we'll be doing the first of many station sponsorships to support youth in DXing and contesting."

Amateur Radio Supplies will give a complete HF (high frequency) station to the selected applicant, including:

Alinco DX-SR8T/E 160-6m All Mode Transceiver & 30 Amp PS
LDG AT-100 Pro II Desktop Antenna Tuner
Choice of Rugged All Band G5RV or HyGain DX-77A Vertical 100' of
Premium RG-213 Coax
Vibroplex Brass Racer Iambic Paddles
SignaLink USB Sound Card for Digital Modes
Heil Pro Set Plus Headset

Applicants from any country under the age of 21 are invited to provide brief answers to the following three questions, as well as their name, call sign, and license class online.

1. How often are you able to operate on the HF bands?
2. Where (what QTH) do you typically operate from?
3. How do you intend to use the equipment provided?

Visit the Application Form

Nominations will also be accepted. If you know of a deserving youth, please email Randy Rowe at randy@....

About Amateur Radio Supplies

Founded in 2012, Amateur Radio Supplies provides a full line of gear, including antennas, transceivers, coax, antenna wires and countless station accessories. Amateur Radio Supplies was founded in order to provide amateur radio operators with the supplies they need to pursue their passion ☐ ham radio. Amateur Radio Supplies, www.amateurradiosupplies.com, offers low prices and a full selection of tools and station supplies, baluns, antenna wires and more.

OM Iwan...dan OM Hendro..

Kalo dari Lokal Kebayoran ada koq adik-adik Pramuka, asisten pembina yg menjadi amatir radio dan baru saja mendapatkan callsign ...ada tiga orang...

Seandainya bisa diajukan ya mohon diberitahukan persyaratannya apa ya? Lumayan bisa dipakai untuk melakukan pelatihan komunikasi darurat dan tanggap
bencana...disamping QSO dan DX-ing seperti biasanya...

OM Miky,
Iya ini salahsatu point yang menarik perhatian mereka - para IOTA Hunter/Chaser.
Kalo misalnya QSL card yang diterima itu tidak mencantumkan IOTA No. - apakah valid untuk IOTA Award ?

GM OM Hen,
How r u ?

Bbrp kali sy on air, memang masih banyak mereka yg ngrubutin sy, terutama CW mode, mgkn jg mode lain selain Phone, baik EU, NA atau JA, YB-land masih dicari.

Satu cerita ketika XP2I (Greenland) on air YB2LSR berusaha masuk, walau signal tidak besar dibanding dgn yg lainnya, prioritas tetap pada YB2LSR sampai penyebutan call YB2LSR benar, kesimpulan sy YB-land masih dicari. Demikian jg dari EU lainnya, NA/SA.
Demikian pengalaman sy.

Kapan kita qso di 20m?
Hi...

Siiplah OM Yongkie,
Beberapa hari ini masih gagal utk QSO dengan 3D2C di 10M maupun di 15M.
Semalam juga panggil Barbados, sekedar utk nambah2 Diamond DXCC setengah mati padahal OM Imam-YB4IR sekali panggil langsung worked.

Saya akhirnya berhasil setelah berulang mengkoreksi prefix - karna dia manggilnya YT0QR, setelah saya berhasil malahan 8P6SH memberikan kesempatan kepada "any other Indonesian station" - tapi mungkin rekan2 sudah dapat Barbados di 10M. Sebelumnya saya sudah conformed dg 8P6ER tapi tahun 2011.

Dear All,
Dari data Log teman-teman yang telah mencantumkan nama YBDXC atau juga YB Land DX Club, semua sudah dikoreksi dan diseragamkan oleh pihak penyelengara Contest sebagaimana dibawah ini dengan nama "YB Land DX Club".
 Namun masih ada beberapa yang memang tidak mencantumkan nama Clubnya dan atau ada yang memang salah nama (seperti YB0COU), bahwa definisi Club dari panitia seharusnya adalah yang bukan dari Organisasi resmi.
 Untuk itu mohon dapat diperbaiki dan dikirim ulang data Lognya, supaya semua score yang dari Indonesia dapat digabung menjadi satu untuk bersaing dengan Club dari negara lain.

OM Taufan,
Kayaknya bisa valid kalo tercetak nama pulaunya, bukan tulis tangan (juga mesin tik).
Sampai sekaraNGpun 2012 masih ada QSL card yg gak mencantumkan IOTA No. padahal QTHnya ada di IOTA Directory.

Mulai diperkenalkan tahun 1964 - tapi masih banyak juga yg tidak perhatian ya.

Sigi Presch - DL7DF and Crew DXpeditions

DXpeditioning since 1993

H44/ H40 Solomon Islands/ Temotu Islands - March 2013

Navigation Date | Operation | Equipment | Operators | QSL Information | Sponsors | About Solomon Islands | Home
    H4 News | H44 Online Log | H40 Online Log | H4 Pictures | How to help | Sign Guestbook | View Guestbook

---

Operation For our next DXpedition, we have chosen two destinations. The first destination the Solomon Islands, H44 . We will stay there from March 8 and 25, 2013. During the time from March 12 to 23, a part of the group will be active from Temotu Island, H40. We are active with several stations on 160m through 6m on CW, SSB. One station on each destination will be exclusively dedicated to RTTY, PSK31 and SSTV. Please check our News Page
  The local time in Honiara, Solomon Islands is: 12:56:02 - Tuesday, October 2, 2012

Equipment Our equipment on each destination consists of 4 transceivers (3 x K2, 1 x FT857D), 3 power amplifiers, alowband vertical for 160/80 m, a deltaloop for 40, a deltaloop for 30, a Spiderbeam for 20/17/15/12/10, a 5 elem. Yagi for 6m, some Beverage antennas as well as some laptop computers.

Pilot Pilot for this DXpedition is Bernd, DF3CB
QSL The QSL-Route is via DL7DF either direct to:
Sigi Presch
>DL7DF
>Wilhelmsmuehlenweg 123
>12621 Berlin
>Germany
or via the German QSL bureau DARC to DL7DF.
    If you prefer a direct QSL please send a SASE or SAE with 1 new IRC or 2 US$ for a international letter. When sending IRC's please check the expiration date, the new ones are valid until the end of 2013. Any donations are very welcome and needed for the high shipping costs.

If you do not provide the right return postage or a self addressed envelope, we reply via the buro. Please only one call sign per letter! If more than one, all additional cards go via the buro.

Postage needed for 1 envelope with 20 Gramm (FYI):

A letter within DL = 55 Euro Cent, a international letter costs 75 Euro Cent. 1 US$ is equal to 69 Euro Cent. So please keep in mind that 1 US$ - due to the bad exchange rate between the US$ and the Euro - does not cover the postage needed for an international airmail letter!

About
Solomon Islands
Country name: Solomon Islands
National capital: Honiara
Location: Oceania, group of islands in the South Pacific Ocean, east of Papua New Guinea
Area: total: 28,896 sq km
land: 27,986 sq km
water: 910 sq km
Land boundaries: total: 0 km
Coastline: 5,313 km
Climate: tropical monsoon; few extremes of temperature and weather
Terrain: mostly rugged mountains with some low coral atolls
Natural resources: fish, forests, gold, bauxite, phosphates, lead, zinc, nickel
Population: 584,578 (July 2012 est.)
Ethnic groups: Melanesian 94.5%, Polynesian 3%, Micronesian 1.2%, other 1.1%, unspecified 0.2% (1999 census)
Religions: Protestant 73.7% (Church of Melanesia 32.8%, South Seas Evangelical 17%, Seventh-Day Adventist 11.2%, United Church 10.3%, Christian Fellowship Church 2.4%), Roman Catholic 19%, other Christian 4.4%, other 2.4%, unspecified 0.3%, none 0.2% (1999 census)
Languages: Melanesian pidgin (in much of the country is lingua franca), English (official but spoken by only 1%-2% of the population), 120 indigenous languages
Independence: 7 July 1978 (from the UK)
Economy: The bulk of the population depends on agriculture, fishing, and forestry for at least part of its livelihood. Most manufactured goods and petroleum products must be imported. The islands are rich in undeveloped mineral resources such as lead, zinc, nickel, and gold. Prior to the arrival of RAMSI, severe ethnic violence, the closing of key businesses, and an empty government treasury culminated in economic collapse. RAMSI's efforts to restore law and order and economic stability have led to modest growth as the economy rebuilds.

Hi OM Jo,

O walah,
Pantesan kok ga datang, ta tunggu2 lho, hi.....
Ok deh ga papa, may be next time.

Soal antenna :
Iya itu lah cirinya seorang AR yg bisa mensiasati spy bs muncul di sebnyak2nya band operasi.
Layaknya siluman, bisa muncul dimanapun dan kapan pun.
Namun ekonomis, seng penting gitu tah ?
Wah ternyata sekarang Homo ya ? (= HObby MOnitor)
Wkwkwk...

GM OM Hen,
How r u ?

Bbrp kali sy on air, memang masih banyak mereka yg ngrubutin sy, terutama CW mode, mgkn jg mode lain selain Phone, baik EU, NA atau JA, YB-land masih dicari.

Satu cerita ketika XP2I (Greenland) on air YB2LSR berusaha masuk, walau signal tidak besar dibanding dgn yg lainnya, prioritas tetap pada YB2LSR sampai penyebutan call YB2LSR benar, kesimpulan sy YB-land masih dicari. Demikian jg dari EU lainnya, NA/SA.
Demikian pengalaman sy.

Kapan kita qso di 20m?
Hi...

OM Seno,
Saya gak tau deh, apa maksudnya dia bilang "Any other Indonesia station".

Apakah :

- YB-land masih dicari, atau
- Karena sebelumnya EU melulu, kasih kesempatan ke YB
- Mumpung antenna diarahkan ke YB-land

Siiplah OM Yongkie,
Beberapa hari ini masih gagal utk QSO dengan 3D2C di 10M maupun di 15M.
Semalam juga panggil Barbados, sekedar utk nambah2 Diamond DXCC setengah mati padahal OM Imam-YB4IR sekali panggil langsung worked.

Saya akhirnya berhasil setelah berulang mengkoreksi prefix - karna dia manggilnya YT0QR, setelah saya berhasil malahan 8P6SH memberikan kesempatan kepada "any other Indonesian station" - tapi mungkin rekan2 sudah dapat Barbados di 10M. Sebelumnya saya sudah conformed dg 8P6ER tapi tahun 2011.

Dear All,
Dari data Log teman-teman yang telah mencantumkan nama YBDXC atau juga YB Land DX Club, semua sudah dikoreksi dan diseragamkan oleh pihak penyelengara Contest sebagaimana dibawah ini dengan nama "YB Land DX Club".
 Namun masih ada beberapa yang memang tidak mencantumkan nama Clubnya dan atau ada yang memang salah nama (seperti YB0COU), bahwa definisi Club dari panitia seharusnya adalah yang bukan dari Organisasi resmi.
 Untuk itu mohon dapat diperbaiki dan dikirim ulang data Lognya, supaya semua score yang dari Indonesia dapat digabung menjadi satu untuk bersaing dengan Club dari negara lain.

Ya OM Hendro,

Sekarang sy harus apa lagi,
Kalo nurutin nafsu ya ga abis2
Seng penting enjoy aja lah,

Kan aku sdh jadi penegak, kan ndak usah ngejar target lagi jadi pembina , wkwkwk....

3D2C baru dpt 1 slot
BY1WXD/0 (Tibet) dpt 4 slot
OY1CT dpt 2 slot

itu diatas baru2 yg aku dapet, mudah2an dpt lagi deh
Dikit2 lama2 jadi Bukit
Heheheh

hehehehe,
ketawa juga -

khan boleh ngetes dulu - kira2 QRP masih nyampe gak ke YB2LSR, jangan diplonco dong OM Seno. HI

kalo soal QRP, saya pernah cheating juga.
berkutat dg EU & JA yang ampun2 kuat dan rapatnya waktu V5/DJ2HD mempersilahkan QRP station, saya masuk padahal power waktu itu kurleb 60-70 watt, worked - tapi di QSL cardnya jadi YC0QR/QRP.

Saya banyak "tertolong", kalo DX bilang "outside EU" atau mereka pakai urutan angka, atau OC only.

Pagi tadi barengan sama OM Ridha-YB6JRT koq kita manggil Curacao - PJ2/XE1KK.

73 es tnx

he he he

(ketawa ini bukan indikasi mengejek, tp merupakan keramah-tamahan seorang amatir radio seperti seno ini)
lagi .... heheheheh ....

hal yg diceritakan Om Hen itu wajar saja, banyak kemungkinannya
salah satu nya persis apa yang diuraikan Om Hen, betul sekali ....
namun jangan salah kadang ada juga yang usil,

misal : dia pake QRP, sudah tau condx ga bagus dia nge-test (asem ..)
atau pake model cw straight key yang di model2 ketukannya,
apa yang aku lakukan?
kalo pas sepi pura2nya agn...agn...???? walau sebenernya aku sudah dapet full call-nya agn agn .... sampai dia capek dulu ..... hehehehe .

apalagi kalo itu bukan new entity, hahaha ..
tapi aku tidak serta merta begitu, lihat si-kon dulu kita bisa lihat keseriusannya dia untuk qso dgn kita dilihat/didengar dari caranya dia panggil (just a feeling lah, walau kadang tidak benar).
itulah salah satu seninya ... the Art of Amateur Radio

anyhow :
Congratulation : YC0QR worked CO6LC di 10M dan PJ2/XE1KK di 15M

all the best

OM Hendro,
Andaikan limit waktu masih seperti dulu (bisa dikoreksi hingga 30 hari), dan andaikan juga disaat kontes statiunnya OM Hendro cukup besar dan selalu di pile ups di saat kontest, maka selama tenggang waktu utk koreksi data Log tsb, saya yakin OM Hendro akan kebanjiran email di inbox nya, dgn rata2 utk meminta konfirmasi dan koreksi QSO.

Beberapa memang ada yg sempat salah ketik (biasanya bukan pd call sign, tetapi di exch) dan ini abu-abu area (bisa di rubah dan pihak panitia memberikan kesempatan utk merubah itu), tetapi ada yg memang red area yaitu sama sekali call sign nya tidak ada di data log dan minta utk di tambahkan dgn alasan bhw di data lognya ada Call sign kita (apakah memang kita yg gak denger atau memang sama sekali tdk pernah jumpadan itu hanya akal-akalan dia).

Semua itu karena Saking tingginya tekhnologi (mereka bisa cross check di LoTW, di Club Log, di eQSL, di HRD Log dan termasuk di DX Cluster) maka untuk peluang mendapatkan new DXCC dan score multiplier akan bisa diperoleh dengan mudah.

Kalau saya malah maunya utk single operator limitnya hanya 1 hari saja, dan utk yg multi operator 2 hari. Sehingga kalau ada yg minta utk di revisi maka sudah tidak bisa lagi, khususnya ke single operator.

Subject: Bls: [YBDXC_News] Batas waktu pengiriman logsheet cqww contest

Positive thinking nya : sekarang khan semua serba computerized sudah digunakan sistim online utk pengiriman contest log dsb.
Cukup batas waktu 5 hari.

Batas waktu sampai 30 hari khan peninggalanmasa contest log ditulis tangan, dikirim melalui pos.

Judul: [YBDXC_News] Batas waktu pengiriman logsheet cqww contest

Dear all, tadi saya baca rules utk cqww ssb. Batas waktu akhir pengiriman logsheet adalah 2 Nov 2012, artinya panitia hanya memberikan waktu kepada semua contester utk mengirimkan logsheetnya maksimal 5 hari setelah hari H.

Biasanya 30 hari setelah hari H. Mudah2an informasi inoi berguna untuk teman2 semua.

Ini salah satu email yg masuk ke inbox ku setelah RTTY contest kemarin.

Alasannya, pura2 mau kirim QSL Card.
Padahal, call signnya tidak ada di data Log nya saya sewaktu kontes kemarin.

Dia mungkin ngintip di HRD Log, atau di DX Cluster

Ps: "ini hanya utk internal kita dan hanya utk sharing ttg kondisi pasca contest, bukan ada niat utk mempermalukan ataupun sengaja mencemarkan nama beliau"

NaH, OM Bambang,
Itu fonetik dari mana tuh orang Russia ? Nantinya apa gak confuse antara Yuliette (Yangkee) dengan Juliet.

QR = Queen Romanovski - jadi seperti judul pementasan baletnya Russia. Bagus sih, cuma kalo dipake malahan orang jadi bingung, dicuekin malahan., HI

OM Imam,
Waduuhh.... dari sono ya ?
Padahal : ARRL Life member, FISTS #15371, SKCC #7448, NAQCC #5451- koq masih mau cheating ?

Positive thinkingnya :

Ada kontak yg disangkanya sudah OK/worked tapi masih meragukan dan dia tanyakan dulu sebelum kirim QSL card. Dan ternyata memang tidak ada contact seperti yg disangkanya, wong gak ada di log nya YB4IR.

Setelah kejadian saya terima QSL dg note : NOT IN THE LOG dari FM5AN, saya sangat hati2 dlm QSO dan QSLing. Sebelumnya saya juga pernah QSO yg menurut kuping saya sudah OK dg FM5WD, tapi waktu saya cek melalui clublog sampai sebulan lebih gak muncul - yg ada "Sorry, No QSO found".
Saya tanyakan via email, dia jawab bahwa ada QSO dg YC0QR tapi mobile, tapi saya jadi ragu dan tetap anggap gak worked karna kita sama2 gak ada yg sedang mobile.

Saya harapkan ada kesempatan lain dan ternyata dapat QSO dg FM5AN tadi, tapi not in the log - alhamdulillah akhirnya dapat juga QSO dg FM/F5UFX - confirmed via LoTW lagi = gratis.

Kalo K5LY tanyanya via email malahan lebih gampang jawab bahwa ybs tidak ada di log daripada dia kirim QSL card bodong, yg bikin kita tetap punya kewajiban ke kantor pos, kirim tulisan "SRI U R NOT IN MY LOG".

Di QRZ.com maupun di bolg saya, sudah saya lengkapi dgn ONLINE Log dari ClubLog agar mereka bisa check and recheck data QSOnya dgn saya sebelum mengirimkan QSL Cardnya ke saya.

Karena secara Online beliau tidak ada datanya di log saya, HARUSnya tidak seperti itu.. Hehehe..

Kalau memang butuh sebagai new DXCC, harusnya ajak sked dgn saya.. Dan iti akan jauh lebih elegan

Tetapi itu bukan karena QSL card kok.. Itu masih ada kaitannya dgn jeda waktu yg memungkinkan utk bisa saling confirmasi di lognya masing2 sebelum di kirim ke panitia contes (saya terima mungkin ada sekitar 12 email yg isinya serupa)

OM Imam,
Kalo boleh tanya apakah hadiahnya begitu menggiurkan hingga sampe banyak yg mau berbuat curang, karena kalo misalnya hanya utk mendapatkan credit new entity/DXCC - khan malahan diketawain sama diri sendiri, juga diketawain sama mic, rig, coax & antenna.

Ya udah, kalo gitu saya ikut kontes jadi seperti Charlie aja deh yg setiap ikut kontes hanya "gembira bisa memberi point kepada peserta kontes lain", HI HI

Padahal sih masih blom Papa Delta.

Betul OM Imam, selesai kontes mungkin hanya perlu waktu 1-2 jam contest log sudah terkirim ke panitia.

OM Imam,
Kalo di QRZ.Com ada online log enak tuh, apalagi kalo yg otomatis begitu dia tulis di log lalu muncul di online log.
Tapi jangan setiap tulis di online log, munculnya jadi spot di cluster seperti yg kadang terjadi.

Kalo ternyata belum ada di log nya setelah 2-3 hari kita masih bisa coba lagi selagi DXped masih QRV.

Thanks OM Imam

Hello Imam,

We had a OSO during the CQ WW RTTY Contest: 09/30/2012 14.077 at 14:58.

I would like to send you my QSL if you can acknowledge the QSO.

Thank you,

73,

OM Firman,
Menurut pendapat saya, MUNGKIN ybs SP1QXK sudah QSO dengan YE2W di kontes itu, tapi dilihat di layar dia YE2W masih menulisnya SP1QKE.
Saya pernah QSO dengan SP1QXK, juga saya cek di QRZ.com - gak ada data tentang SP1QKE.

Tapi yang saya pernah dengar dari senior2 saya dulu, suatu QSO dinyatakan "worked" bila pertukaran informasi telah dilaksanakan dg benar.
Callsign tidak keliru, RST sudah saling dikirim - mangkanya dulu dihimbau utk readback yg kalo sekarang dianggap buang waktu, antrian sudah panjang.

    Until October 28, the special call CG3X remembers the 50th
    anniversary of the first Canadian satellite "Alouette".
    QSL via VE3JPP.

VK9X, Christmas Island:
    Pekka, OH2YY, and Pekka, OH1TV, will be QRV as VK9XM from October 6
    to 12 with two stations from 40m to 10m in SSB and CW.
    QSL via OH2YY.

W, USA: W4O (October 6/7) is a special callsign to celebrate the
    24th annual "Oliver Hardy Festival" in Harlem/Georgia.
    QSL via K4KNS.
    http://ccarc.hamradioman.com/W4O.html

    The "North American QRP CW Club" (NAQCC) celebrates its 8th
    anniversary between October 7th and 13th. The soecial calls
    N1A, N2A, N3A, N4A, N5A, N6A, N7A and N8A will be on the air
    from all over the USA.
    http://naqcc.info/

Z8, South Sudan:
    Keith, W7DXX, acquired a license as Z88Z and plans to operate
    an internet remote transceiver there like he previously did
    with YI9DXX.
    QSL direct via Homecall, LoTW, eQSL.

ZF, Cayman Islands:
    Paul, VE1DX, will be QRV as ZF2TK until August 2013.
    QSL via Homecall, direct only.

OPs wanted:
    Alfredo, IK7JWY, is organizing a DXpedition to Djerba Island

(AF-083, WLOTA 1394, Tunisia) from April 27 to May 4th 2013 and
is looking for operators (ik7jwx2003[at]yahoo.it).

Contests:

3.10. DIG-Birthday-Contest CW
4.10. DIG-Birthday-Contest SSB
6.10. DARC HF-HELL Contest (80m)
6.10. European Sprint Contest
6./7.10. Oceania DX Contest
6./7.10. 2. Greek Telegraphy Club CW Cup
6./7.10. IARU-Region-1 UHF/Microwaves October Contest
6./7.10. California QSO Party
7.10. ON Contest 80m
7.10. RSGB 21/28 MHz Contest
7.10. DARC HF-HELL Contest (40m)

WAPC

The first "Worked All Provinces of China (WAPC) DX Contest" takes
place on October 6th.

Silent Key:

Michael Owen, VK3KI, president of the "Wireless Institute of
Australia" and president of the IARU-Region III passed away
on September 22nd.

The chairman of the "Ethiopian Amateur Radio Society" (EARS) Sid
T. May, ET3SID passed away on September 25. He was a founding
member of EARS in 1993.

On September 26, Goran Savic, YT2A, died in a plane crash in
Belgrad. As a Serbian Air Force Major he was on a routine training
mission when the accident happened. His colleague ejected from the
plane while Goran stayed inside to sacrifice himself - not hitting
houses and people. He saved many lives.

Our condolences to their family and friends. We don't want to be sad
that we lost them; we want to be thankful that we had them as friends.
We will always remember them.

IOTA: Compiled by Klaus, DL7UXG (E-Mail: iota@...)

Island activities

AF-027 FH; Mayotte Island: Sam/F6AML will be QRV as TO2M from October
4 to 19 on Mayotte Island (DIFO FH-001, WLOTA 0376, LOC LH27OE)
from 80 to 10m in CW and SSB. QSL via F6AML (d/B).

AS-101; HS; Malay Peninsula East group: Eddy/ON4AFU will, from October
7 - 24, be QRV from Koh Samui (WLOTA 1384) using the call HS0ZJF/8
on 40 - 10m only in CW. QSL via ON4AFU (d/B).
http://www.on4afu.net

AS-190; HZ; Red Sea Coast North (Tabuk Province) group: A team
consisting of Badar/HZ1BF, Abdul/7Z1CQ, Suli/7Z1SJ, Mohamad/HZ1MD,
Abdullah/HZ1BW, Hani/HZ1HN, Abdullah/HZ1AR, Abdul/HZ1DG,
Firas/HZ1FS and Nhaw/HZ1TL, is planning a DXpedition to Al-Dhahrah
Island. It's the first activation of this group. As 7Z7AB they
will be QRV from October 5 to 11 on 160-10m in SSB, CW and RTTY.
QSL via 7Z1CQ. OQRS will be set up. http://www.dxtool.com/7z7ab/

EU-015; SV9; Crete Island: Andreas/DL9USA spends his holidays on Crete
from October 5 - 15 and will be on the HF bands as SW9C.
QSL via DL9USA (d/B).
http://www.dl9usa.de/

EU-038; PA; Noord Holland/ Friesland/ Groningen Province group:
Ben/DO1BEN will be QRV PD/DO1BEN from October 8 to 14 from
Texel Island (WLOTA 0043, LOC JO23KD). Main activities will
be in the digital modes and a little SSB on the HF bands.
QSL via Homecall (d/B)
http://www.do1ben.de/index.php?page=texel-island-eu-038

EU-114; GU/MU; Guernsey group: GP0PKT/p will be the call sign of
the "Martello Tower Group", Keith/G6NHU, Tony/G0MBA, Yan/M0YNK,
Colin/M1EAK, Chris/M6GSD and Richard/G7HJK on their DXpedition to
Herm Island (WW Loc. IN89sl). From October 5 - 7 they will be
active on all bands and modes. QSL via GP0PKT (B) / G6NHU (d).
http://www.martellotowergroup/gp0pkt

EU-129; DL/SP1; Usedom Island: Between October 7 and 14, Peter
DK2RMP/p will be QRV from Usedom (GIA O-13, WLOTA 1640, DLFF-075).
QSL via Homecall (d/B).

EU-171; OZ; Jylland North group: Mike/DG5LAC and Petra/DB1LPS
will visit Vendsyssel-Thy (DIA NJ-001) from October 6 to 12,
using the call sign OZ/DG5LAC on the HF bands. QSL via DG5LAC (d/B).
The log will be uploaded to LotW and eQSL after the activity.

EU-172; OZ; Jylland East and Fyn group: Harry/PA1H and Nico/PA7PA
will be on the air from Lango Island (DIA FY-025), October 4 to 12,
as OZ/Homecall. Their focus will be on 30m in the digital modes.
QSL via Homecall (d/B).

NA-063; CY0; Sable Island: Murray/WA4DAN and Ron/AA4VK are planning
their third journey to Sable Island (CIsA NS004, WFF CYFF-001, WLOTA
0758). Between October 8 and 17 they'll use homecall/CY0 on the

HF bands with low power and simple antennas. OQRS will be available at http://www.cy0dxpedition.com

NA-124; XE2; Baja California Sur State South East group:
Felix/XE2I, Saul/XE2HQI, Tony/XE2HVF, Enrique/XE2AA, Fred/KG6HGK, Norma/XE2JNE, Craig/XE2HWJ, Ana/XE2IHA, Jose/KD6AFA and Manuel/XE2HUQ are planning to be QRV as XF1F from October 7 - 13 from Isla San Francisco. It's the first activation of this island. They will work on the HF bands in all modes. QSL via XE2HUQ.

NA-143; W5; Texas State East (Matagorda to Jefferson County) group:
On October 5 - 7, Joe/K5KUA will again be active from Galveston Island as K5KUA/5 on 30-10m in CW only. QSL via K5KUA (d/B).

Non-IOTA:
Members of the "Delmarva Island Hoppers" plan to activate Middle Island (USi DE016, Not IOTA, LOC FM28KO) as N3NAH and Massey Island (USi DE014, Not IOTA, LOC FM28KP) as W3TL on October 6th. QSL via QRZ.COM.

OPDX Bulletin 1080 September 24, 2012
The Ohio/Penn Dx PacketCluster
DX Bulletin No. 1080
BID: $OPDX.1080
September 24, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)
Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Web Page, K1XN & GoList, NC1L, NJ1Q & W1AW, KE2VB, W2NK, NG3K & ADXO, NQ3X, W3UR & The Daily DX, N4AA & QRZ DX, KH6BZF, K8GI, K8NA, K8YSE, W8BBQ, W8GEX & 60m News, W9ILY, 9A6AA, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, G6NHU, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, JA1FMN, OZ6OM & 50 MHz DX News, Pete's DX- Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, SV8AQY, TF3AO, VA3RJ & ICPO, the VHF-DX-Portal (MMMonVHF) and VK2ARE for the following DX information.
IMPORTANT NOTICE FROM EDITOR
There will not be a bulletin next week, and this week's will not be mailed out to the subscribers on the OPDX Mailing List. The server (hamnet.org) that hosts the OPDX mailing list, as well as the E-mail received for the bulletins, has failed on September 20th and will not be back online until possibly October 1st due to commitments. I may be able to post special announcements on the OPDX Web page and the NODXA FaceBook Page (see URLs below). Please pass the word and I hope to be back in print in a couple of weeks.....

DXCC COUNTRY/ENTITY REPORT
According to the AR-Cluster Network for the week of Sunday, 16th-September, through Sunday, 23rd-September there were 219 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5W, 5X, 5Z, 6W, 6Y, 7P, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D6, DL, DU, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J6, J7, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PY, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV5, SV9, T30, T33, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9X, VP2V, VP8,
VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z6, Z8, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS
* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).
3D2/C, CONWAY REEF
A large multi-national team of 19 operators will arrive on Conway Reef (OC-112) located in the South Pacific Ocean on September 26th, and complete their DXpedition on October 5th. Activity will be on 160-2 meters using CW, SSB, RTTY, SSTV and PSK31. Suggested frequencies were in OPDX.1045. QSL via YT1AD, direct (w/SAE or SASE + 1 USD for normal postage, 2 USDs for Airmail), by the Bureau or use the OQRS on the Web page. For more details and updates,

visit the 3D2C Web page at:
http://www.yt1ad.info/3d2c/index.html
5H, TANZANIA
Harald, DL7VSN, will once again be active from Tanzania between September 23rd and October 13th. Activity this time will be from two locations (dates not provided) using the following callsigns: 5H1HS from Zanzibar Island (AF-032) and 5H1HS/3 from Lazy Lagoon Island (not an IOTA). Operations are usually 160-10 meters using mainly CW and RTTY. He will use various dipoles with 100 watts. QSL via his home call- sign. Visit his Web page at:
http://www.qsl.net/dl7vsn
C6, BAHAMAS
Jay, K2TTT, will be active as C6ATT from New Providence Island (NA-001) between June 8-15th, 2013. Activity will be on 40-10 meters. QSL via K2TTT.
DXCC NEWS
Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
3B8/IW5ELA (Mauritius) JY8VB (Jordan) 9A8VB (Croatia) UN/UA4WHX (Kazakhstan) 4O7VB (Montenegro) YU9VB (Serbia) E40VB (Palestine) Z38VB (Macedonia) E7/UA4WHX (Bosnia-Herzegovina) ZA/UA4WHX (Albania) EY8/UA4WHX (Tajikistan) All operations were conducted in 2012FR, REUNION ISLAND (Cancelled)
Willi, DJ7RJ, who was expected to be active as FR/DJ7RJ from Reunion Island between September 26th and October 21st, has announced he had to cancel his trip. No reason given.
FS, ST. MARTIN
Operators John/K9EL and Nick/K9NB will be active as FS/K9EL and FS/K9NB from St. Martin between November 20-28th. Their activity will include the CQWW DX CW Contest (November 24-25th). Outside of the contest, they will be active on 80-10 meters using CW, SSB and RTTY. Schedules are welcome before and after the contest. QSL via their home callsigns. They plan to upload their logs to ClubLog and LoTW during the operation.
IOTA NEWS
AS-136. Operators Dale/BA4TB (Leader), Mi/BD4TQ, Tim/BD4TJ, Ni/BD4TR, and Zhou/BG4TVT will be active from Hengsha Island between October 1-4st. Activity will be on 40-10 meters. QSL via their home callsigns.
EU-114. Members of the Martello Tower Group (G0PKT) will be activating the Island of Herm as GP0PKT between October 4-8th. Herm is one of the smallest Channel Islands, and although it's part of the EU-114 IOTA group, it's not activated very often. Activity will be on 80/40/20/15/10 meters using SSB and RTTY. There will be two stations running simultaneously. QSL via G6NHU. For more details, see:
http://www.martellotowergroup/gp0pkt
NA-213. Members of several clubs from Atlanta will activate Sand Island Lighthouse (ARLHS USA-723), Dauphin Island, in the state of Alabama, between September 25-30th. The special callsign will be K4D from this rarely activated island. Operators mentioned are Ricky/K4JTT (team leader), Steve/KC4YBO, Tim/WK4U, Ernie/ KJ4VUX, John/KI4IYC, James/N4DU and Joe/WD4FGB. Activity will be on or around the IOTA frequencies on 40/20/17 meters using CW, SSB and the Digital modes. Depending on propagation, other bands may be activated. All QSOs will be confirmed with a 4 color QSL card, by the Bureau or direct (see QRZ.com). Also, log will be uploaded to LoTW and eQSL. For more details and updates, see:
http://www.w4bti.orgADDED NOTE: There will be "Live Video Streaming" during this operation at:http://www.radioodyssey.com/K4D.html
SA-087. Members of Radio Club Ria Deseado (LU1XB) report that they having received verbal permission to be active from Pinguino Island and are expected to be active between November 2-4th. More details will be forthcoming.

KH0, MARIANA ISLANDS
Shuji, JA1FMN, will be active as KH0/JA1FMN from Saipan Island (OC-086) between October 13-15th. Activity will be holiday style on 17 and 15 meters using SSB and PSK31. He informs OPDX that if there is a request for 12 and 10 meters, he may operate on those bands. Operations will take place after 1800 his local time. QSL via his home callsign, direct, by the Bureau or eQSL.

Bob, NQ3X, and his wife are moving to St. Croix at the end of the month. He informs OPDX that he will be "active on as many HF bands as possible as soon as possible; shipping times will dictate when I get on the air and what bands. I plan on having 80-10 available by CQWW SSB. 6m will follow when I can erect a decent antenna. I operate phone and CW. Haven't gotten into any other modes yet, though I hope to get digital modes squared away over the winter. Antennas will consist of verticals and wires (because verticals over salt-water ground planes ROCK); power will be barefoot." Bob plans to be active as KP2/NQ3X (or use a KP2 callsign) during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band entry. QSL via his home callsign, direct (preferred), LoTW or eQSL.
LX, LUXEMBOURG
Operators Werner/DC8QT, Peter/DL2YCA, Hans-Peter/DF7EME, Burkhard/DF8XC, Frank/DL8LR, Helmut/DF7ZS and Philippe/LX2A will be active as LX7I during the CQWW DX RTTY Contest (September 29-30th) as a Multi-2 entry. QSL via LX2A. Visit the LX2A Web page at:
http://www.lx2a.com
MJ, JERSEY
Operators Kiki/SV1BRL and Fivos/SV8AQY are planning to visit Jersey Island after the annual meeting of the CLIPPERTON DX CONVENTION, and will operate for some days starting possibly on September 25th. Look for MJ/SV1BRL and MJ/SV8AQY to be active on SSB and on 80-6 meters. QSL via their home callsigns or RAAG.
MT0, ISLE OF MAN
Members of the Sands Contest Group will be active as MT0SCG from Isle of Man between September 22-28th. Operators mentioned are Andrew/G0LWU, Hughie/G4UME, Steve/G1TLQ and Paul/2E0EET. Activity will be on various HF and VHF bands. QSL via M0SCG. Visit the SCG Web page at:
http://www.m0scg.org.uk
OD, LEBANON
Ted, K8NA, informs OPDX that John, OD5RW, is once again active after being off the air for a period. He is active on 80/40/20/ 15/10/2 meters and 70cm using SSB, FM, Packet, AMTOR, Pactor, Clover, RTTY, SSTV CW, PSK31, WEFAX and recently D-STAR. K8NA is his QSL Manager.
P29, PAPUA NEW GUINEA (Update)
An international team will visit five islands belonging to Papua New Guinea between October 19th and November 4th. Operators mentioned are Derek/G3KHZ, Hans/SM6CVX, Hans-Peter/HB9BXE, Eddy/K5WQG, Axel/DL6KVA and Non-ham Stig Nyman. The team will use the boat "M/V Barbarian", and start their travels from Kokopo in New Britain on November 18th, sailing via Kavieng to Emirau. The islands scheduled by the full team will be:
October 20-24th - Callsign P29VCX; Emirau Island (OC-103) in the St. Matthias IOTA Group.

QSL via SM6CVX.
>October 27-31st - Callsign P29NI; Tatau Island (OC-099) in the Tabar IOTA Group. QSL via G3KHZ.
>November 2-4th - Callsign P29VPB; Lihir Island (OC-069) in the Lihir IOTA Group. QSL Manager TBA.The main team will fly home on November 6th. However, Hans/SM6CVX and Stig Nyman will continue to Buka on the "M/V Barbarian", and plan to activate the following:
November 6-9th - Callsign P29VCX; Buka Island (OC-135) in the Solomon Island IOTA Group. QSL via SM6CVX.
>November 9-12th - Callsign P29VCX; Manu Island (OC-205) in the Admiralty Island IOTA Group. QSL via SM6CVX.Activity will probably be 40-10 meters using mostly CW with some SSB just like last year's activity. They do have a Web page at:http://www.p29ni.yolasite.com
PJ4, BONAIRE
Marco, PE2MC, is planning to return to Bonaire between November 9-17th, and be active as PJ4/PE2MC. Watch for more details and updates at:
http://www.pe2mc.nl/bonaire-here-we-come-pj4pe2mcQSL via his home callsign.

SILENT KEY (Ham Killed In Attack)
The ARRL Web page reports: "Sean P. Smith, KG4WSS, of Falls Church, Virginia, was killed when the U.S. Consulate in Benghazi, Libya, was attacked on September 11th. He was 34. Smith was one of four Americans, including Chris Stevens -- the U.S. Ambassador to Libya -- who was killed in the attack. Read the complete story at:
xhttp://www.arrl.org/news/view/sean-smith-kg4wss-killed-in-consulate-attackOPDX and its readers send out our deepest sympathy to the family and friends of KG4WSS.
T33, BANABA ISLAND
It was announced by Jay/W2IJ and David/N1EMC: "We are still looking for a few operators, so if you have previous DXpedition experience working SSB/CW pileups, don't mind a few days on a boat, and love to operate in miserable conditions on tiny equatorial islands in the middle of nowhere that nobody's ever heard of, please send an E-mail to banaba@.... Serious inquiries only please."
TF, ICELAND
Members of the "Tango Fox Radio Foxes" will be active as TF2RR during the CQWW RTTY DX Contest (September 29-30th) as a Multi- Single entry. QSL via TF3AO. Operators mentioned are Andres/TF3AM, Seli/TF3AO and Jon/TF3PPN.
VK0, MACQUARIE ISLAND
The "DX-World.net" is reporting that Steve, VK3ZAZ, hopes to be active from Macquarie Island over the 2013/14 winter. Activity will be on all bands with priority given to 6m. More details will be forthcoming.

VP2V, BRITISH VIRGIN ISLANDS
Larry, KE2VB, will be active as VP2V/KE2VB from a house 450 ft. above Cooten Bay on Tortola between the evening of February 27th and March 4th. He informs OPDX that he will leave the island on March 5th. He is going there to be in the ARRL DX SSB Contest (March 2-3rd) as a Single-Op/All-Band/Low-Power entry. He also mentions that he will using a TH-3 tribander and dipoles on 40 and 80 meters; no 160, no WARC. Larry will be active on both SSB and CW before the contest. QSL via KE2VB.
ADDED NOTE: Larry states, "This is my first ARRL DX SSB contest from the Caribbean since I left my contest station, WP2Z, in 1998. I am the builder and original operator of the WP2Z station on St. Croix."
VP5, TURKS AND CAICOS ISLANDS
Dave, W5CW, will once again be active as VP5/W5CW from the VP5JM Hamlet QTH on the Island of Providenciales (NA-002, WLOTA 1476) between November 20th and December 11th. Activity will be on 160-6 meters using CW and SSB. Dave also plans to be in the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band/Low-Power entry and using the callsign VP5CW. QSL direct to his home callsign ((QRZ.com) address) at: PO Box 88, Morris, OK 74445-0088 U.S.A.
VP9, BERMUDA
Operators Ray/ND8L and Jamie/WW3S will once again be active as VP9I from Ed/VP9GE's QTH for the CQWW RTTY DX Contest (September 29-30th). QSL VP9I via N1HRA only. Outside of the contest, look for them to be active as VP9/WW3S and VP9/ND8L. The duo will be there between September 27th and October 1st. Conditions permitting, there will be an emphasis on the 30/17/12 meter bands pre and post contest. QSLs for VP9/ND8L are preferred though LoTW or his home CBA with SASE. LoTW QSOs from VP9/ND8L will be uploaded by 10/5/2012. QSLs for VP9/WW3S are via his home CBA with SASE or LoTW.
YJ, VANUATU
Daniel, VK4AFU, will be active as YJ0AFU, from Port Vila between November 3-10th. Activity will be on 80-6 meters using mainly the JT65A mode. They may be "a little" 160 meters. Daniel states that 6 meters will be priority when open and should be mostly on CW, SSB and JT65 on request. He will be using a FT857 w/100w into a 2 element ¼ wave vertical phased 40m, OCF Dipole 80-10M and a 2 element F8DR beam for 50 MHz. QSL via NA5U.
Z6, KOSOVO (WFWL!)
The big news this week has been the activity from the Republic of Kosovo. As this was being written, NOTHING has been announced yet from the ARRL's DXCC Desk on the DXCC status for Kosovo. The ARRL Great Lakes Division Director Jim Weaver, K8JE, informed everyone on September 19th:
"Of interest to DXers is the current operation from Kosovo -- Z60K. I want to ensure that everyone interested in QSOing this activity understands it does not qualify for DXCC credit. This is because Kosovo is neither a member of the United Nations nor does it have an ITU- issued callsign block. At this time, Kosovo does not meet the established requirements of the DXCC program. It is legal and fun to work the station, but as the situation currently exists, it will not count toward DXCC."During the past week, the OPDX Desk has been sending out a few special bulletins via the mailing lists and the NODXA FaceBook page trying to keep everyone up-to-date. In short, activity by Z60K has been seen on 40/30/20/17/15 meters on the DXCluster network. Currently, on the Kosovo's Telecommunications Regulatory Authority (TRA) Web page, under regulations of the "Amateur Radio Services" (which is a draft and can be downloaded) it does not provide authorization of
operations on 80, 12, 10 or 6 meters. This can be viewed
at:http://www.art-ks.org/?cid=2,13,419&sqr=amateurExcerpts from press releases on the TRA

Web page and (QRZ.com), state that the Z60K callsign is issued to the new Amateur Radio Association of Kosovo, SHRAK, and will be active from new premises as soon as these are fixed. SHRAK President, Sabit, Z61AA, together with Ali, Z61DD, are heading these efforts. Many individual new licensees are scheduled to be operating at the new Z60K station very soon. Also, individual visitor licensing is now in place, and the first visitor license was issued at a gathering hosted by the Administrators and attended by all new local hams as well as their instructors.
Emir, 9A6AA, part of the Kosovo IARU Project, was issued the callsign Z6/9A6AA and was active as this was being written. He informed OPDX that he made 300 QSOs as ZA/9A6AA. An application for a visitor license can be printed from the Administrators' (TRA) Web site but, in the short term, you can obtain an application form from any of the current Kosovo instructors; G3TXF, N2BB/MD0CCE, OH2TA or OH2BH. They also suggest, "Be prepared as the contesting season is also just around the corner, and make sure to add Z6 to your master multiplier database and expect Z6 stations to appear on the air."
ADDED NOTE: On Thursday, September 20th, a copy of the Z60K license appeared on (QRZ.com), showing that the license was issued by the TRA to IARU Region 1 President Hans Blondeel Timmerman, PB2T, good between September 17-24th.
http://files.qrz.com/k/z60k/Z60Kauthorization.jpgHowever, reports indicate the operation went QRT on the 22nd.
Currently, the Z60K operation has posted the log online at ClubLog at:
http://www.clublog.org/charts/?c=Z60K#rAs of 1658z, September 22nd, Z60K has made a total of 18545 QSOs with 8676 Unique callsigns (10167/CW and 8378/SSB). Breakdown by continent is: 203/AF, 0/AN, 2305/AS, 11283/EU, 4428/NA, 102/OC and 224/SA. QSL Z60K via G3TXF.
ZD9, TRISTAN DA CUNHA (Update)
The ZD9UW team of Martin/G3ZAY and Robert/M0VFC is now down to one operator for the upcoming Tristan da Cunha operation. According to the ZD9UW Web page:
"Martin, G3ZAY, has been forced to cancel his onward journey from Cape Town to Tristan. Rob, M0VFC, will still continue and be active as ZD9UW. This means that it's now a single operator activation and will concentrate primarily on SSB with some RTTY. Since our goal is to enable as many people as possible to work ZD9 for the first time, this means the number of bands we can activate will be limited - concentrating mostly on the higher bands. We're sorry if this means you don't get to work us on the particular slots you were after - we'll do our best given the situation!"By the time you read this, Rob, M0VFC, will be aboard the MV "Baltic Trader" and embark on a seven day journey over the South Atlantic Ocean. Weather permitting, he should arrive on Tristan around the 27th of September, where he will operate until the 4th of October before returning to Cape Town. For more details and updates, visit their Web page at:http://www.zd9uw.org.uk
ZL9, CAMPBELL ISLAND (Press Release)
Ed, VK2ARE, Australian publicity Officer for ZL9HR, sent out the following on September 20th:
"IT'S ON IT'S WAY! - The ZL9HR 'Logistics team' are very pleased to announce that the packed equipment crates have left the DX'Pedition's Sydney base heading south to New Zealand, on schedule and in plenty of time to progress through the required quarantine formalities with the authorities on the New Zealand mainland before the final leg of the trip by sea with the operations team down to Campbell Island in the great southern ocean for the activation between November 28th and December 9th. Please refer to the Web site ZL9HR.COM for the full, up-to-date, information about this major DX'Pedition to the Great Southern Ocean. 73 from Ed VK2ARE"By the way, the ZL9HR team also has a FaceBook page which shows the packed equipment crates at:https://www.facebook.com/#!/Zl9hr

3968. e-QSP Vol. II-1 SEPT 2012

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-10-04 06:00:39 UTC
From: bam yb0ko soetrisno
Topic: 3968 Message: 3968
Attachments: 3 described; binary payloads are missing from this source WARC

Dear ALL,

SRI fr the bandwidth, e-QSP Vol. II-2 SEPT 2012 ini benar-benar "berat di bandwidth", karena menyita +/- 1 Mb sendiri ...

BTW, mulai edisi Tahun ke II Vol.II.1 kemarin, e-QSP sy rubah sdkt cara distribusinya, yaitu sehari sesudah saya release lwt berbagai milist (dan narasumber) serta sudah mendapat QSL dari penerimanya -- baru e-QSP sy kirim lwt individual japri, dg TIDAK LEBIH dr 10 alamat per "batch" pengiriman.

Ini saya lakukan semata untuk mendapatkan hit-rate (keberhasilan pengiiman) yang lebih baik ketimbang cara-cara yang biasa sy lakukan ditahun pertama penerbitan e-QSP dulu.

Karenanya, untuk sekedar meyakinkan, begitu anda menerima kiriman e-QSP Vol. II-2 ini, PSE PSE PSE QSL, TNX ..

73,

[bam]

e-QSP Ed.

==========

FYI, konten e-QSP Vol II.2 ini seperti bisa dilihat di "kolom pengantar" adalah sbb. :

.

PS: Bagi rekans yang tidak bisa menerima surel dengan Lampiran, e-QSP edisi ini (dan Back numbers/edisi lawas) bisa diunduh sendiri (atau sekedar buat dibaca-baca) dari/di http://issuu.com/e-qsp

Hi Pak Dhe Bam, YBØKO

terima kasih atas e-qsp nya

dan terima kasih pula untuk tulisannya tentang club Dragon DX Club,

pada kesempatan ini pula kami atas nama tim YE2R mengundang kepada siapa aja yg berkenan mengunjungi kegiatan kami di kontes CQWW SSB 27-28 Okt mendatang di QTH Grobogan YB2DX, dengan harapan bahwa kami bisa menularkan wawasan kami yang di salah satu kegiatan amatir radio di Indonesia TERUTAMA kepada temen-temen yang mungkin baru pertama kali tahu tentang kegiatan ini.
" All of you are most WELCOME "

sekali lagi atas nama tim YE2R dan pribadi YB2LSR,
kami mengucapkan terima kasih atas dukungannya.

sendiri ...
BTW, mulai edisi Tahun
ke II Vol.II.1 kemarin,
e-QSP sy rubah sdkt cara
distribusinya,
yaitu sehari sesudah saya release
lwt berbagai milist (dan
narasumber) serta sudah mendapat QSL dari penerimanya -- baru e-QSP sy kirim lwt
individual japri, dg TIDAK LEBIH dr 10 alamat per “batch”
pengiriman.
Ini saya lakukan semata untuk mendapatkan hit-rate
(keberhasilan pengiiman) yang lebih baik ketimbang cara-cara yang biasa
sy lakukan ditahun pertama penerbitan e-QSP dulu.

Karenanya, untuk sekedar meyakinkan,
begitu anda menerima kiriman e-QSP Vol. II-2 ini, PSE PSE PSE QSL, TNX
..

73,
[bam]
e-QSP Ed.
==========
FYI, konten e-QSP Vol II.2 ini seperti bisa dilihat di “kolom
pengantar“ adalah sbb. :

.

PS: Bagi rekans yang tidak bisa menerima surel dengan Lampiran,
e-QSP edisi ini (dan Back
numbers/edisi lawas) bisa diunduh
sendiri (atau sekedar buat dibaca-baca) dari/di http://issuu.com/e-qsp

Hello YC0QR!

Long time not seen! You have not visited QRZCQ since more than a half year!

So many things did happen in this time on the page, maybe you would like see them?

We have thousands of users by now, the page has many new features with all the bells and whistles a ham could imagine of. Much of them are regularly used by our users, like DX Cluster with spotting, extended search, messages between users etc. We also have forums, chat, swapmeet, articles, news, calendar and contest informations. Several hundreds sorted ham videos and short movies are waiting for you on the page!

Your profile page was viewed 57 times, please check you profile to ensure other hams can lookup the right data about you!

Please visit us again and take a look! If you forgot your password simply try to login with your call and last password you remember, then use the simple 'password forgotten' function.

ARLD041 DX news

ZCZC AE41
QST de W1AW
DX Bulletin 41 ARLD041
From ARRL Headquarters
Newington CT October 4, 2012
To all radio amateurs

SB DX ARL ARLD041
ARLD041 DX news

This week's bulletin was made possible with information provided by NC1L, PT2OP, QRZ DX, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

FIJI, 3D2. A group of amateurs will be QRV as 3D2OP from the Viti Levu Lighthouse, WLOTA 0055, on Levu Island, IOTA OC-016, from October 8 to 14. Activity will be on the HF bands. In addition, they will be active as 3D2AS, 3D2PT, 3D2XC, 3D2ZY and 3D2XB during this period. QSL 3D2OP via PT2OP and all others via operators' instructions.

NIGER, 5U. Stations 5U5U, 5U6E and 5U8NK are QRV from Niamey until October 15. They are QRV on the HF bands and 6 meters with three stations active. QSL 5U5E direct, 5U6E via F6EXV and 5U8NK via DJ8NK.

WEST MALAYSIA, 9M2. Shou, JA1XXI is QRV as 9M2/JA1XXI from Port Dickson until October 15. Activity is on 20, 15, 10 and 6 meters. QSL to home call.

NEPAL, 9N. Fernando, 9N1FE has been active using PSK on 15 meters around 1100z. QSL via operator's instructions.

UNITED ARAB EMIRATES, A6. Abdullah, A61Q has been active on 10 meters using CW between 1300 and 1500z. QSL via EA7FTR.

SABLE ISLAND, CY0. Murray, WA4DAN and Ron, AA4VK will be QRV as home calls/CY0 from October 8 to 17. Activity is on the HF bands using low power. QSL via operators' instructions.

MAYOTTE, FH. Sam, F6AML is QRV as TO2M until October 19. Activity is on 80 to 10 meters using CW and SSB. QSL to home call.

THAILAND, HS. Eddy, ON4AFU will be QRV as HS0ZJF/8 from Koh Samui, IOTA AS-101, from October 7 to 24. Activity will be on 40 to 10 meters using only CW. QSL to home call.

SAUDI ARABIA, HZ. A group of operators are QRV as 7Z7AB from Al-Dhahrah Island, IOTA AS-190, until October 11. Activity is on 160 to 10 meters using CW, SSB and RTTY. This is the first time this IOTA has been activated. QSL via 7Z1CQ.

MARIANA ISLANDS, KH0. Kazuo, JH8PHT is QRV as AH0KT from Saipan, IOTA OC-086, until October 9. Activity is on 80 to 6 meters. He may also try some AM/FM activity on 10 meters. QSL to home call.

US VIRGIN ISLANDS, KP2. Ray, NM2O will be QRV as KP2M and KP2/NM2O from October 9 to 16 while on vacation. He will be active as time allows. This includes entries in the upcoming SAC Phone and Oceania CW contests. QSL KP2M via AI4U and KP2/NM2O to home call.

NETHERLANDS, PA. The special station PB100PREFIX is QRV during the month of October to celebrate the first official call sign prefixes assigned 100 years ago. QSL via PB0P.

GREECE, SV. Members of the Radio Amateur Association of Greece are QRV as SX100A until October 7 from the battleship memorial Georgios Averof in Trocadero Marine Park near Athens. QSL via bureau.

PALAU, T8. Kiichi, JF1LUT is QRV as T88IK from Arakabesan Island, IOTA OC-009, until October 10. Activity is on 17 to 6 meters using SSB. QSL to home call.

CHAD, TT. A group of operators are QRV as TT8TT from N'Djamena until October 16. Activity is on 160 to 6 meters using CW, SSB and RTTY. QSL via operators' instructions.

CHRISTMAS ISLAND, VK9X. Pekka, OH2YY and Pekka, OH1TV, will be QRV as VK9XM from October 6 to 12. Activity will be on 40 to 10 meters using CW and SSB with two stations active. QSL via OH2YY.

ANTARCTICA. Bhagwati, VU3BPZ is QRV as VU3BPZ/3 from the Indian Base Bharati until the end of December. QSL direct via I1HYW.

OPERATION APPROVED FOR DXCC CREDIT. The following operation is approved for DXCC credit: Guinea-Bissau, J5IFD, 2010 operation.

THIS WEEKEND ON THE RADIO. The ARRL EME Contest, NCCC RTTY Sprint, NCCC Sprint, YLRL DX/NA YL Anniversary Contest, TARA PSK Rumble Contest, Worked All Provinces of China DX Contest, EPC Russia DX BPSK63 Contest, Oceania DX Phone Contest, WAB HF Phone, TRC DX Contest and the GTC CW Cup.

The California QSO Party, EU Autumn SSB Sprint, International HELL-Contest, 4 State 4x4 QRP Sprint, UBA ON SSB Contest and the RSGB 21/28 MHz Contest will certainly keep contesters busy this upcoming weekend. The RSGB 80-Meter Club CW Sprint, NAQCC Straight

Key/Bug CW Sprint, NAQCC-EU Monthly CW Sprint, CWops Mini-CWT Test, and 10-10 International 10-10 Day Sprint are all scheduled for October 10. Please see October QST, page 87 and the ARRL and WA7BNM Contest websites for details.

Berhari2 masih berharap bisa mendengar (dulu) TT8TT-Chad yg selama ini cuma terdengar kabarnya saja.
Kemarin hawar2 terdengar dan berharap bisa jelas lalu berhasil di pileup - tapi yang ada malahan A61R yg CQing di frequencynya dan ragchewing juga dengan OM Seno - YB2LSR.

Pagi ini coba panggil K7ULS test case ke W-land lalu monitor lagi di frequency sesuai yg di spot banyak DX utk TT8TT - 21.310MHz, walaupun menurut VOACAP - impossible.

Nah, kedengaran ada signal yg mungkin bisa terbaca, berharap sambil mengarahkan antenna dari sekitar 38 deg.NE ke 280an W-NW.
Masih di 120an SE signal kuat, tapi koq seperti ada yg aneh - ternyata....GUAM/KH2JU juga pake frequency yang sama.

Hilang harapan yg sudah menggebu....
Sementara....., masih ada beberapa hari penuh harapan.

OM Hen,
Saya kemarin sore iseng2 panggil TT8TT di 10m, meski signalnya tdk terlalu kuat ternyata berhasil juga masuk dan langsung saya cek di log online nya ternyata sdh masuk.
Cuma yg di band lain sampai sekarang blm berhasil bisa mendengarkan signalnya.

OM Uun,
Wah selamat ya..., memang saya sempat dengar dan saya tunggu sampai 100% terbaca baru saya mau coba masuk arena pileup.
Pas agak jelas - saya masuk - lhaaa.... lemah lagi gak jelas lagi. Takutnya dia panggil tapi saya ndak dengar. HI.

Itulah enaknya kalo DXped ada log online - kita bisa cek apakah sudah worked.

Subject: [YBDXC_News] TT8TT

Berhari2 masih berharap bisa mendengar (dulu) TT8TT-Chad yg selama ini cuma terdengar kabarnya saja.
Kemarin hawar2 terdengar dan berharap bisa jelas lalu berhasil di pileup - tapi yang ada malahan A61R yg CQing di frequencynya dan ragchewing juga dengan OM Seno - YB2LSR.

Pagi ini coba panggil K7ULS test case ke W-land lalu monitor lagi di frequency sesuai yg di spot banyak DX utk TT8TT - 21.310MHz, walaupun menurut VOACAP - impossible.

Nah, kedengaran ada signal yg mungkin bisa terbaca, berharap sambil mengarahkan antenna dari sekitar 38 deg.NE ke 280an W-NW.
Masih di 120an SE signal kuat, tapi koq seperti ada yg aneh - ternyata....GUAM/KH2JU juga pake frequency yang sama.

Hilang harapan yg sudah menggebu....
Sementara....., masih ada beberapa hari penuh harapan.

73 es gud DX

ARLP040 Propagation de K7RA

ZCZC AP41
QST de W1AW
Propagation Forecast Bulletin 40 ARLP040
From Tad Cook, K7RA
Seattle, WA October 5, 2012
To all radio amateurs

SB PROP ARL ARLP040
ARLP040 Propagation de K7RA

A coronal mass ejection (CME) hit Earth on September 30, triggering a jump in geomagnetic indices. The planetary A index on October 1 was 31, and the K index went as high as 7, making aurora visible across the northern tier of the United States. Strange, but the northern latitude college A index was 23 (near Fairbanks, Alaska), about the same as the mid-latitude index, which was 21, in Fredericksburg, Virginia. During a geomagnetic disturbance it is common to see indices go much higher in the far-northern latitudes.

Average daily sunspot numbers declined 8.3 points to 73, and average daily solar flux was off exactly one point, to 128.7.

The latest prediction from NOAA/USAF has solar flux on October 5-6 at 110, 105 on October 7, 100 on October 8-11, 115 on October 12-13, 120 on October 14-15, 130 on October 16, 140 on October 17-18, and then 145 and 150 on October 19-20. The same forecast has solar flux rebounding to 150 on November 16, after reaching a minimum of 110 on November 4-5.

The predicted planetary A index is 5 on October 5-8, 10 and 8 on October 9-10, 5 on October 11-14, then 8, 12 and 10 on October 15-17, 5 on October 18-25, 10 on October 26, 5 on October 27-28, and reaching a peak of 15 on October 29.

Now from F.K. Janda, OK1HH comes his geomagnetic forecast. October 5 expect quiet to active conditions, quiet October 6-8, mostly quiet October 9, quiet October 10, mostly quiet October 11, quiet to unsettled October 12-14, mostly quiet October 15, active to disturbed October 16, mostly quiet October 17, quiet to unsettled October 18, quiet October 19-20, mostly quiet October 21, quiet October 22-23, quiet to unsettled October 24, and back to quiet again on October 25-27.

In September we saw a slight decline in sunspot averages. Monthly averages of daily sunspot numbers for April through September 2012 were 84.5, 99.4, 90.1, 99.6, 85.8 and 84.

Three-month moving averages of daily sunspot numbers, for 3-month periods ending February through September 2012 were 83.3, 73.7, 71.2, 87.3, 91.5, 96.5, 91.9 and 89.9. So the last number, 89.9, was an average of daily sunspot numbers for all of July, August and September, and the number prior to that, 91.9, was for the months of June, July and August.

In 6 meter news, Floyd Chowning, K5LA of El Paso, Texas wrote, "I have been seeing many spots on the DX cluster where stations are working from Africa to Europe earlier in the day our time. So decided to start listening and finally heard a DX station." He copied the beacon CE3AA/B in Santiago at 2122z on October 4 on 50.0293 MHz. That distance is nearly 5,100 miles.

Jon Jones, N0JK says there was "a fairly impressive aurora" on October 1, and KF6A in Alma, Michigan copied the N0LL 6-meter beacon in Smith Center, Kansas at 0442z on that day on 50.0776 MHz. The distance was 770 miles, and the direction from the beacon toward the receiving station was 66.6 degrees, or roughly east-northeast.

Jon also wrote, "The next day (or later the same day, UTC) conditions were good on 24 MHz to 3D2C Conway Reef. They were very loud to Kansas around 2030 UTC on October 1. I was able to work them with my mobile set up. With the good but not high solar flux, 24 MHz has often been a good band for DXing, better than 10 or 15 meters. Signals from 3D2C were not nearly as loud on 10 meters when I listened."

The NASA solar cycle prediction was revised slightly since last month. You may recall that the predicted peak was moved recently from Spring to Fall 2013, and now the predicted peak has gone down one point, from a smoothed sunspot number of 76 to 75. Read it at http://solarscience.msfc.nasa.gov/predict.shtml.

Larry Godek, W0OGH in Gilbert, Arizona reported October 1: "Saturday and Sunday both the RTTY portions were overloaded with activity. Couldn't believe the number and signal strength of stations. Even 40 Saturday night was something I've not heard in many years. On SSB, 10 meters in particular, it sounded like the days of AM when stations were overlapping. Amazingly there were very few, maybe half dozen that I heard ragchewing between 28.6 and 29.0 MHz. Almost everything else was below 28.6. Even had good AM activity above 29.0 as some of the locals were talking about the QSOs they had in that segment of the band.

"10 FM through the KQ2H repeater had European stations till after lunch time here in the west. Only heard one or two other stations from the US, all of it was foreign. Even 29.640 had lots of traffic although nothing like 29.620.

"I didn't check anything on the WSPR modes but it would have been interesting to see how the high SFI and A index affected them as well. You could tell by late Sunday afternoon that things had changed as the noise level came way up almost like the Summer afternoons. Previous to this past 3 days the band noise has been almost nil. Had to turn the gain on the K3 way up on 10 as I thought no noise, weak signals but that wasn't the case at all.

"I'd suspect the stations who were active this past weekend will be talking about this opening as it truly brought back memories of the good times when the bands were full of activity with great signals."

The day before, September 30, Larry wrote, "WOW! The RTTY guys must have thought they died and went to heaven! RTTY sigs on 15 meters alone occupied 70 KHz of the band and a lot of excellent quality DX signals as well. 10 was really nice also but didn't spend much time there as I was busy down on the low part of the band. Worked 5 new countries on 10 FM and more on the CW and SSB modes. Lets hope this is an indication of what's left of this cycle. I could certainly use some extra oxygen on days like this when my heart gets a cardiac workout from the excitement of hot bands! Whoever is responsible, keep up the good work. Makes being retired a lot more fun as I may only get one more of these cycles to play in."

Herb Lacey, W3HL of Cary, North Carolina noted that there seem to be more sunspots south of the Sun's equator than north. I responded that this seems to be true lately, but when I looked in the http://www.spaceweather.com archives over the past year, there didn't seem to be more sunspots in the southern hemisphere. K9LA was consulted, and said that asymmetry in the north-south distribution of sunspots is common. He referred to butterfly diagrams of solar cycles, and you can see them at, http://www.nasa.gov/images/content/144051main_ButterflyDiagramLG.jpg.

As each solar cycle progresses, sunspots emerge closer to the equator. K9LA drew our attention to Cycle 20, around 1970. You can see a weighting toward the northern hemisphere. The previous cycle, around 1960, Cycle 19, also seems to favor northern spots, and Cycle 22 around 1990 seems to favor southern sunspots.

K9LA doesn't know of any explanation for the asymmetry, and notes it is probably tied to plasma flow in the Sun.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good

information and tutorials on propagation at
http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve
overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL
bulletins are at http://arrl.org/bulletins.

Sunspot numbers for September 27 through October 3 were 97, 77, 70,
95, 59, 55, and 58, with a mean of 73. 10.7 cm flux was 133.2,
137.8, 136, 135.6, 128.1, 118.2, and 111.7, with a mean of 128.7.
Estimated planetary A indices were 5, 2, 4, 10, 31, 5, and 5, with a
mean of 8.9. Estimated mid-latitude A indices were 3, 2, 4, 9, 21,
5, and 5, with a mean of 7.

**** DX INFORMATION ****

==========

Edited by I1JQJ & IK1ADH

Direttore Responsabile I2VGW

3D2 - Prior to the T30PY/T30SIX DXpedition [425DXN 1094], look for 3D2AS (PY2WAS), 3D2OP (PT2OP), 3D2PT (PY2PT), 3D2XB (PY2XB) and 3D2XC (PY7XC) to be active from Viti Levu (OC-016), Fiji between 7 and 14 October. After the DXpedition, from 27 October to 3 November, Ricardo PY2PT will be active again as 3D2PT from the Fiji Islands, but this time from Tavarua (OC-121). QSL 3D2XB via PT7WA, others via home calls.

5H - Noel, WB0VGI will be active in his spare time as 5H3NP from Iringa, Tanzania between 8 October and 15 December. QSL via home call. [TNX DX World]

5V - Wim, ON4CIT will be active as 5V7TH from Togo from 26 October to 4 November. He will operate SSB, CW and RTTY on 40-6 metres. QSL via home call, direct or bureau, and LoTW. Wim will use the OQRS facility provided by Club Log. Announced frequencies and further information can be found at www.dxpedition.be/5V7TH.html

CY0 - "Circumstances beyond our control prevented us from being able to fly to Sable Island on 8 October, our original schedule", Ron, AA4VK and Murray, WA4DAN have announced. The new dates are 22-31 October. As previously advertised [425DXN 1115], WA4DAN/CY0 and AA4VK/CY0 will focus on 10, 12, and 15 metres, where the most demand for CY0 exists. They "do not plan to compete" in the CQWW DX SSB Contest, but they will be glad to provide the multiplier to those in the contest. Bookmark www.cy0dxpedition.com for further information and updates.

GM - Steve G0MTD, Paul M1PAF, Mark M0WCR and Glyn M0XUH will be active as MS0WRC from South Uist in the Outer Hebrides (EU-010) on 20-27 October. They will operate SSB "across the HF bands". QSL via G0MTD (email requests for bureau cards can be sent to g0mtd[@]aol.com). Logsearch and further information can be found at www.mx0wrc.org

I - IT9BWD, IT9BWW, IT9CVO, IT9HBS, IT9MRZ, IT9ZSB and IW9CLF will be active from Ortigia Island (EU-025, IIA SR-006) and ligthouse on 7 October. They will operate SSB and CW on 10, 15, 20 and 40 metres. [TNX IT9MRZ]

JA - Look for 7L4PVR/1, 7N1GMK/1, JA1UNS/1 and JI1PLF/1 to be active from Hachijo Island (AS-043) on 13-16 October. They will operate

CW, SSB and RTTY on 160-6 metres. QSL via home calls, direct or bureau. [TNX DX World]

JW - LA9DL (JW9DL), LA6VM (JW6VM) and LA7XK (JW7XK) will operate CW, SSB and digital modes from Longyearbyen (EU-026), Svalbard between 10 and 15 October. They will participate in the Scandinavian Activity Contest (SAC) SSB as JW5X. [TNX The Daily DX]

KG4 - Bill, W4WV (KG4WV) and Ed, KN4KL (KG4KL) will be active from Guantanamo Bay between 11 and 27 October. They will participate in the Jamboree on the Air (20-21 October) with GTMO Boy Scout Troop. [TNX The Daily DX]

KH0 - Look for KH0/JA1FMN to be active from Saipan on 13-15 October. He will operate holiday style on 17 and 15 metres PSK31 or SSB. QSL via home call. [TNX NG3K]

KH8 - Dom, M1KTA will be active as KH8/M1KTA from Pago Pago (OC-045), American Samoa on 5-11 October. He plans to operate SSB, slow CW and RTTY/PSK31 on 10, 12, 15, 17 and 20 metres, with the possibility of other bands if he can find a suitable location. QSL via home call and LoTW. [TNX DX World]

W - Once again Joe, K5KUA will be active as K5KUA/5 from Galveston Island (NA-143) on 5-7 October. He usually operates CW only on 40-10 metres. QSL via home call, direct or bureau.

W - Jacek, SP5APW will be active as W4/SP5APW from Clearwater Island (NA-034) on 15-18 October. He will operate holiday style mainly on 20, 25 and 10 metres SSB. Between 12 and 14 October he might go and be active from Amelia Island (NA-138). [TNX DX World]

XX9 - Eugene EA5HPX (XX9TPX), Francisco EA7FTR (XX9TFR), Jose EB5BBM (XX9TBM) and David EB7DX (XX9TEX) will be active from Coloane Island (AS-075), Macau on 18-29 October. They plan to be QRV on 160-6 metres CW, SSB a nd RTTY with at least two stations. QSLs via EA7FTR and LoTW. Further information can be found at http://adxg.org/macau/index.php

Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3D2C ---> The DXpedition to Conway Reef went QRT earlier than expected, around 00.00 UTC on 3 October, after 71,693 QSOs. Their final log, statistics and OQRS are on http://www.yt1ad.info/3d2c/index.html. They expect to have QSL cards in the mail in late November and to "upload to LoTW within six months".

CQWW CONTEST DIRECTOR ---> CQ Contest Hall of Fame member and WPX Contest Director Randy Thompson, K5ZD has been named Director of the CQ World Wide DX Contest, effective immediately. He succeeds Bob Cox, K3EST, who retired in September after 35 years. Randy's appointment to the directorship of the CQWW creates a vacancy for director of the CQ WPX Contests. Anyone interested in taking on the challenge of leading a major contest should

contact Randy at k5zd[@]cqwpx.com.

DXCC NEWS ---> J5IFD (Guinea-Bissau, 2010 operation) has been approved for DXCC credit. [TNX NC1L]

HF STATION YOUTH GIVEAWAY ---> To encourage youth in DXing and contesting, the Amateur Radio Supplies owner management team (N1SNB and N0TG) will provide a complete HF station to a deserving young operator. Applicants are welcome from any location in the world provided they are 21 years of age or younger. Details on http://www.amateurradiosupplies.com/youth-s/222.htm

IARU NEWS ---> The Directors in IARU Region 3 have voted to appoint Peter Lake, ZL2AZ as the Chairman of IARU Region 3. He replaces Michael Owen, VK3KI, who passed away unexpectedly last month.

NWRW 2012 ---> The National Wildlife Refuge Week combines Amateur Radio communication capabilities with enjoyment of the outdoors to help others learn about the National Wildlife Refuge System. Amateur radio stations will be active from a number of wildlife refuges on 14-20 October under guidelines established in cooperation with the U.S. Fish & Wildlife Service. Information on this special event can be found at www.nwrweek-radio.info

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at www.425dxn.org/awards/toplist/index.html. QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send your scores, as well as any request for further information, to Luciano Lucini, IK2QPO (ik2qpo[@]425dxn.org).

ZD9UW ---> The "Baltic Trader" departed Tristan da Cunha earlier than the scheduled date of 5 October. Considering the limited amount of time, Rob M0VFC concentrated purely on HF SSB in order to get as many people in the log at least once as possible. He went QRT around 12.30 UTC on 4 October, with 4270 QSOs in the log from less than four days on the air.

Macau DX-adventure

Welcome to Macau - DX-adventure 2012 DXpedition web site, where we'll give you more information about our DXpedition.
The operation will be on the air from 18th to 29th October 2012. We will transmit from IOTA AS-075 (Coloane Island OL62SC).
The Team

Macau DX-adventure Team is made up 4 operators:
 EA5HPX (XX9TPX) - Eugene Mosiychuk
 EA7FTR (XX9TFR) - Francisco Liañez
 EB5BBM (XX9TBM) - Jose M. Molero
 EB7DX (XX9TEX) - David Liañez

Macau

Macau, along with Hong Kong, one of the two special administrative regions of the People's Republic of China. It lies on the western side of the Pearl River Delta, bordering Guangdong province to the north and facing the South China Sea to the east and south.

The territory's economy is heavily dependent on gambling and tourism but also includes manufacturing.

Macau was a Portuguese colony and both the first and last European colony in China. Portuguese traders first settled in Macau in the 16th century and subsequently administered the region until the handover on 20 December 1999. The Sino-Portuguese Joint Declaration and the Basic Law of Macau stipulate that Macau operates with a high degree of autonomy until at least 2049, fifty years after the transfer.

Macau is situated 60 kilometres (37 mi) southwest of Hong Kong and 145 kilometres (90 mi) from Guangzhou. It also has 41 kilometres (25 mi) of coastline, yet only 0.31 kilometres (0.19 mi) of land border with Guangdong. It consists of the Macau Peninsula itself and the islands of Taipa and Coloane, which are now connected by landfill forming the Cotai Strip. The peninsula is formed by the Zhu Jiang (Pearl River) estuary on the east and the Xi Jiang (West River) on the west. It borders the Zhuhai Special Economic Zone in mainland China. The main border crossing between Macau and China is known as the Portas do Cerco (Barrier Gate) on the Macau side, and the Gongbei Port of Entry on the Zhuhai side.

The history of Macau is traced back to the Qin Dynasty (221–206 BC), when the region now called Macau came under the jurisdiction of Panyu county, in Nanhai prefecture (present day Guangdong). The first recorded inhabitants of the area were people seeking refuge in Macau from invading Mongols during the Southern Song Dynasty. Under the Ming Dynasty (1368–1644 AD), fishermen migrated to Macau from Guangdong and Fujian provinces.

Extracted from wikipedia: http://en.wikipedia.org/wiki/Macau

Macau 2012 - PlansWe'll be active from 10 to 160 meters (include WARC bands) in CW, SSB and RTTY with at least 2 stations at the same time in different bands and modes.

QSL info

The QSL Manager for Macau DX-adventure 2012 is EA7FTR:

 Francisco Liañez Suero
Asturias 23
21110 Aljaraque-Huelva
(SPAIN)

Direct QSL

For all direct request, please send a self addressed envelope with:

1 IRC or 2 US$ or 1 € for European Union

1 IRC or 2 US$ for other destinations
Not in Log?

If you cannot find your callsign in the LOG but are sure to have a valid contact, please send your request to EA7FTR after carefully checking the QSO details (date, time, band and mode) with our operators.

Every request will be considered in order to debug any possible log entry error.

Thank you for your understanding.
LoTW Confirmations

All QSOs will be confirmed via LOTW.
Bureau Confirmations

Spanish Bureau, we dont need your Bureau QSL card.

To radio YF1AR

Dear friend!
RUSSIAN DX CONTEST Committee has the honour to invite you for participation in this growing International Contest on March, 16 - 17. 2013. This contest has the 1-st place in rating of all international contests during last 13 years
We are sincere thankful to you for your activity in RDXC-2012 and for your log. Your results in RDXC-2012 by bands and list of your lost QSOs are below.
You can see complete information, RDXC-2012 results and RDXC-2013 rules at http://www.rdxc.org Contest committee E-mail: rdxc@... E-mail for sending logs: logs@...
Our best wishes to you and good luck in RDXC-2013! 73!

OPDX Bulletin 1081 October 8, 2012
The Ohio/Penn Dx PacketCluster
DX Bulletin No. 1081
BID: $OPDX.1081
October 8, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)
Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Web Page, K1XN & GoList, NC1L, NJ1Q & W1AW, K2DM, KA3UNQ, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, KH6BZF, N6PSE, AC7DX, K8AV, K8GI, K8YSE, W8GEX & 60m News, W9ILY, N0HJZ, N0VD, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, G3SWH, HS0ZIB/G6JFY, I1HYW, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, OH6XX, ON4ATW, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, SM3CVM, VA3RJ & ICPO, the VHF-DX-Portal (MMMonVHF) and VE3ZZ for the following DX information.
IMPORTANT NOTICE FROM EDITOR
Everything is now back online. The server (hamnet.org) that hosts the OPDX mailing list, as well as all the E-mail received for the bulletins which failed on September 20th, came back online on October 1st. I would like to thank Dave, WB8APD, Sysop of the Hamnet.org, once again for getting things going again. We should be back to normal next week. Thanks for all your understanding..... 73 de Tedd KB8NW.
DXCC COUNTRY/ENTITY REPORT
According to the AR-Cluster Network for the week of Sunday, 30th-September, through Sunday, 7th-October there were 221 countries active. Countries available: 3A, 3B8, 3D2, 3D2/c, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5W, 5Z, 6W, 6Y, 7P, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9X, VP2E, VP2V, VP5, VP8, VP8/h,
VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZL, ZP, ZS
* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).
3A, MONACO
Operators Max/ON5UR and Marc/ON8AK will be active as 3A/homecall from Monaco between November 9-17th. Activity will be on 80-10 meters, SSB only and with one station (possibly two) on the air. QSL via M0URX. They hope to have a Web page up soon.
3D2, FIJI
Ricardo, PY2PT, one of the operators from the upcoming T30PY and T30SIX DXpedition to Tarawa Island (OC-017), Western Kiribati, is planning to be active as 3D2PT before and

after the T30PY/T30SIX DXpedition from the following Fiji Islands:
OC-016 - Viti Levu Island (WLOTA L0055); October 13-15th and again between 25-27th
OC-121 - Tavarua Island; October 27th-November 3rd
Ricardo states, "The operation from Fiji, if possible, will be done in my free time because the main focus is on the preparation for the T30PY & T30SIX DXpedition (October 16-25th)."
QSL via PY2PT.
3D2/C, CONWAY REEF
A press release sent out October 4th states: "The 3D2C team has just arrived in Suva from our return voyage from Conway Reef. We are very pleased to have made 71,693 contacts from Conway Reef. We expect to have QSL cards in the mail in late November. We will upload to LoTW within six months. We are very grateful to all of our equipment sponsors, including ICOM and ACOM. We appreciate all of the financial support from INDEXA, NCDXF and all club and individual sponsors. We have now placed much of our equipment into storage, and we hope to activate other rare South Pacific entities next year. We are updating our website with our statistics and OQRS information.
Best Regards, The World-Wide DX Team"
The 3D2C 71693 QSOs breakdown are as follows: 39829/CW, 30608/SSB, 1054/RTTY, 10/SSTV and 192/PSK31. Continent breakdown: 33%/AF, 25.21%/AS, 37.25%/EU, 33.33%/NA, 2.73%/OC and 1.15%/SA. QSL 3D2C via YT1AD, direct (w/SAE or SASE + 1 USD for normal postage, 2 USDs for Airmail), by the Bureau or use the OQRS on the Web page. For more details and updates, visit the 3D2C Web page at:
http://www.yt1ad.info/3d2c/index.html
4S, SIR LANKA
Peter, DC0KK, will once again be active as 4S7KKG from Sri Lanka (AS-003, WLOTA 0762) between November 9th and March 9th, 2013. Activity will be mainly on CW and the Digital modes. QSL via DC0KK, by the Bureau (preferred) or direct (see(QRZ.com)). LoTW on request. All QSLs for all QSOs will be sent via the QSL Bureau.
5D7, MOROCCO
Operators Abdo/CN8VO, Jos/PD0JOS (CN2OS) and Francois/ON4LO (CN2LO) will be active as 5D7AT from Agadir between October 8-21st. Activity will be on 80-10 meters SSB. QSL via ON4LO, direct or by the Bureau. Look for more details to be published on (QRZ.com).
5U, NIGER
Operators Christian/TL0A (5U5U), Paul/F6EXV (5U6E) and Jan/DJ8NK (5U8NK) are now active from Niamey until October 15th. Activity will be on 160-6 meters using CW, SSB and Digital. Suggested frequencies are:
CW - 1826.5, 3524, 7024, 10104, 14024, 18084, 21024, 24894 and 28024 kHz
SSB - 3799, 7070, 14190, 18150, 21290, 24950 and 28490 kHz
Digi - 7050, 10138, 14080, 18100, 21080, 24920 and 28080 kHz
6m - 50104/CW and 50150/SSB
QSL via their home callsigns, direct or by the Bureau (except 5U5U, direct only). The callsigns 5U6E and 5U8NK will be available on LoTW shortly after the operation, and on ClubLog's OQRS for both direct and Bureau QSLs. For more details, see:
http://www.premiumorange.com/5u-2012
5X, UGANDA (2013)
A press release sent out by the members of the F6KOP team states [edited], "After many DXpeditions in the past (5V7C, 5H1C, XT2C, J5C, TK7C, TS7C, TM7CC, IS0R, TJ9PF) and the successful PJ4C in 2012, the F6KOP team is happy to announce their next one in Uganda for February 2013. More than 20 ops, 6 stations for 12 days in this beautiful Africa country."
Details from their Web page
http://www.5x2013.comstate that the operation will take place between February 6-18th, from a location some 20 Km from Entebbe airport. They mention that "they have found the

perfect place for hamradio, a large hotel with more than 6000m² for our antennas with a direct access on the beach of the Victoria lake." Activity will be on 160-6 meters using CW, SSB, RTTY and PSK. Suggested frequencies are:
CW - 1826.5, 3524, 7024, 10104, 14024, 18074, 21024, 24892 and 28024 kHz RX AS/OC 1821.5 and RX EU/NA 1834.5
SSB - 1850, 3785, 7120/7075, 14145, 18140, 21295, 24960 and 28480 kHz
RTTY - 1842, 3585, 7038, 10142, 14087, 18102, 21082, 24918 and 28082 kHz
PSK - 3570, 7035, 10142, 18100, 21072, 24920 and 28122 kHz
6m - 50104/CW and 50145/SSB
The team will use K3's and FT450 with ACOM 1010 into SpiderBeams, verticals and 4 Square antennas. Current operators mentioned are Franck/ F4AJQ (Team Leader), Seb/F5UFX (Team Leader, WebMaster), Alain/F6ENO (Team Leader), Bob/N6OX, Dave/K4SV, Michel/FM5CD, Gérard/F2JD, Uwe/DL8OBF, Francois/ON4LO, Flo/F5CWU, Jean Jacques/F5NKX, Norbert/DJ7JC, Eric/ON7RN, Michel/F5EOT, John/F5VHQ, Jean Paul/F8BJI, Gerard/F2VX, Hans/DL1YFF, Valery/RG8K/UT7CR, Patrick/F2DX, Mike/UA9KGH and Jean-Marc/F8IXZ. Yann, F1NGP, will be their QSL Manager (100% OK Direct, ClobLog's OQRS, Bureau and LoTW). For more details and updates, see:
http://www.5x2013.com
6V, SENEGAL
Vladimir, RK4FF, will once again be active as 6V7S from Le Calao in Ngaparou between October 22nd and November 3rd. No word on whether he will participate in the CQWW DX SSB Contest. QSL via RK4FF.
6W, SENEGAL
Francis, F6BLP, will once again be active as 6W7SK from Saly Portudal, 80 kms south of Dakar on the coast, between January 5-18th, 2013. Activity will be holiday style using the same station as last time (IC-7000 into G5RV antenna) operating mainly CW. QSL via F6BLP, direct or by the Bureau. Logs will be uploaded to LoTW and eQSL. For more details, logs and pictures of his last operation, visit:
http://www.f6blp.org/index.php?langue=uk&contenu=home.php
8Q, MALDIVES
Jim, G3VDB, is intending to once again be active as 8Q7EJ from Vilamendhoo Island Resort (AS-013) between October 29th and November 11th. Activity will be holiday style mainly on 20 meters using CW, SSB, PSK31 and RTTY. QSL via his home callsign. The 2009/2010/2011 8Q7EJ logs are available on the Clublog Web page at:
http://www.clublog.org/logsearch/8Q7EJ
9M2, WEST MALAYSIA
By the time you read this, Shou, JA1XXI, will be active as 9M2/JA1XXI from Port Dickson, Negeri Sembilan, Malaysia (Malacca Strait) until October 15th. Activity will be holiday style on 20/15/10/6 meters using CW and SSB. Suggested frequencies are 14220, 21220, 28500 and 50110 kHz. QSL via his home callsign, by the Bureau for JA and direct only for stations outside of Japan (SAE+1 IRC or 2 green stamps).
9U, BURUNDI
An international team of operators from ON, PA and GM will be on the air from Burundi during the second half of February 2013. In total, they have 10 operators and four stations and airing the requested callsign 9U4U (not confirmed yet). A Web site will be online soon with details and information about their plans. This Expedition is organized by the "Belgian Rockall Team".
AH0, MARIANA ISLANDS
Kazuo, JH8PHT, is once again active as AH0KT from Saipan on Northern Mariana Island (OC-086) until October 9th. Activity will be on 80-6 meters. Look for him to also try 10 meters FM and AM. QSL via direct to his home callsign. Logs will be uploaded to LoTW.

PLEASE do not QSL to Saipan.
AH0/KH0, MARIANA ISLANDS
Operators Kit/JA1NVF, Kowata/JF7ELG, Miho/JJ2VLY and Yutaka/JQ2GYU will be active as NH0J from Tinian Island (USI NI003S, WLOTA 3108), Northern Mariana Islands (OC-086), between October 18-22nd. Activity will be on 80-6 meters using CW, SSB and possibly some RTTY/PSK. The operators may also use their own U.S. callsigns, such as AH0J (QSL via JA1NVF), WA2O/KH0 (QSL via JF7ELG), WS2M/KH0 (QSL via JJ2VLY), and WS2Y/KH0 (QSL via JQ2GYU). QSL NH0J via JJ2VLY, direct or by the Bureau.
C5, THE GAMBIA
Members of the Radio Syd Contest Group will be active as C5A from Banjul during the CQWW DX SSB Contest (October 27-28th) as a Multi-Multi entry. Operators mentioned are Lada/OK1DIX, Jiri/OK1DO, Petr/OK1FFU, Karel/OK1JKT, Vlada/OK1NY, Jiri/OK1RI, Vasek/OK1VVT, Joe/ OM5AW and Norbert/OM6NM. QSL via OM2FY, direct or by the Bureau. For more details and updates, see:
http://www.om0c.com
DXCC NEWS
Bill Moore, NC1L, ARRL Awards Branch Manager, reports on the following:
* On September 24th, Bill, NC1L, states, "Congratulations to the team which helped to reintroduce Amateur Radio to Kosovo, and welcome back to the airwaves to the returning Hams. As of this time Z60K, and/or any other Z6 station, will not count for any entity for DXCC awards purposes as they do not qualify under the DXCC rules. Any future change in Kosovo's DXCC status will be announced by ARRL."
>* The following operation is approved for DXCC credit:
>J51FD - Guinea-Bissau; 2010 Operation
>"If you have had this operation rejected in a recent application, please send an e-mail to the ARRL DXCC Desk," Moore said. "Please note that due to heavy e-mail volume, you may not receive a reply. Once updated, results will appear in Logbook of The World (LoTW) accounts, as well as online in the daily listings."E51, SOUTH COOK ISLANDS
Frank, HB9BXU, and a group of other Swiss hams will be active as E51C, E51ABS, E51BZD and E51CHX, from Aitutaki Island (OC-083) between November 12-30th. Activity will be holiday style on 80-10 meters including the 30/17/12 meter bands, between 1900-1200z, using CW, SSB and PSK31. Suggested frequencies are:
CW - 3505, 7020, 10104, 14024, 18080, 21024, 24894 and 28024 kHz
SSB - 3799, 7070, 14190, 18145, 21290, 24950 and 28490 kHz
PSK31 - 3580, 7035, 10139, 14070, 18100, 21070, 24920 and 28120 kHz
They state that there will be no internet access and they will not be able to provide online logs during their operation. QSL via HB9BXU.
ED9, CEUTA AND MELILLA
Operators Con DF4SA, Jorge/EA7HZ, Julio EA7JB, Quillo EA7LS, Chris/EA7RU, Jorge/EA9LZ and Zoli/HA1AG will be active as ED9Z from Ceuta during the CQWW DX SSB Contest (October 27-28th) as a Multi-2 or Mutil-Single entry. The group will be using all Spiderbeam antennas and a 40m 3 element full size beam. QSL via EA9LZ.
FM/TO9, MARTINIQUE
Robert, S53R (ex-ST2AR), will be active as TO9R from FM5BH's QTH on Martinique Island (NA-107) during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band entry. Outside the contest, Robert will be signing FM/S53R. QSL via S53R, direct or via LoTW.
H4, SOLOMON ISLANDS
Bernhard, DL2GAC, will once again be active as H44MS on a DX vacation to Honiara, Guadalcanal (WLOTA 0086), Solomon Islands (OC-047), between October 17th and December 10th. Activity will be on 80-6 meters SSB only. QSL via his home callsign, by the Bureau or direct.

H4, SOLOMON ISLANDS
Operators Phil/G3SWH and Jim/G3RTE will be active from Honiara, Guadalcanal (WLOTA 0086), in the Solomon Islands between February 18-28th, 2013. The Solomon Islands are located in CQ zone 28, ITU zone 51. Guadalcanal counts as OC-047 for IOTA purposes. The "most wanted" data provided by Clublog currently shows the Solomon Islands at #81 in Europe and #77 in North America. Their activity will be on CW only on all bands 80-10 meters. There will be no 160, 60, 6 meters or EME activity. Propagation permitting, they plan to have two stations on the air for as many hours every day as is possible. Their main objective is to work as many European, North American and ROTW stations on as many different bands as possible and plan to make at least 15,000 QSOs. QSL via G3SWH, either via the OQRS facility on Phil's Web site
http://www.g3swh.org.uk (recommended), direct with SAE and adequate return postage or via the traditional Bureau route. There is more information available
atwww.g3swh.org.uk/h44kw.htmlwhich will be updated from time to time.
H40 & H44, TEMOTU AND SOLOMON ISLANDS
Sigi, DL7DF, will once again lead a group of operators on a 2013 DXpedition which is being called a "Two Entities DXpedition - Solomon 2013". Sigi states on his Web page that they have chosen two destinations. The first destination will be theGuadalcandal (OC-047), Solomon Islands (H44), between March 8-25th, 2013. During the time between March 12-23rd, part of the group will be active from Nendo (OC-100), Temotu Island (H40). Activity will be on 160-6 meters using CW and SSB. They to have several stations on the air. One station on each destination will be exclusively dedicated to RTTY, PSK31 and SSTV. Their station equipment on each destination consists of 4 transceivers (3 x K2, 1 x FT857D), 3 power amplifiers, a lowband vertical for 160/80m, a deltaloop for 40, a deltaloop for 30, a Spiderbeam for 20/17/15/12/10, a 5 element Yagi for 6m, some Beverage antennas as well as some laptop computers. Operators mentioned are Manfred/DK1BT, Georg/DK7LX, Wolf/DL4WK, Reiner/DL7KL, Sigi/DL7DF, Juergen/DL7UFN, Frank/ DL7UFR, Jan/SP3CYY and Leszek/SP3DOI. Pilot station is Bernd, DF3CB. QSL route is via DL7DF, direct or by the Bureau.
IOTA NEWS
AF-053. Christian, J28NC, who has been in Djibouti since July, announced that he will team-up with Jean-Francois, J28UC, to activate the coral reef Islands Moucha or Maskali sometime in the near future.
AF-083. Alfredo, IK7JWY, is organizing a second DXpedition to Djerba Island (WLOTA 1394), Tunisia, between April 27th and May 4th, 2013. The group hopes to use the callsign TS8IT. Activity will be on all bands and modes. Current operators are Alfredo/ IK7JWX (team leader), Antonello/IK2DUW (QSL manager), YL Rosy/ IW2NLC, Ampelio/IS0AGY, Roberto/IK2PGM, Leopoldo/I8LWL, YL Titti/IK8GQY, Carlo/IK6CAC (CW), Elvira/IV3FSG, Dario/IT9SSI + YL. If interested to join, contact Alfredo at: ik7jwx2003[at]yahoo.it
AS-060. Members of the Korean Contest Club (KCC) will be active as D9K from Pigum Island, South Korea, between October 26-29th. Activity will be on 80-10 meters and include participation in the CQWW DX SSB Contest (October 27-28th) as a Multi-Single entry. QSL via DS4NYE. Logs will be on ClubLog. Operators mentioned are Han/DS2GOO, Yongsup/DS3GLW, Joon-Woo/DS3MLG, Rew/DS4NYE, Rocky/HL1VAU and Kijun/HL3AMO.
AS-075. Andrea, IK7YTT, will be active as XX9TTT from Coloane Island, Guangdong Province, between October 26-29th. Activity will include the CQWW DX SSB Contest (October 27-28th) as a Single- Op/Single-Band (15m) entry. There will be activity before and after the contest, and Andrea will be on other bands. Suggested frequencies are 21285 and 14185 kHz. QSL via IZ8CCW, direct or by the Bureau. For more info and updates, visit:
http://www.mdxc.org/xx9ttt

NA-031. Jim, KA3UNQ, will be active from numerous lighthouses in the Rhode Island State Island group between December 6-9th. Details and QSL information are posted on (QRZ.com).
NA-034. Jacek, SP5APW, will be active as W4/SP5APW from Clearwater Island between October 15-18th. Activity will be holiday style for only a few hours a day using K3 (probably battery powered) and a Buddipole antenna. Operations will be mainly on 20/15/10 meters SSB. QSL via his home callsign, direct or by the Bureau or LoTW. For more details and updates, see:
http://na-034.blogspot.com
NA-054. Rick, K6VVA, will be active as C6AVA from Berry Islands (WLOTA 1903) between December 7-11th. Activity will be on 40/30/20/17 meters using mainly CW with some SSB. Rick may or may not operate in the ARRL 10m Contest (December 8-9th) depending on propagation at the time. QSL only via N6AWD, direct or by the Bureau. For more information and updates, visit:
http://www.k6vva.com/iota/na054
NA-112. Wayne, K9YNF, will be active as K9YNF/4 from Bogue Banks, NC, between October 21-26th. Suggested frequencies are:
SSB - 14260 and 18128 kHz
PSK31 - 14070.15 and 7035 kHz
QSL via K9YNF.
NA-138. A few days before his NA-034 operation (see above), Jacek, SP5APW, will possibly be active as W4/SP5APW from Amelia Island (WLOTA 3048)for one or two days between October 12-14th. QSL via his home callsign, direct or by the Bureau or LoTW. For more details and updates, see: http://na-034.blogspot.com
IOTA OP (THAILAND)
Eddy, ON4AFU, will once again be in Thailand to activate the following IOTAs. His schedule is as follows:
October 7-24th - Callsign HS0ZJF/8; from Koh Samui (AS-101) October 26th-November 4th - HS0ZJF/9; from Koh Butang (AS-129)
Activity will be on 40-10 meters using CW only with 100 watts into a wire antenna. QSL via ON4AFU, direct or by the Bureau.
ISWL CALLSIGNS (For October)
The following ISWL club callsigns will be used throughout the month of October:
GX4BJC/A - Operated from Walton on the Naze, in Essex, by Herbie, G6XOU. (/A WAB Square = TM22 - England & IOTA = EU-005). Herbie will also operate as GX4BJC/P at times.
MX1SWL/A - Operated from Hartford, in Cambridgeshire, by Tom, G3RPV. (/A WAB Square = TL27 - England & IOTA = EU-005).
ALL QSLs will be handled by Herbie, G6XOU, and NOT the individual operator. The I.S.W.L. is a member of the European PSK Club. All QSL info is on www.iswl.org.uk or (QRZ.com) or via . NO LoTW. I.S.W.L. Awards are available to all Hams and SWLs, see www.iswl.org.uk for full details. The eQSL.cc cards ARE welcomed for their awards.
KG4, GUANTANAMO Bay
Look for the following operators to be active from Guantanamo Bay (NA-015) during the month of October:
October 13-27th - Ed/KN4KL (KG4KL); activity on SSTV, RTTY, SSB, PSK and possibly CW.
October 11-27th - Bill/W4WV (KG4WV); activity on SSB, PSK, RTTY and possibly CW.
While there, operators will be joined by the GTMO Boy Scout Troop in the "Jamboree on the Air" (JOTA, October 20-21st). QSL via their home callsigns.

100-400KH8, AMERICAN SAMOA
Dom, M1TKA, is now active as KH8/M1TKA from American Samoa until October 11th. Activity will be on 20/17/15/12/10 meters, from the south side of KH8, with the possibility of LF bands if he can relocate to the north side after October 7th. QSL via his home callsign and LoTW. For updates, see:http://m1kta-qrp.blogspot.co.uk/2012/10/qrv-in-kh8.html
KH8, AMERICAN SAMOA (Update To OPDX.1075/Possibly Moved To 2013)
Bill, N6MW, and possibly 1-2 other operators (TBA) are/will/expected to be active as KH8/N6MW from a hotel in Tutuila between November 8-19th. However, the DXpedition's Web page states, "This DXped is still in the planning stages, possibly will be moved to March 2013." Stay tuned! For more details and updates, visit:
http://n6mw.jimdo.com
NP4, PUERTO RICO
Jeff, N5TJ, will be active as as NP4Z from San Juan (NA-099, USI PR006S, WLOTA 2802) during the CQWW DX SSB Contest as a Single-Op/High-Power entry. QSL direct to N4AO (QRZ.com)
OJ0, MARKET REEF
Operators Tomi/OG9X, Simo/OH2HAN and Juha/OH6XX will activate Market Reef (EU-053, ARLHS MAR-001, WLOTA 0542) between October 25-29th. Both OG9X and OH6XX will participate in CQWW DX SSB Contest (October 27-28th) using the OJ0B and OJ0X callsigns in a the Single-Op/ Single-Band (80m) and Single-Op/Single-Band (15m) categories, respectively, while OH2HAN will activate other bands on RTTY mode signing OJ0MI. QSL OJ0B and OJ0X via OH2BH and LoTW, and QSL OJ0MI via OH2HAN.
PJ4, BONAIRE (Update)
Operators Marco/PE2MC, Bert/PE2KY and Peter/PJ4NX will be active as PJ4X from Bonaire (SA-006, WLOTA LH-1279) between November 9-16th. QSL via PE2MC. Watch for more details and updates at:
http://www.pe2mc.nl/bonaire-here-we-come-pj4pe2mc
PJ4, BONAIRE
Look for PJ4D will be once again be active between November 18th and December 1st. Activity will be on all bands and modes. Operators include Kelly/N0VD, Scott/W4PA and possibly others. PJ4D was last activated during the 10.10.10 "New DXCC" event and logged nearly 36,000 QSOs. They hope to be able to give those who still need a QSO with Bonaire (SA-006, WLOTA LH-1279) a new one. Also, they expect to be active during the CQWW DX CW Contest (November 24-25th) in one form or another. More information will be posted at . QSL all contacts with PJ4D via W3HNK.

SI9, SWEDEN (Special Event)
Special event station SI9AM from the King Chulalongkorn Memorial in Ragunda, Sweden, the largest Thai Pavilion in the world outside Thailand, will be active between October 13-14th, and in the Scandinavian Activity SSB Contest (SAC). Operators mentioned are Markus/SA3BPG, Joel/SA3BRX, Jan-Eric/SM3CER, Lars/SM3EAE, Björn/SM3UQO and Göran/SM5SIC. SA3BPG and SA3BRX are young and newly licensed radio amateurs and will now for the first time try contesting. They will operate three stations, one of the currently most productive band and one of the second best band. The third station will be a multiplier station. Outside of the contest, activity will be on 160-10 meters. Suggested frequencies are:
CW - 1817, 3517, 7017, 10117, 14017, 18077, 21017, 24897 and 28017 kHz
SSB - 1840, 3760, 7060, 14210, 18160, 21310, 24960 and 28510 kHz
FM - 145.550 MHz and repeater RV49 - 145.612 MHz
QSL via SM3CVM, direct or by the Bureau (E-mail Bureau request are OK via sm3cvm (at) ssa.se. For more information, visit (QRZ.com) or the SI9AM Web page at:
http://www.si9am.se
SPECIAL OPDX BULLETIN WENT OUT THIS WEEK
If you missed OPDX.1080.2, which contained press releases/updates on:
* ARS GIVEWAY TO PROMOTE YOUTH IN AMATEUR RADIO (Press Release)
* CQ NEWS (Press Release) - Randy Thompson, K5ZD, Named Director of CQ World Wide DX Contest
* CY0, SABLE ISLAND (Press Release/Update). The new dates are October 22-31st.
* LIVE BROADCAST (from MFJ's 40th Anniversary Celebration)
* ZL9, CAMPBELL ISLAND (Update/Press Release). They are "making great progress during the planning and preparation phases.
Go to the following URL to see OPDX.1080.2
T8, PALAU
Kiichi, JF1LUT, is now active as T88IK from Arakabesan Island, Koror (OC-009) until October 10th. Activity will be on 17-6 meters SSB. QSL via his home callsign, direct or by the Bureau.
T8, PALAU
Nob, JH1EAQ, will be active during the CQWW SSB Contest as T88EB as a Single Op/All Band entry. QSL via JH1EAQ, Bureau or direct to: Nob Watanabe, 6-11-2 Azuma-chou, Iruma-City SAITAMA, JAPAN 358-0002. Nob states that this is his first time on the air in 10 years (he was active back then as T88EA).

TF, ICELAND
Siggi, TF3CW, from Seltjarnarnes (EU-021, WLOTA 2975), has announced that he will be active in the CQWW DX SSB Contest (October 27-28th) as Single-Op/Single-Band (20m) entry. QSL via LX1NO.
TO2, MAYOTTE
Serge, F6AML, is active as TO2M from Mayotte until October 19th. Activity will be on 80-10 meters using CW and SSB. QSL via F6AML, direct or by the Bureau (E-mail request are fine; see (QRZ.com) for details).
TO7, MAYOTTE
Hartwig, DL7BC, will once again be active from Mayotte (AF027, WLOTA LH 0376) between March 25th and April 12th, 2013. He is hoping to have his callsign TO7BC re-issued again. Activity will be from Bruno's, DH1BL/FH4VOS, QTH. Operations will be on 80-10 meters plus participation in CQWW WPX SSB Contest (March 30-31st). He also plans to be on RTTY and PSK. QSL via his home callsign, direct or by the Bureau. For more details, visit it his Web site at:
http://www.qslnet.de/member/dl7bc/en_TO7BC.htm
TT8, CHAD
Members of the "Italian DXpedition Team" are now active as TT8TT from N'Djamena until October 16th. Activity will be on 160-6 meters using CW, SSB and RTTY. Suggested frequencies are listed in OPDX.1072. QSL direct via I2YSB. QSL by the Bureau via IK2CIO. Logs will be posted to LoTW within six months. A log search and an OQRS are all available on their Web page at:
http://www.i2ysb.comOfficial forum is at:http://bit.ly/NVQaav
TX5, FRENCH POLYNESIA (Update/IOTA Op!)
Didier, F6BCW, is now active as TX5EG from Huahine Island (OC-067) until October 15th. He will activate other various French Polynesian Islands between now and November 8th. Activity will be holiday style, CW only, and using 100 watts into dipoles strung-up between coconut trees on the following islands:
October 6-15th - Huahine Island (OC-067); 40-10 meters
>October 15-19th - Raiatea Island (OC-067); 30/20/17 meters
>October 19-22nd - Tahaa Island (OC-067); 40/30/20/17 meters
>October 22-26th - Maupiti Island (OC-067); 30/20/17 meters
>October 22nd(?)-November 8th - Huahine Island (OC-067); 40-10 metersQSL via his home callsign, direct or by the Bureau.
TX5, NEW CALEDONIA (Special Event)
Christian, KH6/F5IDM, is expected to be active as TX5FS during the Pacific Science Festival ("Fête de la Science") which is held on Lifou Island (OC-033) and runs until October 13th. Activity will be limited to his spare time. No QSNs have been reported as of press time. QSL via F5IDM, by the KH6 Bureau or direct. Details about the festival can be found at:
http://www.symbiose-nc.com/fds/index.php
V3, BELIZE
Rich, N0HJZ, will once again be active as V31MW from Placencia between October 21-30th. Activity will be on all bands especially 30/17/12 meters on CW during his stay except 160 meters. He will also operate as V31MW during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/ All-Band/High-Power entry. QSL via N0HJZ, LoTW or direct with SASE.
V6, MICRONESIA
Operators Shoij/JA7HMZ (V63DX) and Masahiko/JA7EPO (V63EPO) will be active from Pohnpei Island (OC-010) between November 23-28th. Activity will be on all bands and modes. QSL via their home callsigns. Shoij will also be in the CQWW DX CW Contest (November 24-25th) as V6B and as a Single-Op/All-Band entry. QSL via JA7HMZ, direct or LoTW.

VC2, CANADA
Operators Noel/VE2BR and Gregg/VE3ZZ will once again partici- pate in the CQWW DX SSB Contest (October 27-28th) as a Multi-Single entry using the special callsign VC2B. QTH will be Mercier, Quebec (CQ Zone 5, Grid Loc FN35ch). QSL to VE2BR, direct or by the Bureau.
VP2M, MONTSERRAT
Operators Dave/G3NKC, Martin/G4XUM, Stewart/GM4AFF and George/K2DM will be active as VP2MKC, VP2MXU, VP2MAF, and VP2MDG, respectively, between October 24-30th. The team will be active as VP2MDG during the CQWW DX SSB Contest (October 27-28th) as a Multi-2 entry. QSL via K2DM, direct only or LoTW. QSL contacts with VP2MKC, VP2MXU and VP2MAF are via GM4FDM.
VP5, TURKS AND CAICOS ISLANDS
Operators Frank/WA2VYA, Tony/K4QE and Jack/N2VW will be active from VP5JM's 'Hamlet' on Providenciales Island (NA-002) between October 23-30th. The group will be there to operate in the CQWW DX SSB Contest (October 27-28th) as VP5T and as a Multi-Multi entry in CQ Zone 8. QSL ONLY to N2VW, direct or by the Bureau. See QRZ.com for more details. Logs will be upload to LoTW shortly after their operation. Operators will be active as VP5/homecall on the island between October 23-30th, so activity before and after the contest will be on CW and on the 30/17/12 meter bands. QSL per the operators' instructions and per (QRZ.com).
VU3/P, ANTARCTICA (Bharati Base)
Gianni, I1HYW, informs OPDX: "Bhagwati Prasad is still active as VU3BPZ/P from the new Indian Base 'Bharati' (WAP IND-04) in Antarctica, until the end of December, then he will be onboard the 'M/V Ivan Papanin' on the way to India via Cape Town. A stop is preview at Maitri Station (WAP IND-03) where he hopes to operate again as VU3BPZ and when sailing the call used will be VU3BPZ/MM as done on the way on. He is still waiting the reply for his request of a special callsign through the Indian Ministry, and perhaps the answer will come around mid- October. QSLs have not been printed yet and will not be available before the end of November, so no hurry in QSLing; information to the chasers will be given as soon as we know if the special call will be issued or not. QSL only direct via I1HYW (QRZ.com)."
More information is available on the WAP Web site at:
http://www.waponline.itLAST MINUTE UPDATE: Gianni, I1HYW, reports that the Bharati Base's sunrise is at 2341z and sunset at 1347z. Local time down there is UTC +5 HRS. There are about 46 days left for Bhagwati, VU3BPZ/P, to be there before he leaves onboard the "M/V Ivan Papanin". If you did not work the Bharati Station yet, the best times and frequencies are:
 10m - 28495 kHz between 1100-1215z
 17m - 18145 kHz between 1015-1100z
 20m - 14180 kHz +/- between 1400-1500z and again between 1700-1800z
For North Americans, VU3BPZ/P will be on 14242 kHz between 0200-0300z. If you don't hear him, call him (VU3BPZ/P), he may be just listening at the above times and bands given.
XP, GREENLAND
Henning, OZ1BII/OU2I, will once again be active as XP2I from club station XP1AB in Kangerlussuaq between November 16-19th. Activity will be on CW in the LZ DX Contest (November 17-18th) in ITU Zone 5. Also, look for activity on the 160/80 meters during the night between November 18-19th. QSL via his home callsign.
XX9, MACAO
Operators Francisco/EA7FTR (XX9TFR), Eugene/EA5HPX (XX9TPX), Jose/EB5BBM (XX9TBM) and David/EB7DX (XX9TEX) will be active from Pousada de Coloane Hotel, Coloane Island (AS-075) between October 18-29th. Activity will be on 160-6 meters, including the 30/17/12 meter bands, using CW, SSB and RTTY, with at least 2 stations on at the same time on different bands and modes. Suggested frequencies are:

CW - 1823, 3523, 7023, 10103, 14023, 18073, 21023, 24893 and 28023 kHz
SSB - 1825, 3780, 7065/7160, 14145, 18145, 21295 and 28495 kHz
RTTY - 7035, 10140, 18100, 21080, 24921 and 28080 kHz
6m - 50103/CW and SSB operations NOT PERMITTED
12m - SSB operations NOT PERMITTED

There will be an emphasis on working NA and EU. QSLs for all callsigns are via EA7FTR, direct. All QSOs will be confirmed via LoTW. For more details and updates, see:
http://adxg.org/macau/index.php

XZ, MYANMAR (Update)

Simon, HS0ZIB/G6JFY, who was active as XZ1K, is now "no longer living in Kawthaung". According to his Web site (which is "now redundant" as he calls it), Simon states, "I hope to obtain a new licence for operation from my new QTH in the capital city of Yangon". Simon informs OPDX that he plans to "live and work in Yangon on a long- term basis now." He also mentioned that he is "in contact with the telecoms Regulator who is currently updating all the outdated telecoms and radio- comms laws in Myanmar. However, right now he is very busy with the issue of new mobile telephone network licences, so I am sure that any progress in the ham radio laws will be slow. To try to improve my relationship with the government departments, I am trying to get a new job actually in the new capital city of Nay Pyi Taw, where all the government offices are located..."

ZF, CAYMAN ISLANDS

Operators John/K6AM, Bob/K5WA, George/K5PI and David/ N6AN will be signing ZF1A from Grand Cayman Island (NA-016, WLOTA LH-1042) during the CQWW DX CW Contest (November 24-25th) as a Multi-Single entry. QSL via K6AM, direct, by the Bureau or LoTW.

http://www.g3swh.org.uk/ethics.html

THE ETHICS OF QSL MANAGEMENT.

The following “Ethics for QSL Management” were adopted by the IARU Region 2 Conference in Curacao in 1992 and are based on a proposal by the Radio Society of Great Britain to the IARU Region 1 Conference in 1990.

G3SWH is pleased to comply.

1) Any DX station appointing a QSL manager must ensure that satisfactory arrangements are in place for receiving and responding to incoming bureau and direct cards.

2) QSL managers must respond to incoming SWL cards.

3) Any DX station appointing a QSL manager must accept responsibility for that manager's performance.

4) QSL managers must respond "direct" and within a reasonable period of time, as long as sufficient funds/lRC’s/stamps to cover the exact cost of return postage (and a return envelope, if one isn't supplied) are enclosed with the request. Airmail must be used if sufficient funds/IRC’s/stamps are enclosed.

5) QSL managers must not insist on separate envelopes/applications for different QSO’s or different stations. They must establish internal procedures to handle such multiple requests.

6) Recognising that mistakes of time and/or date are frequently made, QSL managers must make a reasonably diligent search for QSO’s that can't immediately be found in the log.

7) It is unacceptable to demand a specific number of IRC’s or "green stamps" (US dollar bills) if a smaller number would cover the costs mentioned in Point 4.

8) It is unacceptable to return cards via the bureau if the cards are received direct with sufficient funds/lRC’s/stamps as defined in Point 4.

9) There should be no time limit for applying for QSL cards. Old logbooks should be passed to responsible DX clubs when the manager no longer wishes to retain them.

http://www.g3swh.org.uk/ethics.html

http://www.qsl.net/qslmanagers/index_files/Page379.htm

QSL Manager’s Creed

I agree to save and preserve all DX and DXpedition logs in my possession.

I agree to NEVER close a log.

If I am unable to fulfill my duties as a QSL manager I shall transfer such duties to a responsible person willing to take on the responsibility, OR contact the QSL Manager's Society for a referral.

I shall answer ALL direct QSL requests as long as sufficient funds for return postage are provided. Any QSLs sent without adequate funds for return postage shall be answered via the bureau.

I shall accept, and answer ALL QSL requests sent via the bureau by answering them via the bureau.

I will answer SWL cards.

I agree to ONLY provide QSL cards for QSO's that are "in the log".

I agree to return any QSL cards where QSO's were not in the log, and include an appropriate note.

I will require full matching log data for any logs that are online.

I agree to be accessible via email if at all possible.

In the event of an untimely postage increase, I agree to make up the difference on any delayed outgoing mail.

I shall keep separate, all IRC's and money received with the cards. I will use this kitty to pay for my QSL manager expenses such as stamps, QSL cards, and all bureau expenses. I understand that I may have to contribute my own personal funds to this kitty from time to time. (Exception: there could be special arrangements made with DXpeditions for handling money/contributions)

I will never "close" a log.

In the event that Electronic QSLing becomes a reality, I agree to ALWAYS provide a "physical" QSL card if one is requested.

I agree to be fair at all times.

I agree to the following statement:
"Donations are NEVER required, but ALWAYS appreciated."

5X, Uganda 2013

After many dxpeditions in the past (TO7C, 5V7C, 5H1C, XT2C, J5C, TK7C, TS7C, TM7CC, IS0R, TJ9PF) and the successful PJ4C in 2012, the F6KOP team is happy to announce his next one in Uganda for February 2013.

More than 20 ops, 6 stations for 12 days in this beautiful Africa.

Stay tuned for more information.

Our QTH
We wil be located around 20 Km from Entebbe airport. We have found the perfect place for hamradio, a large hotel with more than 6000m² for our antennas with a direct access on the beach of the Victoria lake.

QSL Info

F1NGP Yann will be our qsl manager (100% OK Direct, OQRS, Buro, LOTW).

We will use the Oqrs system provided by Clublog. Just go on the website here : "to be available soon" , search for your qsos then click the "request qsl" button.
You will then have to enter all your qsos.
You have to contibute with 2 USD for direct QSL (more will be appreciated), for any number of QSOs.
You could also use the online qsl request service for Buro qsl cards (with or without any contribution).
Logs will be uploaded on LOTW.
For any mistake in the log use the following email adress : qslmanager@...

OM,
Sepertinya masih ada yang gak melaksanakan seperti yg tertulis dalam kode etik ini.

- membatasi jumlah QSO dlm 1 request, padahal khan bisa juga balasan ditulis dlm 1 QSL card juga.
- beda stasiun DX harus beda amplop/GS, walopun manajernya dia juga

Mungkin masalahnya ada biaya lain2 di luar biaya pos yg gak cukup dg selembar IRC atau 1-2 GS.

Yang saya alami juga adalah adanya DXer yg cuma membalas QSL card saya dengan LoTW setelah ybs terima QSL card saya. QSL card gak dibalas, padahal awalnya juga saya mengharap confirming via LoTW seperti ditulis di QRZ.Com juga tertulis di cluster. Tapi karna lama ditunggu gak ada confirming via LoTW, saya kirim kartu - eh terima kartu plus GS jawabnya cuma di LoTW. Tapi ya alhamdulillah, daripada hilang tanpa kesan.

Beberapa hari yll saya kirim QSL card utk E40VB, SU9VB, 4O7VB dalam satu amplop.
Vladimir E.Bykov ini khan sering jalan2 & QRV keliling dunia, seperti juga waktu di Timor Leste dll.
Semoga aja dia berbaikhati membalas sekaligus.

73 es tnx

hen-yc0qr

Judul: [YBDXC_News] http://www.ybdxc.net/2012/10/the-ethics-of-qsl-management.html

http://www.g3swh.org.uk/ethics.html

THE ETHICS OF QSL MANAGEMENT.

The following “Ethics for QSL Management” were adopted by the IARU Region 2 Conference in Curacao in 1992 and are based on a proposal by the Radio Society of Great Britain to the IARU Region 1 Conference in 1990.

G3SWH is pleased to comply.

1) Any DX station appointing a QSL manager must ensure that satisfactory arrangements are in place for receiving and responding to incoming bureau and direct cards.

2) QSL managers must respond to incoming SWL cards.

3) Any DX station appointing a QSL manager must accept responsibility for that manager's performance.

4) QSL managers must respond "direct" and within a reasonable period of time, as long as sufficient funds/lRC’s/stamps to cover the exact cost of return postage (and a return envelope, if one isn't supplied) are enclosed with the request. Airmail must be used if sufficient funds/IRC’s/stamps are enclosed.

5) QSL managers must not insist on separate envelopes/applications for different QSO’s or different stations. They must establish internal procedures to handle such multiple requests.

6) Recognising that mistakes of time and/or date are frequently made, QSL managers must make a reasonably diligent search for QSO’s that can't immediately be found in the log.

7) It is unacceptable to demand a specific number of IRC’s or "green stamps" (US dollar bills) if a smaller number would cover the costs mentioned in Point 4.

8) It is unacceptable to return cards via the bureau if the cards are received direct with sufficient funds/lRC’s/stamps as defined in Point 4.

9) There should be no time limit for applying for QSL cards. Old logbooks should be passed to responsible DX clubs when the manager no longer wishes to retain them.

http://www.g3swh.org.uk/ethics.html

http://www.qsl.net/qslmanagers/index_files/Page379.htm

QSL Manager’s Creed

I agree to save and preserve all DX and DXpedition logs in my possession.

I agree to NEVER close a log.

If I am unable to fulfill my duties as a QSL manager I shall transfer such duties to a responsible person willing to take on the responsibility, OR contact the QSL Manager's Society for a referral.

I shall answer ALL direct QSL requests as long as sufficient funds for return postage are provided. Any QSLs sent without adequate funds for return postage shall be answered via the bureau.

I shall accept, and answer ALL QSL requests sent via the bureau by answering them via the bureau.

I will answer SWL cards.

I agree to ONLY provide QSL cards for QSO's that are "in the log".

I agree to return any QSL cards where QSO's were not in the log, and include an appropriate note.

I will require full matching log data for any logs that are online.

I agree to be accessible via email if at all possible.

In the event of an untimely postage increase, I agree to make up the difference on any delayed outgoing mail.

I shall keep separate, all IRC's and money received with the cards. I will use this kitty to pay for my QSL manager expenses such as stamps, QSL cards, and all bureau expenses. I understand that I may have to contribute my own personal funds to this kitty from time to time. (Exception: there could be special arrangements made with DXpeditions for handling money/contributions)

I will never "close" a log.

In the event that Electronic QSLing becomes a reality, I agree to ALWAYS provide a "physical" QSL card if one is requested.

I agree to be fair at all times.

I agree to the following statement:
"Donations are NEVER required, but ALWAYS appreciated."

OM Hen,

Ini saya cuma menyampai kan pesan dari Vladimir, dia bilang semua qsl cards buat YB land belum tentu dia balas, kalau pun dia balas "it will be at my own leisure time" katanya

Kenapa? Karena dia sangat kesal dgn para pengurus ORARI, soalnya dia mau portable tahun depan dari YB8 and YB9 tapi ngga ada yg mau bantu untuk mendapatkan license nya.

Beliau juga sering kirim email ke saya minta bantuan, ya saya bantu sebisa mungkin, oleh karena daerah yg di tuju daerah 8 dan 9 saya ngga bisa ber buat banyak.
Saya cuma bisa menerus kan permintaan ijin portable beliau ke beberapa rekan pengurus di daerah 8 dan 9, but sampe hari ini tidak ada hasilnya, meskipun saya sudah pernah contact dgn (yg kata nya pengurus di ORDA 8 dan 9) di freq., but saya kasih email nya ke si Vlad, tetep ngga di bales ...
Sama juga email saya kepada para pengurus ORARI daerah 8 and 9, no answer ....

Beliau email ke ORPUS pun sudah, but no answer juga ...

So, mudah2an qsl cards anda di bales si Vlad, kalo anda bukan yg termasuk di black list nya hehehehe

Good luck es 73,

Iwan - W7NZ

Harusnya, urusan pribadi jangan sampai mempengaruhi untuk yang lain.

Next time, kalau OM Iwan ber email dgn Vlad, sampaikan aja hal itu. Kita mengharapkan jiwa besarnya dan jangan sampai merugikan teman2 YB Land yg lain yang tidak tahu menahu ttg permasalahan pribadi Vlad dgn pihak Orari dan dikaitkan dgn masalah QSLing antar Amatir Radio.

http://www.yb0ko.com/2012/10/membuat-sendiri-15m-delta-loop.html

obrolan AntennaManIa

Membuat sendiri 15m DELTA Loop
TNX to Syarif Hidayat JG1WCT/YB1FWO

Pengantar:
Dari Tokyo – QTH-nya saat ini – OM Syarif masih me- nyempatkan untuk mengirim orèk-orèkan tentang cara mem- biksen Antena DELTA Loop untuk band 15m yang diunggah- nya di FB. Orèk-orèkan tersebut dilengkapi dengan foto-foto yang lebih dari sekedar deskritip, yang mendorong Penyunting untuk memohon persetujuan beliau untuk menyunting ulang dan me-nayang-kannya di e-QSP edisi ini. [Ed.]

Antene Delta Loop ini diumpan (fed) di bawah, pada “titik temu” antara kedua sisi miring (lihat Gambar 1), untuk mendapatkan polarisasi horizontal.

Gambar 1 : Feed point pada titik temu kedua sisi miring

Untuk merakitnya siapkan dulu bahan-bahan sbb.:

I. ELEMEN:
Tiap sisi (miring) Delta Loop ini dibuat dari tubing alu- minium sepanjang 486 cm, atau total panjang kedua sisi miring = 972 cm.
Tambahan sisi horizontal (melintang di atas di antara kedua ujung sisi miring) dibuat dari kawat stainless steel berdiameter 1 mm sepanjang 476 cm, sehingga apabila dijumlahkan maka panjang total elemen Delta- loop ini adalah 1446 cm.
+/- 50 cm pangkal elemen yang paling bawah (diameter 1”= 254 mm) harus dibuatkan isolator agar nantinya tidak shorted (hubungan pendek) dengan mounting bracket. Isolator dapat dibuat dari potongan pipa PVC (Pralon) dengan diameter dalam 25 mm se panjang 3 ~ 4 cm. (Gambar 2)
[catatan Ed. : atau gunakan SOK (adaptor penyambung) PVC ukuran 1” yang lebih mudah didapat]

Gambar 2: Isolator pada pangkal kaki elemen

II. MOUNTING BRACKET, dibuat dari bahan plaat alu- minium t. 5-6 mm ukuran 30 cm x 10 cm. Buat lubang untuk dudukan U-clamp (klem knalpot) ukuran sekitar 40 mm dengan diameter 6 mm, yang nantinya diguna- kan untuk “memegang” kaki (pangkal) elemen.
Lubang pada plaat tersebut harus diatur sedemikian rupa sehingga nantinya pangkal kaki-kaki elemen kiri/ kanan membentuk sudut +/- 650. Sesudah jadi plaat, lubang dan klemnya akan terlihat seperti pada Gambar
3 berikut.

Gambar 3: Mounting bracket, perhatikan pengaturan lubang sehingga pangkal kaki ki/ka membentuk sudut 65"

Nantinya – apabila sisi miring sudah terpasang pada mounting bracket – tambahan sisi horizontal yang berupa kawat stainless steel (atau kawat tembaga enamel/kawat dinamo, atau kabel speaker yang di- split) bisa dipasang pada/di antara kedua ujung atas elemen/sisi miring. Pasangkan dulu kabel schoen/ sepatu kabel pada kedua ujung kawat untuk memu- dahkan koneksi ke tubing aluminium (Gambar 4).

Gambar 4: Pasangkan kabel schoen pada kedua ujung ka- wat, dan kethok ujung aluminium tubing sampai rata untuk bisa "menerima" baut & sekrup pengencang koneksi ujung kawat ke ujung tubing.

III. BALUN: impedansi pada feed point antena jenis ini ada pada kisaran 100 ~ 200 ohm, karenanya harus di"sela"kan sebuah Balun sebagai penyelaras im- pedansi.
JG1WCT/YB1FWO mempergunakan Balun 4:1 yang dibuat dari lilitan bifiler kawat tembaga email dia. 1 mm sebanyak 8 ~ 10 lilitan pada cincin ferrit (beliau pakai merek TDK) berdiameter sekitar 2 cm.
Biar rapi, sesudah jadi Balun ini dimasukkan ke sepo- tong pipa PVC dia. 1.5" yang kemudian dilengkapi de- ngan cap, baut & sekrup seperlunya (sebagai titik-titik terminasi/koneksi ke elemen) dan konektor coax SO-259 untuk koneksi ke coax RG 58 panjang sebarang ke XCVR (lihat skema dan Gambar di halaman berikut). BTW, beberapa rekan di Jepang membuat/memasang Balun dengan perbandingan ratio 2,4:1, dan hasilnya relatif sama: didapatkan SWR yang relatip rendah dan flat sepanjang rentang band 15m).

Gambar 5: skema dan cara merakit Balun 4:1 [catatan Ed. : untuk bekerja barefoot (100 ~150 watt Po)
cincin ferrit merk TDK bisa disubstitusi dengan cincin ferrit dia. +/- 2 cm warna kuning yang bisa di-pulung dari switching Power Supply pada desk top PC jadoel]

Pen g erj a a n
Siapkan dulu (atau potong-potong) pipa aluminum yang disambung teleskopis dengan ukuran masing-masing
segmen (yang sudah disesuaikan dengan jenis pipa yang ada di pasaran Indonesia) sbb. :

Diameter (mm)	Panjang (efektip)	Panjang	Jumlah
1"	50	50	2
7/8"	100	86	2
3/4"	100	86	2
5/8"	100	88	2
1/2"	100	88	2
3/8"	100	88	2

Panjang effektip satu sisi = 486 mm
[catatan Ed.: kalau sulit mendapatkan diameter pipa yang persis sama dengan ukuran tersebut dalam Tabel, ukuran- ukuran panjang di atas harap dipakai sebagai ancer-ancer pemotongan pipa saja. Penyesuaian/adjustment dilakukan dengan memanjangkan ukuran satu segmen, kemudian di- ameter segmen berikut di"longkap"/diloncati/di-skip dan panjang segmen berikutnya lagi di"satu"an dengan panjang segmen yang dilongkapi, mis. : segmen 1 dibuat 100 mm, segmen ke 2 dilongkapi dan disatukan dengan segmen ke 3 untuk mendapatkan panjang efektip 172 mm, dan seterus- nya]

Penyambungan antar segmen dilakukan dengan me- masukkan segmen berikut (yang diameternya lebih kecil) +/- 15 cm ke segmen yang lebih besar, ke- mudian sambungan di"mati"kan dengan rivette (lihat Gambar 6)

Gambar 6: penyambungan antar segmen dilakukan dengan menggunakan 2 bh rivette. Rivette pertama (yang sudah terpasang pada gambar) berfungsi seba- gai stopper supaya pipa yang lebih kecil tidak “nyerosot” masuk ke pipa yang lebih besar. Rivette kedua baru di”tancap”kan sesudah kedua segmen “pas” duduknya.

Gambar 7: Kedua pangkal sisi miring dengan isolator yang sudah terpasang

Dengan semua komponen (sisi miring, Balun) ter- pasang seperti terlihat di Gambar 1 dan segmen hori- zontal sudah terpasang maka “tongkrongan” akhir Delta Loop 15m di JG1WCT/YB1FWO ini terlihat seperti pada Gambar 8 berikut:

Gambar 8: Delta Loop 15m di-install perpendicular (“menyi- ku”/900) terhadap 20m V-Dipole di bawahnya)

Antena ini sudah digunakan selama +/- setahun tera- khir di JG1WCT/YB1FWO. Dibandingkan dengan 20m V -dipole yang 1/2λ full size, penerimaan Delta loop yang full 1λ relatif lebih hening karena noise floor-nya yang rendah. Seringkali ada station DX yang tidak terdengar dengan V-dipole, masih bisa didengar dengan baik dengan Delta Loop. Gain antena ini +/- 1,5 dBd, de- ngan rentang bandwidth yang lebar (SWR < 1:1,5. di sepanjang rentang band 15m). Antena ini juga mampu di-empani power sampai 500 watt.

Catatan Ed. :
1. Kalau “tidak terbeli”, aluminium tubing untuk segmen miring bisa diganti dengan pipa PVC Type AW (dinding tebal) yang dibuat teleskopis juga dari beberapa diameter yang berurutan.
2. Solusi lain adalah membuatnya dari joran pancing fiber- glass. Cari yang panjangnya 6 mtr, potong/buang bagian ujung yang terlalu kecil sehingga tinggal sepanjang 4.86 mtr seperti yang diperlukan. Kalau dengan ini ujungnya masih terlalu kecil juga, potong lagi bagian yang terlalu kecil tersebut dan gantikan dengan menambahkan 1 mtr pipa PVC di bagian pangkal joran.
3. Kalau memakai pipa PVC atau joran fiberglass, JANGAN lupa memasukkan +/-25 cm dowel (potongan kayu yang diserut/dibubut berbentuk silindris) di pangkal segmen, supaya tidak “remuk” waktu klem-nya dikencangkan.
4. Dengan cara ini, SELURUH elemen lalu bisa dibuat dari kawat berisolasi atau kabel speaker sepanjang 14.46 mtr yang dimasukkan ke dalam pipa/joran.
5. BTW, untuk rekans yang ingin membuat 2 element Delta Loop, buat saja elemen kedua (sebagai REFlektor) dengan panjang total 105% dari ukuran Loop di atas (yang sekarang berfungsi sebagai DE/driven element).
6. OM Syarief tidak memberikan catatan apapun tentang design frequency antenanya, demikian juga itung-itungan untuk mendapatkan ukuran panjang elemen yang 14.46 mtr itu. Bagi rekan yang mau menghitung sendiri, rumus-nya adalah L 1λ(mtr) = 306.3/f. Rumus ini adalah rumus dasar yang tidak memperhitungkan K-factor (= ratio antara diameter kawat dengan panjang gelombang) yang tentunya berbeda antara aluminium tubing, kawat telan- jang dan kabel berisolasi, sehingga perlu dilakukan ad- justment/penyesuaian pada saat penalaan untuk menda- patkan penunjukan SWR terbaik.
7. Untuk 2 ele. Delta Loop ini mounting bracket harus diganti dengan jenis element-to-boom mounting bracket.

Bukannya iklan, tapi seperti dimuat dalam beberapa akun FB (a.l. akun FB Orda Jabar) silah menghubungi OM Soe- tedja Wihardja YB1KEN di soetedja.wihardja@... yang menyediakan stok bracket ini (dan berjenis bracket jenis element-to-boom lainnya) yang dibuatnya dari alu- minium cor.

8. Jarak antar elemen buat saja antara 1.25 – 1.80 mtr (= +/- 1/8λ), jarak yang “pas” nanti dicari pada proses pena- laan, yang dilakukan dengan menggeser REF mendekat/ menjauhi DE sampai didapatkan kompromi terbaik antara Forward Gain dan Front-to-Back (F/B) ratio.

So, enjoy homebrewing your own antenna, GL ES CU OTA ... ■

OM Imam,

Pada awal nya, ya dia cuma stick sama black lists nya, beliau sudah email2 an dgn saya sejak April 2012, but hasilnya nihil sampe hari ini ... makin lama dia makin kesal jadi nya tuh hehehe

Ya saya akan bilang ke beliau untuk tidak mem black lists rekan2 YB land yg lain, yg tidak bersangkutan dgn problem nya beliau ..

73,

Iwan - W7NZ

DX-ers'corner . . . . . .

The DRAGON DX-ers Club

Tim kontes CQWW YE2R: sebuah awal mula ...

Rerasanan tentang DDXC – Dragon DX Club, tak pelak kita harus merujuk kepada YE2R, Tim kontes pada CQWW yang telah berkiprah sejak dari tahun 2009.
Sekitar kwartal pertama tahun itu, dalam 'ngobrol-'ngobrol santai antara Hans YB2DX dan Seno YB2LSR terlontar gagasan untuk membentuk sebuah tim kon- tes yang melibatkan rekans DX-ers (terutama) dari Call Area 2, untuk bisa di"terjun"kan pada beberapa kontes internasional.
Sementara menjajagi kesediaan beberapa rekan untuk bergabung, mereka berdua menemui (untuk memo- hon advise) dari YB2AA, Ketua ORDA Jawa Tengah, yang ternyata menyetujui dan sangat mendukung ga- gasan tersebut.
Melewati beberapa proses, akhirnya didapatkan call- sign YE2R, yang kemudian disepakati bersama untuk digunakan pada kontes CQWW 2009 - SSB, dengan kategori yang pada mulanya masih belum ditentukan. Seiring berjalannya waktu, akhirnya ditentukan keikut- sertaan dalam kategori Multi-Two, dengan melibatkan DX-ers andalan Call Area 2: YB2DX, YB2LSR, YB2ECG, YB2TJV, YB2VTO, YB2BOB, YB2CPO, YB2OBL, YB2SSB, YC2BBY, YC2JKG, YC2JVX, YC2KME, YC2PQW, YD2DNA dan "bon-bonan" dari Call Area 3: YB3MM dan YB3PXF sebagai Tim Kontes YE2R 2009.
Dengan perolehan score 2.254.293 untuk penampilan perdana dan menempati urutan #1 CQWW SSB Multi- Two INDONESIA, atau urutan #5 CQWW SSB Multi-Two OCEANIA, ini benar-benar sebuah prestasi yang cukup membanggakan untuk tahap awal.

Tahun 2010:
Untuk meng-optimalkan keberhasilan pada kontes CQWW 2010, anggota tim ditata kembali untuk akhirnya menurunkan konfigurasi operator "Multi call areas": YB1TJ, YB1WR, YB2CPO, YB2DX, YB2ECG, YB2LSR, YB2TJV, YB2VTO, YC2BBY, YB3MM, YB3KM, YB3PXF, dan YB9WZJ.
Hasil yang diperoleh sungguh luar biasa: score 4.999.390 menjadikan YE2R juara # 1 INDONESIA dan Juara #4 OCEANIA.

Tahun 2011 :
Keberhasilan dalam kontes CQWW dua tahun berturut- turut membulatkan tekad para anggota YE2R untuk tetap eksis di kancah kompetisi internasional.
Setelah rapat pada pertengahan Agustus 2011 di ORDA Jateng di Semarang, diputuskan bahwa Tim YE2R akan berlomba di kategori Multi-Multi di CQWW 2011 SSB, yang merupakan sebuah keputusan yang berani, namun berkat tekad dan kerjasama yang solid diantara para anggota tim semua halang rintang dalam persiapan menuju hari kompetisi bisa diatasi tanpa banyak kesulitan yang berarti
Pada hari-H diturunkan konfigurasi operator yang ter- diri dari YBØAI, YB1AR, YB1HK, YB1TJ, YB2DX, YB2BBY, YB2ECG, YB2LSR, YB2TET, YB2TJV, YB2VTO, YB3MM, YB3KM, YB3PXF, YB4IR dan YB9WZJ.

Walaupun kondisi propagasi agak kurang bersahabat, perolehan score tim YE2R yang membukukan 4,801
QSO dengan Total Score 7,621,077, yang kembali me- nempatkannya pada ranking YB #1 dan OC #3 untuk kategori Multi Operator Multi Transmitter tetap dapat di masukkan kategori luar biasa, kembali membulatkan tekad untuk dapat mengulang kembali kenangan seba- gai a very solid multi call areas & multi gender team work yang sudah 3 tahun berturut-turut menempatkan Grobogan pada peta konstelasi DX-Contest-ers tingkat dunia !!!

Tahun 2012 :
Menjelang CQWW Contest 2012, terbersit dalam ingat- an beberapa rekan penggiat YE2R untuk memberi nama atau identitas pada "kelompok" DX-ers ini. Me- lalui beberapa pertimbangan akhirnya dipilih nama DRAGON DX Club, dan tanggal 29 Februari 2012 disepakati sebagai hari kelahirannya.
Ini karena tahun 2012 (yang menurut kalender Cina dikenal sebagai tahun ber-shio Naga) ditengarai (dan diharapkan) sebagai tahun yang membawa banyak keberuntungan dan kisah sukses bagi rekan amatir yang tergabung di dalamnya, a. l.:
1. Ada dua pasang penggiat DDXC yang melangsung- kan pernikahannya di tahun Naga ini, yaitu YB2VTO dengan YB2BBY dan YB2TET dengan YB3MM.
2. YB2TJV, salah satu penggiat DDXC yang lain menda- patkan tambahan harmonic berupa seorang bayi naga kecil (Little Dragon) dalam keluarganya.
Dan last but not least, tanggal 29 Februari 2012 dipilih sebagai hari kelahiran club, karena tahun 2012 adalah tahun kabisat menurut perhitungan tahun Gregorian, sehingga tidak (terlalu) perlu untuk dipikirkan bagai- mana merayakan HUT-nya pada tiap tahun ;-)

BTW, Club ini bersifat "terbuka" (= TIDAK eksklusip), dalam arti anggotanya tidak harus larut dalam tabrak- an kepentingan (conflict of interest) antara keanggo- taannya dalam DDXC dan keanggotaan dalam klub- klub lain, termasuk Club stations (kalau misalnya ada) di ORLOK atau ORDA-nya. Sebagai contoh, misalnya dengan posisi YB2DX sebagai Contesting Coordinator pada YBDXC, seperti juga YB2TJV yang bisa (dan harus) berdiri dengan masing-masing satu kaki berpijak di DDXC dan YBDXC.
Dan, DRAGON DX Club hanyalah sekedar SEBUAH NAMA (paling juga buat disablon di kaos, atau tercetak di QSL-card) yang jelas bukan pengganti call sign resmi YE2R, yang tetap dan selalu akan menjadi callsign ke- banggaan bagi tiap anggotanya, sehingga TIDAK AKAN TERJADI ada anggota yang lalu me"lafal"kan: CQ DX CQ DX CQ DX, this is DDXC, Dragon DX Club from Grobog- an, Indonesia calling DX and standing bye ... atau di sela suatu pile up akan meneriakkan: Dee-dee-ex-cee atau Delta-delta-x-ray-charlie .....

Aktifitas :
Sejak 2009 aktifitas DDXC selama ini hanya pada kei- kut sertaan pada kontes CQWW SSB, yang tentunya harus bisa ditingkatkan dengan keikut sertaan pada kontes-kontes internasional lainnya, pada berbagai kategori dengan berbagai mode yang tidak terbatas pada SSB saja.
Lebih dari itu tentunya diharapkan DDXC juga bisa berkiprah khususnya pada berbagai faset kegiatan DX- ing lainnya, misalnya dalam berbagi pengalaman, memberikan penataran dan pelatihan (atau "pembe- kalan") kiat-kiat DX-ing (termasuk meningkatkan ke- mampuan dalam CW) dalam rangka regenerasi dan talent scouting bibit-bibit unggul DX-ers dari Lokal-lokal di ORDA Jateng, DIY dan sekitarnya.
Rencana dalam waktu dekat stasiun YE2R — DRAGON DX Club akan mengambil bagian (lagi) dalam kontes CQWW SSB 2012 pada 27-28 Oktober 2012, dengan mengambil tempat di QTH Hans Budiono YB2DX, Jl. Pierre Tendean 17, Purwodadi - Grobogan 58111 ■

http://www.yb0ko.com/2012/10/confirming-qsos-am-i-in-his-log.html

DX-ing trick of the month

"Confirming QSOs - Am I in His Log ?"

Judul lengkapnya "Confirming QSOs - Am I in His Log ?" - potongan artikel yang ditulis Bernie W3UR pada kolom How's DX di QST - December 2011 ini lalu di CoPas dan diunggah ke milist YBDXC oleh OM Hen YCØQR.
Karena cukup menarik dan aktual, potongan artikel tersebut Ed. CoPas lagi ke e-QSP edisi ini (persis “as it is” dalam bhs Inggris, karena takut di sana-sini salah terjemahannya kalau harus disadur ulang dulu [Ed.]

Everyone who has been DXing for more than a few mi- nutes and has worked a DX station then afterward won- der to themselves and even to others "was that a good QSO?".
Whether on SSB,CW,RTTY or the other digital modes, it happens. The DX station will say something like "W3U YOU ARE 599".
You come back and give your full call one or more times, hoping the DX station gets it this time, and then give the DX station a report back. This is immediately followed by the DX station sending TU or thank you as he continues along his way through the pileup.
Seconds later you are left scratching your head, won- dering did he get your full call sign correct or not?. All he said was thanks and went back to the pileup. Even your friends won't be able to help you to know for sure that the DX station indeed got your full call.
So how do you make sure the DX station gets your full correct call sign? Here's a trick I learned from my good friend and next door neighbor Frank Donovan, W3LPL. Never, and I mean NEVER, give the DX station a signal report until you know he has your call sign cor- rectly. So when the DX station say, for example, "W3U YOU ARE 599", call him again giving only your call sign and not a report. Wait for him to give your full call and report again. Once you are sure he has your full and complete call sign, then give the report.
If everyone in the pileup of the DX station did this, the DX operator would eventually figure it out.
The DX station on the other hand is not at fault for sending W3U U R 599. After all he may not have not copied the full call sign and it is his job to keep the pileup moving.
Sending W3U? just gets many to continue calling be- cause some don't listen carefully enough. Instead, the DX station need to get as much of the call sign as pos- sible and then give the report to keep the rest in the pileup "thinking and having the feeling" that this op knows how to operate. At the same time it is extremely important for the DX station to send the full call sign of the station he just worked and some kind of confirmation such as TU on CW or THANK YOU on Phone.

Hmmm, menarik ... dan semoga bisa jadi salah satu trick yang bisa digunakan dalam DX-ing untuk menghindari note dari DX station : "SRI U R NOT IN MY LOG".

OM,

Semoga gak masuk black list ah - knapa masuk wong saya anak baik2 koq, sebelumnya sih dia balas QSO yang dari Timor Leste 4W0VB dan 4W0VB/P.
Yang QSL dari Montenegro sih sebenarnya sdh confirmed dari 4O3A via LoTW, tapi mumpung saya juga mau kirim yg SU9VB dan E40VB ya sekalian deh untuk 4O7VB juga masukin.

73 es semoga

OM Hen,

Ini saya cuma menyampai kan pesan dari Vladimir, dia bilang semua qsl cards buat YB land belum tentu dia balas, kalau pun dia balas "it will be at my own leisure time" katanya

Kenapa? Karena dia sangat kesal dgn para pengurus ORARI, soalnya dia mau portable tahun depan dari YB8 and YB9 tapi ngga ada yg mau bantu untuk mendapatkan license nya.

Beliau juga sering kirim email ke saya minta bantuan, ya saya bantu sebisa mungkin, oleh karena daerah yg di tuju daerah 8 dan 9 saya ngga bisa ber buat banyak.
Saya cuma bisa menerus kan permintaan ijin portable beliau ke beberapa rekan pengurus di daerah 8 dan 9, but sampe hari ini tidak ada hasilnya, meskipun saya sudah pernah contact dgn (yg kata nya pengurus di ORDA 8 dan 9) di freq., but saya kasih email nya ke si Vlad, tetep ngga di bales ...

Sama juga email saya kepada para pengurus ORARI daerah 8 and 9, no answer ....

Beliau email ke ORPUS pun sudah, but no answer juga ...

So, mudah2an qsl cards anda di bales si Vlad, kalo anda bukan yg termasuk di black list nya hehehehe

Good luck es 73,

Iwan - W7NZ

Saya pernah kirim email ke Vlad, minta supaya bisa pake GS karena seingat saya pesannya PayPal.
Yang kontak dg Mesir SU9VB tahun 2011 gak ada jawaban - "missing in action" kali QSL card saya, untungnya sih bukan pirate seperti yg saya khawatirkan.

Harusnya, urusan pribadi jangan sampai mempengaruhi untuk yang lain.

Next time, kalau OM Iwan ber email dgn Vlad, sampaikan aja hal itu. Kita mengharapkan jiwa besarnya dan jangan sampai merugikan teman2 YB Land yg lain yang tidak tahu menahu ttg permasalahan pribadi Vlad dgn pihak Orari dan dikaitkan dgn masalah QSLing antar Amatir Radio.

OM Hen,

Iya org nya memang baik kok, cuma di buat kesal sama se jumlah org tertentu saja ..

Lagi di pile up aja malah sempet ngobrol dulu sama saya, ya nanyain ttg gimana dapetin ijin portable nya dan complaint yg di email ngga jawab2.. hehe

Ya good luck,semoga anda di confirmed semua qsl cards anda, kalo menurut qrz.com all African contacts sudah dikirim semua katanya ...

http://www.dxcoffee.com/eng/2012/10/08/1a-dx-history-started-years/

1A: A DX WHOSE HISTORY STARTED MORE THAN NINE HUNDRED YEARS AGO

There are some DXCC entities, which, regardless their position in the “most wanted” list, send the DXers’ hearts throbbing. The Sovereign Military Order of Malta is doubtless one of them. According to “The DX Magazine” it occupies the 79th position in the list of the worldwide most wanted Countries. For the American West Coast it is a “most wanted” included among the first 30 elements of the list, it occupies nearly the 44th position in Asia and in Japan. Only in Europe it is after the 100th position but this does not seem to frighten European DXers, whose calls produce the insuperable wall against which the expectations of all those who hoped to obtain even just a QSO were wretched.

Why is the SMOM Country?

The Order of Malta, fortified by its more than nine hundred years history, analyses the reality according to a perspective we could define patient and “millenary”. That’s why determination is an essential element for those who want to come into contact with such an ancient and prestigious institution.

And it was exactly thanks to a group of Roman people’s strong determination that SMOM was added among the entities admitted inside the prestigious DX Century Club on 29th September 1981 (with the QSL confirmation from January 1982).

Certainly, if all that has been done it is thanks to those who have believed in this project from the beginning, putting a lot of effort in it. I make reference to the historical core composed of Mario Gallavotti I0MGM, Mario Monaco I0MXM, Alfonso Porretta I0AMU, Tony Privitera I0IJ, Antonio Vernucci I0JX and many others I am not able to list but who struggled in order for the extraordinary peculiarities of the Order of Malta to be recognized by the ARRL in the 1980s. Many months spent studying the complicated and troubled history of the Order gave to Rome the prerogative to be the only capital city which can boast three DXCC entities in its territory.

Only few people know that the 1A prefix was chosen in occasion of the first programmes, precisely in the 1980s, following the praxis of that period, according to which other “particular” entities used the prefixes of the 1AA-1ZZ group, which was not allocated by the ITU. It was, in fact, a set which was left free for the radio amateur activities that sprang from “ambiguous” or “contested” territories. In those years, Spratly used 1S, while the operations from Minerva Reef took place through the 1M prefix. So, the Capitolian team decided to adopt 1A, which had never been used before, trying to underline that the activities did not take place from the Italian territory. From that moment, this decision was never questioned, but the suffix was debated. In those years, a 1A0A station sounded like a piratical operation. You should forget today call-sign trends characterized by shorter and shorter contests; that’s why the two letters KM (Knight of Malta) were chosen. In that way the agreement was reached and 1A0KM made history in DX.

The birth of 1A0C

The circumstances, which actually led to the birth of the first operating station from the Sovereign Military Order of Malta, are, also, famous for unfortunate reasons. In fact, 1A0KM was born in order to support the communications between the unities of the Order that operated in the territories shaken by the terrible 1980 earthquakes and the head office of Rome. To a certain extent, 1A0C was born in similar circumstances. In fact, some CISOM radio amateurs (the Order of Malta's Italian Relief Corps) felt the need to study the aspect concerning emergency communications in depth.

A large scale project concerning precisely this theme had been prepared for a long time and, more than one year before, some radio amateur call-signs had been issued by the Grand Magistry and the Reliefs Corps had then assigned them to some operators. So, the emergency of the earthquake in Emilia has completely changed the situation, showing all its dramatic power and underlining the importance of these skills in the backgrounds in which CISOM operates every day.

An entity which is difficult to avtivate

However, as it is known, it is necessary to be aware of the difference between permissions and authorizations to exert a station from the territory of this DXCC entity.

Permissions to install a station as a radio amateur are granted in very small quantities and always in periods of the year in which diplomatic and service activities allow it. These are usually short periods and they often do not coincide with the best propagation openings, where it is necessary to manage various stations work simultaneously in a yard which is only 100 meters long and 70 meters wide.

The way in which angles, paths, radials encumbrances and anchorages have to be analysed has to be much more similar to a "Tetris" field than to a "field day". Everything has to perfectly fit in in a background where many compromises come into place between the performances and the aerials dimensions. Eventually, some choices have to be taken and it is bound to renounce to something. This year, this meant for us the fact of not working on 160 meters.

Moreover, difficulties concerning equipment are not the only ones that people operating through 1A have to meet. Rome, as all big cities, is characterized by a quite high noise level. Actually, the attempt is to obtain the best possible result dealing with any kind of noise. But, regardless all these difficulties, the excitement felt when transmitting from that small plot of land in the heart of a big city is unique.

41.000 QSO in 4 days

From the outside, it is almost impossible to judge an expedition considering all the factors. Certainly from the inside, a team knows if the group dynamics have well operated and whether the expected goals have been achieved or not. I think 41000 QSO in such a short time can place this activity among the greatest successes of the thirty-year history of this prefix. The preliminary works which led us to this event have been long and tiring. From the very first moment we knew we wouldn't have been able to do all that we would have to. That's why we have decided to invest all our strengths in two definite areas of the world: the USA (in particular the West Coast) and Japan. Moreover, these are the areas with the highest OM density and with the greatest number of attempts in search of the QSO with an Order of Malta station. The propagation, even if it is in a better period of the solar cycle than the activities in 2007, gave us two powerful "flares",
which have considerably reduced the possibilities of DX during two out of the four periods

of work. To be honest, I think with America it would have been hard to do something better, but the result could have been better towards Asia. Unfortunately, towards that direction physical obstacles are numerous and signals coming from Japan are faint and difficultly decipherable (because of a high pile-up). Maybe the situation could have been improved by inserting a Japanese operator inside the team. He/She would have been able to speed up QSO in SSB, using his/her mother-tongue. But unfortunately, we have not been able to recruit a Japanese colleague in due time for the activation.

Modern by tradition

I would like to conclude this short report of the 1A0C activity by a hint at the fund-raising campaign in favour of the CISOM. I would like to thank individually all the people who contributed to the initiative through a small or notable grant. The funds raised will be used for the purchase of radio equipment, which will be employed by CISOM in emergency situations, where it constantly operates. As soon as possible, we will furnish you the proof through a detailed report.

I personally believe seeing that in this period of worldwide economic crisis radio amateurs engage in solidarity, with no cultural barrier, is beautiful (and the simplicity of this word is not fortuitous at all). Evidence of this: the international origin of the offers we are collecting.

So, while we take down the radio amateurs' equipment from the villa, our eyes fall on a series of panels temporarily prepared in the yard. A series of images, taken in the most desolate and sorrowful places of the world, where the humanitarian activities of the Order of Malta are immortalized. Among them, three sentences which have stricken me stand out: the first one states "Let's go where the others do not want to go"; the second one states "Let's do what the others do not want to do"; the third concludes "We are the last ones to go away". So, while I close the Hexbeam in its box, I feel proud of having taken part, even just for a few days, of this almost millenary glorious history.

1A0C: the 6 meters adventure

by Jose Ramon Hierro Peris

Having the idea of activating the SMOM during summer the 6 metre band came first to our minds.and with the lack of a firm F2 so far this cycle to offer DX at mid latitudes Sporadic E propagation is always a refuge for the magic band enthusiasts.

Since 1A was added to the DXCC program on September 1981, several aficionados groups have operated from Villa Magistrale dell'Aventino.

Outside of the Sporadic E season in the lower part of the solar cycle few contacts are made using tropospheric ducting and terrestrial communication means.

The ones made in summer on 6 metres with Sergio, IK0FTA, at the key produced contacts to most ham radio populated places via one or two "Es" hops.

At the Aventine's summit, one of the Seven Hills of Rome, you not only can enjoy the quiet atmosphere around but have an almost clean 50 MHz spectrum, which surprised us, considering you are in the middle of a bustling large city.

The antenna location was chosen on the most suitable place to cover North America, Japan and most of the European territory. Our focus was to contact those countries not widely

covered by previous operations, mainly in the Americas and the Far East.

Although the Sporadic E mechanisms are not very clear yet, it is widely accepted that high solar activity does not favor it. Before and during our four days stay El Sol was very flare productive. There were 81 C and 15 M class flares during a 9 days period. X-Ray radiations from those events sparked off plentiful radio blackouts on the HF bands, obvious on 50 MHz.

Whatsoever the reason was, the only full day with the fun of a strong Es was the first one, 1 July. At 9:51 UTC was the kick off. And the band folded at 19Z. The next day the band looked promising but shortly after noon only weak footprint openings showed. Meanwhile the band was Es absent, although we were not in the middle of an important meteor shower, we managed to log lots of stations reflected off the rocks,not forgetting reflections off Saint Peter's Dome, as Sergio, IK0FTA, suggested.

We were not able to hear or to be heard in Japan but managed to grab some 23 QSOs with North America in two brief openings via Es multihop.

Notwithstanding the bad propagation, ending with 2125 QSOs, 57 different DXCC entities in 4 continents fulfilled our expectations for such short operating time.

What is CISOM?

The Order of Malta's Italian Relief Corps (CISOM), counts some 3000 volunteers (medical, paramedical staff and assistants) in the three North-Centre-South units into which the corps is divided in Italy. Founded in 1970, it carries out rescue and assistance operations during natural disasters. It intervened during the earthquakes in Irpinia, Umbria, Puglia, Basilicata and Abruzzo.
In addition to its work in Italy, the Corps has also participated in international humanitarian initiatives such as the consignment of food aid for children in Hungary after the collapse of the Soviet bloc (1990) and, more recently, in Kosovo and in the entire Balkan region.

What is the SMOM?

The Sovereign Order of Malta is a sovereign body as provided by international law. The Order – based in Rome, on via Condotti, has its own government, an independent magistracy, bilateral diplomatic relations with 104 countries and is granted the status of Permanent Observer in many international organisations such as the United Nations. The six Grand Priories, six Subpriories and 47 National Associations of Knights on five continents manage its operational activities. The Order issues its own passports and stamps and creates public institutions, endowed with judicial autonomy. The Order's day to day life is governed by a Constitution and Code, reformed in 1997.

The Grand Master governs the Order both as sovereign and religious head. He is elected for life, within the professed knights in perpetual vows. He is assisted by and presides over the Sovereign Council, which is composed of four high offices – Grand Commander, Grand Chancellor, Grand Hospitaller, and Receiver of the Common Treasure – as well as six other members, all elected by the Order's Chapter General for a five-year term. The Council of Government and the Board of Auditors, whose compositions reflect the international character of the Order, assist the Grand Master and the Sovereign Council. The Chapter General also elects these two bodies for a five-year term.

DX-ers'corner . . . . . .

The DRAGON DX-ers Club

Tim kontes CQWW YE2R: sebuah awal mula ...

Rerasanan tentang DDXC – Dragon DX Club, tak pelak kita harus merujuk kepada YE2R, Tim kontes pada CQWW yang telah berkiprah sejak dari tahun 2009.
Sekitar kwartal pertama tahun itu, dalam 'ngobrol-'ngobrol santai antara Hans YB2DX dan Seno YB2LSR terlontar gagasan untuk membentuk sebuah tim kon- tes yang melibatkan rekans DX-ers (terutama) dari Call Area 2, untuk bisa di"terjun"kan pada beberapa kontes internasional.
Sementara menjajagi kesediaan beberapa rekan untuk bergabung, mereka berdua menemui (untuk memo- hon advise) dari YB2AA, Ketua ORDA Jawa Tengah, yang ternyata menyetujui dan sangat mendukung ga- gasan tersebut.
Melewati beberapa proses, akhirnya didapatkan call- sign YE2R, yang kemudian disepakati bersama untuk digunakan pada kontes CQWW 2009 - SSB, dengan kategori yang pada mulanya masih belum ditentukan. Seiring berjalannya waktu, akhirnya ditentukan keikut- sertaan dalam kategori Multi-Two, dengan melibatkan DX-ers andalan Call Area 2: YB2DX, YB2LSR, YB2ECG, YB2TJV, YB2VTO, YB2BOB, YB2CPO, YB2OBL, YB2SSB, YC2BBY, YC2JKG, YC2JVX, YC2KME, YC2PQW, YD2DNA dan "bon-bonan" dari Call Area 3: YB3MM dan YB3PXF sebagai Tim Kontes YE2R 2009.
Dengan perolehan score 2.254.293 untuk penampilan perdana dan menempati urutan #1 CQWW SSB Multi- Two INDONESIA, atau urutan #5 CQWW SSB Multi-Two OCEANIA, ini benar-benar sebuah prestasi yang cukup membanggakan untuk tahap awal.

Tahun 2010:
Untuk meng-optimalkan keberhasilan pada kontes CQWW 2010, anggota tim ditata kembali untuk akhirnya menurunkan konfigurasi operator "Multi call areas": YB1TJ, YB1WR, YB2CPO, YB2DX, YB2ECG, YB2LSR, YB2TJV, YB2VTO, YC2BBY, YB3MM, YB3KM, YB3PXF, dan YB9WZJ.

Hasil yang diperoleh sungguh luar biasa: score 4.999.390 menjadikan YE2R juara # 1 INDONESIA dan Juara #4 OCEANIA.

Tahun 2011 :
Keberhasilan dalam kontes CQWW dua tahun berturut- turut membulatkan tekad para anggota YE2R untuk tetap eksis di kancah kompetisi internasional.
Setelah rapat pada pertengahan Agustus 2011 di ORDA Jateng di Semarang, diputuskan bahwa Tim YE2R akan berlomba di kategori Multi-Multi di CQWW 2011 SSB, yang merupakan sebuah keputusan yang berani, namun berkat tekad dan kerjasama yang solid diantara para anggota tim semua halang rintang dalam persiapan menuju hari kompetisi bisa diatasi tanpa banyak kesulitan yang berarti
Pada hari-H diturunkan konfigurasi operator yang ter- diri dari YBØAI, YB1AR, YB1HK, YB1TJ, YB2DX, YB2BBY, YB2ECG, YB2LSR, YB2TET, YB2TJV, YB2VTO, YB3MM, YB3KM, YB3PXF, YB4IR dan YB9WZJ.
Walaupun kondisi propagasi agak kurang bersahabat, perolehan score tim YE2R yang membukukan 4,801
QSO dengan Total Score 7,621,077, yang kembali me- nempatkannya pada ranking YB #1 dan OC #3 untuk kategori Multi Operator Multi Transmitter tetap dapat di masukkan kategori luar biasa, kembali membulatkan tekad untuk dapat mengulang kembali kenangan seba- gai a very solid multi call areas & multi gender team work yang sudah 3 tahun berturut-turut menempatkan Grobogan pada peta konstelasi DX-Contest-ers tingkat dunia !!!

Tahun 2012 :
Menjelang CQWW Contest 2012, terbersit dalam ingat- an beberapa rekan penggiat YE2R untuk memberi nama atau identitas pada “kelompok” DX-ers ini. Me- lalui beberapa pertimbangan akhirnya dipilih nama DRAGON DX Club, dan tanggal 29 Februari 2012 disepakati sebagai hari kelahirannya.
Ini karena tahun 2012 (yang menurut kalender Cina dikenal sebagai tahun ber-shio Naga) ditengarai (dan diharapkan) sebagai tahun yang membawa banyak keberuntungan dan kisah sukses bagi rekan amatir yang tergabung di dalamnya, a. l.:
1. Ada dua pasang penggiat DDXC yang melangsung- kan pernikahannya di tahun Naga ini, yaitu YB2VTO dengan YB2BBY dan YB2TET dengan YB3MM.
2. YB2TJV, salah satu penggiat DDXC yang lain menda- patkan tambahan harmonic berupa seorang bayi naga kecil (Little Dragon) dalam keluarganya.
Dan last but not least, tanggal 29 Februari 2012 dipilih sebagai hari kelahiran club, karena tahun 2012 adalah tahun kabisat menurut perhitungan tahun Gregorian, sehingga tidak (terlalu) perlu untuk dipikirkan bagai- mana merayakan HUT-nya pada tiap tahun ;-)

BTW, Club ini bersifat “terbuka” (= TIDAK eksklusip), dalam arti anggotanya tidak harus larut dalam tabrak- an kepentingan (conflict of interest) antara keanggo- taannya dalam DDXC dan keanggotaan dalam klub- klub lain, termasuk Club stations (kalau misalnya ada) di ORLOK atau ORDA-nya. Sebagai contoh, misalnya dengan posisi YB2DX sebagai Contesting Coordinator pada YBDXC, seperti juga YB2TJV yang bisa (dan harus) berdiri dengan masing-masing satu kaki berpijak di DDXC dan YBDXC.
Dan, DRAGON DX Club hanyalah sekedar SEBUAH NAMA (paling juga buat disablon di kaos, atau tercetak di QSL-card) yang jelas bukan pengganti call sign resmi YE2R, yang tetap dan selalu akan menjadi callsign ke- banggaan bagi tiap anggotanya, sehingga TIDAK AKAN TERJADI ada anggota yang lalu me”lafal”kan: CQ DX CQ DX CQ DX, this is DDXC, Dragon DX Club from Grobog- an, Indonesia calling DX and standing bye ... atau di sela suatu pile up akan meneriakkan: Dee-dee-ex-cee atau Delta-delta-x-ray-charlie .....

Aktifitas :
Sejak 2009 aktifitas DDXC selama ini hanya pada kei- kut sertaan pada kontes CQWW SSB, yang tentunya harus bisa ditingkatkan dengan keikut sertaan pada kontes-kontes internasional lainnya, pada berbagai kategori dengan berbagai mode yang tidak terbatas pada SSB saja.
Lebih dari itu tentunya diharapkan DDXC juga bisa berkiprah khususnya pada berbagai faset kegiatan DX- ing lainnya, misalnya dalam berbagi pengalaman, memberikan penataran dan pelatihan (atau “pembe- kalan”) kiat-kiat DX-ing (termasuk meningkatkan ke- mampuan dalam CW) dalam rangka regenerasi dan talent scouting bibit-bibit unggul DX-ers dari Lokal-lokal di ORDA Jateng, DIY dan sekitarnya.
Rencana dalam waktu dekat stasiun YE2R — DRAGON DX Club akan mengambil bagian (lagi) dalam kontes CQWW SSB 2012 pada 27-28 Oktober 2012, dengan mengambil tempat di QTH Hans Budiono YB2DX, Jl. Pierre Tendean 17, Purwodadi - Grobogan 58111 ■

OM Hen, tadi waktu saya masuk besar sekali, mungkin propagasinya tiba2 menutup.
Tadi malam sekitar jam 16z TT8TT di 14.280 juga besar padahal siang dan sorenya sama sekali tdk terdengar, tapi pile up nya rame sekali, saya yang hanya pakai 1 elemen terpaksa monitor saja sambil sekali2 teriak tapi tetap nggak bisa masuk juga....

Subject: [YBDXC_News] 3D2MM & VK9XM

Sesuai spot di cluster pagi ini :

3D2MM spot VK9XM di 28.490MHz jam 00.12UTC
YB1UUN spot 3D2MM strong here di 28.485MHz jam 00.26UTC
YB6NE spot 3D2MM tnx simplex di 28.485MHz jam 00.33UTC

terakhir :

W6FTA spot 3D2MM di 28.485MHz jaM 00.40UTC

Tapi dari jam 00.51 sampai sekarang 01.01UTC, saya gak mendengar signal mereka sama sekali kecuali suara2 mirip nelayan2 asing. cmiiw.

Kemanakah mereka (VK9XM dan 3D2MM) pergi..?

I miss you - I need you

OM Uun,
Saya terlambat monitor dong ya, karena baca2 koran & buku dulu di bawah.
Kalo lihat di QRZ.com memang kondisinya "poor" dan "fair" gak ada yug good, padahal saya berharap justru karena di VOACAP untuk kita ke Fiji & Xmas island lebih memungkinkan berhasilnya.

Kemarin2 sih utk ke Africa saya lebih berhasil di 10M ketimbang di 15M, pernah kontak dg africa (lupa CS) walaupun signalnya hampir gak gerakin garis S-meter, tapi modulasinya terbaca dan dia bisa dengar saya juga bagus.

Sabar.....

DX-ers'corner . . . . . .

The DRAGON DX-ers Club

Tim kontes CQWW YE2R: sebuah awal mula ...

Rerasanan tentang DDXC – Dragon DX Club, tak pelak kita harus merujuk kepada YE2R, Tim kontes pada CQWW yang telah berkiprah sejak dari tahun 2009.
Sekitar kwartal pertama tahun itu, dalam 'ngobrol-'ngobrol santai antara Hans YB2DX dan Seno YB2LSR terlontar gagasan untuk membentuk sebuah tim kon- tes yang melibatkan rekans DX-ers (terutama) dari Call Area 2, untuk bisa di"terjun"kan pada beberapa kontes internasional.
Sementara menjajagi kesediaan beberapa rekan untuk bergabung, mereka berdua menemui (untuk memo- hon advise) dari YB2AA, Ketua ORDA Jawa Tengah, yang ternyata menyetujui dan sangat mendukung ga- gasan tersebut.
Melewati beberapa proses, akhirnya didapatkan call- sign YE2R, yang kemudian disepakati bersama untuk digunakan pada kontes CQWW 2009 - SSB, dengan kategori yang pada mulanya masih belum ditentukan. Seiring berjalannya waktu, akhirnya ditentukan keikut- sertaan dalam kategori Multi-Two, dengan melibatkan DX-ers andalan Call Area 2: YB2DX, YB2LSR, YB2ECG, YB2TJV, YB2VTO, YB2BOB, YB2CPO, YB2OBL, YB2SSB, YC2BBY, YC2JKG, YC2JVX, YC2KME,

YC2PQW, YD2DNA dan “bon-bonan” dari Call Area 3: YB3MM dan YB3PXF sebagai Tim Kontes YE2R 2009.
Dengan perolehan score 2.254.293 untuk penampilan perdana dan menempati urutan #1 CQWW SSB Multi- Two INDONESIA, atau urutan #5 CQWW SSB Multi-Two OCEANIA, ini benar-benar sebuah prestasi yang cukup membanggakan untuk tahap awal.

Tahun 2010:
Untuk meng-optimalkan keberhasilan pada kontes CQWW 2010, anggota tim ditata kembali untuk akhirnya menurunkan konfigurasi operator “Multi call areas”: YB1TJ, YB1WR, YB2CPO, YB2DX, YB2ECG, YB2LSR, YB2TJV, YB2VTO, YC2BBY, YB3MM, YB3KM, YB3PXF, dan YB9WZJ.
Hasil yang diperoleh sungguh luar biasa: score 4.999.390 menjadikan YE2R juara # 1 INDONESIA dan Juara #4 OCEANIA.

Tahun 2011 :
Keberhasilan dalam kontes CQWW dua tahun berturut- turut membulatkan tekad para anggota YE2R untuk tetap eksis di kancah kompetisi internasional.
Setelah rapat pada pertengahan Agustus 2011 di ORDA Jateng di Semarang, diputuskan bahwa Tim YE2R akan berlomba di kategori Multi-Multi di CQWW 2011 SSB, yang merupakan sebuah keputusan yang berani, namun berkat tekad dan kerjasama yang solid diantara para anggota tim semua halang rintang dalam persiapan menuju hari kompetisi bisa diatasi tanpa banyak kesulitan yang berarti
Pada hari-H diturunkan konfigurasi operator yang ter- diri dari YBØAI, YB1AR, YB1HK, YB1TJ, YB2DX, YB2BBY, YB2ECG, YB2LSR, YB2TET, YB2TJV, YB2VTO, YB3MM, YB3KM, YB3PXF, YB4IR dan YB9WZJ.
Walaupun kondisi propagasi agak kurang bersahabat, perolehan score tim YE2R yang membukukan 4,801
QSO dengan Total Score 7,621,077, yang kembali me- nempatkannya pada ranking YB #1 dan OC #3 untuk kategori Multi Operator Multi Transmitter tetap dapat di masukkan kategori luar biasa, kembali membulatkan tekad untuk dapat mengulang kembali kenangan seba- gai a very solid multi call areas & multi gender team work yang sudah 3 tahun berturut-turut menempatkan Grobogan pada peta konstelasi DX-Contest-ers tingkat dunia !!!

Tahun 2012 :
Menjelang CQWW Contest 2012, terbersit dalam ingat- an beberapa rekan penggiat YE2R untuk memberi nama atau identitas pada “kelompok” DX-ers ini. Me- lalui beberapa pertimbangan akhirnya dipilih nama DRAGON DX Club, dan tanggal 29 Februari 2012 disepakati sebagai hari kelahirannya.
Ini karena tahun 2012 (yang menurut kalender Cina dikenal sebagai tahun ber-shio Naga) ditengarai (dan diharapkan) sebagai tahun yang membawa banyak keberuntungan dan kisah sukses bagi rekan amatir yang tergabung di dalamnya, a. l.:
1. Ada dua pasang penggiat DDXC yang melangsung- kan pernikahannya di tahun Naga ini, yaitu YB2VTO dengan YB2BBY dan YB2TET dengan YB3MM.
2. YB2TJV, salah satu penggiat DDXC yang lain menda- patkan tambahan harmonic berupa seorang bayi naga kecil (Little Dragon) dalam keluarganya.
Dan last but not least, tanggal 29 Februari 2012 dipilih sebagai hari kelahiran club, karena tahun 2012 adalah tahun kabisat menurut perhitungan tahun Gregorian, sehingga tidak (terlalu) perlu untuk dipikirkan bagai- mana merayakan HUT-nya pada tiap tahun ;-)

BTW, Club ini bersifat “terbuka” (= TIDAK eksklusip), dalam arti anggotanya tidak harus larut dalam tabrak- an kepentingan (conflict of interest) antara keanggo- taannya dalam DDXC dan keanggotaan dalam klub- klub lain, termasuk Club stations (kalau misalnya ada) di ORLOK atau ORDA-nya. Sebagai contoh, misalnya dengan posisi YB2DX sebagai Contesting

Coordinator pada YBDXC, seperti juga YB2TJV yang bisa (dan harus) berdiri dengan masing-masing satu kaki berpijak di DDXC dan YBDXC.
Dan, DRAGON DX Club hanyalah sekedar SEBUAH NAMA (paling juga buat disablon di kaos, atau tercetak di QSL-card) yang jelas bukan pengganti call sign resmi YE2R, yang tetap dan selalu akan menjadi callsign ke- banggaan bagi tiap anggotanya, sehingga TIDAK AKAN TERJADI ada anggota yang lalu me”lafal”kan: CQ DX CQ DX CQ DX, this is DDXC, Dragon DX Club from Grobog- an, Indonesia calling DX and standing bye ... atau di sela suatu pile up akan meneriakkan: Dee-dee-ex-cee atau Delta-delta-x-ray-charlie .....

Aktifitas :
Sejak 2009 aktifitas DDXC selama ini hanya pada kei- kut sertaan pada kontes CQWW SSB, yang tentunya harus bisa ditingkatkan dengan keikut sertaan pada kontes-kontes internasional lainnya, pada berbagai kategori dengan berbagai mode yang tidak terbatas pada SSB saja.
Lebih dari itu tentunya diharapkan DDXC juga bisa berkiprah khususnya pada berbagai faset kegiatan DX- ing lainnya, misalnya dalam berbagi pengalaman, memberikan penataran dan pelatihan (atau “pembe- kalan”) kiat-kiat DX-ing (termasuk meningkatkan ke- mampuan dalam CW) dalam rangka regenerasi dan talent scouting bibit-bibit unggul DX-ers dari Lokal-lokal di ORDA Jateng, DIY dan sekitarnya.
Rencana dalam waktu dekat stasiun YE2R — DRAGON DX Club akan mengambil bagian (lagi) dalam kontes CQWW SSB 2012 pada 27-28 Oktober 2012, dengan mengambil tempat di QTH Hans Budiono YB2DX, Jl. Pierre Tendean 17, Purwodadi - Grobogan 58111 ■

Subject: FW: Invitation to 40th SEANET Convention

Dear Sir,

Invitation to participate in 40th SEANET Convention, Kuala Lumpur.

You are cordially invited to take part in the upcoming 40th SEANET Convention which will be held in Kuala Lumpur, Malaysia.

The purpose of this annual event is this can be a place where all the amateur radio members gather and enjoying all the events organized through out the convention period.

We really are hoping that with your participation in this event, will together bring more value added and knowledge sharing to all of us.

Below are the details of the convention :-

Date : 23rd - 27th November 2012

venue : Kuala Lumpur, Malaysia

Contact Person (PIC) - Issac, registration@2012sea.net

Participating fees (Including Accommodation, Transportation & convention events) :USD420

Due date to respond : 15th November2012

For further info, you may either contact Project Director Sharizad Husin via email at seanet2012@mares.org.my or mobile +6017 733 8676.

More info about this convention, you may go to our webpage at www.2012sea.net

Looking forward for your prompt reply to our invitation.

Have a good day ahead.

Regards,

Sharizad "Issac" Husin

9W2RI

Project Director,

40th SEANET Convention,Kuala Lumpur

for Malaysian Amateur Radio Emergency Service

Biasanya gitu OM Zen,

Bawa secangkir kopi, sama snack kalo ada & buku2/majalah juga ada di atas, tapi karena kemarin2nya agak sepi juga jadi santai di bawah dulu.

Sekarang selagi sepi, nyoba nyolder2 bikin interface utk digital - kali aja bisa main juga di digital mode.

boleh juga tuh om hendro, saya sdh punya interfacenya tp cuma bisa RX
doang, mungkin musti ganti jacknya yang pakai ACC dibelakang radio. Tempat
saya tinggal susah cari bahan-bahan buat experimen,
Tinggal di pedalaman payah om hendro, kantor pos saja tidak jual perangko.
jadi kalau saya kirim QSL card musti dikirim ke Jakarta dulu.

Iya OM Hen, VK9XM juga selalu kecil saya terima, untung semalam dapat juga di 40m bareng2 sama OM Yana. Nambah 1 entity lagi buat DDXCC...

OM Uun,
Saya terlambat monitor dong ya, karena baca2 koran & buku dulu di bawah.
Kalo lihat di QRZ.com memang kondisinya "poor" dan "fair" gak ada yug good, padahal saya berharap justru karena di VOACAP untuk kita ke Fiji & Xmas island lebih memungkinkan berhasilnya.

Kemarin2 sih utk ke Africa saya lebih berhasil di 10M ketimbang di 15M, pernah kontak dg africa (lupa CS) walaupun signalnya hampir gak gerakin garis S-meter, tapi modulasinya terbaca dan dia bisa dengar saya juga bagus.

Sabar.......

OM Hen, tadi waktu saya masuk besar sekali, mungkin propagasinya tiba2 menutup.
Tadi malam sekitar jam 16z TT8TT di 14.280 juga besar padahal siang dan sorenya sama sekali tdk terdengar, tapi pile up nya rame sekali, saya yang hanya pakai 1 elemen terpaksa monitor saja sambil sekali2 teriak tapi tetap nggak bisa masuk juga....

Thanks you link QSL Managernya, saya pernah dikirimkan email bahwa dia
nawarin untuk jadi managernya. Cuma saya belum bisa jawab sebab takutnya
saya yang tidak konsisten untuk DX-ing maupun kirim lognya.

OM Zen,
Belum mulus nih - receive/decode sudah OK, yah memang karena cuma pake 1 trafo aja utk sekedar isolasi PC - Rig.
Jack/connector ACC pernah tanya di glodog = 60k - mahal ah..
Ada beberapa skema IF ini, mau coba yg gak pake serial-USB adapter.

OM Zen,
Ini salahsatunya - dibuat oleh KH6TY juga dimuat di QST Maret 2011 dan dimuat di buku "Get on the Air with HF Digital".

Harga 2N4401 = Rp.500,- 1N4148 = Rp 5000,-/100 pcs, R dan C juga gak mahal.
Cuma trafo 1:1 600 ohm apalagi yg pake CT saya belum dapat, jadi sementara saya nyoba skema yg satunya, nanti saya kirimkan juga.

73
hen-yc0qr

Digital VOX Sound Card Interface

October 1, 2011

The final lot of interface kits, boards, and cases, has now sold out, but
you can still build the interface using perfboard, or "dead bug"on a
scrap of circuit board material, from the parts list below.

73, Skip, KH6TY

Transmit audio from the computer is connected to J1, isolated from the
transceiver and doubled in value by T1, and then peak rectified by the
voltage doubler consisting of D1, D2, C1, and C2, which is used to bias
Q1 on, causing it to saturate and pull down the transceiver push-to-talk pin, putting the transceiver into transmit. R5 and VR1 form an
attenuator, and VR1 is used to adjust the transmit audio to the right
level for a clean transmitted signal. Q1 gets its collector voltage from the transceiver push-to-talk circuit, which must be the
common"open-collector" push-to-talk circuit. If this voltage does not
exist, the interface will not work.
This interface is intended to be used with all the popular digital modes
like PSK31, RTTY, Olivia, etc., which modulate a continuous carrier. For modes that require fast attack and recovery times, such as keyboard CW, Hellschreiber, Packet, or Winmor, a serial port switched interface like the Classic Sound Card Interface in the July 2010 QST should be used
instead.
Circuit Board Assembly
Mount and solder all parts to the circuit board as indicated by the legend on the circuit board. Pay close attention to where the "+" ends of the
electrolytic capacitors and the black bands of the diodes are placed
before soldering. Cut and trim each part after soldering, saving the
cutoff ends for making tie points. Mount the resistors and diodes first, then the rest of the parts, and lastly, the tie points. If a hole is
accidentally filled with solder, heat the hole to melt the solder, and
push a sharp round wooden toothpick into the hole. On the opposite side
of the circuit board, melt and draw the solder away from the hole, and

when the solder has cooled, withdraw the toothpick, leaving the hole ready to accept another part. Check that there are no solder bridges between adjacent holes, such as those for the transistor or electrolytic capacitors, and melt away any solder bridges with the soldering iron.

( ) Mount and solder resistor R1, 4.7K (yellow, violet, red, gold)
( ) Mount and solder resistor R2, 2.2K (red, red, red, gold).
( ) Mount and solder resistor R3, 680 ohms (blue, gray , brown, gold).
( ) Mount and solder resistor R4, 10K, (brown, black, orange, gold).
( ) Mount and solder resistor R5, 4.7K, (yellow, violet, red, gold).
( ) Mount and solder D1, 1N4148, with band positioned as shown. D1 is next to R1.
( ) Mount and solder D2, 1N4148, with band positioned as shown. D2 is next to D1.
( ) Mount and solder all pins of J1.
( ) Mount and solder all pins of J2.
( ) Solder all pins of pre-mounted T1.
( ) Solder all pins of pre-mounted T2.
( ) Mount and solder electrolytic capacitor C1, 10 uF/50v, with plus end as shown. C1 is next to R1.
( ) Mount and solder electrolytic capacitor C2, 47 uF/50v, with plus end as shown. C2 is next to Q1.
( ) Mount and solder transistor Q1, 2N4401, with flat positioned as shown. Q1 is between the ends of D2 and R2.
( ) Mount and solder 500 ohm potentiometer, VR1.

Tie points are made by bending the lead cut off from a resistor into a "hairpin" shape, inserting it into the two closely-spaced holes on the circuit board, pushing it down to about 3/16" from the top of the circuit board, and soldering both ends of the hairpin wire on the bottom of the circuit board.

( ) Create a tie point and solder to the two holes marked PTT
( ) Create a tie point and solder to the two holes marked Data in
( ) Create a tie point and solder to the two holes marked Ground
( ) Create a tie point and solder to the two holes marked Data Out

Preparing the Cable to the Transceiver

Decide how long a cable you want to use and cut off the end with the female connector, leaving about 6" of length on the female connector in case you are using an accessory connector, or a microphone connector, other than the 6-pin MiniDin data socket connector supplied with the kit. In this case, plug the male end of the cable into the female end and strip and tin the wires for connecting to the connector you are going to use.

On the cut end of the cable, strip about 3/8" of insulation off, and then strip each wire about 3/16" and tin the wires.

Identifying the Wires

If you are using a microphone plug or an accessory plug that has a DC voltage on it, refer to the transceiver manual for the correct pin connections. Do not connect anything to a pin that has a DC voltage on it, unless it is a microphone input pin.

If you are using the MiniDin data jack on the transceiver, identify each wire by first plugging the cable into the transceiver and turning it on. Touch each of the wires, in turn, to the electrical ground of the transceiver. The wire that makes the transceiver go into transmit is the push-to-talk wire.

( ) Solder this wire to the tie point marked "PTT" on the circuit board.

( ) Touch each of the other wires to the now-identified push-to-talk wire. Solder the one that makes the transceiver go into transmit to the "Ground" tie point.
( ) Run the digital software (like DigiPan - www.digipan.net) and place it in transmit. Verify that you can hear transmit audio coming from the computer speaker.
( ) Connect a stereo audio cable from J1 to the computer speaker or earphone jack and place the transceiver in SSB mode (or FM for FM-only transceivers).
( ) Raise the Windows Volume or Speaker level control slider (and also WAVE slider, if present), until the transceiver switches into transmit.
( ) Using a small screwdriver, turn VR1 fully clockwise.
( ) Touch each of the remaining wires to the tie point marked "Data In" and solder the one that makes the transceiver generate RF output to the "Data In" tie point. If using an FM-only transceiver, monitor with a second receiver, or scanner, and solder the wire to the tie point that produces a transmit audio sound.
( ) With the transceiver still in transmit, adjust VR1 until the transceiver output power is one-third to one-half of maximum rated power.
( ) Place the software into receive mode.
( ) Connect a stereo audio cable from J2 to the computer microphone jack and raise the Windows microphone level control to maximum.
( ) Touch each of the remaining wires to the tie point marked "Data Out" and solder the one that creates visible noise on the waterfall to the "Data Out" tie point.
( ) Cut off the remaining wires and, if present, the cable shield wire.
( ) Solder one end of the longest cut off part lead into one of the remaining holes without any part soldered in it.
( ) Dress the cable between that hole and the last remaining hole, push the free end of the lead around the cable and into the hole, pull tight, and solder. This will act as a strain relief for the cable. This completes the assembly and wiring of the circuit board.
Modifying the Enclosure
Place the wired circuit board into one half of the enclosure. It will not settle down fully because holes for the jacks and cable need to be drilled.
( ) With a pencil, make a mark where each jack and the cable touches the edge of the enclosure.
( ) Remove the circuit board, snap on the other half of the enclosure, and drill a small pilot hole where the edges of the enclosure top and bottom meet, at the place where you made the pencil marks. Leaving the enclosure snapped together, enlarge the pilot holes to 1/4" diameter.
Open the case by inserting a small screwdriver in the indentations where the enclosure halves meet, and twist. Do this on both indentations on one side and the enclosure will pop open. Clear the holes of extra plastic if necessary.
( ) Place the circuit board back into the enclosure. Note which jack is J2, and snap the two halves together.
( ) If not still connected, connect a stereo audio cable from J2 to the computer microphone jack.

( ) If not still connected, connect a stereo audio cable from J1 (the other interface jack) to the computer earphone or speaker jack.
( ) If not still connected, plug the transceiver cable into the transceiver data port, accessory port, or microphone port, depending on which one you are using.
( ) Adjust the Windows Volume Control level until the transceiver goes into transmit when the software is in transmit. The level should be correct from the previous adjustment of VR1. If not, open the case and adjust VR1 until the transceiver is one-third to one-half power, or for an FM-only transceiver, the audio level that is about the same as that for phone operation as heard on a second receiver.
( ) Adjust the Windows Microphone Control level until there is a faint haze of noise on the waterfall. If using DigiPan, it will be yellow on a blue background.
( ) To prevent any possible feedback, it is a good idea to mute both Microphone and Line inputs on the Windows Volume Control panel (not the Recording Control panel, as that is used to control the waterfall signal level).
This completes the assembly and adjustment of the interface. Review each step above if necessary for proper operation of the interface.

OM Zen,
Ini salahsatunya - dibuat oleh KH6TY juga dimuat di QST Maret 2011 dan dimuat di buku "Get on the Air with HF Digital".

Harga 2N4401 = Rp.500,- 1N4148 = Rp 5000,-/100 pcs, R dan C juga gak mahal.
Cuma trafo 1:1 600 ohm apalagi yg pake CT saya belum dapat, jadi sementara saya nyoba skema yg satunya, nanti saya kirimkan juga.

Digital VOX Sound Card Interface

October 1, 2011

The final lot of interface kits, boards, and cases, has now sold out, but
you can still build the interface using perfboard, or "dead bug"on a
scrap of circuit board material, from the parts list below.

73, Skip, KH6TY

Transmit audio from the computer is connected to J1, isolated from the
transceiver and doubled in value by T1, and then peak rectified by the
voltage doubler consisting of D1, D2, C1, and C2, which is used to bias
Q1 on, causing it to saturate and pull down the transceiver push-to-talk pin, putting the transceiver into transmit. R5 and VR1 form an
attenuator, and VR1 is used to adjust the transmit audio to the right
level for a clean transmitted signal. Q1 gets its collector voltage from the transceiver push-to-talk circuit, which must be the
common"open-collector" push-to-talk circuit. If this voltage does not
exist, the interface will not work.
This interface is intended to be used with all the popular digital modes
like PSK31, RTTY, Olivia, etc., which modulate a continuous carrier. For modes that require fast attack and recovery times, such as keyboard CW, Hellschreiber, Packet, or Winmor, a serial port switched interface like the Classic Sound Card Interface in the July 2010 QST should be used

instead.
Circuit Board Assembly
Mount and solder all parts to the circuit board as indicated by the legend on the circuit board. Pay close attention to where the "+" ends of the
electrolytic capacitors and the black bands of the diodes are placed
before soldering. Cut and trim each part after soldering, saving the
cutoff ends for making tie points. Mount the resistors and diodes first, then the rest of the parts, and lastly, the tie points. If a hole is
accidentally filled with solder, heat the hole to melt the solder, and
push a sharp round wooden toothpick into the hole. On the opposite side
of the circuit board, melt and draw the solder away from the hole, and
when the solder has cooled, withdraw the toothpick, leaving the hole
ready to accept another part. Check that there are no solder bridges
between adjacent holes, such as those for the transistor or electrolytic capacitors, and melt away any solder bridges with the soldering iron.
( ) Mount and solder resistor R1, 4.7K (yellow, violet, red, gold)
( ) Mount and solder resistor R2, 2.2K (red, red, red, gold).
( ) Mount and solder resistor R3, 680 ohms (blue, gray , brown, gold).
( ) Mount and solder resistor R4, 10K, (brown, black, orange, gold).
( ) Mount and solder resistor R5, 4.7K, (yellow, violet, red, gold).
( ) Mount and solder D1, 1N4148, with band positioned as shown. D1 is next to R1.
( ) Mount and solder D2, 1N4148, with band positioned as shown. D2 is next to D1.
( ) Mount and solder all pins of J1.
( ) Mount and solder all pins of J2.
( ) Solder all pins of pre-mounted T1.
( ) Solder all pins of pre-mounted T2.
( ) Mount and solder electrolytic capacitor C1, 10 uF/50v, with plus end as shown. C1 is next to R1.
( ) Mount and solder electrolytic capacitor C2, 47 uF/50v, with plus end as shown. C2 is next to Q1.
( ) Mount and solder transistor Q1, 2N4401, with flat positioned as shown. Q1 is between the ends of D2 and R2.
( ) Mount and solder 500 ohm potentiometer, VR1.
Tie points are made by bending the lead cut off from a resistor into a
"hairpin" shape, inserting it into the two closely-spaced holes on the
circuit board, pushing it down to about 3/16" from the top of the
circuit board, and soldering both ends of the hairpin wire on the bottom of the circuit board.
( ) Create a tie point and solder to the two holes marked PTT
( ) Create a tie point and solder to the two holes marked Data in
( ) Create a tie point and solder to the two holes marked Ground
( ) Create a tie point and solder to the two holes marked Data Out
Preparing the Cable to the Transceiver
Decide how long a cable you want to use and cut off the end with the female connector, leaving about 6" of length on the female connector in case
you are using an accessory connector, or a microphone connector, other
than the 6-pin MiniDin data socket connector supplied with the kit. In
this case, plug the male end of the cable into the female end and strip
and tin the wires for connecting to the connector you are going to use.
On the cut end of the cable, strip about 3/8" of insulation off, and

then strip each wire about 3/16" and tin the wires.
Identifying the Wires
If you are using a microphone plug or an accessory plug that has a DC voltage on it, refer to the transceiver manual for the correct pin connections. Do not connect anything to a pin that has a DC voltage on it, unless it is a microphone input pin.
If you are using the MiniDin data jack on the transceiver, identify each wire by first plugging the cable into the transceiver and turning it on. Touch each of the wires, in turn, to the electrical ground of the transceiver. The wire that makes the transceiver go into transmit is the push-to-talk wire.
( ) Solder this wire to the tie point marked "PTT" on the circuit board.
( ) Touch each of the other wires to the now-identified push-to-talk wire. Solder the one that makes the transceiver go into transmit to the "Ground" tie point.
( ) Run the digital software (like DigiPan - www.digipan.net) and place it in transmit. Verify that you can hear transmit audio coming from the computer speaker.
( ) Connect a stereo audio cable from J1 to the computer speaker or earphone jack and place the transceiver in SSB mode (or FM for FM-only transceivers).
( ) Raise the Windows Volume or Speaker level control slider (and also WAVE slider, if present), until the transceiver switches into transmit.
( ) Using a small screwdriver, turn VR1 fully clockwise.
( ) Touch each of the remaining wires to the tie point marked "Data In" and solder the one that makes the transceiver generate RF output to the "Data In" tie point. If using an FM-only transceiver, monitor with a second receiver, or scanner, and solder the wire to the tie point that produces a transmit audio sound.
( ) With the transceiver still in transmit, adjust VR1 until the transceiver output power is one-third to one-half of maximum rated power.
( ) Place the software into receive mode.
( ) Connect a stereo audio cable from J2 to the computer microphone jack and raise the Windows microphone level control to maximum.
( ) Touch each of the remaining wires to the tie point marked "Data Out" and solder the one that creates visible noise on the waterfall to the "Data Out" tie point.
( ) Cut off the remaining wires and, if present, the cable shield wire.
( ) Solder one end of the longest cut off part lead into one of the remaining holes without any part soldered in it.
( ) Dress the cable between that hole and the last remaining hole, push the free end of the lead around the cable and into the hole, pull tight, and solder. This will act as a strain relief for the cable. This completes the assembly and wiring of the circuit board.
Modifying the Enclosure
Place the wired circuit board into one half of the enclosure. It will not settle down fully because holes for the jacks and cable need to be drilled.
( ) With a pencil, make a mark where each jack and the cable touches the edge of the enclosure.
( ) Remove the circuit board, snap on the other half of the enclosure,

and drill a small pilot hole where the edges of the enclosure top and
bottom meet, at the place where you made the pencil marks. Leaving the
enclosure snapped together, enlarge the pilot holes to 1/4" diameter.
Open the case by inserting a small screwdriver in the indentations where the enclosure
halves meet, and twist. Do this on both indentations on
one side and the enclosure will pop open. Clear the holes of extra
plastic if necessary.
( ) Place the circuit board back into the enclosure. Note which jack is J2, and snap the
two halves together.
( ) If not still connected, connect a stereo audio cable from J2 to the computer microphone
jack.
( ) If not still connected, connect a stereo audio cable from J1 (the
other interface jack) to the computer earphone or speaker jack.
( ) If not still connected, plug the transceiver cable into the
transceiver data port, accessory port, or microphone port, depending on
which one you are using.
( ) Adjust the Windows Volume Control level until the transceiver goes
into transmit when the software is in transmit. The level should be
correct from the previous adjustment of VR1. If not, open the case and
adjust VR1 until the transceiver is one-third to one-half power, or for
an FM-only transceiver, the audio level that is about the same as that
for phone operation as heard on a second receiver.
( ) Adjust the Windows Microphone Control level until there is a faint
haze of noise on the waterfall. If using DigiPan, it will be yellow on a blue background.
( ) To prevent any possible feedback, it is a good idea to mute both
Microphone and Line inputs on the Windows Volume Control panel (not the
Recording Control panel, as that is used to control the waterfall signal level).
This completes the assembly and adjustment of the interface. Review each
step above if necessary for proper operation of the interface.

Digital VOX Sound Card Interface

October 1, 2011

The final lot of interface kits, boards, and cases, has now sold out, but
you can still build the interface using perfboard, or "dead bug"on a
scrap of circuit board material, from the parts list below.

73, Skip, KH6TY

Transmit audio from the computer is connected to J1, isolated from the
transceiver and doubled in value by T1, and then peak rectified by the
voltage doubler consisting of D1, D2, C1, and C2, which is used to bias
Q1 on, causing it to saturate and pull down the transceiver push-to-talk pin, putting the transceiver into transmit. R5 and VR1 form an
attenuator, and VR1 is used to adjust the transmit audio to the right

level for a clean transmitted signal. Q1 gets its collector voltage from the transceiver push-to-talk circuit, which must be the
common"open-collector" push-to-talk circuit. If this voltage does not
exist, the interface will not work.
This interface is intended to be used with all the popular digital modes
like PSK31, RTTY, Olivia, etc., which modulate a continuous carrier. For modes that require fast attack and recovery times, such as keyboard CW, Hellschreiber, Packet, or Winmor, a serial port switched interface like the Classic Sound Card Interface in the July 2010 QST should be used
instead.
Circuit Board Assembly
Mount and solder all parts to the circuit board as indicated by the legend on the circuit board. Pay close attention to where the "+" ends of the
electrolytic capacitors and the black bands of the diodes are placed
before soldering. Cut and trim each part after soldering, saving the
cutoff ends for making tie points. Mount the resistors and diodes first, then the rest of the parts, and lastly, the tie points. If a hole is
accidentally filled with solder, heat the hole to melt the solder, and
push a sharp round wooden toothpick into the hole. On the opposite side
of the circuit board, melt and draw the solder away from the hole, and
when the solder has cooled, withdraw the toothpick, leaving the hole
ready to accept another part. Check that there are no solder bridges
between adjacent holes, such as those for the transistor or electrolytic capacitors, and melt away any solder bridges with the soldering iron.
( ) Mount and solder resistor R1, 4.7K (yellow, violet, red, gold)
( ) Mount and solder resistor R2, 2.2K (red, red, red, gold).
( ) Mount and solder resistor R3, 680 ohms (blue, gray , brown, gold).
( ) Mount and solder resistor R4, 10K, (brown, black, orange, gold).
( ) Mount and solder resistor R5, 4.7K, (yellow, violet, red, gold).
( ) Mount and solder D1, 1N4148, with band positioned as shown. D1 is next to R1.
( ) Mount and solder D2, 1N4148, with band positioned as shown. D2 is next to D1.
( ) Mount and solder all pins of J1.
( ) Mount and solder all pins of J2.
( ) Solder all pins of pre-mounted T1.
( ) Solder all pins of pre-mounted T2.
( ) Mount and solder electrolytic capacitor C1, 10 uF/50v, with plus end as shown. C1 is next to R1.
( ) Mount and solder electrolytic capacitor C2, 47 uF/50v, with plus end as shown. C2 is next to Q1.
( ) Mount and solder transistor Q1, 2N4401, with flat positioned as shown. Q1 is between the ends of D2 and R2.
( ) Mount and solder 500 ohm potentiometer, VR1.
Tie points are made by bending the lead cut off from a resistor into a
"hairpin" shape, inserting it into the two closely-spaced holes on the
circuit board, pushing it down to about 3/16" from the top of the
circuit board, and soldering both ends of the hairpin wire on the bottom of the circuit board.
( ) Create a tie point and solder to the two holes marked PTT
( ) Create a tie point and solder to the two holes marked Data in
( ) Create a tie point and solder to the two holes marked Ground

( ) Create a tie point and solder to the two holes marked Data Out
Preparing the Cable to the Transceiver
Decide how long a cable you want to use and cut off the end with the female connector, leaving about 6" of length on the female connector in case you are using an accessory connector, or a microphone connector, other than the 6-pin MiniDin data socket connector supplied with the kit. In this case, plug the male end of the cable into the female end and strip and tin the wires for connecting to the connector you are going to use. On the cut end of the cable, strip about 3/8" of insulation off, and then strip each wire about 3/16" and tin the wires.
Identifying the Wires
If you are using a microphone plug or an accessory plug that has a DC voltage on it, refer to the transceiver manual for the correct pin connections. Do not connect anything to a pin that has a DC voltage on it, unless it is a microphone input pin.
If you are using the MiniDin data jack on the transceiver, identify each wire by first plugging the cable into the transceiver and turning it on. Touch each of the wires, in turn, to the electrical ground of the transceiver. The wire that makes the transceiver go into transmit is the push-to-talk wire.
( ) Solder this wire to the tie point marked "PTT" on the circuit board.
( ) Touch each of the other wires to the now-identified push-to-talk wire. Solder the one that makes the transceiver go into transmit to the "Ground" tie point.
( ) Run the digital software (like DigiPan - www.digipan.net) and place it in transmit. Verify that you can hear transmit audio coming from the computer speaker.
( ) Connect a stereo audio cable from J1 to the computer speaker or earphone jack and place the transceiver in SSB mode (or FM for FM-only transceivers).
( ) Raise the Windows Volume or Speaker level control slider (and also WAVE slider, if present), until the transceiver switches into transmit.
( ) Using a small screwdriver, turn VR1 fully clockwise.
( ) Touch each of the remaining wires to the tie point marked "Data In" and solder the one that makes the transceiver generate RF output to the "Data In" tie point. If using an FM-only transceiver, monitor with a second receiver, or scanner, and solder the wire to the tie point that produces a transmit audio sound.
( ) With the transceiver still in transmit, adjust VR1 until the transceiver output power is one-third to one-half of maximum rated power.
( ) Place the software into receive mode.
( ) Connect a stereo audio cable from J2 to the computer microphone jack and raise the Windows microphone level control to maximum.
( ) Touch each of the remaining wires to the tie point marked "Data Out" and solder the one that creates visible noise on the waterfall to the "Data Out" tie point.
( ) Cut off the remaining wires and, if present, the cable shield wire.
( ) Solder one end of the longest cut off part lead into one of the remaining holes without any part soldered in it.
( ) Dress the cable between that hole and the last remaining hole, push the free end of the lead around the cable and into the hole, pull tight, and solder. This

will act as a strain relief for the cable. This
completes the assembly and wiring of the circuit board.
Modifying the Enclosure
Place the wired circuit board into one half of the enclosure. It will not
settle down fully because holes for the jacks and cable need to be
drilled.
( ) With a pencil, make a mark where each jack and the cable touches the edge of the
enclosure.
( ) Remove the circuit board, snap on the other half of the enclosure,
and drill a small pilot hole where the edges of the enclosure top and
bottom meet, at the place where you made the pencil marks. Leaving the
enclosure snapped together, enlarge the pilot holes to 1/4" diameter.
Open the case by inserting a small screwdriver in the indentations where the enclosure
halves meet, and twist. Do this on both indentations on
one side and the enclosure will pop open. Clear the holes of extra
plastic if necessary.
( ) Place the circuit board back into the enclosure. Note which jack is J2, and snap the
two halves together.
( ) If not still connected, connect a stereo audio cable from J2 to the computer microphone
jack.
( ) If not still connected, connect a stereo audio cable from J1 (the
other interface jack) to the computer earphone or speaker jack.
( ) If not still connected, plug the transceiver cable into the
transceiver data port, accessory port, or microphone port, depending on
which one you are using.
( ) Adjust the Windows Volume Control level until the transceiver goes
into transmit when the software is in transmit. The level should be
correct from the previous adjustment of VR1. If not, open the case and
adjust VR1 until the transceiver is one-third to one-half power, or for
an FM-only transceiver, the audio level that is about the same as that
for phone operation as heard on a second receiver.
( ) Adjust the Windows Microphone Control level until there is a faint
haze of noise on the waterfall. If using DigiPan, it will be yellow on a blue background.
( ) To prevent any possible feedback, it is a good idea to mute both
Microphone and Line inputs on the Windows Volume Control panel (not the
Recording Control panel, as that is used to control the waterfall signal level).
This completes the assembly and adjustment of the interface. Review each
step above if necessary for proper operation of the interface.

OM Zen,
Ini salahsatunya - dibuat oleh KH6TY juga dimuat di QST Maret 2011 dan dimuat di buku "Get on the Air with HF Digital".

Harga 2N4401 = Rp.500,- 1N4148 = Rp 5000,-/100 pcs, R dan C juga gak mahal.
Cuma trafo 1:1 600 ohm apalagi yg pake CT saya belum dapat, jadi sementara saya nyoba skema yg satunya, nanti saya kirimkan juga.

Digital VOX Sound Card Interface

October 1, 2011

The final lot of interface kits, boards, and cases, has now sold out, but
you can still build the interface using perfboard, or "dead bug"on a
scrap of circuit board material, from the parts list below.

73, Skip, KH6TY

Transmit audio from the computer is connected to J1, isolated from the
transceiver and doubled in value by T1, and then peak rectified by the
voltage doubler consisting of D1, D2, C1, and C2, which is used to bias
Q1 on, causing it to saturate and pull down the transceiver push-to-talk pin, putting the
transceiver into transmit. R5 and VR1 form an
attenuator, and VR1 is used to adjust the transmit audio to the right
level for a clean transmitted signal. Q1 gets its collector voltage from the transceiver
push-to-talk circuit, which must be the
common"open-collector" push-to-talk circuit. If this voltage does not
exist, the interface will not work.

This interface is intended to be used with all the popular digital modes like PSK31, RTTY, Olivia, etc., which modulate a continuous carrier. For modes that require fast attack and recovery times, such as keyboard CW, Hellschreiber, Packet, or Winmor, a serial port switched interface like the Classic Sound Card Interface in the July 2010 QST should be used instead.

Circuit Board Assembly

Mount and solder all parts to the circuit board as indicated by the legend on the circuit board. Pay close attention to where the "+" ends of the electrolytic capacitors and the black bands of the diodes are placed before soldering. Cut and trim each part after soldering, saving the cutoff ends for making tie points. Mount the resistors and diodes first, then the rest of the parts, and lastly, the tie points. If a hole is accidentally filled with solder, heat the hole to melt the solder, and push a sharp round wooden toothpick into the hole. On the opposite side of the circuit board, melt and draw the solder away from the hole, and when the solder has cooled, withdraw the toothpick, leaving the hole ready to accept another part. Check that there are no solder bridges between adjacent holes, such as those for the transistor or electrolytic capacitors, and melt away any solder bridges with the soldering iron.

( ) Mount and solder resistor R1, 4.7K (yellow, violet, red, gold)
( ) Mount and solder resistor R2, 2.2K (red, red, red, gold).
( ) Mount and solder resistor R3, 680 ohms (blue, gray , brown, gold).
( ) Mount and solder resistor R4, 10K, (brown, black, orange, gold).
( ) Mount and solder resistor R5, 4.7K, (yellow, violet, red, gold).
( ) Mount and solder D1, 1N4148, with band positioned as shown. D1 is next to R1.
( ) Mount and solder D2, 1N4148, with band positioned as shown. D2 is next to D1.
( ) Mount and solder all pins of J1.
( ) Mount and solder all pins of J2.
( ) Solder all pins of pre-mounted T1.
( ) Solder all pins of pre-mounted T2.
( ) Mount and solder electrolytic capacitor C1, 10 uF/50v, with plus end as shown. C1 is next to R1.
( ) Mount and solder electrolytic capacitor C2, 47 uF/50v, with plus end as shown. C2 is next to Q1.
( ) Mount and solder transistor Q1, 2N4401, with flat positioned as shown. Q1 is between the ends of D2 and R2.
( ) Mount and solder 500 ohm potentiometer, VR1.

Tie points are made by bending the lead cut off from a resistor into a "hairpin" shape, inserting it into the two closely-spaced holes on the circuit board, pushing it down to about 3/16" from the top of the circuit board, and soldering both ends of the hairpin wire on the bottom of the circuit board.

( ) Create a tie point and solder to the two holes marked PTT
( ) Create a tie point and solder to the two holes marked Data in
( ) Create a tie point and solder to the two holes marked Ground
( ) Create a tie point and solder to the two holes marked Data Out

Preparing the Cable to the Transceiver

Decide how long a cable you want to use and cut off the end with the female connector, leaving about 6" of length on the female connector in case

you are using an accessory connector, or a microphone connector, other than the 6-pin MiniDin data socket connector supplied with the kit. In this case, plug the male end of the cable into the female end and strip and tin the wires for connecting to the connector you are going to use. On the cut end of the cable, strip about 3/8" of insulation off, and then strip each wire about 3/16" and tin the wires.

Identifying the Wires

If you are using a microphone plug or an accessory plug that has a DC voltage on it, refer to the transceiver manual for the correct pin connections. Do not connect anything to a pin that has a DC voltage on it, unless it is a microphone input pin.

If you are using the MiniDin data jack on the transceiver, identify each wire by first plugging the cable into the transceiver and turning it on. Touch each of the wires, in turn, to the electrical ground of the transceiver. The wire that makes the transceiver go into transmit is the push-to-talk wire.

( ) Solder this wire to the tie point marked "PTT" on the circuit board.

( ) Touch each of the other wires to the now-identified push-to-talk wire. Solder the one that makes the transceiver go into transmit to the "Ground" tie point.

( ) Run the digital software (like DigiPan - www.digipan.net) and place it in transmit. Verify that you can hear transmit audio coming from the computer speaker.

( ) Connect a stereo audio cable from J1 to the computer speaker or earphone jack and place the transceiver in SSB mode (or FM for FM-only transceivers).

( ) Raise the Windows Volume or Speaker level control slider (and also WAVE slider, if present), until the transceiver switches into transmit.

( ) Using a small screwdriver, turn VR1 fully clockwise.

( ) Touch each of the remaining wires to the tie point marked "Data In" and solder the one that makes the transceiver generate RF output to the "Data In" tie point. If using an FM-only transceiver, monitor with a second receiver, or scanner, and solder the wire to the tie point that produces a transmit audio sound.

( ) With the transceiver still in transmit, adjust VR1 until the transceiver output power is one-third to one-half of maximum rated power.

( ) Place the software into receive mode.

( ) Connect a stereo audio cable from J2 to the computer microphone jack and raise the Windows microphone level control to maximum.

( ) Touch each of the remaining wires to the tie point marked "Data Out" and solder the one that creates visible noise on the waterfall to the "Data Out" tie point.

( ) Cut off the remaining wires and, if present, the cable shield wire.

( ) Solder one end of the longest cut off part lead into one of the remaining holes without any part soldered in it.

( ) Dress the cable between that hole and the last remaining hole, push the free end of the lead around the cable and into the hole, pull tight, and solder. This will act as a strain relief for the cable. This completes the assembly and wiring of the circuit board.

Modifying the Enclosure

Place the wired circuit board into one half of the enclosure. It will not

settle down fully because holes for the jacks and cable need to be
drilled.
( ) With a pencil, make a mark where each jack and the cable touches the edge of the
enclosure.
( ) Remove the circuit board, snap on the other half of the enclosure,
and drill a small pilot hole where the edges of the enclosure top and
bottom meet, at the place where you made the pencil marks. Leaving the
enclosure snapped together, enlarge the pilot holes to 1/4" diameter.
Open the case by inserting a small screwdriver in the indentations where the enclosure
halves meet, and twist. Do this on both indentations on
one side and the enclosure will pop open. Clear the holes of extra
plastic if necessary.
( ) Place the circuit board back into the enclosure. Note which jack is J2, and snap the
two halves together.
( ) If not still connected, connect a stereo audio cable from J2 to the computer microphone
jack.
( ) If not still connected, connect a stereo audio cable from J1 (the
other interface jack) to the computer earphone or speaker jack.
( ) If not still connected, plug the transceiver cable into the
transceiver data port, accessory port, or microphone port, depending on
which one you are using.
( ) Adjust the Windows Volume Control level until the transceiver goes
into transmit when the software is in transmit. The level should be
correct from the previous adjustment of VR1. If not, open the case and
adjust VR1 until the transceiver is one-third to one-half power, or for
an FM-only transceiver, the audio level that is about the same as that
for phone operation as heard on a second receiver.
( ) Adjust the Windows Microphone Control level until there is a faint
haze of noise on the waterfall. If using DigiPan, it will be yellow on a blue background.
( ) To prevent any possible feedback, it is a good idea to mute both
Microphone and Line inputs on the Windows Volume Control panel (not the
Recording Control panel, as that is used to control the waterfall signal level).
This completes the assembly and adjustment of the interface. Review each
step above if necessary for proper operation of the interface.
skipteller@...
Mouser Part Numbers (Quantity needed, part, number):
(1) 2N4401 transistor, 512-2N4401BU

(2) 1N4148 diodes, 512-1N4148

(1) Bourns trimmer potentiometer, 652-3362P-1-102LF

(2) Isolation transformers, 42XL016-RC

(2) Stereo phone jacks, 161-3507-E

(2) 4.7k resistors, 291-4.7K-RC

(1) 680 ohm resistor, 291-680-RC

(1) 10K resistor, 291-10K-RC

(1) 2.2K resistor, 291-2.2K-RC

(1) Electrolytic capacitor, 10 uF, 647-UVR1H100MDD

(1) Electrolytic capacitor, 47 uF, 647-UVR-1H470MED

(1) PS-2 mouse extension cable, 3 ft, 545-P222006

(2) Audio patch cables, 3.5mm male plugs, 3 ft, 172-8362-E

* Every attempt has been made to insure that these part numbers are
correct, but please check the part specifications for yourself. I am not responsible for any parts ordered that do not fit the circuit board, or for substitutions that do not work correctly.

Thank you infonya OM Busan.
Sepertinya saya juga pernah belanja online, relay,potentiometer, R,C dll ke toko ini - apa yg lain ya.
Lupa, tapi kalo gak salah yg dulu itu banyak perlengkapan utk robot.

Lagi dilongok2 dulu etalasenya. HI

73 es tnx

Digital VOX Sound Card Interface

October 1, 2011

The final lot of interface kits, boards, and cases, has now sold out, but
you can still build the interface using perfboard, or "dead bug"on a
scrap of circuit board material, from the parts list below.

73, Skip, KH6TY

Transmit audio from the computer is connected to J1, isolated from the
transceiver and doubled in value by T1, and then peak rectified by the
voltage doubler consisting of D1, D2, C1, and C2, which is used to bias
Q1 on, causing it to saturate and pull down the transceiver push-to-talk pin, putting the
transceiver into transmit. R5 and VR1 form an
attenuator, and VR1 is used to adjust the transmit audio to the right
level for a clean transmitted signal. Q1 gets its collector voltage from the transceiver
push-to-talk circuit, which must be the
common"open-collector" push-to-talk circuit. If this voltage does not
exist, the interface will not work.
This interface is intended to be used with all the popular digital modes
like PSK31, RTTY, Olivia, etc., which modulate a continuous carrier. For modes that require
fast attack and recovery times, such as keyboard CW, Hellschreiber, Packet, or Winmor, a
serial port switched interface like the Classic Sound Card Interface in the July 2010 QST
should be used
instead.
Circuit Board Assembly
Mount and solder all parts to the circuit board as indicated by the legend on the circuit
board. Pay close attention to where the "+" ends of the
electrolytic capacitors and the black bands of the diodes are placed
before soldering. Cut and trim each part after soldering, saving the
cutoff ends for making tie points. Mount the resistors and diodes first, then the rest of
the parts, and lastly, the tie points. If a hole is
accidentally filled with solder, heat the hole to melt the solder, and
push a sharp round wooden toothpick into the hole. On the opposite side
of the circuit board, melt and draw the solder away from the hole, and
when the solder has cooled, withdraw the toothpick, leaving the hole
ready to accept another part. Check that there are no solder bridges
between adjacent holes, such as those for the transistor or electrolytic capacitors, and
melt away any solder bridges with the soldering iron.
( ) Mount and solder resistor R1, 4.7K (yellow, violet, red, gold)
( ) Mount and solder resistor R2, 2.2K (red, red, red, gold).
( ) Mount and solder resistor R3, 680 ohms (blue, gray , brown, gold).
( ) Mount and solder resistor R4, 10K, (brown, black, orange, gold).
( ) Mount and solder resistor R5, 4.7K, (yellow, violet, red, gold).
( ) Mount and solder D1, 1N4148, with band positioned as shown. D1 is next to R1.
( ) Mount and solder D2, 1N4148, with band positioned as shown. D2 is next to D1.
( ) Mount and solder all pins of J1.
( ) Mount and solder all pins of J2.

( ) Solder all pins of pre-mounted T1.
( ) Solder all pins of pre-mounted T2.
( ) Mount and solder electrolytic capacitor C1, 10 uF/50v, with plus end as shown. C1 is next to R1.
( ) Mount and solder electrolytic capacitor C2, 47 uF/50v, with plus end as shown. C2 is next to Q1.
( ) Mount and solder transistor Q1, 2N4401, with flat positioned as shown. Q1 is between the ends of D2 and R2.
( ) Mount and solder 500 ohm potentiometer, VR1.
Tie points are made by bending the lead cut off from a resistor into a "hairpin" shape, inserting it into the two closely-spaced holes on the circuit board, pushing it down to about 3/16" from the top of the circuit board, and soldering both ends of the hairpin wire on the bottom of the circuit board.

OM Eddy,
Saya ada modem jadul itu yg ada jack RJ nya - tapi sayang juga sapa tau nanti perlu - lagi pula yg ini gak ada CTnya sementara saya juga nyopot dari pesawat telpon toriphone yg sdh pernah ke tempat sampah tapi saya pungut, HI.

Sempat lihat di Poncol ada bangkai ex PABX saya lihat ada beberapa trafo ciliknya tapi tukang loaknya masih "sombong" harganya masih tinggi (menurut saya). Mending juga beli baru seperti yg OM Busan infokan, cuma yg ini gak tau juga apakah pakai CT - karna ada skema yg memerlukan adanya CT itu.
Saya masih nyoba trafo lama yg nemu di junkbox = IT-191 sementara OT-240nya saya kasih ke ponakan yg juga sudah buat dg trafo itu, seperti OM Seno - YB2LSR.

Sayang Pasar Rumput sudah ditutup sih, tinggal yg jual keramik & urusan kamar mandi.

73,
hen-yc0qr

http://dx-world.net/2012/e51and-the-palmerston-atoll-story/#more-38647
The E51AND PALMERSTON ATOLL (OC-124) STORY by Andy E51AND

Palmerston Atoll was active from 05:05Z on August 21st to 07:25Z on September 19th 2012

QSL via AB7FS

The activation of Palmerston Atoll was an impromptu event following our being “marooned” there for several weeks. We set off from Rarotonga in the South Cook Islands for a 5 day round trip to Palmerston in a small yacht – Kathy (ZK1SCH) and I (E51AND) were charter passengers on our first ever voyage – along with the skipper, Andre. Palmerston is in the middle of nowhere! About 500 miles SE of American Samoa and 300 miles NW of Rarotonga at 18.02 South and 163.30 West it lies in a region known to sailors as the Pacific Convergence Zone.

The trip started well – calm seas and fair winds carried us to Palmerston in just under 48 hours.

Kathy at the helm – at this point we were 150 miles out of Rarotonga on the open Pacific – an awesome experience! Happily neither of us were seasick nor did we experience the panic many people do as they completely lose sight of land. We each took 3 hour watches at the helm – that allowed 6 hours of sleep for each of us at night :-)

Although on leaving Rarotonga we were able to see he mountains for some 60 miles, Palmerston Island was something else! It is so low that we could not clearly see it until 10 miles out – here is what it looks like from less than a mile. A “motu” or coral sand islet about 500 metres across and 3 metres high. Covered in Pandanus, Coconut Palms and, surprise, huge Mahogany trees.

There are no passages through the reef deep enough to permit the passage of a yacht so visiting yachts tie up at moorings outside the reef and the locals come out in small boats to carry you ashore.

We had another treat when we got there – Whales! They were playing around the yacht – within a 100 metres or less – and breaching over and over again. SPECTACULAR!!

Palmerston Island is amazingly beautiful – it is truly a tropical paradise – intense white coral sand beaches and the lagoon so many shades of intense blue you’d swear it wasn’t real.

We stayed overnight with a local family Edward and Shirley Marsters – along with the extended family of “Mama” Tuaine Marsters. We owe them a huge debt of gratitude for all they did for us!.

Only 66 people live on Palmerston – 36 of them children. All are descendents of William Marsters, an English barrelmaker who settled the previously deserted island with his three Polynesian wives in the mid 1800s. Today his great, great, great great grandchildren populate the island and are scattered across Polynesia, New Zealand and Australia.

After spending the night on the island we set off for Rarotonga, however, a storm blew up in the night and the vessel suffered serious damage and we were forced to put ashore again at Palmerston – lucky to be alive!

This time we were stranded – forced to wait until another ship could take us back to Rarotonga — and ships visit once every 3 – 4 months and on no schedule!!

After a few days on Island a Dutch yacht on a round-the-world trip stopped in — on the way to American Samoa — it was decided Kathy would take passage on the one available berth — and I would stay and await the next ship to Rarotonga.

Life on Palmerston is VERY different from life in the US, or Europe. There is electricity from 6am to noon, and 6pm to midnight — IF the generator is working. Water for drinking and bathing is collected rainwater stored in large concrete and plastic tanks, and anything that is not harvested from the land, lagoon or ocean comes in by ship — if and when one comes. The following are pictures from the island — and at the end, a couple of pictures of the "ham shack" and power and antenna systems. MINIMAL to say the least — this was not a DXpedition — I had the radio along in case I could operate from the yacht as E51AND/MM — so it came with me when we went ashore.

The island was full of surprises — well kept streets of coral sand — raked to keep them free of debis — and YES — that is a street light — while the power is on, the streets are lit. Pretty much everyone walks, there are NO cars, a half dozen scooters and 2 quad bikes on island — and they only run IF there is petrol!

"Little" John Marsters walks toward home — pretty much everyone is barefoot (except for Church on Sundays)

William Marsters grave. He sired 23 children and had 134 grandchildren. Google him for more info :-)

To "give back" to the community for heir hospitality, I volunteered at the school. Palmerston "Lucky" school is pretty amazing – they provide an individualized program for kids are 5 to 18 — the two teachers there work SO hard — it was a pleasure and a privilege to work with them. Couple of pics of he school below.

The classroom BEFORE school – gets pretty busy after 8am with 28 kids age 5 – 17 years

This is the Ham Shack! — we first set up the radio in the open area that doubled as our bedroom but line loss gave only 8.5 volts and less than 50 watts out with terrible audio. So the radio moved to the disused kitchen area and was powered by a bank of solar charged batteries — that also powered the 12v water pump.

There are no stores of any kind on Palmerston — I arrived with minimal equipment – the radio, a key, 25ft of coax and a Snowdonia Radio Products X80 17ft vertical with a 9:1 UNUN — with no way to augment the station or build more efficient antennas — it was "make do with what you have!" And I scrounged a school exercise book for a log.

Here is the battery system – the solar panel is about 18″ x 24″ and on the roof. As you can see the antenna is simply clamped to an iron rod pushed into the sand. There were no ground radials — where would I get the wire?

Operating was a challenge!! I am not a DXer and not at all skilled at managing pile ups. And when the band was open — there WERE pile-ups!!! Imagine you are standing in the centre of a football stadium, and everyone in the crowd is shouting their name at you and it is

your job to select just one – and have a brief conversation with him. That's how it felt to me at the DX end of the pile up. Eveyday I wished that the stations trying to contact me would READ and ABIDE by the DX Code of Conduct. I would have worked 3 to 5 times as many stations if they had!

CW was even more of a challenge with a hand key, paper logging – and it has been 40 years since I operated CW. I copied at about 8wpm and worked those who slowed down – if you didn't QRS – I couldn't copy you – sorry!

So that's it – the VERY abbreviated version of the story!

I'd love to operate from Palmerston with a little power and especially with a directional gain antenna and if you are thinking of a DXpedition there – DO contact me – there are electrical power and "island politics" that are best understood BEFORE you start contacting the folks on island!

MANY THANKS to the stations who facilitated contacts -there were folks out there who helped moderate the European "chaos", there were patient and courteous hams who quietly stood by until I called their number, and there were so many supportive and encouraging comments that helped me through the frustrations of he pile-ups, and the overwhelming sense of isolation.

I was fortunate in that a small cargo yacht came up from Rarotonga after I had been there only 5 weeks – with cyclone season coming on I might have been there until March -5 or 6 months – or longer. HOWEVER, if your are going to be "marooned" – it is nice to be marooned in Paradise!

Digital VOX Sound Card Interface

October 1, 2011

The final lot of interface kits, boards, and cases, has now sold out, but you can still build the interface using perfboard, or "dead bug"on a scrap of circuit board material, from the parts list below.

73, Skip, KH6TY

Transmit audio from the computer is connected to J1, isolated from the transceiver and doubled in value by T1, and then peak rectified by the voltage doubler consisting of D1, D2, C1, and C2, which is used to bias Q1 on, causing it to saturate and pull down the transceiver push-to-talk pin, putting the transceiver into transmit. R5 and VR1 form an attenuator, and VR1 is used to adjust the transmit audio to the right level for a clean transmitted signal. Q1 gets its collector voltage from the transceiver push-to-talk circuit, which must be the common"open-collector" push-to-talk circuit. If this voltage does not exist, the interface will not work.
This interface is intended to be used with all the popular digital modes like PSK31, RTTY, Olivia, etc., which modulate a continuous carrier. For modes that require fast attack and recovery times, such as keyboard CW, Hellschreiber, Packet, or Winmor, a serial port switched interface like the Classic Sound Card Interface in the July 2010 QST should be used instead.
Circuit Board Assembly
Mount and solder all parts to the circuit board as indicated by the legend on the circuit board. Pay close attention to where the "+" ends of the electrolytic capacitors and the

black bands of the diodes are placed before soldering. Cut and trim each part after soldering, saving the cutoff ends for making tie points. Mount the resistors and diodes first, then the rest of the parts, and lastly, the tie points. If a hole is accidentally filled with solder, heat the hole to melt the solder, and push a sharp round wooden toothpick into the hole. On the opposite side of the circuit board, melt and draw the solder away from the hole, and when the solder has cooled, withdraw the toothpick, leaving the hole ready to accept another part. Check that there are no solder bridges between adjacent holes, such as those for the transistor or electrolytic capacitors, and melt away any solder bridges with the soldering iron.

( ) Mount and solder resistor R1, 4.7K (yellow, violet, red, gold)
( ) Mount and solder resistor R2, 2.2K (red, red, red, gold).
( ) Mount and solder resistor R3, 680 ohms (blue, gray , brown, gold).
( ) Mount and solder resistor R4, 10K, (brown, black, orange, gold).
( ) Mount and solder resistor R5, 4.7K, (yellow, violet, red, gold).
( ) Mount and solder D1, 1N4148, with band positioned as shown. D1 is next to R1.
( ) Mount and solder D2, 1N4148, with band positioned as shown. D2 is next to D1.
( ) Mount and solder all pins of J1.
( ) Mount and solder all pins of J2.
( ) Solder all pins of pre-mounted T1.
( ) Solder all pins of pre-mounted T2.
( ) Mount and solder electrolytic capacitor C1, 10 uF/50v, with plus end as shown. C1 is next to R1.
( ) Mount and solder electrolytic capacitor C2, 47 uF/50v, with plus end as shown. C2 is next to Q1.
( ) Mount and solder transistor Q1, 2N4401, with flat positioned as shown. Q1 is between the ends of D2 and R2.
( ) Mount and solder 500 ohm potentiometer, VR1.

Tie points are made by bending the lead cut off from a resistor into a "hairpin" shape, inserting it into the two closely-spaced holes on the circuit board, pushing it down to about 3/16" from the top of the circuit board, and soldering both ends of the hairpin wire on the bottom of the circuit board.

( ) Create a tie point and solder to the two holes marked PTT
( ) Create a tie point and solder to the two holes marked Data in
( ) Create a tie point and solder to the two holes marked Ground
( ) Create a tie point and solder to the two holes marked Data Out

Preparing the Cable to the Transceiver

Decide how long a cable you want to use and cut off the end with the female connector, leaving about 6" of length on the female connector in case you are using an accessory connector, or a microphone connector, other than the 6-pin MiniDin data socket connector supplied with the kit. In this case, plug the male end of the cable into the female end and strip and tin the wires for connecting to the connector you are going to use. On the cut end of the cable, strip about 3/8" of insulation off, and then strip each wire about 3/16" and tin the wires.

Identifying the Wires

If you are using a microphone plug or an accessory plug that has a DC voltage on it, refer to the transceiver manual for the correct pin connections. Do not connect anything to a pin that has a DC voltage on it, unless it is a microphone input pin.

If you are using the MiniDin data jack on the transceiver, identify each wire by first plugging the cable into the transceiver and turning it on. Touch each of the wires, in turn, to the electrical ground of the transceiver. The wire that makes the transceiver go into transmit is the push-to-talk wire.

( ) Solder this wire to the tie point marked "PTT" on the circuit board.
( ) Touch each of the other wires to the now-identified push-to-talk wire. Solder the one that makes the transceiver go into transmit to the "Ground" tie point.
( ) Run the digital software (like DigiPan - www.digipan.net) and place it in transmit. Verify that you can hear transmit audio coming from the computer speaker.
( ) Connect a stereo audio cable from J1 to the computer speaker or earphone jack and place the transceiver in SSB mode (or FM for FM-only transceivers).
( ) Raise the Windows Volume or Speaker level control slider (and also WAVE slider, if present), until the transceiver switches into transmit.
( ) Using a small screwdriver, turn VR1 fully clockwise.
( ) Touch each of the remaining wires to the tie point marked "Data In" and solder the one that makes the transceiver generate RF output to the "Data In" tie point. If using an FM-only transceiver, monitor with a second receiver, or scanner, and solder the wire to the tie point that produces a transmit audio sound.
( ) With the transceiver still in transmit, adjust VR1 until the transceiver output power is one-third to one-half of maximum rated power.
( ) Place the software into receive mode.
( ) Connect a stereo audio cable from J2 to the computer microphone jack and raise the Windows microphone level control to maximum.
( ) Touch each of the remaining wires to the tie point marked "Data Out" and solder the one that creates visible noise on the waterfall to the "Data Out" tie point.
( ) Cut off the remaining wires and, if present, the cable shield wire.
( ) Solder one end of the longest cut off part lead into one of the remaining holes without any part soldered in it.
( ) Dress the cable between that hole and the last remaining hole, push the free end of the lead around the cable and into the hole, pull tight, and solder. This will act as a strain relief for the cable. This completes the assembly and wiring of the circuit board.
Modifying the Enclosure
Place the wired circuit board into one half of the enclosure. It will not settle down fully because holes for the jacks and cable need to be drilled.
( ) With a pencil, make a mark where each jack and the cable touches the edge of the enclosure.
( ) Remove the circuit board, snap on the other half of the enclosure, and drill a small pilot hole where the edges of the enclosure top and bottom meet, at the place where you made the pencil marks. Leaving the enclosure snapped together, enlarge the pilot holes to 1/4" diameter. Open the case by inserting a small screwdriver in the indentations where the enclosure halves meet, and twist. Do this on both indentations on one side and the enclosure will pop open. Clear the holes of extra plastic if necessary.
( ) Place the circuit board back into the enclosure. Note which jack is J2, and snap the two halves together.
( ) If not still connected, connect a stereo audio cable from J2 to the computer microphone jack.
( ) If not still connected, connect a stereo audio cable from J1 (the other interface jack) to the computer earphone or speaker jack.
( ) If not still connected, plug the transceiver cable into the transceiver data port, accessory port, or microphone port, depending on which one you are using.
( ) Adjust the Windows Volume Control level until the transceiver goes into transmit when the software is in transmit. The level should be correct from the previous adjustment of VR1. If not, open the case and adjust VR1 until the transceiver is one-third to one-half power, or for an FM-only transceiver, the audio level that is about the same as that for

phone operation as heard on a second receiver.
( ) Adjust the Windows Microphone Control level until there is a faint haze of noise on the waterfall. If using DigiPan, it will be yellow on a blue background.
( ) To prevent any possible feedback, it is a good idea to mute both Microphone and Line inputs on the Windows Volume Control panel (not the Recording Control panel, as that is used to control the waterfall signal level).
This completes the assembly and adjustment of the interface. Review each step above if necessary for proper operation of the interface.
skipteller@gmail.com
Mouser Part Numbers (Quantity needed, part, number):
(1) 2N4401 transistor, 512-2N4401BU

(2) 1N4148 diodes, 512-1N4148

(1) Bourns trimmer potentiometer, 652-3362P-1-102LF

(2) Isolation transformers, 42XL016-RC

(2) Stereo phone jacks, 161-3507-E

(2) 4.7k resistors, 291-4.7K-RC

(1) 680 ohm resistor, 291-680-RC

(1) 10K resistor, 291-10K-RC

(1) 2.2K resistor, 291-2.2K-RC

(1) Electrolytic capacitor, 10 uF, 647-UVR1H100MDD

(1) Electrolytic capacitor, 47 uF, 647-UVR-1H470MED

(1) PS-2 mouse extension cable, 3 ft, 545-P222006

(2) Audio patch cables, 3.5mm male plugs, 3 ft, 172-8362-E

* Every attempt has been made to insure that these part numbers are correct, but please check the part specifications for yourself. I am not responsible for any parts ordered that do not fit the circuit board, or for substitutions that do not work correctly.

Sedang memonitor Niger 5U6E di 10M mendadak tertutup oleh noise yang kuat sekali full scale 60dB dan sekarang menurun menjadi 40dB.

Semula mengira sumbernya di rumah atau dekat rumah saja, karena waktu antenna diputar tetap kuat QRN ini.
Tapi akhirnya baca spot dari I2RNJ ternyata di mana2, dia tulis RADAR RADAR RADAR EVYWHERE.

Woodpecker sudah gak jaman - sekarang seperti ini yang muncul bikin sakit kuping.

prihatin

http://www.n2amg.com/files/Using%20Ham%20Radio%20Deluxe%20with%20Logger32.pdf

Using Ham Radio Deluxe with Logger32

Geoff Anderson G3NPA

Introduction

These are basically notes about my own set up. They are presented here in the hope that they might just help someone else in the complexities of setting up something similar. The user is encouraged to read and understand the facilities offered by the Ham Radio Deluxe (HRD) program.

I stress that the port numbers mentioned in this document are those used in my particular set up and that these can be changed to suit individual systems.

From the set up described below, I can:
a) Use Logger32 in exactly the same way as I could before linking with Ham Radio Deluxe.
b) Use all the radio control (and some other) facilities within Ham Radio deluxe.
Please note that the virtual serial port driver required as part of this set up will only work with
Windows 2000, Xp and higher. Windows 95/98/SE and NT 4.0 are NOT supported.

HRD can support 3rd party programs such as Logger32 via a virtual serial port. In order to connect to
Logger32 an additional pair of back to back virtual serial ports is generated

Two virtual ports are created during the installation, in this case Com15 (used by HRD) and Com16 (used by Logger32).
• HRD opens and listens on Com15 port for incoming requests.
• Logger32 opens Com16 in exactly the same way it would connect to a radio using a hardware serial port.

The connection parameters used by Logger32 to connect with COM16 are:
• Speed any (57600),
• Stop bits 2,
• Parity none.

And the protocol supported is Kenwood (and only Kenwood, regardless of the type of radio actually being controlled by HRD).

It should be noted that during testing of this configuration it was found that HRD did NOT pass the correct command codes over its 3rd party interface for RTTY (FSK) modes of operation to Logger32. The author has been emailed about the problem but to date I have not received so much as an acknowledgement.

Basic starting point

Most decisions taken during the setting up of this arrangement rest on two main items:
1) the hardware (RS232) or virtual port used for the radio CAT control, and
2) the virtual ports to be used for the linking to Ham Radio Deluxe.

It is not actually necessary to know the Com port numbers used for the radio itself as HRD will discover this it for itself and displays the port number in its opening flash screen sequence. In my case it was virtual Com port 5 generated from within the USB router for a microHam microkeyer. It can be seen that the radio used was a Yaesu FT-1000MP.

As to the choice of virtual ports for the 3rd party connection, it should be remembered that Logger32 will only accept com port numbers up to 16 for the radio port, so the selection should be within that range. As I had several other virtual ports in use at the time I decided to use 15 and 16 to avoid any conflict.

Installation of the virtual port drive

N8VB's vCOM driver creates up to ten sets of paired virtual COM ports and these can be used like you would use a null-modem cable. Virtual null-modems are pure software - no hardware is involved.

Note: vCOM is only supported on Windows 2000, and Windows XP.

When using the 3rd-party program support you must use a virtual null-modem cable to connect HRD
to (in this case) Logger32. HRD opens one end of the virtual cable and Logger32 opens the other. N8VB's vCOM driver is copyrighted 2005 by Philip A Covington N8VB.
I used the latest copy of the driver collected from:-
http://www.philcovington.com/SDR_arch.html (Look for build 226 or later). Configuration of the virtual port driver
I found configuring the virtual port driver was easiest from the HRD menu Tools| N8VB vCom Configuration, which gave the window shown below. I chose to generate two pairs of ports (but only used the 15/16 combination). On requesting an update, the program will advise for the need to reboot your computer before the links will become available.

If you have set things up correctly you should see a virtual serial port driver in the Device Manager

Configuring HRD to use the 3rd party link

Having created the back to back virtual ports there is a need to connect to both ends. The first of these will be HDR. Using the HDR menu option Tools | 3rd Party Serial Port, set this for com15 at the speed shown.

…and finally set up the radio configuration in Logger32 on port 16. Remember that the radio type –
for what ever radio you actually have will ALWAYS be Kenwood.

The combination should now be working – as below.

This screenshot is simply to show the two programs working together. Although it might look like it, HDR is NOT working as a child window – indeed it doesn't even have a "remain on top" facility (that I have found anyhow) so as soon as you click on Logger32, HRD will disappear.

The combination of HRD and Logger32 would best be served by using twin monitors.

The above screenshot is simply to show the two programs working together. Although it might look like it, HDR is NOT working as a child window – indeed it doesn't even have a "remain on top" facility (that I have found anyhow) so as soon as you click on Logger32, HRD will disappear. The combination of HRD and Logger32 would best be served by using twin monitors.

http://www.cdxa.org/pdf_files/Top%20Features%20You%20Should%20Be%20Using%20in%20N1MM%20Logger.pdf

Top features In N1MM Logger that you should be using, but aren't

Tom Wagner, N1MM

Tips:

Print this list double-sided and highlight those features you want to try this contest season. Print the key assignment in the link below for reference use during the contest: http://n1mm.hamdocs.com/tiki-index.php?page=Key+Assignments+Short+List&structure=N1MM+Logger+Documentation

1. CW - Enter sends messages. Users of this feature love it. Non-users just don't get it. What ESM does - particularly on CW - is to reduce stress. Instead of having to remember what button to press to send what message, you almost always send <enter>. Trust me, you will be very surprised had how much this reduces the stress during a contest, especially when you are tired. See tip #2 for how to send a repeat while using ESM.

Use Ctrl+M to toggle 'Enter Sends Message' mode. The function key "convention" used by N1MM logger and most other logging programs is:

F1=CQ
F2=exchange
F3=TU/QSL/QRZ
F4=your call
F5=his call

2. = (equal key) to resend a message - Will send the last message key (F1-F12) again. If the last message sent was the exchange, it will send that. If it was you dumping your call in a pileup, it will send your call. Easy!

3. Alt+Q to find last CQ frequency- Jumps to the last CQ frequency on this band (active bandmap) and will clear all textboxes in the Entry Window. You can use this when you tune around trying to get a few S&P QSOs during a slow run. Jump to a spot, work it, and press Alt-Q to get back to your CQ frequency and resume running. See also Tip #16 below.

4. Available window: sort stations by beam heading. To sort the stations by beam heading, click on the column heading for beam heading. (You can click on any of the columns to toggle ascending/descending sort on that column.) This tip is useful in the afternoon when you are no longer running, but there are spots for stations coming in at all different beam headings. Sort them, and work them in beam heading order to speed up the process of clearing a band of unworked spots. (See picture below tip #5)

5. Available window spot/mult counts. The numbers to the left of the band buttons show the number of unique, unworked mults on that band. The numbers to the right of the band buttons show the number of unworked and total stations available on that band. Use these numbers

to help you judge what bands are open, when to change bands, and which band to change to. (See pic below.)

6. Ctl-up/down, Alt-Ctl-up/down to jump from spot to spot. These keystrokes will jump to the next spot or mult on this band. This is especially useful while trying to S&P in between running stations. Use Ctl-up/down to find a spot to work, work him and use Alt-Q to resume running.

7. Check partial - Guess! If you can touch-type, you should watch the check partial window for calls. Especially on SSB, you may be able to guess the station's callsign as you are speaking it. If you guess correctly, you have just shaved a few seconds off the QSO. If the rate is good, this will make a big difference.

8. Alt-D to delete a spot. It's annoying to come across the same wrong spot over & over. Use Alt-D to delete it. If you keep seeing the same wrong spot, or bad spots from the same spotter, use the blacklist functions (right click on the spot on the bandmap to access) to ban the spot or spotter.

NB: Q. What do you call a spotted call frequency with nobody there?
A. Your new run frequency!

9. Ctl-Enter to set a split. You hear 9A1A calling CQ on 7050 "listening 214.5". Type 214.5 and press ctl-enter to split to
7214.5. Another split tip: did you know you can set up an ssb message that will speak the split frequency?
Use @ to voice the current receive frequency if you have recorded files for individual letters and numbers. The frequency will be voiced to the nearest 100 Hz, dropping .0 if receiving on an even KHz frequency. This capability can be used to avoid having to rerecord CQ messages on 40m split. Here is an example: C:\Program Files\N1MM logger\wav\{operator}\CQ Listening.wav@C:\Program Files\N1MM logger\wav\{operator}\AndThisFreq.wav
With appropriate recorded wav files it will voice messages like: November1 Mike Mike listening 7054 and this frequency.

10. Packet Filters - Right click on the packet window to access the packet filters. Many options here -- you might want to see spots from the whole world at times, and at others you might only want to see spots from K1, K2 & K3. Caution - use the "Why don't I see spots?" option to diagnose problems.

11. Up/down arrow to tune the radio.
Up Arrow - Tune radio down (down in freq, but UP the bandmap) 100 Hz on SSB, 20 Hz on CW (adjustable in the configurer). K3, Flex, Orion, FT-1000MP, FT-890, FT-920, FT-990 and FT-1000 and all Kenwood radios
o In S&P - pressing the up/down arrows will turn off RIT and tune your main VFO.
o In Running mode - it will turn on your RIT and tune the RIT.
Down Arrow - Tune radio up 100 Hz on SSB, 20 Hz on CW (adjustable). See Up Arrow information above

12. Alt+F9 toggle antennas - toggle through all the antennas for that band. The selected antenna will show in the status pane. Multiple antennas for each band can be set up in the Configurer Antenna tab. Antennas can be rotated from all networked computers if desired.

13. Ctrl+Q edit a spot - Quick Edit mode, go back one qso in the log. Enter logs and Escape discards the changes made. Press multiple times to go back multiple Qs. This is the

preferred way to make quick edits during a contest.

14. Alt+' (Alt+singlequote) to set filter width - toggle between the wide and narrow radio filter for the selected mode
(SSB, CW and Digi modes).

15. Muli-User Partner Mode - see calls the other station is copying as he types them.
To indicate which station you want to partner with, right click on it's "cue-ball" in the info window, and select the option "Target for call stacking"
Tune your radio to the exact frequency of the target station's radio.
As you type, your partner will see the call you are typing on their Entry Window's callframe. If they have set up partner mode from their side, you will see their typing in your callframe.
Whoever has control of transmit can choose to work the station in his callsign textbox or they can work the station in the callframe by wiping, then pressing <enter> (ESM) to call the station that is in the callframe.

If you are not on the same frequency, just copy calls and tune off - the calls will be automatically placed in all networked users bandmaps as local spots.
16. CTRL+Shift+Up/Dn to work spots while running - Useful for single op, 2 VFOs (SO2V). Moves VFOB/Sub VFO to the next bandmap spot, skipping over the CQ frequency. Then use Pause to switch when the time is right to work the station.

73,
Tom - N1MM

http://www.arrl.org/files/file/LoTW%20Resources/HRD.pdf

How To Configure Ham Radio Deluxe
To Upload Logs To Logbook of The World

If you need assistance with HRD please visit the HRD web
pages http://www.ham-radio-deluxe.com/
or the users group forum.

• Ham Radio Deluxe is a popular logging program.

• One of the features of HRD v5 is the ability to upload QSOs directly to your Logbook of The
World account.

• This tutorial will enable you to enter the required information to take advantage of this feature.

• Ham Radio Deluxe is NOT an ARRL program therefore we can not offer any support for this software package.

• If you contact ARRL about this software you will be directed to the Ham Radio Deluxe website.

Open the HRD Logbook.
From the main HRD screen select the LOGBOOK tab then select DISPLAY.
Note: Until you highlight a QSO to upload the LoTW upload option will not be made available.

Highlight the QSOs you wish to upload.

Tip: To select a large number of QSOs for uploading left click your mouse on the first QSO in the list. Then hold down your SHIFT key and scroll down to the last QSO in the list. While holding your SHIFT key left click on the last QSO and you should have highlighted everything from first to last.

Configure the upload URLs

The login and upload URLs should be pre-populated.
Login URL is: https://p1k.arrl.org/lotwuser/default
Upload URL is: https://p1k.arrl.org/lotwuser/upload

Enter your username and password

Your LoTW user name and password are located in the e-mail which contained your TQ6 file.

Select the TQSL.exe path

Use the ellipses to select the path to the TQSL executable file. Note: You must select TQSL.exe - NOT TQSL CERT.
The default path is C:\Program Files\TrustedQSL\tqsl.exe
For Windows 7 and Vista 64 bit OS the path is: C:\Program Files (x86)\TrustedQSL\tqsl.exe

Enter your private key password

This is the password that you created when requesting your certificate. This step was optional and you may have not elected to use a password.
If this is the case then leave this box empty.
*We cannot assist you if you do not recall your private key password.
You will have to get a new certificate. See www.arrl.org/fixcert

Enter your TQSL station location

Enter your station location from the TQSL program.
NOTE: this is case sensitive. The location must be entered exactly as you named it in the TQSL program.
In this example the location name is N1ZQ Hartford as it is shown
It is not N1ZQ – N1ZQ Hartford
The call sign associated with the location is to the left of the hyphen. The location name is to the right of the hyphen.

About TQSL station locations

- Your TQSL station location provides the geographic information about your operation.
- You may have as many station locations as necessary to accommodate your operating.

Notice in this screenshot KD3AQ has a location for Bucks County and another for Philadelphia.

- Be sure to select the correct station locataion because this is how other operators receive credit for QSOs with you.
- For information about creating station locations in TQSL see www.arrl.org/instructions Instruction #5

Upload your QSOs

The status bar will turn green when complete.

Support

ARRL does not support Ham Radio Deluxe or any third party software.

If you need assistance with HRD please visit the HRD web pages http://www.ham-radio-deluxe.com/ or the users group forum.

DO NOT contact LoTW help or ARRL with questions about Ham Radio Deluxe. You will only be directed to the above sources.

http://www.karc.net/OperatingEvents/N1MM/SetupN1MMlogger.html?HQP~0
HIQSO Party N1MM Logger Setup
1. General Information

The N1MM logger is a FREE general purpose contest logger that supports a large number of Amateur Radio contests. This is a short explanation of how to install and use the program for the Hawaii QSO Party contest. Some of the N1MM program features for automated logging are covered, they can be skipped and logging done manually.

While this manual is intended to help full installation of the N1MM logger, it does contain information useful for just operating a station, e.g. multi-operator contest stations. Sections 10 thru 13 cover just logging. Section 9 is useful for CW operators. Running a CW contest using a keyboard and mouse requires some thought and a bit of practice helps too!

The N1MM logger has a well written manual to guide user in installing and in using these more complex features. So we'll concentrate a limited set of features for manual operation for the contest. This tutorial will get the logger program working manually, with optional steps 8 and 9 covering how to connect a specific transceiver - the Kenwood TS-480. If you're interested in features to control your transceiver, it would be best to use the program documentation on the N1MM web site.

The logger has two components - the "Base Install" and "Latest Updates". The "Base Install" is latest product that changes infrequently, perhaps once a year as new features are added. The current version is 10.0.0. The "Latest Updates" file is the definition of contests. Updates are frequent, as often as once a month, as new contests are added or contest rules change. The version that supports the 2011 Hawaii QSO Party is 11.06.01.To complete the program, both have to be downloaded and installed.

The N1MM logger is designed to be easy to maintain.
Updates can be installed without un-installing previous versions or rebooting.
It isn't necessary to install each update. The "Latest Update" is a cumulative collection including all previous updates.
Older versions can be re-installed by running the older "Update".
It is not necessary to un-install the program between versions.
The un-install program will remove all registry and DLLs.

To print all 17 sections of these instructions, click on the "Print These Instructions" on the left of the screen.

If you would prefer to follow the more general instructions for the N1MM logger, the home page is located at: http://n1mm.hamdocs.com/tiki-index.php.
2. Install "Base Install"

Installation is two-step process and both must be done before using the program. The first step is the Base Install, described below. The second step is the installation of the Latest Update covered in step 4.

Click on the link below to start the download of the "Base Install" and then select RUN button which will start installation after the download is complete.
Base Install: http://karc.net/OperatingEvents/HawaiiQSOParty/Base.html

Follow the installation program options - NEXT, NEXT and then select the boxes on the "Choose Components" window which will install only the logger program and place two shortcuts on the desktop - one to start the N1MM logger and a second to open its manual.

Click NEXT then INSTALL and at the end of installation DONE and FINISH to close the install windows.
3. RESTART the PC

Before continuing the install process, RESTART your PC. Afterwards continue with the Step 4 to add the "Latest Updates" to the base program.
4. Install "Latest Updates"

Click on the link below to start the download of the "Latest Updates" and then select the RUN button which will start installation after the download is complete.

Latest Update: http://karc.net/OperatingEvents/HawaiiQSOParty/Updates.html

Follow the installation program options - NEXT, NEXT and then select the boxes on the "Choose Components" windows which will install only the logger program and place two shortcuts on the desktop - one to start the N1MM logger and a second to open its manual.

Click NEXT then INSTALL and at the end of installation DONE and FINISH to close the install windows.
5. Station Information

The first time the logger program runs, you need to setup your station information for the contest. For Windows Vista or Win7, RIGHT click on the desktop icon for the program "N1MM Logger" and select the option "Run as administrator". For Windows XP, just double click the icon and give the program Administrator privileges.

The program will run and display the Edit Station Information window. If that window does not appear or later you need to modify the information, the Edit Station Information window can be reopened, from the Entry window CONFIG drop down tab list by selecting CHANGE YOUR STATION DATA.

At minimum the program needs the information shown below.
Your callsign. Be sure to add the DXCC prefix to your call if you are operating outside the prefix of your assigned call. Hawaii stations must have an AH6, AH7, KH6, KH7, NH6, NH7, WH6, or WH7 prefix to indicate their location.
Enter the station licensee name.
Enter the City, State and ZIP code.
Station Latitude and Longitude are required. (The N1MM logger program convention is, West Longitudes are POSITIVE and East Longitudes are NEGATIVE). If you don't know them exactly, good approximations can be found by going to
ZIPInfo.com and entering your US ZIP code, or
QRZ.COM/callsign, entering your callsign and clicking the DETAIL tab (Longitude sign convention is opposite that of the N1MM logger).
For US and Canadian stations the ARRL Section is important to the logger program to determine if you are operating in-state as a Hawaiian station or out-of-state. Contest rules used by the N1MM logger are different for Hawaiian, Canadian, other US and DX

stations. Hawaii stations be sure your callsign is a Hawaii prefix and input your section as PAC (Pacific Section). Hawaii is in the PAC section. DX stations should put "DX" in the ARRL Section box blank.

Once all the information has been entered, click OK to close the Edit Station Information window. You may get a pop up reminder that west longitudes are positive and east longitudes are negative. If you used the QRZ.COM information directly, you may have the sign reversed. Exit the logger by clicking FILE then EXIT.
6. Restart N1MM logger

Double click on the N1MM Logger icon to restart the program. Check the Station Information by reopening the Edit Station Information window. In the CONFIG drop down tab list select "CHANGE YOUR STATION DATA". Notice that the logger program set your "Grid Square" and "IT Zone" using the Latitude

and Longitude data.

Correct any errors and click OK to close the window.
7. Create Contest Log

Program setup is complete. From now on you can always start the N1MM program by double clicking its icon on the desktop. After you closed the Edit Station Information window in the previous Step 5, there will be two other windows as shown below. The large window at the top is the Log window where contact information will be stored line-by-line as each contact is confirmed. Note, even though your computer has its clock in local time, this window keeps a date and time clock in UTC format in the title bar. (Outlined by a red box in the picture below).

Close this window so we can concentrate on creating the Contest Log, where contact information is stored on the HDD. Later we'll show how easy it is to open any on the many windows the N1MM logger keeps for contesting.

The remaining window is called the Entry window used to enter contact information. More about it in following steps. The last thing we have to do to begin logging contacts is to create the log file, where contact information will be stored. Click the FILE tab of the Entry window and select the first entry "New Log in Data Base".

Only two selections are needed to complete the log file:
Log Type, which should be "QSOPARTY", and
State for Log Type QSOPARTY which should be "HI"

See the red boxes in the picture below for the location of these two selections. Next click "OK" to create the log for the Hawaii QSO Party.

8. Transceiver Connection

If you'd prefer to skip setting up a direct connection go to Step 9. You can still use N1MM to log all your contacts with manual input for frequency and mode!

Like most logger programs N1MM supports a COM interface to the transceiver to get the exact frequency and mode rather than have the operator input it to the program. This automation can further reduce operator tasks and errors, for example the operator forgetting to input the frequency when changing bands or modes.

For some rigs and versions of Windows this can be difficult to setup. Instructions in this section assume use of Win7 and a Kenwood TS-480. If you are using a previous version of Windows or a different transceiver the instructions may still be helpful. Actually if you choose to connect your rig and find information helpful to others, please drop us an email and we'll incorporate suggestions into these setup instructions.

To connect a rig like the Kenwood TS-480 to most PCs running Win7 you will need a COM to USB adapter. Most current transceivers like the TS-480 use a COM port to control and/or send frequency and mode information to PC. Most new Windows PCs no longer have COM ports but their USB ports can simulate a COM port. You will need a COM to USB converter and unfortunately not all such devices provide the perfect simulation of COM ports. These instructions are for adapters that contain the FTDI chip set and driver software. The table below lists the cable and adapter used to "debug" these instructions. The links are to pages on Amazon.com and may be out of date by the time this information is needed. There are other manufacturers of equivalent products. Just Google or BING to find current information.
USB to RS232 serial male DB9 10ft. cable adapter
DB9 female/female mini gender changer

The TS-480 uses a male DB-9 RS-232 connector so be sure to get a 9-pin female adapter like the mini gender changer listed above. Boot up your Win7 PC and then connect the USB side of the adapter to a PC USB port. With the exception of the Win7 "Starter" version, all version of Win7 have the device drivers for the FTDI chip set so Win7 will detect the adapter and begin installation of the drivers. (If your version of Windows does not find the drivers you will asked to locate it and do a manual installation. FTDI has a list of VCP (Virtual Com Port) drivers for various operating systems athttp://www.ftdichip.com/Drivers/VCP.htm.

When the drivers have been successfully installed, Win7 will display the small window shown below. Notice the USB Serial Port line shows Win7 has assigned a COM port number to the driver. In this case it is COM8 but it can be any other port but it must be 8. N1MM cannot handle port numbers greater than 8. If Win7 assigns a port number bigger than 8, check out step 17 for help. It is important to remember this port and assign it to N1MM so the logger knows what COM port to use to communicate with the transceiver.

The N1MM COM port assigned to the transceiver must be the same one Win7 is using. However the Win7 COM port settings for baud rate, byte size, parity and any other values for the asynchronous communications are not used.You do not have to set the COM8 port values in Win7. All you need is to remember the port number.

To set the N1MM COM port parameters click on "Config" and select "Configure Ports, Mode Control, Audio,Other".

The Configurer window opens as shown below. Locate the COM port line for the FTDI adapter. If your configuration is a little complex and you forgot to write down the COM port as was previously recommended there are instructions in Step 16 (Which COM Port?) to help you locate it.

Using the drop down list to the right of COM8 (or whatever port Windows assigned to the FTDI adapter) to selectKenwood. Click on the SET icon to set the parameters for the Kenwood-480.

The left pointing arrow in the window below are suggested setting for generic Kenwood equipment. These instructions differ! We recommend TS-480 "HANDSHAKE" settings be ignored

and DTR and RTS set to ALWAYS. With TS-480 power off, N1MM will "hang" with the HANDSHAKE settings. The TS-480 works fine with DTR and RTS set to ALWAYS (shown set to ALWAYS in the red box). Set the

parameters as shown and click OK.

The Configurer window will be updated and any changes displayed to the right of SET button on the COM8 line. (See the values shown in the red box).

Click OK in the Configurer window and N1MM will attempt to communicate with the TS-480. You should hear relay clicks if all is well.

However for the PC and transceiver to be able to "talk" to each other, N1MM and the TS-480 transceiver must be set to the same 4800 baud rate.

The TS-480 has the ability to set the baud rate. Press [MENU/ F.LOCK] and turn the MULTI control to select Menu No. 56 on the TS-480 transceiver. Use [∧] / [∨] to select the 4800 baud rate. Some transceivers may not make the change immediately. You have to "reboot" the TS-480 transceiver (turn power off and on) to have the baud rate take effect.

If you have the correct cable between the PC and the TS-480, N1MM should show the TS-480 display frequency in the N1MM Entry Window title bar (red box in the picture below). While turning the TS-480 frequency dial N1MM should track the frequency.

Reminder - Make sure the N1MM Configurator Com port and the transceiver Com port have the same baud rate.
9. WinKey CW Setup

If you'd prefer to skip setting up a WinKey for CW operation go to Step 10. You can still use N1MM to log all your contacts with CW sent via your transceiver!

There is an advantage in running a CW contest from a PC since repetitive manual operations can be automated. N1MM centralizes operations to one keyboard. With N1MM there is no need for special keyers with memory or other features. To use this N1MM contest functionality from a keyboard, an interface between the PC and the transceiver key jack is needed. WinKey is one popular device used by many Amateurs that has both PC and paddle interfaces. The operator can switch from the keyboard to his familiar paddle at any time during a QSO.

There are other ways to connect a transceiver and a PC using N1MM and most of what follows applies regardless of the interface used. For the purposes of producing these instructions, WinKey was chosen. If you are interested in purchasing a WinKey kit, the link to the web site is:http://k1el.tripod.com/WKUSB.html

These instructions assume you have already connected WinKey to your PC via a USB port below COM8. The Configurerwindow below shows WinKey connected to COM2. (Reminder - the Configurer window is opened from the N1MM Configtab and selecting "Configure Ports, Mode Control, Audio, Other".

In the COM2 line select the "CW/Other" column and then click the Set button.

Select the setting as shown in the window below. Make sure the WinKey is checked since it is not the

N1MM default setting.

Click OK leaving the Configurer open. Select the WinKey tab in the Configurer window to change to the view shown in the next picture.

You can set WinKey options to suit your operating style.

WinKey has four keying modes controlling how it handles the paddle (or key) connected to it.
Iambic A ("slap keying") sends repeating dots or dashes when one paddle side is being pressed.
Iambic B ("squeeze keying") sends repeating dots or dashes but also has a squeeze mode that sends alternating dots and dashes when both paddles are squeezed together.
Ultimatic keying is similar to Iambic B, except that when the paddles are squeezed together either dots or dashes are repeated, depending which paddle was last pressed.
Semi-automatic keying send repeating dots but requires the dash paddle to be pressed once for each dash sent.

WinKey has a built in side tone but most operators prefer the transceiver's side tone that can be heard in their headphones. Leave it unchecked if that's how you want to operate.

While there is a WinKey "pot" to control sending, N1MM also has software controls for this. To avoid the having the hardware pot control inadvertently change the N1MM software setting while operating we suggest checking the box to "Ignore WinKey Speed Pot".

Click OK to store the settings.

Only the Entry window remains open and in the image below it is setup for CW on 21300 kHz and the "canned" messages F1 thru F11 are setup for KH6J's FD operation. The callsign in the first window is the start working W1AW who has just called us. The canned messages can be used to complete the contact. Before starting to operate you should practice selecting them and get a feel of their use.

Two more keys are very useful in running a pile up!
The semi-colon is equivalent to pressing F5 and F2. In this case it would send W1AW 2A PAC. When you hear a confirmation from W1AW you press the ENTER key and the contact is logged.
The apostrophe is equivalent to pressing F5 then F2 and then ENTER, completing the logging in one operation.

Running mode is another useful feature of N1MM. Click the box on the left of the Entry window, just before the word "Running". This enables "Running mode". Then pressing F1 or clicking the F1 icon starts transmitting a contest CQ and repeats it every 1.8 seconds. Entering a call sign suspends the CQs so logging operations can continue. Sending CQs can also be suspended by typing ALT+R. Typing ALT+R again resumes sending CQs. Unclicking the box next to "Running" disables running mode.

There are two small circular icons in the Entry window that show the status of "Running" mode. One is green and the other red. By the way the opposite of "Running" mode is "Search and Pounce" mode represented as "S&P". The icons change depending on whether "Running" mode is enabled and sending of CQs is "running" or suspended.
Running Mode Disabled
Running Mode Enabled, but Not Running CQs
Running Mode Enabled, and Running CQs

The CW sending speed is controlled by N1MM. The Page Up and Page Down keys increase or decrease the sending speed by 2 wpm, each time they are pressed. Using a mouse with icon

controls does the same thing.

You can also connect your favorite paddle to the WinKey paddle port (⅛ inch stereo phono plug) and optionally use it instead of the keyboard.

For those who agree to abandon the traditional key, CTRL+K opens a Send CW typing window and connects the PC keyboard to the WinKey. Typed characters are displayed in the window and causes them to be transmitted. PressingCTRL+K a second time closes the Send CW window and returns the PC

keyboard to the N1MM program for logging operations.

To edit the contents of canned messages right click on any of function keys. A window with all of the messages is displayed and using the mouse cursor and keyboard individual messages can be changed.

The special symbol in the messages {exch} is the "Sent Exchange" taken from the contest log created in Step 7. We could also write 2A PAC for the ARRL FD contest. The form {exch} allows the canned messages to be used with other contests, something avid contester appreciates and {log} has the same effect as the Enter key. The symbol ! refers to the callsign currently in the first Entry window. The symbol * is our callsign, KH6J, taken from the callsign entered as the station information in Step 5.
10. Change Frequency/Band

There are four data fields in the Entry window. The first is normally used for the callsign of the station being contacted, the second the sent signal report, the third the received signal report and the last the contact exchange received.

You can also enter the frequency of your receiver in the box normally used for callsigns. In the example below, the frequency of 21.3 MHz is entered as 21300 in kHz.

You can enter the frequency as often as you want, keeping perfect records of each contact. However for the purpose of scoring the contest, any frequency within the band operated is adequate, e.g. you might enter 21300 when starting to operate 15 meter phone and later 14250 when switching to 20 meters.Press the ENTER key to change the frequency.

Afterwards the frequency entered will show in the Entry window title bar (outlined by a red box in the picture

below).

If you have connected N1MM to your transceiver (Step 8), setting the frequency with N1MM will also cause the transceiver to change. The frequency shown in Entry window title bar will also appear on the transceiver display. If this causes a band change you may have to re-tune the transceiver and/or change antennas before continuing operating.
11. Change Mode

The mode being used is also entered in callsign box.

The Hawaii QSO Party contest scores separately for contacts made in different modes:
CW - enter CW
Phone - enter SSB
Digital - enter PSK or RTTY

Press the Enter key to change the mode being used.

Afterwards the mode will show in the Entry window title bar (outlined by a red box in the picture below). CW and RTTY will appear as entered. SSB will be changed to either LSB or USB, depending on the convention of the HF band being operated. PSK will always show as USB because that is the dominate modulation used on all HF bands. (The Hawaii QSO Party rules allow only PSK31 operation).

If you have connected N1MM to your transceiver (Step 8), setting the mode with N1MM will also cause the transceiver to change mode. The mode shown in Entry window title bar will also appear on the transceiver display. This may cause improper operation, e.g. operating USB in the CW portion of the band. You may have to change frequency before continuing operating.
12. Logging Contacts

The Entry window is really the only one required to run the contest. Other windows are available and we'll cover some of those in later steps. But if all you want is to have a computer record for submission of your log for contest credit, this window will meet your needs.

For multi-operator contests, N1MM will keep track of who was operating, something valuable if there are questions about a log entry at a later time. Before operating each operator should use the CTRL+O to open

an input window to enter his callsign.

You can make the window small so other applications can share the screen. Just put the cursor on the right or bottom edges of the window, hold it down and the side will move with cursor motion. The font size can be changed by clicking the View tab and selecting the Font Size option at the bottom of the list. Be careful to choose a font size that allows the longest callsign in the entry window. Remember you can lengthen the entry fields by pulling the Entry window to the right.

In the pictures below there are three minimum sized Entry windows showing steps to enter contact information. The windows have been resized so only the logging entries are visible; the function keys F1 thru F12 are hidden below the bottom of the window. The first step in logging a contact is to input the callsign of the station being worked. In the window below, the callsign typed is AH6OZ. You have two choices to complete typing the callsign, Input a space: Two 59 reports are filled in and the cursor moves to the Exch field ready to input the exchange.
Press the Tab key: Two 59 reports are filled in and the cursor moves to the Snt field ready to input a report different from "59"

Regardless of the way the callsign input ends (space or tab) the displayed window will be the same. Only the cursor position for the next input is different.

After inputting the callsign (AH6OZ) the QTH information for the station being worked is displayed in the status bar: Prefix - Country, Zone, Continent. (See text in the red box.)

Next enter the Exch. In the example below the HIQSO Party QTHID (HON) is input. Note the callsign

turns red indicating a new QTHID multiplier.

Before pressing the ENTER key to record the contact to HDD you have the option of adding a note to the contact. PressCtrl+N to open a Note window. The note can be any text - nickname

of the operator, a

promise to QSL, etc.

Click OK to add the note to the contact or CANCEL (or press ESC) if you decide not to record it.

If Exch is invalid the ENTER key will not work. Instead you'll see the status line of the Entry window

updated with an error message.

Make corrections and try the ENTER key again. If you decide that you can't fix the contact info and want to move on and fix it later, Crtl+Alt+ENTER will override error checking and store the erroneous QSO information after giving you an opportunity to add a note. Clicking OK or CANCEL (or pressing ESC) with the Note window open in this case will store the note, record the invalid QSO information and clear the Entry window.

It is now saved. Baring a catastrophic computer failure during the contest, your log is safe.

After saving the contact to the log, the Entry window is cleared, ready for the next contact. The status bar is updated with contest statistics - in the picture below, 9/3 means the log has 9 contacts with 3 multipliers (QTHIDs) and the 108 is the total points score thus far. (See the information inside the red box).

13. Duplicate Contacts

Working a station a second time on the same band in the same mode is not counted as a new contact. (In a different mode on the same band or on different bands is OK). These are duplicate contacts or DUPS for short. The N1MM logger detects DUPs as soon as the callsign is entered. A big red Dupe! appears on the

right of the Entry window.

If you press the Tab key once all the information from the previous contact copied into the contact fields. Then pressing ENTER will record the duplicate contact in your log, but it will not be counted in your score.

In many situations it is easier to just record the contact a second time and move on to the next contact, e.g. a weak station that is difficult to hear. It may be that this is DUP for you but not for the other station. Trying to sort out the situation takes time away from working other stations. It really is easier to complete the duplicate contact and let the logger program sort out scoring.

If both stations quickly agree this is DUP you can clear the Entry window with CTRL+W (WIPE) without entering it into the log.
14. Other Features

This short tutorial is intended for new contesters and specifically targeted for use with the Hawaii QSO Party. The N1MM logger is an extremely powerful program with many more features than are documented here. It has amazing flexibility and adaptability that allows its use with just about any Amateur Radio contest conducted worldwide. You are encouraged to read the well written general manual and learn about the many features that can help you enjoy contesting.

Each contact recorded using the Entry window is stored in a log file. The Log windows can be displayed by selecting theWINDOW tab then LOG. It is possible to edit (make corrections) by double clicking on a line which will copy the information to the Entry window. You can make changes (for example, correct the callsign) and press ENTER to write the corrected information back to the log.

As explained in Step 10 the logger keeps track of Hawaii QSO Party QTHID multipliers in the status bar of the Entrywindow. It also has a MULTIPLIERS window that can be opened using the WINDOW tab then selectingMULTIPLERS.

The logger keeps track of QTHIDs, DXCC countries, Zones, US states, the US District of Columbia, Canadian provinces and territories worked. The Multipliers window can be re-sized to show this information in four separate frames, selected by clicking one of the four check-boxes in the left of the status box - Country, ZN, Sect or Other.

The OTHER tab displays the QTHID multipliers for the Hawaii QSO Party. The picture below shows how QTHIDs are shown. There are six boxes for each QTHID - 160, 80, 40, 20, 15, and 10 meters for a total possible 66 multipliers (eleven QTHIDs on 6 bands). If the QTHID has been worked on the band the box is colored pink. The picture shows that Honolulu (HON), Kauai (KAU) and Molokai (MOL) were worked on 40 meters.

These setup instructions just scratch the surface of N1MM capabilities. N1MM is a full featured program that can be configured to control your antenna rotator, log into packetcluster nodes, etc. . . . The program web site with more details is located at, http://n1mm.hamdocs.com/tiki-index.php
15. Send Log for Awards

To check any notes created during the contest, in the Entry window VIEW Tab, select NOTES to open the

Notes window.

Below is a sample of a Note window. The information can be used to edit the Log window and make any necessary corrections before converting it to Cabrillo format and sending it to the awards committee. With the SAVE button you have the option of convert the notes in the window to text and saving it in a file whose default name will be your callsign with a file extension of TXT.

To convert the N1MM logger file to Cabrillo format (a standard text format) click File, then Generate Cabrillo File. Follow the menus, selecting a folder to save the file whose default name will be your callsign with a file extension of LOG.

To submit your contest log, just send an email to awards@... with the LOG file attached.
16. Which COM Port?

Forgot which cable is assigned to which Win7 COM port? Read on!

To find which COM port your FDTI adapter cable is connected, first make sure it is plugged into its USB slot on your PC. Open the device manager by clicking on the Win7 START button, typing "dev" into the Search window and clicking the iconDevice Manager.

To open the COM ports list click the little triangle ▹ left of the line "Ports (COM & LPT)".

Remember all the port numbers currently connected. Write them down?Unplug the FDTI cable. The COM port for the one that disappears from the list is it! Write it down and continue where you left off.
17. COM Port > 8?

If you Win7 assigns a port bigger than 8 to your device you have a problem. N1MM cannot handle ports above 8, so you will have to reassign the port number. Hopefully if you already have experience with a Win7 PC with a lot of port devices, you already know how to do this. But here's what to do if you’re not 100% sure.

You probably got a Win7 install window like the one below.

COM9 or bigger won't work. You can use the Win7 Device Manager to change the port number. First open the device manager by clicking on the Win7 START button, typing "dev" into the Search window and

clicking the icon Device Manager.

Open the COM ports list by clicking the little triangle ▹ left of the line "Ports (COM & LPT)".

Double click COM9 and select the Port Settings tab.

Click the Advanced icon

Click the COM Port Number drop down selection box and select a different port below Com8 (COM2 in this case) and click OK. Close all open windows and continue where you left off.

http://www.pvrc.org/~n4zr/Quick.htm

N1MM Logger Quick-Start Guide

The purpose of this guide is to give the brand-new user an easy path to getting the software running for the first time. That means using it without any external interfaces, initially and only then adding radio control. Further interfacing (such as CW, PTT and transmit audio) is covered in later chapters, along with related operating techniques. I have not tried to address digital modes in this guide, because while some aspects of program operation are identical, most are different, because of using MMTTY, MMVARI or a terminal unit to decode the digital transmissions.
Special thanks to Bob, K0RC, for his contributions to this second draft. He sanity-tested the original by installing N1MM from scratch and uncovered some errors and omissions that are (hopefully) corrected below.
Before we start, let me make a pitch right now for the excellent Google search capability built into N1MM Logger. You'll find it on the Help menu in the Entry Window (see below). It searches the 300-plus pages of the manual for keywords you select, exactly as Google does searches of the Internet. You may have to adjust your searches to get the terminology exactly right, but when you do, you'll be glad you did. With this capability you always get access to the latest version of the manual without having to download it, and you can almost always find what you want within a minute or two - highly recommended!
 Chapter 1 – Getting Started
Setup
I’m assuming that you followed the instructions for downloading the program on the website (http://www.n1mm.com/), first installing Version 8.0.0 and then updating to the latest version. I’m also assuming that during the base installation you installed the Help files, downloaded the manual, and installed dlportio if needed by your operating system (Windows XP, Windows 2K, and Windows NT).
All this having been done, you’re ready to start the program for the first time. The first time you run it, the very first thing you’ll see is the following notice:
Click on OK, and what comes next is what we call the "splash screen."
After that, the next dialog that opens automatically is referred to as Station Data:
Since you have never run the program before, it is filled in with Tom, N1MM's information. You should replace it with your own information, in the same format. This is very important for proper operation of the program.
When you see one of the blue “Tip:” notes, be sure to pay attention – for example, this one warns you to be sure your computer is set up for local time, NOT GMT. N1MM Logger will take care of the conversion for you. Don't worry about the SMTP server address unless you know it off-hand - it is only useful for bug reporting. When you have completed the form, click OK.
Next comes what looks like an error message:
Don’t take it seriously – this is related to playback of audio files, something you won’t need for a long time yet. Just OK out.
  After that you will see an Entry Window, at the upper left of your screen. :
 Let’s get a little terminology out of the way first. The top blue part of this (or any)

window is called the Title Bar. It displays the current frequency, mode (if one has been selected), and which radio it is (nominally, Radio A). You will have to enter a mode before you begin to operate, and a band and/or mode each time you change either. You do that simply by typing a frequency in KHz (3500, 7000, etc.) in the Call-Sign Field (to the far left) and hitting [Enter]; then typing a mode (CW, USB, LSB) there, hitting [Enter] again, and you're set.
The first menu row is standard Windows style, and we'll be using it in a minute. Below the menu is a set of entry textboxes. This row is where you log your contest QSOs. The left-most field is the Call-Sign field. You always enter the call sign of the station you are working into this field.
.
The rest of the data entry fields are titled above them - depending on how you have resized the window, they may not line up perfectly with the entry fields, but they are always in the same sequence as those fields are. Depending upon the specific contest and the required contest exchange, the number and titles above these windows can be different. The example window shown above would be used during the IARU Contest. This contest requires a call sign, sent and received signal reports, and the IARU Zone be logged for each contact
For now, you can ignore the "Running" check-box, as well as the rest of the buttons alongside it. This controls one of the most important features of N1MM Logger – it distinguishes between Run and Search and Pounce modes, providing different features for each. However, these aren't really relevant until you get into sending stored CW and phone messages, which are covered in Chapter 4. The rest of the buttons in the Entry Window are related to this, and to other advanced capabilities.
If you want to save space on your screen, you can reduce the size of the Entry Window, like this. Just use your mouse to grab the lower right corner or lower edge of the window and drag it upward.

There are two more useful features of the Entry Window. The box in the lower left corner, called the Status Line, provides a lot of useful program status information. For example, if you enter a call sign, the Status Line will tell you what country it represents. If you have set up the Entry Window just a little bigger than the minimum, it will also show you the distance and bearing, like this.

To the right of the Status Line is the progress box, where you can keep track of your QSOs and multipliers without having another window open, and to its right is a running score.
If you press the backslash (\) key, the program opens a second, almost- identical entry window. The only difference is that it will have a "B" instead of the "A" in the title bar of the first entry window, and it may well have a different frequency and/or mode as well. But if you pop up the second Entry Window by mistake, and want to get rid of it, you simply close it by clicking the big red X.
The idea is this - most modern transceivers have two VFOs, or a main VFO and a sub-VFO. There will be circumstances - during a contest on 40 meter SSB, for example - when you will want to receive on one frequency and transmit on another, widely-separated one. Since we haven't yet gotten to controlling a radio (that's in chapter 2) it's not appropriate now to get into a lot of details, and in any case different transceivers (or brands of transceivers) manage dual VFOs differently. If you are running two radios (SO2R), the second Entry window controls the second radio.
If you really want to disable the second entry window until your radio is interfaced., select the Config menu, and under the dropdown menu, select Configure Ports, Telnet Address, Other.
That opens this rather intimidating dialog:
Ignore everything else, and just select your operating mode, from among the choices "SO1V",

"SO2V" and "SO2R." SO2V is the normal default - it stands for "Single Operator 2 VFOs", and assumes that you will want, at some point, to use the second VFO of your radio for things like working split in SSB contests. Select SO1V if you wish to disable this (it prevents the program from opening the second entry window any time you press the "\" key). SO2R stands for Single Operator 2 Radios. To disable the second radio or VFOs Entry Window, select "SO1V". Now OK out.

In the row below the entry fields in the Entry Window are two colored dots – the green dot denotes which Entry window (if you are using two VFOs, or have more than one radio) has the Entry or Receive Focus. That is, it's where information will be entered if you type it, and also the radio (or VFO) which will transmit any Function Key you press on the keyboard. The blinking Windows cursor denotes the same thing, and so does the change in color of the title bar and frame of the entry window. The red dot denotes the Transmit Focus, which frankly is not very useful, because it denotes the radio (or VFO) that transmitted the last message. More on this whole 2-radio/2-VFO business later.

A word about fonts. Windows defaults to a sans-serif font that does not distinguish well between "oh" and zero. If you click on View in the menu row, you'll see "Set Font" as one of the options. Click on that and you'll be given a list of available fonts, like this:

I have chosen Monaco for my font, even though it is normally used by Macintoshes, because it gives a good clear 0/O and l/1 distinction. In addition Monaco bold is a little bit bigger than the unbolded type-face in a given size, which helps legibility in some windows. You can make similar choices in the Log and Check windows, by right-clicking them to get the appropriate sub-menu. You may have to play around a bit with the window size and font characteristics (Bold/Regular, or point size) to fit everything in the exchange field - this is particularly true of the signal reports "59" and "599".

Now, we're ready to set up a contest. Note that the first database the program creates is named ham.mdb by default - you can have as many databases as you want, and name them what you want. I'm using ham.mdb, but my program directory is named MM Beta (for historical reasons). Some people prefer to create a database for every contest, while others create one for a period of time, like every year. If you want to create a database, for example "2007.mdb", just click Files to drop down the menu, and then click on "New Database".

That will open a standard file creation dialog in your program directory

Name your new database and click Save. You'll be switched to the new database and ready to go.

Back to the Files menu again. This time click "New Log in Database: C:\Program Files\N1MM Logger\ham.mdb" A new dialog opens.

The first thing to do is to click on the down button of the Log Type field. That will open a list of abbreviated contest names, as I already have done above. You can use your mouse to scroll through the list, or type the first letter of the contest to jump to the right general area. Once you have found the contest you want and highlighted it, click back in the original field and the drop-down list will close.

Fill in the start date for that instance of the contest, in the format shown. This is a good idea for calculations of total contest time and to keep track in case you have logs for many different instances of the same contest name, such as QSO parties. Since I'm just illustrating here, the date is today.

Next, fill in the information in the next few fields, denoting the class and category you intend to enter in the contest. In each case, you have drop-down lists available. "Overlay category" refers to contests like WPX, which have both regular classes and categories like Rookie or "Tri-bander plus wires". In most cases, "N/A", for not applicable, is the answer you want there.

Next comes the most important part of this dialog, the Sent Exchange field.

For many contests, the program guesses what you will want – for example, in this case, since the CQWW contest uses CQ zones, it has already picked zone 5 for me. Note the “Omit RST” warning. If the contest you choose has serial numbers, like WPX or the NA Sprint, then you need to put "001" at the start of the Sent Exchange field. Hence, for WPX, my Sent Exchange would read 001. An important exception is the ARRL Sweepstakes. The serial number is "assumed" for this contest only, so my Sent Exchange for SS would read B 54 WV. More information on the Sent Exchange is in the Supported Contests section of the manual. Once you have filled in the Sent Exchange, you’re done for now. Just Click OK and hit [Enter]. Now you’re almost ready to operate in the contest, but first it’s time to open a few more windows. Go back to the Menu line in the Entry Window, and Click “Window”. A sub-menu will open, like this:

To begin with, click on the “Log” window. That will open a Log window on the screen, like this:

First, you should notice that the title bar gives the current date and exact time, the name of the contest, and the database in use. As you log QSOs, they will appear in the log. I have logged one above just to indicate how it looks. The most recent last QSO is highlighted. You’ll note that each column has a fixed label – these labels do not change. CQWW is a 2-multiplier contest, so the log shows columns for "Mult" which is the country, and "Mult2" which is the CQ Zone. The "yes" in each simply means that it is the first of that multiplier on that band. If you click on any column heading, the entire log is sorted by that attribute – for example, if you click on the Mult heading, the log will be sorted so that all of your first QSOs with a given kind of multiplier (in this case, a new country) will be moved up to the front. Click on TS (for timestamp) to switch back to the normal log order.

A further nice touch - if you click a second time on the column heading, for example the "Call", the sort order switches from Ascending to Descending, so that all your "Z" QSOs come first, and your "As" last. Same goes for the TS (TimeStamp) heading - normally, you'll want to leave the Log Window in TS ascending, so that each QSO you log appears immediately at the bottom of the list.

The Log window has two “panes” – the one above the dark-grey line is the normal log, while the one below the line is to show you previous QSOs with a station, each time you type its call into the Entry Window. You can resize the entire log window, or move the separator to make the previous QSO pane bigger.

This makes it very easy to see, quickly, all the information about previous QSOs, for that special someone who drops by and asks, “What was the serial number you gave me yesterday.” Like all windows in N1MM Logger, the Log window is resizable, as are the individual log columns – to resize the whole window, use your mouse to drag and drop the lower right corner, and to resize a column grab the between-column divider and drag it right or left. You can move any window around the screen by dragging and dropping its title bar. Also, as I mentioned above, you can change the font in the Log window by right-clicking in the window, and choosing your font as you did for the Entry window.

OK, another important window – the Check window. You open it the same way as you did the Log window., and set the font the same way (with a right-click menu choice). This window is used to display the results of checking a call-sign against your log and also against a master list of calls, variously called the master.dta or Super Check Partial file. One is provided when you install the program, and the process of updating is covered in the manual.

First things first, though. When you type a call-sign in the Entry Window, the Check window displays whether a match was found or not. If the match is in your current log, it is shown in the first line of the window, like this:

Note the program warns you that you have already worked that station, and can't do so again on the current band (or maybe in the entire contest, like SS). Also note that two lines below are two possible matches from the master database.

Had the station you copied been W1AWB, when you entered the "B" the Check window would change to reflect that, as follows:

Note that the station's call appears in blue, meaning that to work the station would not be a new multiplier, but would be a valid non-dupe QSO. This color coding is consistent throughout the program. Because it appears in the second row, you know that it is from the database and not from your log (if for example, you had worked him on another band, the call would appear on the first line, in blue).

OK, that's probably enough about the Check window for now. These are really the only windows you need to operate your first contest with N1MM Logger. Now let's sit down and operate.

For the purpose of this guide, we'll assume that you're operating in the CQWW SSB contest. In that case, the Entry Window will look like this:

I'm assuming that you're going to operate phone to start, so I have typed in USB in the call-sign field, and hit [Enter]. I have left the default frequency (20M phone) in place, but if I wanted to show another band, I need only type a frequency (in KHz) in that band (like 21200, for example) in the call-sign field and hit [Enter] to change bands.

When I've done these things, I then type a call-sign in the call-sign field. Even before I look at the Check window, I see that the call sign is color-coded green. This means that it is both a new contact and a double multiplier (in this case, both the new country of Martinique and the new Zone 8). The beam heading is displayed below, as are the country, its zone and continent (which affects points per QSO). If I have already worked Zone 8 on this band, then the call sign will be color-coded red, signifying just a new country. If both the country and zone had been worked before, but the station has not, then the color code will be blue. If it is a dupe, the call sign will be coded grey, and the warning "Dupe!" appears to the right of the entry fields.

So, you call him, and he answers. At this point, just hit [Space] to fill in the expected signal reports and move the cursor to the Zone field. N1MM Logger uses the [Space] bar as a "smart tab". The idea is that it will skip fields you are unlikely to want to change and move immediately to the one you may need to. Note, too, that the Zone is highlighted. This means that if you need to change it – for example, if FM5BH really was in Zone 9 (he isn't) – you would just type "9" and the "8" would be replaced.

Ok, but suppose he's a wise-guy and gives you a "57" report instead. No problem – you just use the [Tab] key twice, and the cursor will be on the second digit of the received signal report, ready for you to type over. The [Tab] and [Shift]+[Tab] work just as you'd expect in Windows, moving forward or backward one field. Here's how it looks:

If you need to correct the call-sign, use the [Space] bar to get you quickly there and edit as necessary. Then, once everything is as you want it (and the QSO is done), all you do is hit [Enter], and the QSO will be logged.

One thing that trips everyone up at least once is that the program checks to make sure that you have entered everything, and that everything is correctly formatted. For example, if you accidentally fatfinger the zone number, like "89", the program won't let you enter the QSO. This can be disconcerting at first - you get an error message in the status line, like this:

f the program has blocked you from logging the QSO, just use the [Space] bar to move to the appropriate field, correct it, and hit [Enter} to log. If you absolutely can't figure out

what the correction should be (for instance, with an ARRL section in Sweepstakes), you can hit [Ctrl]+[Alt]+[Enter] to bypass the exchange checking and log the QSO "as is." Just in case you want to put a note in the log, when you do this a note window opens. Type whatever note you want and Hit [Enter], or just hit [Enter] to skip it and get back to the contest.
Suppose you miscopied a call sign, or he didn't really come back to your call, so you now have a mistake in your log. If you need to delete the QSO altogether, just hit [Ctrl]+D. The program will ask you if you really want to move the QSO to a Deleted QSOs file. Just hit [Enter] to do so, or type N for No.
If you need to edit the QSO, hit [Ctrl]+Q, and put the program in QuickEdit mode.

You'll notice the words QuickEdit above the call-sign field, and that the background of all of the entry fields is now blue. You can move through the fields as before and make your corrections. Then hit [Enter] and the QSO will be corrected in the log, or else hit [Esc] to get back to normal logging mode and cancel any changes. Be careful not to leave the program in QuickEdit mode for your next QSO, or you'll screw up two QSOs at once!
As you log more QSOs, you'll note that the call-sign of your last previous QSO will appear in the space right above the call-sign field. This area, called the Call-Frame, will be very important once you have interfaced the program with your radio, but for the moment it is just a reminder of who that last guy was.
Remember, each time you change bands, you need to enter the frequency of that band in the call-sign field, and, if you change modes, enter that there too. For example, if you switch to 40M CW, you would need to enter 7000 and then enter CW (separately) before you begin logging QSOs on that band.
So, you've logged a bunch of QSOs, the contest is over, and it's time to send in your log. Almost all contests these days accept Cabrillo-format logs, and that's what N1MM Logger usually provides (check contest rules for any exceptions). To export your log in Cabrillo format, go to the File Menu in the entry window and select "Export Cabrillo to file."
The program will first check to be sure you have the Sent Exchange you want:
If it's OK, then click OK or [Enter]. Next you will see a standard Windows "Save-as" dialog. By default, the program goes to the program directory, but I usually change that to Desktop for convenience:
You can name the Cabrillo file as anything you want ([Call sign].log is suggested), and then click Save and your Cabrillo file is automatically produced and saved.
Next, and this is important, open your Cabrillo file in Notepad and check to be sure that the information in the header is in accordance with the instructions for the contest. N1MM Logger tries to keep up with Cabrillo file format changes, but nobody's perfect, so save yourself some hassle and double-check. Contest categories seem to be a particularly tricky area. You also need to be very sure that you specified the Sent Exchange correctly during contest setup - one common mistake is to put the signal report in as part of the exchange.

Okay – that pretty well wraps up the first chapter. Don't hesitate to use the Google Help facility ("Search Help Using Google (Internet)") to look up more information on any of these topics. It works tremendously well for looking up more details on any of the windows, or exploring any other aspect of the program. In the next chapter, you may need this capability a lot, because so much of interfacing is specific to a particular radio, and you really need more detail than I can provide here.
Chapter 2 – Basic Radio Control Interfacing
Regardless of whether you want to operate phone, CW or digital modes, the most useful and important interface is the one between your computer, N1MM Logger and your radio. Fortunately, most radios now incorporate an RS-232 serial port to enable them to swap information and commands with the computer.

A first step is to look up your transceiver in the manual section titled Supported Radios. Assuming you find your radio there, look for any specific settings or peculiarities that need to be addressed and make a note of them.

Many modern laptops and a growing number of desktop computers lack both RS-232 serial ports and an LPT parallel port, having replaced both with one or more USB ports. Fortunately, once you have purchased a USB-to-serial converter and installed the drivers for it, MM can work with your radio just fine.

Once you have the hardware hooked up between your computer and your radio, start N1MM Logger and open the Config menu in the Entry window. Choose Configure Ports, Telnet Address, Other. Ignore all the other stuff for now.

That brings up the following, rather intimidating dialog. Don’t worry, we’ll walk you through the part you need now.

You may want to select SO1V if this is your first experience with N1MM. SO1V allows N1MM to control VFO A in your transceiver. If you are an experienced contester and understand how to operator in split mode (for example, working DX on 40 meter sideband) you may want to select SO2V. It allows N1MM to simultaneously control both VFO A and VFO B in your transceiver. If you are an advanced contester, whose station is configured with TWO transceivers (one for running contacts and the other for searching for new multipliers), then you will want to select SO2R.

Now identify which port you have physically connected between your computer and the radio (or in the case of USB, the virtual serial port it has created). Click the drop-down arrow under Radio, and select your specific radio model. For this example, I’ve assumed COM3 and a Yaesu radio. Virtually all Kenwood models use the one common radio configuration, while Yaesu and Icom radios are generally designated by the specific model number - refer to the manual under "Supported Radios" for more information. Icom radios require a Radio Address (Hex Code) - see the manual for more information.

Now click the "Set" button next to the port you have chosen.

That will bring up this dialog, with connection details. Normally, N1MM Logger chooses the parameters in the first two rows for you, and does a good job. You might want to verify them with your radio manual, just in case. Radio/VFO number should be 1, so that your main VFO will be displayed in the main (first) entry window. The rest of the stuff on this dialog is not important right now, so just click OK to get back to the previous dialog, and then OK again to return to the Entry Window.If all is well (you did turn your radio on, right?), when that big multi-tabbed dialog closes and the Entry Window reappears, the title bar of the Entry Window will display the radio’s frequency and mode. It’s magic. The “+0.00” simply means that RIT is turned on, but set to zero (no offset)

Now that you have radio control, you can do a lot of neat things, but one of the most basic is that you will never again have to worry about accidentally logging QSOs on the wrong band or mode.

With an interfaced radio, you will find it useful to open a Bandmap window. Click Window, then select Bandmap, and the Bandmap corresponding to your entry window will be displayed. In the example at left, I have filled the bandmap with spots from a packet cluster, just to illustrate how spots are displayed. The stuff in the top bar is pretty self-explanatory. The SH/DX button, when mouse-clicked, sends that request to the cluster (which you don't know how to set up yet). The button labeled “Wide” toggles filters in your radio, though you may have to set it up first (the process is explained in the manual). In any case, clicking on it switches TO the filter mode shown. The red RIT means that RIT is on, and the number left of it is the amount of offset. The black XIT means that XIT is not selected. Turn on XIT and you’ll see it turn red.

The color-coding of spots in the Bandmap is the same as in the Entry Window, so each of

those red calls represents a new multiplier in the contest. If you want, you can mouse over a spot, and the program will tell you more about it, like this:
The “–635 min” tells you how long ago the spot was posted. Generally, you won’t want to keep spots displayed that long, and a little later I’ll explain how to clear spots after a certain amount of time has elapsed.

In a busy contest, certain parts of the band can get pretty crowded with spots. Pressing the numeric keypad [+] key will zoom the bandmap in and spread the spots out, like this:
Pressing the numeric keypad [-] key will have the opposite effect. You can also zoom the bandmap using the scroll wheel on your mouse, if it has one.
Another useful thing about the bandmap. If you single -click on a spot, your radio will automatically be sent to that spot. If, instead, you click on the frequency scale (anywhere within the width of the frequency hash marks), the radio will go to that frequency. There are also keyboard shortcuts that will move your radio from spot to spot up and down the band. This might be a good time to look at the Key Assignments section in the manual, to get a feel for what’s there.When you single-click on a spot, something else useful happens – the call sign of that station is copied to the Call-Frame of the Entry Window, like this. This is done this way so that if you discover that the station on that frequency isn’t OK1XJ after all, you can just type in the correct call. This does happen now and then with packet spots.However, let’s assume it’s OK. In that case, all you have to do is call the station, get him to answer you, and hit
[Space]. Here’s what happens – the call sign is pulled down into the Call-sign field, and the QSO is all set for logging, once you complete the exchange.
Another good thing can happen on the band-map when you complete a QSO and tune off the frequency – the spot’s color code turns to grey, so that you know at a glance that you have worked the station already, and won’t waste time when you come back to that frequency again.

To turn on this feature, click Config, and then, in the dropdown menu, click on the two items checked (see below). You need them both because grey spots are regarded as non-workable, and they will disappear unless “Show non-workable spots” is checked. If you don't work a station, and tune off his frequency, his call sign will appear in the appropriate color to denote whether he's a new multiplier or simply a valid QSO; either way you know to go back and work him later, if he's still there.

By the way, even if you never plan to use packet spots, the Bandmap is a very useful window. As you S&P your way up and down the band, each station you’ve worked will be marked with a grey self-spot, so you can skip by them the next time even if you have no packet spots.
You may be wondering how to move quickly up and down the bandmap, hitting only the workable spots, or those that represent multipliers. This might be a good time to introduce another very useful section of the Manual. N1MM Logger makes extensive use of "hot-keys" to largely or entirely eliminate the use of the mouse during contest operations. There is a very useful section in the manual titled "Key Assignments" which explains each and every such key combination. For example, under "Active Radio/Bandmap Key Assignments" it lists:
Jump to Spots   Note: If you are operating single mode, your mode won't change when jumping between spots.
* Ctrl+Down Arrow - Get next spot higher in frequency.
* Ctrl+Up Arrow - Get next spot lower in frequency.
* Alt+Ctrl+Down Arrow - Get next spot higher in frequency that is a multiplier.
* Alt+Ctrl+Up Arrow - Get next spot lower in frequency that is a multiplier
Try these and see - with a full bandmap and these keystrokes, it is easy to work 100+

search and pounce QSOs per hour, something that used to be regarded as impossible.
As we’re finishing up this introduction to the Bandmap, it might be a good idea to offer another general hint when you’re exploring the program. Be sure to right-click on each new window (other than the Entry Window), to see what options involving that window might be available to you. Each of these options is explained in the section of the manual dealing with that window.
If you do this with the Bandmap, you’ll see this right-click menu:
Of the choices here, “Packet Spot Timeout” is perhaps the most useful. Click there and set the timeout interval in minutes – both self-spots and spots from packet will disappear after however many minutes you choose.
The “Reset Radios” command is also useful in case, for some reason, you lose control of your radio. Click it, and the program resets the connection.
Again, if you go to the manual, you’ll find much more exhaustive discussion of each menu option, but that’s enough for us right now.
So really, that’s all you need to operate contests with N1MM Logger controlling your radio – the Entry Window, the Check Window, the Log Window and the Bandmap. Of course, there are a zillion more capabilities you’ll want to explore, beginning with the capability for sending stored messages, but I have to stop somewhere, at least for now.
Chapter 3 - Interfacing for Phone, CW and PTT
Of course, controlling your radio through a serial port isn't the only way to interface N1MM Logger and your radio - in fact, long before there were computer-controllable radios, early logging software authors developed several standards for CW and PTT interfacing, using either serial or LPT (printer) ports.
The use of your computer sound card to provide "canned" transmit audio in conjunction with logging software came along a little later, but since the target of this guide is new contesters, I'm going to assume that you'd like to hear about it first. Also, over the years, problems with transmit audio have been a leading source of questions on the reflector.
The following discussion is cribbed almost verbatim from audio trouble-shooting notes by Dave Robbins, K1TTT. If any mistakes have crept in, blame me, not him.
To begin with, make sure you close Windows Media Player, RealPlayer, Audacity, or any other sound playback/recording program you may have open. Start N1MM Logger and open the Configure|Ports, Other tab.Now select the Audio tab. As shown here, select option 1 "zero or single sound card" from the drop-down list. Select "default" in the first "select device" list:

Now OK out to save that setting, and close N1MM Logger.
Plug your microphone directly into the microphone jack on your sound card. Plug your headset directly into its speaker output. Open the Windows Volume Control. It should come up with a set of sliders, like this:

Set all the sliders to mid range, and un-mute everything. You may have to go into Options|Properties to check the box to let you see the microphone volume control and those for other sound sources.

5. In Options|Properties, now , click the 'Recording' radio button, and make sure the microphone is checked on the list of controls:
Now OK out. Make sure the Microphone slider is at mid-range and that there is a check in the Select box. If you are using a typical ham microphone, such as a Heil, and you have the "Advanced" button, click on it and select Mic Boost if that option is available, because it provides a 20 dB preamp.

Now, when you talk in the microphone, you should be able to hear yourself in the headset. If you can't, then something is wrong with your settings, hardware or drivers. Try playing existing .wav files using the Windows Control Panel's Sounds option. Recheck volume and mute settings, check that the microphone is plugged into the right jack, try a different microphone, try a different headset. Get your 8 year old kid to help. DO NOT PASS THIS POINT UNTIL YOU CAN HEAR YOURSELF!

Now open Windows Sound Recorder, which is usually found in the Accessories category in your program list. DO NOT open Audacity, any of the audio tools that came with your sound card, or your other favorite tool. Some of them play with the mixer settings and we don't want that now that they are set.

Click the Record button in Windows Sound Recorder, and speak a few words into the microphone. You should see the green trace deflect in time with your voice. Now press Stop. Press the Play button and you should hear what you just said. If you don't there is something wrong with your hardware or drivers. Check recording control settings, adjust volume, make sure the microphone is selected as the recording source, and get that 8 year old back to help again! DO NOT PASS THIS POINT UNTIL YOU CAN RECORD AND PLAY. If Windows Sound Recorder doesn't work, then N1MM likely won't work and since N1MM is much more complicated it is harder to troubleshoot.

Now close the Windows Sound Recorder and start N1MM Logger. Put your radio in SSB mode, and make sure that the Entry Window's title bar specifies either USB or LSB (if you don't have a radio connected, type the appropriate mode in the callsign box and hit [Enter].

Right-click on any of the message buttons in the entry window. That will bring up this table:

The filenames in the table are the default filenames that are put into the table when you first install MM. Depending on how long ago you first loaded MM, the ones above may not be the same ones you see.
The easiest way to visualize this is that rows 1-12 represent the 12 function keys in "Run" mode, while rows 13-24 represent the 12 function keys in S&P ("Search and Pounce") mode. We'll get into why there are two sets of function key definitions in a little while. But for the moment, let's concentrate on programming the Run F1 function key. If you click in the first box under Button Caption, you'll notice that the "pencil" icon moves to that row, and that the cursor will be in the box. Now you can edit the button caption to whatever you want it to be. Then hit [Tab], and the cursor moves to the .WAV File column. In the example above, I'm assuming that you have a \WAV subdirectory in the N1MM program directory, and that you want to name your CQ file as I have.
One last thing - if your SSB function keys have something in the 13th row (S&P F1), temporarily use the Edit function to delete that row, because it will just confuse things right now.
All right - now OK out, and the definition is saved.
A caution - unless you have something in both boxes in each row, the cursor will not move on to the next row. You'll note that it looks like F5 violates that rule, but it really doesn't, because there is a single empty space in that row, which I put there to meet the requirement.
Now watch the bottom of the Entry Window and press Ctrl+Shift+F1. You should see:

If you speak into the microphone at this point, whatever you say will be recorded in the file CQ.WAV. Press Ctrl+Shift+F1 again to stop the recording, and look for this report in the same place:

Now press F1. You should hear what you just recorded in the speaker. If you don't, look for an error message in the status bar. The most common problem affecting playback is that you recorded the file with a different program, using a compression or other parameters that are not supported by N1MM Logger. Another common one is to be looking for a filename that is different than the one that appears in the key definition table. For both these reasons, we suggest using the Ctrl+Shift+Fx process to record within N1MM Logger, at least until you get truly comfortable with audio files.

Now that you've got things working, you need to program at least the first few function keys. It's best to follow the order in the example above, at least for F1-F8, because a little later, when we talk about ESM (Enter Sends Messages) mode, the order is important.
You will also need an interface between your sound card's Line Out jack and the microphone jack on your rig. Typically, this can be as simple as a 10:1 voltage divider (the Line Out signal level is much higher than the microphone jack can handle) and isolation transformers (to avoid feeding AC hum into the sensitive microphone jack on either your sound card or your rig). You can also use any of the commercial interfaces (RigBlasters, for example) designed for digital modes using AFSK.
Here's a simple schematic OK, so now you have everything you need to play "canned" audio messages on the air. If you're content to use VOX to switch your transmitter, and you're not interested in CW, then you can jump ahead at this point to Chapter 4 (Using Stored Messages). However, you may want to have N1MM Logger control your radio's push-to-talk (PTT function). One good reason might be to ease wear and tear on the relay in your amplifier by having it switch on before your transceiver starts sending it RF. For this we need a PTT interface.
CW and PTT Interfacing
First, let's set it up in N1MM Logger. Begin by opening the Config menu to the Ports, other dialog:

Your dialog will show COM ports 1-8 and LPT ports 1-3, regardless of which ports are actually (or virtually) there. For this example, let's choose COM1 as our CW/PTT port. Put a check in the CW/PTT box and you'll notice that the Set button is no longer greyed. Click on it, and open the dialog for that port.
You can configure the DTR pin as either CW or PTT. Click the down arrow and you'll see the list of possibilities:

Highlight the one you want, depending on your interface. Now do the same with the RTS pin: You'll note that the choices are different. This is because commercial interfaces generally do not use RTS for CW, while many default to RTS for PTT. If you are building your own . Just make sure you plug the correct one into the key jack.
Set the Radio/VFO Nr to 1. The PTT Delay setting is to protect the relays in an amplifier by making sure that the T/R relay is closed before the program starts sending CW. The default value of 30 Ms. is fine even if you don't have an amplifier.
Unless you know that you have your COM1 at a non-standard memory address, assume that N1MM knows best and accept the default address it suggests. If it is a USB virtual port, this setting doesn't matter anyway.
OK, now to interface to the rig. The very simplest interface imaginable will work just fine for either the CW or PTT functions with any modern radio; again, there are many commercial options, but here's the Radio Shack parts solution:
CW Messages
From the Tools menu, select Change CW/SSB/Digital Message Buttons, and then Change CW Buttons.

Now this dialog appears:

Again, depending on when you downloaded N1MM Logger, your table may have various messages already in it. No matter - just click on Edit and delete rows until you get all the way back to the empty table above.
As you discovered with voice messages, the database table editor is a little quirky, so let's walk through the process for F1. Click in the first box under "Button Caption", next to the cute little drawing of a pencil. Type a caption, for example F1, and hit [Tab]. Instead of jumping to the next box, the program highlights what you just entered, to give you a chance to change it. Hit [Tab] again and the cursor finally moves to the first box under "CW Message". Now type a message that you want to send frequently, such as a CQ, like this:
OK, what's that asterisk (*)? This is the first and one of the most useful Macros. It denotes your callsign. There are two types of macros, text macros and action macros - text macros substitute a string of text for the macro, while action macros perform some program action. Both are often used in combination with regular text in a message, as shown here - when you press the function key or click the on-screen F1 button, the program will send CQ TEST N4ZR N4ZR TEST (substituting my call for the asterisk).
There's a table of the various sorts of Macros in the chapter by that name in the manual, but for now let's go on. Hit [Tab} twice again, and this happens:
The "pencil" icon has moved to the second row, and your cursor is there. Conventionally, F2 is used for your contest exchange, so let's fill one in:
 {EXCH} is a text macro that substitutes whatever you put in the Sent Exchange part of your contest setup. Say, for example, we were setting up for a contest where the exchange is signal report, your name and your state. When I set up the contest, I put PETE WV in the Sent Exchange. Now when I press or click F2, the program will send 5NN PETE WV.
A couple of fine points - you might think of putting the 5NN in your sent exchange - after all, everyone's 599, right? Well, don't, because it will screw up your Cabrillo log. Just resign yourself to putting 5NN (or 599, if you insist) anywhere you want it sent. Also, most macros are in the form of {WORD}, where "word" is the macro. The curly brackets are necessary so that the program knows it's time to substitute something or take some action.
Two messages will do for right now, so OK out, and get back to the Entry window.
From now on, if you want to change the content of any message buttons, there's a shortcut - just right-click in the area of the buttons, and the table we just left will reappear.
OK - you've hooked up your interface, so now you're ready to send some canned CW. As I said above, you can either hit the function key F1, or click on the F1 button. Either way, the program will switch your radio from Receive to Transmit (assuming you have PTT connected - you can also use VOX or break-in, of course) send the message, and then go back to Receive again.
There are two easy ways to adjust the speed of your CW - either click the up and down arrows next to the CW speed box (where it says "30" in the picture above), or press [Page Up] or [Page Down], to increase or decrease speed in 2 word per minute increments. If you hit the wrong key or button, no problem - hit the [Esc] key to stop sending immediately.
If you want to send CW manually, the easiest way is to parallel a keyer with the computer CW at the transceiver's key jack. Alternatively, hit [Ctrl + K], and a CW window appears:

Type the CW you want, and hit [Enter] when you're done. As soon as you begin typing, the program begins sending; you can type ahead, and the program will finish sending the CW before the window closes.
Chapter 4 - Using Stored Messages in Contests
Now the real fun begins. You have interfaced your radio to the program, so MM knows what band and mode you're using. You can send "canned" voice messages to your radio, as well as

CW, and you can control its PTT.
So now it's time to put all these bells and whistles to work. There are several ways to do this, depending on how much you want to automate the process. The details are the same for either phone or CW messages, so let's look at the possibilities.
First, let's reopen the voice message table, by right-clicking on the message buttons while in USB or LSB.
  If you don't already have all of these messages, use the Ctrl+Shift+Fx process to record them, and then OK out.
Now open the CW message table.

You need to load CW messages corresponding to the phone list above For Function keys 1-8. Here's what it should look like when you finish.
  There are 4 main ways you can use the stored messages, listed here in ascending order of speed and convenience.
One key at a time - press a function key when you want to send the associated message. Use the Space bar to move your cursor. When you have everything filled in, press [Enter], and the QSO will be logged. Done this way, a typical Run (CQ) QSO would look like this:
F1 (CQ)Station answers - copy call in callsign box
Say his callsign (phone) or press F5 to send it (CW)
Press F2 to send the exchange (either a stored voice message or CW)
Press [Space] to move the cursor to the exchange field
Type in the received exchange
Press F3 to send your acknowledgement
Press [Enter] to log the QSO
Semi-CT Style - Enter the callsign of the station calling you. Press the [Ins] key to send his call and your exchange (CW), or speak his call and then press [Ins]. Once you have copied his exchange, press F3 (TU) and [Enter to Log]. If you are calling other stations (Search and Pounce, or S&P), you would first press F4 to send your call, and when the station responds follow the sequence as above.
Early N1MM style - Enter the callsign of the station calling you. Press the [;] key to send his call and your exchange. Copy his exchange and press the ['] key (right next to it on US keyboards). The program sends the F3 (TU) message and logs the QSO. In S&P, you would hit F4 first, then [;], and then ['].
This saves some keystrokes, but there's an easier way. A decade ago, N6TR developed the idea of making TR Log "modal." By that, he meant that the program would behave differently depending on whether you were in Run or S&P mode. Making this distinction let him massively simplify and shorten the sequence of keystrokes required to complete a QSO.
N1MM Logger has now evolved N6TR's invention into what is called Enter Sends Messages, or ESM for short.
The first step is to turn it on. Open the Config menu in the Entry Window, and select ESM
Now close the menu and enter any call in the entry window. We're assuming that you are doing S&P.
What's different? Take a look at the F4 button. The highlight means that if you press [Enter] at this point, the F4 message will be sent (which is what you want - your call).
Press [Enter], your call is sent, but the cursor remains in the callsign field, and F4 is still highlighted. If he doesn't answer the first time, just press [Enter] again. If he answers you, hit [Space], and look!
The cursor has moved to the Exchange box, and now F2 is highlighted. That means that the next time you hit [Enter], the program sends F2 and logs the QSO.
So instead of an 8 step process to work an S&P QSO, you have either 3 or 4:
Enter the callsignPress[Enter]

(optional) If he doesn't answer, press [Enter] when it's time to call him again; if he does, press [Space] and copy his exchange
Press [Enter] again to send your exchange to him and log the QSO.
But suppose you're Running (Calling CQ)? The first thing to do is tell the program. You do that by checking the box next to the word "Running", either with your mouse or by hitting [Alt]+U. Now your Entry Window looks a bit different:
Note the highlight is now on F1, because the first thing in most Run QSOs is a CQ. Press [Enter] and the program will send F1.
Now someone answers. Type in his callsign and the window changes.
You're starting to get the hang of this - the highlights mean that when you hit [Enter] the program will send F5 followed by F2 (on CW - on phone you would speak the callsign and then press [Enter] to send your exchange).
Once you have done that, the window changes again.
Now the highlights tell you that you have copied a legitimate exchange (in this case the program has supplied it from the callsign, and that the next [Enter] will send your F3 message and log the QSO.
So, type a callsign, hit [Enter] 3 times, and you've logged a QSO. Pretty slick!
Now suppose you're like me and you fat-finger copying the exchange, so that you have nonsense in the Exchange box, like this. In that case, the program reminds you:
If you hit [Enter] with an incorrect exchange, the program will send the F8 message and request a repeat. Alternatively, if you see your mistake and correct it, the screen changes again to show the "F3 and Log It" highlights. Just press [Enter], the program sends the F3 message, logs the QSO, and you're done.
Once you've used ESM, I predict you'll never go back to the old way again.
Two further refinements, and then this chapter is done. Open the Config menu again, and then open the "Configure Ports, Telnet Address, Other" sub-menu. Click on the Function Keys tab:
In the left-hand column, note that I have checked "Send Corrected Call." This neat feature, in Run mode, keeps track of whether you have changed the callsign in the callsign box. For example, say you only copied "DL6A" at first, and filled in the rest later. Eventually, you copy DL6ABC, and when you press Enter to send the F3 (TU message), on CW the program sends "DL6ABC TU ..." On phone, you'll need to supply the correction.
In the right-hand column, the third checkbox is cumbersomely titled "ESM only sends your call once in S&P, then ready to copy received exchange." In shorthand, we call this the "Big Gun switch." If you nearly always get stations you call the first time, you can save a keystroke by having the cursor advance automatically to the exchange box after the first time you call. If you often need to call again, don't check it. If you have checked it, and need to call a station more than once, you just press [F4], regardless of where the cursor is.
A caution - don't change the "key mappings" (below the red type) unless you absolutely know what you're doing - it can make a horrible hash out of ESM.

Mantab OM Hen, rajin hunting :D
menjelang CQ WW Contest biasanya banyak super station muncul untuk test stationnya.
ini kesempatan saya untuk hunting, karena station saya pas pasan saja :D
Berat kalau menembus EU Wall, kecuali diberi kesempatan oleh station tersebut, semalam coba contact Z81D ngak kebagian keblok EU Station.

jadi bener kata temen dari W land, kalau kita sedang di pileups mesti kasih kesempatan Outsite EU

tnx

Pagi OM Hen,

Apa nih YB2LSR kok disebut sebut pake OT-240, makanya kupingnya terasa sedikit gatel (maklum blm dibersihin heheheh)

Yahh,
Kalo aku sih digital memang masih kurang trampil sejauh ini cuman kalo partisipasi boleh kan, wong sudah wai-bi, nanti dikira wai-bi ga bisa nyolder, capeeek deeeh
Glodaaagghhh .....

Subject: Bls: Bls: [YBDXC_News] 3D2MM & VK9XM (interface)

OM Eddy,
Saya ada modem jadul itu yg ada jack RJ nya - tapi sayang juga sapa tau nanti perlu - lagi pula yg ini gak ada CTnya sementara saya juga nyopot dari pesawat telpon toriphone yg sdh pernah ke tempat sampah tapi saya pungut, HI.

Sempat lihat di Poncol ada bangkai ex PABX saya lihat ada beberapa trafo ciliknya tapi tukang loaknya masih "sombong" harganya masih tinggi (menurut saya). Mending juga beli baru seperti yg OM Busan infokan, cuma yg ini gak tau juga apakah pakai CT - karna ada skema yg memerlukan adanya CT itu.
Saya masih nyoba trafo lama yg nemu di junkbox = IT-191 sementara OT-240nya saya kasih ke ponakan yg juga sudah buat dg trafo itu, seperti OM Seno - YB2LSR.

Sayang Pasar Rumput sudah ditutup sih, tinggal yg jual keramik & urusan kamar mandi.

73,
hen-yc0qr

>Ini salahsatunya - dibuat oleh KH6TY juga dimuat di QST Maret 2011 dan dimuat di buku "Get on the Air with HF Digital".
>
>Harga 2N4401 = Rp.500,- 1N4148 = Rp 5000,-/100 pcs, R dan C juga gak mahal.
>Cuma trafo 1:1 600 ohm apalagi yg pake CT saya belum dapat, jadi sementara saya nyoba skema yg satunya, nanti saya kirimkan juga.

DXNL 1800 - Oct 10, 2012
DX Newsletter

3D2, Fiji:
Cicero, PY7ZY, will be QRV as 3D2ZY from October 11 - 15 from Viti Levu/Fiji (OC-016, WLOTA 0055) on the HF bands. QSL via home call.

5X, Uganda:
Nick, G3RWF will, starting October 15th, be on the bands as 5X1NH for two months from Fort Portal in Western Uganda (WW Loc. KJ50co) in CW only. He's still looking for advice for a 160m antenna. He has some 12m masts and can reach a maximum of 15m. There are no trees, neither space for beverage antennas. (nick (at) henwood.demon.co.uk). Nick wants to take part in the CQWW DX CW Contest (November 24/25) and the ARRL 10M Contest (December 8/9). QSL via home call, only direct.

CN, Morocco:
Abdou, CN8VO, Jos (PD0JOS) CN2OS and Francois (ON4LO) CN2LO plan to be QRV until October 21 on the occasion of the "Concert for Tolerance" in Agadir with the special call sign 5D7AT. Activities will take place on 80 - 10m. QSL via ON4LO.

CE, Chile:
Robert, SQ1DWR, will work as CE3/SQ1DWR between October 10 and 22 on 40 - 10m in CW. QSL via home call.

CY0 Sable Island (Update):
The DXpedition by Murray, WA4DAN, and Ron, AA4VK, to CY0, announced in DXNL1801 was postponed to October 22 - 31. They will not take part in CQ WWDX SSBbut try to give as many people as possible the chance to work a new DXCC. Theirfocus will be on 10/12/15m. http://www.cy0dxpedition.com

EA, Spain:
Until October 15, a special event station will be QRV for the annual diploma of the "Asociacion Cultural de Radioficionados de la Guadia Civil". http://www.acragc.org

FK, New Caledonia:
Christian, KH6/F5IDM, plans to be QRV until October 13 during the "Fete de la Science" as TX5FS from Lifou Island (OC-033). QSL via F5IDM (KH6 bureau). http://www.symbiose-nc.com/fds/index.php

FO, French Polynesia (Update):
For the activities announced in DXNL 1799, Didier, F6BCW acquired the special call sign TX5EG.

J7, Dominica:
Volker, DL8WEM, will be on the west coast of Dominica (NA-101) in Salisbury from October 14 to November 7 as J79WE. He's using a K3 (100W) and dipoles for 40m - 10m bzw, mostly working in CW. A participation in the WAG contest is planned. QSL via home call.

KH8, American Samoa:
Dom, M1KTA will be QRV until October 11 as KH8/M1KTA from Pago (OC-045) on 10 to 20m in SSB, slow CW and RTTY/PSK31. QSL via home call, LoTW.

KP2, US Virgin Islands:
Ray, NM2O, will be QRV until October 16 as KP2M and KP2/NM2O. He plans to take part in the SAC phone and the Oceania DX CW contests. QSL KP2M via AI4U, KP2/NM2O via home call.

OA, Peru:
Peter, DF7NX, is active from near Puerto Maldonado (Amazonas area) as OA7/DF7NX. He's using a small station with only 50W and a G5RV, only in CW. After this activity he's going back to Bolivia and plans to start on October 19 as CP8/DF7NX. QSLs via home call.

SM, Sweden:
Markus, SA3BPG, Joel, SA3BRX, Jan-Eric, SM3CER, Lars, SM3EAE, Bjoern, SM3UQO and Goeran, SM5SIC, will operate as SI9AM on October 13/14 from the "King Chulalongkorn Memorial" in Raganda in the Scandinavian Activity SSB Contest (SAC). SA3BPG and SA3BRX are newcomers working their first contest. Outside the contest they are QRV on all HF bands. Main frequencies: CW: 1817, 3517, 7017, 10117, 14017, 18077, 21017, 24897 and 28017 kHz SSB: 1840, 3760, 7060, 14210, 18160, 21310, 24960 and 28510 kHz FM: 145.550 MHz and Repeater RV49 - 145.612 MHz QSL via SM3CVM, bureau cards can be requested by email. (sm3cvm (at) ssa.se). http://www.si9am.se

T30, Western Kiribati:Leo, PP1CZ, Orlando, PT2OP, Fabio, PY2AAZ, Rick, PY2PT, Alex, PY2WAS, Fred, PY2XB, Miguel, PY3MM, Fernando, PY4BZ, Jim, PY7XC and Xavier, PY7ZY, plan to be QRV on HF as T30PY and on 6m (EME in WSJT-JT65A) as T30SIX between October 16 and 25. They will have three stations on the air. Preferred frequencies: CW: 833.5, 3524, 7024, 10124, 14024, 18084, 21024, 24894 and 28024 kHz SSB: 3798, 7085, 14190, 18145, 21295, 24945 and 28495 kHz RTTY: 3580, 7038, 14080, 18102, 21080, 24920 and 28080 kHz 6m: 50102/CW and beacon, 50110-50120/SSB, 50.198/EME. Donations to support the operation are accepted by Paypal. QSL via PY2PT (OQRS). http://www.mdxc.org/t30py/

VU, Antarctica:
Bhagwati, VU3BPZ, is QRV till the end of the year as VU3BPZ/3 from the Indian antarctic station Bharati (WAP IND-04). On his way back to India, via Cape Town he will be QRV from the "MS Ivan Papanin" and show up on the bands as VU3BPZ/MM. A short stop at the "Maitri Station" (WAP IND-03) is planned as well. For mid October he expects to receive a spacial callsign for his activities. Preferred

frequencies: 10m: 28495 kHz, 1100-1215z 17m: 18145 kHz,
1015-1100z 20m: 14180 kHz +/- 1400-1500z and 1700-1800z
For stations from NA he's on 14242 kHz around 0200-0300z.
QSL via I1HYW, only direct.

DXCC:
J51IFD cards of the 2010 DXpedition to Guinea Bissau are accepted
for the DXCC.

CQ WW DX Contest:
Randy Thompson, K5ZD, member of the "CQ Contest Hall of Fame" and
WPX Contest Director was appointed the successor of Bob Cox,
K3EST, who was the director of the CQWW Contests for more than 35
years.

Youth HF Station giveaway!
In order to promote DXing and radiosporting, Randy, N0TG, and
Jeff, N1SNB, of "Amateur Radio Supplies" are giving away a
complete HF station to a young radio amateur. More information on
their website:
http://www.amateurradiosupplies.com/youth-s/222.htm

IARU News:
The directors of the IARU Region 3 appointed Peter Lake, ZL2AZ,
as the new Chairman of IARU Region 3. He's the successor of
Michael Owen, VK3KI, who passed away last month.

NWRW 2012
The "National Wildlife Refuge Week" combines ham radio with the
joy of experiencing the nature. Between October 14 and 20 several
special event stations will be on the air from wildlife refuges.
More info: http://www.nwrweek-radio.info

OM Seno,
Bersihkan kuping pake cotton bud ya, jangan pake resistor atau capasitor, bisa lecet.
Kalo saya sih masih berpikir soal nyolder, homebrewing adalah juga sub hobby dari hobi amatir radio - jadi belum tentu yang menyandang tingkat penggalang-penegak harus suka nyolder. HI

Saya senang nyolder karna dari dulu suka - saya senang DXing baru sebatas hunting itupun Search & Pounce, belum sampai yg lebih jauh seperti contesting.

Pagi OM Hen,

Apa nih YB2LSR kok disebut sebut pake OT-240, makanya kupingnya terasa sedikit gatel (maklum blm dibersihin heheheh)

Yahh,
Kalo aku sih digital memang masih kurang trampil sejauh ini cuman kalo partisipasi boleh kan, wong sudah wai-bi, nanti dikira wai-bi ga bisa nyolder, capeeek deeeh
Glodaaagghhh .....

OM Hen,

Mmg jarang ada ham radio seperti anda,
Anda selayaknya menyandang YA.....
Ooopppssss ..... !
YB maksudku (paling duwur sih ya)
Sip lah,
Aku kemarin habis layat Alm. YC1ONM pak toto di jogja, beliau juga salah satu pemerhati AR di Indo, hya fakultasnya mungkin lain.

OM Djoko,
Saya rajin hunting karna cuma ini kegiatan sehari2 yg bisa dijalankan.
D44AC semalam memang ngetes antennanya ke NA-AS-AF, cuma memang EU tuh banyak stasiun yg bandel - semalam muncul lagi D44AC kasih kesempatan ke EU - sepi.., HI.
Cuma yah sayang semalam itu saya belum dapat Niger di 10M, pas ada 5U6E yg signalnya lumayan kuat, tertutup noise yang 60dB di QTH saya. Tapi ternyata semuanya juga tertutup, hingga 5U6Enya QRT.

Mantab OM Hen, rajin hunting :D
menjelang CQ WW Contest biasanya banyak super station muncul untuk test stationnya.
ini kesempatan saya untuk hunting, karena station saya pas pasan saja :D
Berat kalau menembus EU Wall, kecuali diberi kesempatan oleh station tersebut, semalam coba contact Z81D ngak kebagian keblok EU Station.

jadi bener kata temen dari W land, kalau kita sedang di pileups mesti kasih kesempatan Outsite EU

tnx

SB DX @ ARL $ARLD042
ARLD042 DX news

ZCZC AE42
QST de W1AW
DX Bulletin 42 ARLD042
From ARRL Headquarters
Newington CT October 11, 2012
To all radio amateurs

SB DX ARL ARLD042
ARLD042 DX news

This week's bulletin was made possible with information provided by NC1L, W3UR, QRZ DX, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

RODRIGUES ISLAND, 3B9. A group of operators will be QRV as 3B9SP from October 16 to 23. Activity will be on the HF bands using CW, SSB, RTTY and PSK with three stations active. QSL via HB9ACA.

NIGER, 5U. Stations 5U5U, 5U6E and 5U8NK are QRV from Niamey until October 15. They are QRV on the HF bands and 6 meters with three stations active. QSL 5U5U direct, 5U6E via F6EXV and 5U8NK via DJ8NK.

UGANDA, 5X. Nick, G3RWF will be QRV as 5X1NH from Fort Portal in Western Uganda beginning October 15 and here for two months. Activity will be on the HF bands, possibly including 160 meters, using CW. This includes possible entries in the upcoming CQ WW DX CW and ARRL 10 Meter contests. QSL direct to home call.

EAST MALAYSIA, 9M6. Mirek, VK6DXI is QRV as 9M8DX from Kuching, Sarawak until October 15. Activity is on 40 to 10 meters, and possibly on 160 and 80 meters as well. He will be a Single Op/All Band/Low Power entry in the Oceania DX CW contest. QSL via SP5UAF.

MOROCCO, CN. A group of operators are QRV as 5D7AT until October 21 during the Concert for Tolerance taking place in Agadir. Activity is on 80 to 10 meters. QSL via ON4LO.

CANARY ISLANDS, EA8. Mike, DL3FCG will be QRV as EA8/DL3FCG from Tenerife, IOTA AF-004, from October 15 to 28. Activity will be on 80 to 10 meters using CW, SSB, RTTY, PSK and JT65. He plans to be in the upcoming WAG and CQ WW SSB DX contests. QSL to home call.

FRENCH POLYNESIA, FO. Didier, F6BCW is QRV as TX5EG from Huahine Island, IOTA OC-067, until October 15. Activity is holiday style on 40 to 10 meters using only CW. QSL to home call.

SOLOMON ISLANDS, H4. Bernhard, DL2GAC will be QRV as H44MS from Guadalcanal, IOTA OC-047, from October 17 to December 10. Activity will be on 80 to 10 meters using only SSB. QSL to home call.

HUNGARY, HA. Members of the Hungarian International Police Association are QRV as HG20IPA until the end of November in celebration of the 20 years of the Hungarian section of IPA. Activity is on 160 to 6 meters using CW, SSB and various digital modes. QSL via HA3JB.

MINAMI TORISHIMA, JD1. Shin, JF7MTO is QRV as JF7MTO/JD1 from Marcus Island until October 16. Activity is on the HF bands. QSL to home call.

SVALBARD, JW. Operators LA9DL, LA6VM and LA7XK are QRV as JW9DL, JW6VM and JW7XK, respectively, from Longyearbyen until October 15. Activity is on the HF bands using CW, SSB, RTTY, PSK and JT65. This includes being QRV as JW5X in the SAC SSB contest. QSL to home calls and JW5X via LA5X.

SWEDEN, SM. A group of operators will be QRV as SI9AM from the King Chulalongkorn Memorial in Raganda. Activity is on 160 to 10 meters, including 2 meters, using CW, SSB and FM. This includes being an entry in the SAC SSB contest. QSL via SM3CVM.

WEST KIRIBATI, T30. A group of operators will be QRV from October 16 to 25 as T30PY on 160 to 10 meters using CW, SSB and RTTY, and as T30SIX on 6 meters using EME with JT65A. There will be three stations on the air. QSL via PY2PT.

ST. KITTS AND NEVIS, V4. John, W5JON and Cathy, W5HAM are QRV as V47JA and V47HAM, respectively, from Calypso Bay on St. Kitts, IOTA NA-104, until November 1. Activity is on the HF bands and 6 meters using SSB. This includes a possible entry in the upcoming CQ WW SSB contest. QSL both calls via W5JON.

MACAO, XX9. A group of operators will be QRV as XX9TFR, XX9TPX, XX9TBM and XX9TEX from Pousada de Coloane Hotel, Coloane Island, IOTA AS-075, from October 18 to 29. Activity will be on 160 to 6 meters using CW, SSB and RTTY with at least two stations active. QSL all calls direct via EA7FTR.

THIS WEEKEND ON THE RADIO. North American RTTY Sprint, Makrothen RTTY Contest, NCCC RTTY Sprint, Oceania DX CW Contest, NCCC Sprint, QRP ARCI Fall CW QSO Party, Scandinavian Activity SSB Contest, Pennsylvania QSO Party, Arizona QSO Party, EU Autumn CW Sprint, FISTS Fall CW Sprint, PODXS 070 Club 160-Meter Great Pumpkin PSK31 Sprint, SKCC Weekend CW Sprintathon and the UBA ON CW Contest will certainly keep contesters busy this upcoming weekend. The ARRL

School Club Roundup is scheduled from October 15 to 19. Please see October QST, page 87 and the ARRL and WA7BNM Contest websites for details.

OM Taufan,
Saya sedang nyoba juga pake IT 191 yg nemu setelah bongkar2 junkbox.
Jadi waktu itu bongkar2 nemu 2 buah OT-240 satu blm dipake satunya sudah nempel di PCB bersama kawan2nya, juga nemu IT-191. OT-240 kasih ke ponakan yg lagi gandrung digital mode.

Seingat saya OT-240 itu kalo di radio cawang di bagian final audio ya, yg sekundernya 8 ohm ke loudspeaker. Kalo IT-191 nya ada di tengah.

OM Taufan, saya penasaran dengan impendansi OT-240 dan IT-191, terutama IT-191 ini. Apa ada datanya ?

ZCZC AP42
QST de W1AW
Propagation Forecast Bulletin 41 ARLP041
From Tad Cook, K7RA
Seattle, WA October 12, 2012
To all radio amateurs

SB PROP ARL ARLP041
ARLP041 Propagation de K7RA

Another decline in sunspot activity this week, but based on activity over the past few days and projected solar flux values it is making a steady recovery.

Average daily sunspot numbers dropped from 73 to 51.7, a difference of 21.3 points. But the past three days saw sunspot numbers higher (63, 71 and 82) than the average, and climbing.

The average of daily solar flux was off 23.8 points to 104.9, and like the sunspot figures, the past three days saw solar flux values (106.2, 112 and 116.6) higher than the average for the week, a good indicator of the rising activity.

Predicted solar flux from the Thursday, October 11 NOAA/USAF forecast is 115 on October 12-13, 120 on October 14-17, then 125, 130, 150 and 145 on October 18-21, 140 on October 22-23, 135 on October 24-27 and 130, 125, 120 and 115 through the last day of October. Solar flux is then predicted to dip below 100 on November 4-8 and peak at 145, 150 and 145 on November 15-17.

October 12-17 predicted planetary A index is 5, 5, 12, 12, 10 and 8, then 5 on October 18 through November 3, then 18, 20, 12 and 8 on November 4-7, 5 on November 8-10, then 8, 12 and 10 on November 11-13 and 5 after that, through the end of the 45 day forecast period.

We always get a bit different perspective on upcoming geomagnetic conditions from OK1HH. He predicts quiet to active conditions October 12, quiet to unsettled October 13, quiet on October 14, quiet to unsettled October 15, quiet October 16, quiet to active October 17, quiet to unsettled October 18-19, quiet on October 20-22, quiet to active October 23, quiet October 24-27, active to disturbed October 28, mostly quiet October 29-30, quiet October 31 and November 1, quiet to active November 2, and mostly quiet

November 3.

October 8-9 showed the most geomagnetic activity during the past week, with planetary A index at 35 and 42, mid-latitude A index at 21 and 32, and the high latitude college A index at 66 and 54. This activity was triggered by a coronal mass ejection on October 8. The predicted rise in planetary A index to 12 on October 14-15 is because of a solar wind spewing from a coronal hole, which should rotate into a geo-effective position during that time.

John King, EI2HVB said on October 10 he worked W1AW in Newington, CT on 20 meter CW using only 2 watts into a sloping V dipole from an MFJ Cub transceiver. This was right after seeing aurora from his QTH for several nights in a row. Of course, unlike here on the West Coast, a path from W1AW to Ireland is not anything near a polar route, so it would not be as affected by geomagnetic unrest as a contact to Europe from the West Coast would be. In Seattle, my bearing to Letterkenny, John's QTH, would be 35.7 degrees, close to the auroral zone, and his return path would be at 316.9 degrees. But from W1AW short path would be toward 49.2 degrees, and return path is 280.4, further away from the polar path.

Dean Lewis, W9WGV of Palatine, Illinois wrote: "While working county after county in the California QSO Party on the low end of 10 meters on Saturday, October 6, I heard PY2XC calling CQ DX. Had a friendly exchange with Carlos; 559 signals both ways, no QSB. He was running 200W to a dipole; due to outside antenna restrictions I run an Icom 703 (10W max) into an end-fed 65 foot wire (half wave on 40 meters) indoors along the upstairs ceiling (I've had the most supportive XYL in hamdom for 42 yrs). It resonates at a low SWR on 40, 20, 15, and 10 meters without a tuner. QRZ.com says the distance is 5,248 miles from my QTH (25 miles NW of Chicago). A half hour later his signal was S9+."

I received some interesting emails this week from a ham who has one of those FCC experimental licenses that allows him to operate below the AM broadcast band to test antennas, radios and propagation. I was about to present some of his observations here in the bulletin, but just now noticed that at the very top of his first email was a statement about "this is not intended for publication." That's unfortunate, as he wants to attract others to do what he is doing, but now I feel restrained from quoting our correspondence. If you send me an email, normally you can assume that I might quote you as well as make edits for brevity and readability.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see

http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for October 4 through 10 were 56, 55, 39, 37, 41, 63, and 71, with a mean of 51.7. 10.7 cm flux was 109.5, 106.2, 98.8, 98.1, 103.4, 106.2, and 112, with a mean of 104.9. Estimated planetary A indices were 3, 4, 6, 5, 35, 42, and 10, with a mean of 15. Estimated mid-latitude A indices were 3, 3, 5, 4, 21, 32, and 6, with a mean of 10.6.

http://www.cordell.org/CI/index.html

TX5K, Clipperton Isl, March 2013

We are pleased to announce a DXpedition to Clipperton Island, Territory of France in the Eastern Pacific, during March, 2013.
The project will be mainly an amateur radio DXpedition, but it will also involve selected scientific projects related to the environment, populations, and history of the island.
We invite your participation in the project, as a participant, collaborating scientist, student, or contributor.

Clipperton Island is an uninhabited 3.5-square-mile coral atoll in the eastern Pacific Ocean, southwest of Mexico and west of Central America, at 10°18′N 109°13′W. It is an overseas possession of France under direct authority of the Minister of Overseas France. The island is low-lying and largely barren, save for scattered grasses and a few clumps of coconut palms. A small volcanic outcrop rising to 95 ft on its southeast side is referred to as "Clipperton Rock". The atoll has been occupied at various times by guano miners, would-be settlers or military personnel, mostly from Mexico, which formerly claimed it until international arbitration awarded it to France in 1931. However, Clipperton has had no permanent inhabitants since 1945. It is still visited on occasion by fishermen, French Navy patrols, scientific researchers, film crews, and shipwreck survivors. It has also proven a popular site for transmissions by ham radio operators. [From Wikipedia, the free encyclopedia]
Watch it in real time with DXA!

This is a simulated image of the DXA window for TX5?.

OVERVIEW
For a complete Project Description, click here.

Cordell Expeditions is pleased to announce ascientific expedition to Clipperton Island, March, 2013. We will use the vessel Shogun from San Diego.

The goals of the project are:
Conduct amateur radio operations to enable amateurs to make a contact with Clipperton;
Implement an advanced version of the real-time online log website DXA;
Carry out activites in support of the wildlife sanctuary and facilities on Clipperton Island.

The first goal of the DXpedition is to enable as many contacts with Clipperton for as many different radio amateurs as possible. To this end we will field a highly experienced team of up to 24 operators and up to 7 active stations. The motivation for this is to participate in the worldwide activity of amateur radio, using it as a tool for fraternity and information. We expect to make more than 50,000 contacts with up to 20,000 different stations during the expedition. We will favor making contacts with stations needing Clipperton for the first time, but all DXers are welcome to contact us.

The callsign for the operation will be TX5K.

The second goal of the radio operation is to deploy and use DXA (version 2). Developed by KK6EK for the 2005 Kure Atoll DXpedition K7C, this system comprises a satellite link from the DXpedition site to a land-based server, and software to enable quasi-real-time communications between the DXpedition site and the server, including direct interaction with DXers. The system is described in various documents available at www.cordell.org/DXA and is available in a working simulated expedition mode on this website (click here). The purpose of DXA is to provide a nearly real-time presentation of the radio log as an aid to DXers wanting to make a contact with the DXpedition. The system reduces the need for duplicate (insurance) contacts, provides an engrossing view of the ongoing operation of the DXpedition, and enhances the integrity and accuracy of the log.

The third goal is to contribute to ongoing research and monitoring of the environment at Clipperton. The team will carry out several scientific projects, including:

Search for possible infestation by the extreme pest ant Pheidole megacephala (the big-headed ant).

Collection of representative specimens of marine algae for colleagues the Jepsen Herbarium, University of California, Berkeley.

Study of vortex winds generated by the island
Collection of airborne insects
Search for transitional meiofauna between the ocean and lagoon.
Observation of deformed masked boobies
Observation of invasive rats.

This project is being managed by Cordell Expeditions, a nonprofit research group based in Walnut Creek, California. The group has fielded expeditions to remote sites for more than 25 years. Among other projects, Cordell Expeditions provided the scientific basis for designation of the Cordell Bank National Marine Sanctuary.

The principal organizers of this project are: Dr. Robert W. Schmieder, KK6EK; Christian Janssen DL1MGB; and Carlos Nascimento NP4IW.

It is policy of this project to observe and operate within all permits, regulations, and recommendations of the various agencies with interest in Clipperton Island, with particular attention to minimizing impact on the ecosystem. Safety and minimal impact to the Clipperton Island environment have priority in this operation.
CORDELL EXPEDITIONS

Cordell Expeditions is an independent nonprofit research/educational organization.

Founded in 1977, the group has carried out a series of research expeditions every year since 1978. The work involves exploring and describing remote sites, principally offshore submerged marine sites that support extensive biological communities. The motivation for the work is to carry out field work to generate primary information about the sites, so that they can be protected and rationally managed.

The first project of Cordell Expeditions was to explore and describe Cordell Bank, a shallow rocky feature about 50 nautical miles NW of San Francisco, California. As a result of this 10-year project, the U. S. Department of Commerce designated it as the Cordell Bank National Sanctuary.

Other expeditions by the group have been to the Farallon Islands, Noonday Rock, and Fanny Shoal (northern California); the coast near Pt. Sur (California); Rocas Alijos and Guadalupe Island (Baja California); Peter I Island (Antarctica); Roqueta Island (Mexico); Galapagos (Ecuador); Easter Island/Salas y Gómez (south Pacific); Heard Island (South Indian Ocean); San Felix island (Chile); and Kure Atoll (Pacific Ocean).

Books that resulted from the these expeditions include:Ecology of an Underwater IslandEdward Cordell and the Discovery of Cordell BankRocas Alijos. Scientific Results from the Cordell Expeditions3YØPI Peter I Island: The 1994 DXpeditionDX-Aku: Messages from the Easter Island ExpeditionVKØIR: The 1997 Heard Island ExpeditionXRØX: The 2002 San Felix Island Expedition

The work has resulted in the discovery of more than 20 new species, significant uncharted topographic features, and many first observations of environmental conditions. Altogether more than 1000 new records (range and depth extensions, and first observations) have been recorded. A large collection of specimens, and photographic archive, and a large number of popular articles are additional results of the expeditions.

Cordell Expeditions is also involved with ongoing research programs associated with educational institutions, including Diablo Valley College, the California Academy of Sciences, St. Mary's College, and the Shorebird Nature Center in Berkeley. Additionally, the expeditions have embraced radio science, with extensive involvement in amateur radio used on expeditions, particularly to remote sites such as oceanic islands.

HONORS

Southwest Ohio DX Association: DXpedition of the Year (1994, 1995, 1997)

QST: Best Magazine Article: Peter I 1994, Heard Island 1997
Chiltern DX Club: Certificate of Merit for Heard Island DXpedition 1997

Central Arizona DX Association:Honorary Lifetime Membership KK6EK 1997
International Underwater Foundation:Environmental Enrichment Award 1995
Underwater Photogaphic Society:OPEN VIDEO Second Place 1985

SCHEDULE

We will use the vessel Shogun from San Diego. This vessel was used for numerous previous trips to Clipperton, includingTX5C in 2008.

QSL MANAGER

QSL manager for the 2013 Clipperton DXpedition:

Bob Schenck N2OO and the SJDXA QSL team
QSL VIA N2OO INFO: http://www.qsl.net/n2oo/history/qsl-n2oo.htm

For this DXpedition, we will be developing new software to make the process significantly more efficient. This will be done principally by

Dean Davis N7XG of Alpinesoft

Please read our Policy for QSLing.

http://www.rsgb.org/rsgbconvention/

Welcome to RSGB Convention 2012
The World's premier HF, VHF and IOTA event
Dates: 12-14 October 2012
Horwood House, Little Horwood, Milton Keynes MK17 0PH
Your weekend at the Convention
The Convention starts on Friday evening with a social gathering of delegates and lecturers. The Martin Lynch and Sons sponsored buffet is at 7pm for 7.30pm (admission by ticket only). On Saturday the RSGB Convention is formally opened at 9.15am by RSGB President, Dave Wilson, M0OBW. Lectures continue until 5.45pm. The RSGB Gala Dinner is at 7.30pm for 8pm on the Saturday evening (admission by ticket only).
On Sunday, lectures start at 9am and continue until 2.45pm. The event concludes with the RSGB DX Fund raffle with main prizes kindly donated by Icom, Kenwood and Yaesu.

RSGB Convention 2012 highlights

The following are confirmed highlights of RSGB Convention 2012
* DXpedition of 2012, the HK0NA DXpedition – Jorge Prieto, HK1R
* Learn about research related to HF pumping of the ionosphere using a mega-watt transmitter, coupled to radar and optical diagnostics – Professor Mike Kosch
* HF transceivers – Peter Hart G3SJX
* An introduction to using SPICE (Simulation Program with Integrated Circuit Emphasis). A software tool that simulates electronic circuits in a computer environment. – Lee Hudson, M0LMH.
* Developing Small UAS for NLOS Applications—DARPA UAVForge Competition 2012 – Stephen Prior, Middlesex University
* T32C DXpedition – Neville Cheadle G3NUG & Don Field G3XTT
* 10 Ways to Make Your Station Work Better – Ian White GM3SEK'
* Sun by Day, Aurora by Night – Paul Money
* Amateur Radio Direction Finding (ARDF) – Bob Titterington, G3ORY
* What is SOTA all about – Tom Read M1EYP
* Getting in the Log, QSO Mechanics – Roger Western G3SXW
* Next steps in Contesting – Alan, G3XSV
* Remote Operating – Mark Hill G4FPH
* ATV – Noel G8GTZ
* Datamodes, starting out – Mike Richards G4WNC
* The latest on optical Communications – Stuart Wisher
* Log40M logging program explained – Terry, G4POP
* DXpedition to Swaziland – Phil Whitchurch G3SWH
* Microwave Recipes for the UKACs –Bolton Wireless Club
* Raspberry Pi – Peter Goodhall 2E0SQL
* A review of the Olympic operations – how did amateur radio look? – Murray Niman
* Propagation prediction programs and how to use them – Steve Nichols G0KYA
* Contest logging software & how it works with the Robot – Ian, G0FCT
* Complex datamodes for beginners – Mike Richards G4WNC

* Antenna modelling with MMANA-GAL – Steve Nichols G0KYA
* Techniques and software for assisting radio communications via Aurora – Dave Edwards G7RAU
* The Design of a Range of 21st Century Equipment for the Amateur Microwave Bands – Chris Bartram GW4DGU
* Operating for DX on 160m – John Rogers G3PQA
* VP6T DXpedition to Pitcairn – Nigel G3TXF
* Making a start on Microwave EME – Sam Jewell G4DDK
* A little bit of Hydrogen Line Astronomy ... from the back yard – Brian Coleman G4NNS
* Stresses in Cables and Towers – Dave G4HUP
* 6dB better than CW. Weak Signal Modes – why and how they work – Andy Talbot G4JNT
With even more to confirm…

09/10/2012 | ARRL Welcomes NASA Astronaut Lee Morin, KF5DDB, to 2012 National Convention

Special Guest Lee M.E. Morin, M.D., Ph.D. (Captain, USN), KF5DDB -- NASA Astronaut

ARRL welcomes NASA astronaut, Captain Lee M. Morin, KF5DDB to the 2012 ARRL National Convention at Pacificon. Lee served as a mission specialist on the space shuttle Atlantis crew, STS-110, which launched April 8, 2002. During this 13th shuttle mission to visit the International Space Station, Lee performed 2 spacewalks. It was the first time the station’s robotic arm was used to maneuver spacewalkers around the station. You can meet and greet Lee in the ARRL exhibit area (times and locations will be posted). Lee has also been confirmed as a Pacificon forum presenter and Saturday night banquet speaker. Lee will share his experiences about spaceflight and his interests in Amateur Radio with convention attendees. Lee, KF5DDB is an ARRL member.

Banquet Speakers Announced
ARRL CEO Dave Sumner, K1ZZ

NASA Astronaut Lee Morin, KF5DDB

License Examinations

ARRL-accredited Volunteer Examiners will offer the Amateur Radio license exams on Saturday and Sunday, from 8:00 AM to 12 noon. All examination levels will be offered: Technician, General and Extra Class. The license exam fee is $15 (convention registration is not required). Candidates are required to bring a photo ID, and will need to include their social security number on the application (including minors). If currently licensed, bring your original and a copy of your current or expired FCC Amateur Radio license. Also, if you have one, bring the original and copy of any CSCE (Certificate of Successful Completion of Exam). Further information can be found on the Pacificon website or see the following registered exam session listings on the ARRL website:
Saturday, 8:00 AM to 12:00 PM
Saturday (after all day class), 3 PM
Sunday, 8:00 AM to 12:00 PM

For additional questions, please contact ARRL VE Team liaison George Tickner, K6NHY, k6nhy@....

ARRL EXPO

ARRL, the national association for Amateur Radio, welcomes members and friends to the 2012 ARRL National Convention, hosted by Pacificon. Here is a handy list of ARRL-sponsored activities, exhibits and program representatives. ARRL EXPO is a large exhibit area located in the exhibit hall.

ARRL EXPO floorplan (PDF)

ARRL Store

Visit the HUGE ARRL bookstore to purchase popular ARRL publications, join or renew your ARRL membership, and pick up official ARRL merchandise.
FREE Gift when you join ARRL or renew your membership at ARRL EXPO.
FREE ARRL Antenna Book when you join or renew for 3 years. Best Deal!

Radiosport and DXCC

DXCC Card Checking – Personnel from the ARRL DXCC Branch will be on hand to check applications for all ARRL Award Programs. All cards will be eligible for checking, including old cards, cards for deleted countries and cards for 160-Meters. Applications will be limited to 101 cards (more cards will be checked as time and volunteer Card Checkers are available). Seewww.arrl.org/awards/dxcc for the latest program information and current forms. Use the new Online DXCC tool and save half on your application! Remember to bring with you to the convention a printout of your application, card list, and your cards in the order in which they are entered into the Online DXCC.

ARRL Contests and Awards – On-air competitions and award-hunting are great activities of Amateur Radio. These are effective ways to boost your technical knowledge and improve your radio operating skills—helping make you a better radio amateur. Ask us about the ARRL Award Program and upcoming ARRL Contests. VHF/UHF Century club (VUCC) and Worked All States (WAS) award applications may also be checked at the convention.

QSL Bureau – ARRL members will be able to drop off their QSL cards to be sent through the ARRL Outgoing QSL Bureau. If you have QSLs that you would like to send through the ARRL Outgoing QSL Bureau (your QSLs going to foreign stations -- no US-to-US QSLs, please), you can save the shipping cost to ARRL by bringing them to the convention and ARRL will transport your cards to the Bureau in Newington, Connecticut. In order to take advantage of this exciting benefit, all of the standard QSL Bureau rules must be followed: Cards must be sorted by DXCC country, they must go to countries where a bureau exists and you must be an ARRL member to use the Outgoing QSL Bureau. Cards do not have to be boxed, but should be wrapped with rubber bands.

Logbook of the World – Representatives from Logbook of the World will be giving demonstrations and answering your questions. See www.arrl.org/lotw for the latest program information.

ARRL Exhibits…

ARRL Laboratory – Does your Handie-Talkie meet FCC Emission Standards? Meet an ARRL Test Engineer who will measure the spurious emission of your handie-talkie, using a state-of-the-art spectrum analyzer. Does your handheld have the potential to interfere with other radio services? Find out here! The ARRL Lab is best known for serving the Amateur Radio community with technical information services, trusted product-review testing, spectrum-protection engineering, and its RFI/EMC program.

Introducing the Digital Edition of QST – In May, all ARRL members were introduced to the new digital edition of QST—ARRL's popular membership journal. The new online format offers several advantages including enhanced content, convenient access, and a more interactive experience. Drop by this exhibit to see a demonstration!

ARRL Development and ARRL Foundation – Learn how you can help strengthen ARRL's work on behalf of Amateur Radio by participating in the Diamond Club, earning your way to the prestigious ARRL Maxim Society, contributing to the Spectrum Defense Fund, the Education & Technology Fund, the W1AW Endowment, the Historic Preservation Fund, and joining the Legacy Circle by including ARRL in your estate plans. Information will be available about The ARRL Foundation and its more than 75 annual scholarships and grants for Amateur Radio groups working to promote Amateur Radio and involve young people in Amateur Radio activities.

Emergency Communications & Public Service – Meet with program representatives for the Amateur Radio Emergency Service (ARES®) and the National Traffic System (NTS). Learn about opportunities to volunteer, and explore resources and training. Network with other public service volunteers.

ARRL Education Services –See displays of ARRL Education & Technology Program kits, projects, and other resources available to schools and teachers. Obtain information about the Teachers Institute on Wireless Technology, Amateur Radio on the International Space Station (ARISS) and Amateur Radio licensing instruction.

ARRL Pacific Division – Visit with ARRL Pacific Division leadership, Section Managers and volunteers from East Bay, Nevada, Pacific, Sacramento Valley, San Francisco, San Joaquin Valley, and Santa Clara Valley. Find out how you can support the extensive ARRL Field Organization.

ARRL-Sponsored Insurance Program – ARRL has been providing opportunities for equipment insurance to its members for more than 25 years. A representative from Hays Affinity Group

will be available to answer questions about the ARRL-sponsored Equipment Insurance and Club Liability Insurance plans. Enroll online at ARRLinsurance.com

W1AW/6 Special Event Station

Plan to get on-air using the world's most recognized call sign. W1AW/6 will be located in a large tent in the outdoor display/swap area, 100 yards from the convention main entrance. Operating frequencies will be 3.870/3.550; 7.270/7.050; 10.110; 14.270/14.050; 21.370/21.050; 28.670/28.050 MHz; 146.49 MHz simplex. All frequencies are +/- QRM. QSL to ARRL W1AW/6, 225 Main Street, Newington, CT 06111 (include a SASE). Special thanks to Steve Wagner, KA6SFT and Lauren Styles, WA6CIE for their help planning the special event station.

ARRL Wouff Hong Ceremony

Saturday 11:45 PM - Marriott Santa Clara (site of the convention)

All ARRL Members are invited to attend the traditional midnight ceremony of the Royal Order of the Wouff Hong. Gather at the convention registration desk on Saturday at 11:45 PM (no admittance after midnight). The ceremony, steeped in mystery, will begin at midnight--and lasts nearly one hour. Attendees receive a special keepsake. A fun activity for all ages.

ARRL-Sponsored Forums

The following ARRL-sponsored presentations will be hosted by Pacificon. Please see the www.pacificon.org or the Pacificon program for a complete listing of forums, times and locations.

SATURDAY, October 13

Saturday, 8:30 AM to 12:00 PM – Sequoia Room
Law Seminar: Communications Law and 2012 Regulatory Update for Interested Lawyers and the Radio Amateur
Presenters: Bart Lee, K6VK, (xKV6LEE), an ARRL Volunteer Counsel and Government Liaison (San Francisco Section), and Chris Imlay, W3KD, ARRL General Counsel

This legal seminar is designed for both Amateur Radio operators facing zoning and other restrictions or interference issues, and practicing attorneys especially those who serve as ARRL Volunteer Counsel (VC). Members of the general public may also attend. The cost is $99 for attorneys seeking Mandatory Continuing Legal Education (MCLE) Accredited. Register via Bart Lee, K6VK, email kv6lee@...
[Photo of Bart Lee, photo credit: Paula Carmody, copyright Bart Lee, 2009]

Saturday, 8:15 AM to 9:15 AM – Newport Beach Room
FCC Update
Presenter: Laura Smith, FCC Special Counsel for Amateur Enforcement
At the invitation of ARRL, Laura Smith, FCC Special Counsel for the Spectrum Enforcement Division, will present an update on the latest Amateur Radio and enforcement news from the FCC and field questions.

Saturday, 9:30 AM to 10:30 AM – Newport Beach Room
ARRL Emergency Preparedness Forum – Rethinking Emergency Communications
Moderator Mike Corey, KI1U, ARRL Emergency Preparedness Manager
EmComm, public service, disaster communications; so what is it we really do? This forum will present a way of putting the role of the Amateur Radio operator who is interested in

serving their community in perspective.

Saturday, 10:45 AM to 11:45 AM – Newport Beach Room
ARRL Wireless Technology Literacy in the Classroom
Moderator: Nathan McCray, K9CPO, ARRL Instruction and Resource Coordinator
The ARRL Education & Technology (ETP) Program supports resources to help integrate wireless technology into school curricula. The program uses a multi-technology approach that includes Amateur Radio, other wireless technologies and robotics. ARRL Instruction and Resource Coordinator Nathan McCray, K9CPO, will share his experiences of integrating wireless technology education into the classroom curriculum. His approach helps inspire students to pursue careers in high-tech industries and beyond. Learn also about the annually-sponsored ARRL Teachers Institute workshops.

Saturday, 1:00 PM to 2:00 PM – Newport Beach Room
ARRL Arduino Programming Workshop
Moderator: Leigh L. Klotz Jr., WA5ZNU, author of ARRL's upcoming publication The ARRL Arduino Ham Radio Cookbook.
Have you heard about the Arduino microcontroller, but were unsure how to get started using it for ham radio projects? Bring an Arduino, a laptop and maybe a friend to this hands-on workshop, and walk away an hour later able to write and use your own programs in the shack. Limited to 28 one or two-person groups.

Saturday, 2:15 PM to 3:15 PM – Newport Beach Room
ARRL Radiosport: Budget Pileups -- Being rare DX without breaking the bank
Moderator Sean Kutzko, KX9X, ARRL Contest Branch Manager
You don't need to go on a big DXpedition to work some great pileups. ARRL Contest Manager Sean Kutzko, KX9X will talk about participating in contests, awards programs and other operating events that will get you on the Other Side of the Pileup without needing to take out a second mortgage.

Saturday, 3:30 PM to 4:30 PM – Newport Beach Room
Getting Started in PIC Microcontroller Programming
Moderator: Mark Spencer, WA8SME, ARRL Education and Technology Program Director and author ofARRL's PIC Programming for Beginners.
There has been an explosion if the number of articles highlighting the use of microcontrollers in ham radio and other DIY (do it yourself) electronic hobby projects. With your interest peaked, the questions are "what is it all about; why should I be interested; and, how do I get started?" This forum will give you some ideas about how microcontroller devices can enhance your operating experience. A few different approaches will be presented that you might take to get involved in this important and evolving aspect of our hobby from someone who has been there, done that, and continues to learn more and more each day…in a practical way.

SUNDAY, October 14
Sunday, 8:15 AM to 9:15 AM – Newport Beach Room
Impedance Matching 101
Presenter: Ward Silver, N0AX, Lead Editor – The ARRL Antenna Book for Radio Communications
An overview of impedance matching at HF through UHF - what impedance matching is, why it is used, and common techniques for circuits and antennas.

Sunday, 9:30 AM to 10:30 AM – Newport Beach Room

Exploring Our World through Remote Sensing and Ham Radio
Moderator: Mark Spencer, WA8SME, ARRL Education and Technology Program Director
Remote sensing, whether carried on high altitude balloons aloft, satellites in space, or afloat on water borne buoys, this is an evolving and fascinating facet of our hobby. Hurricane warnings, Tsunami alerts, predicting global climate change, or day to day weather observations for air traffic operations all have one thing in common; remote sensing from seaborne, air, or space borne buoys…but how does that work? During this forum, the discussion will center on how you can learn more about remote sensing, how you can do your own projects to study our environment, what others are doing, and the pivotal role that ham radio plays in connecting the users to the remote sensing platforms aloft or in the water. This forum will be of particular interest for school teachers and those interested in supporting STEM education in our schools (STEM = Science, Technology, Engineering and Math). Mark Spencer, WA8SME uses his experience in engineering remote sensor systems for US Department of Defense programs to support school STEM education efforts.

Sunday, 10:45 AM to 11:45 AM – Newport Beach Room
ARRL: Radio Clubs & Mentoring
Moderator: Norm Fusaro, W3IZ, Assistant Manager, ARRL Membership & Volunteer Programs Department
With all the new and exciting things going on in Amateur Radio, your local radio club should be the go-to place for mentoring. Learn some of the things that are working for other clubs and be prepared to share your success stories from your radio club.

Sunday, 1:00 PM to 2:00 PM – Sedona Ballroom
ARRL Member Forum & Pacificon Awards, Prizes and Drawings
Moderator: Bob Vallio, W6RGG, ARRL Director--Pacific Division
ARRL is the largest national Amateur Radio association in the world. The organization has over 158,000 members worldwide, publishes the popular monthly journal QST, and coordinates an extensive all-volunteer field organization. Hear from local and national ARRL officials on key areas of membership interest. Find out how ARRL supports dozens of ways to get involved and get on the air. Members and prospective members are all welcome!

OPDX Bulletin 1082 October 15, 2012
The Ohio/Penn Dx PacketCluster
DX Bulletin No. 1082
BID: $OPDX.1082
October 15, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)
Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4BP, W4OX, WA4DAN, KH6BZF, K8GI, K8PGJ, K8YSE, NL8F, W8BBQ, W8GEX & 60m News, WB8ZRL, ND9M, W9ILY, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, JI5RPT, LA4LN, Mediterraneo DX Club, ON4EI, ON5NT, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, PY7ZZ, RSGB IOTA Web Site, Sixitalia Weekly, TA3J, VA3RJ & ICPO, VE3ZF, the VHF-DX-Portal (MMMonVHF) and YC9MLL for the following DX information.
DXCC COUNTRY/ENTITY REPORT
According to the AR-Cluster Network for the week of Sunday, 7th-October, through Sunday, 14th-October there were 218 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5U, 5W, 5Z, 6W, 6Y, 7P, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PY, PZ, R1FJ, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TN, TR, TT, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VK9X, VP2V, VP8, VP8/h, VP9,
VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z3, Z8, ZA, ZB, ZC4, ZD7, ZD8, ZL, ZP, ZS
* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).
1S/S1, PRINCIPALITY OF SEALAND (Once Claimed To Be A DXCC Entity)
Do you remember this one? A former UK anti-aircraft tower/fort (called Roughs Tower) located in the North Sea was occupied by a retired army major Roy Bates and his family in 1967. Major Bates declared the fort an independent sovereign state from the UK and renamed it Sealand on September 2, 1967. Bates established Sealand as a nation in 1975. Sealand had its own con- stitution, flag, National Anthem, stamps, passports and currency. There were even a few DXpeditions to Sealand - 1SLA1 (2000 by a Dutch group) and S1A (1982 by a German group). However, it has been reported that Major Bates passed away on October 9th, at the age of 91 in a care home in Leigh- on-Sea, Essex, after a long battle with Alzheimer's. His wife Joan is now expected to take over the rule of Sealand. Here are some interesting URLs to read about the history and view pictures of the Principality of Sealand:
http://www.dailymail.co.uk/news/article-2216596/Retired-army-major-occupied-fortress-North-Sea-declared-sovereign-principality-Sealand-dies-aged-91.htmlhttp://www.sealandgov.orghtt

p://www.angelfire.com/nv/micronations/sealandinfo.htmlxhttp://www.facebook.com/pages/The-Principality-of-Sealand/42469203122http://en.wikipedia.org/wiki/Principality_of_Sealandhttp://www.southgatearc.org/news/july2006/sealand_appeal.htm

3B9, RODRIGUES ISLAND

Just a reminder that a team of operators from Switerland known as the "Radio 7 Team" will be active as 3B9SP from Rodrigues Island (AF-017) between October 16-23rd. Their goal is to set up three amateur radio stations that can be run together on different Amateur Radio bands. Mostly one on CW, one on SSB and the third running special modes like RTTY and PSK31. They hope to use small 400 watt solid state amplifiers for the CW and SSB stations. Activity will be on 160-6 meters using two 3 element Spiderbeams (20/17/15/12/10m), verticals for 40/30/20m, a Butternut HF2V for 160/80/40m and a Slim Jim for 6 meters. QSL via HB9ACA direct or use the OQRS on ClubLog. The logs will be uploaded to LotW within 6 months after the DX Operation. For more details and updates, see:

http://hb9fr.ch/3b9sp

5H, TANZANIA (Update)

Noel, WB0VGI, informs OPDX this week that he is now operational in Iringa, Tanzania. He states, "I haven't established a schedule yet but will try to get on in the afternoons (1500-2000z) on 15 and 20 meters." He states that he will update us with more when he figures out what bands are best from there. He will be there until December 17th. Operations will be on CW, SSB and PSK. QSL via his home callsign.

5X, UGANDA (Postponed!)

Nick, G3RWF, who was expected to be active this week as 5X1NH from Uganda for two months, has announced that his trip is now postponed. No reason given.

8P, BARBADOS

Dave, WJ2O, will be active as 8P9DF from Surfsong resort in St. Philip between November 21-28th. Activity will be on all HF bands using mainly CW and an entry in the CQWW DX CW Contest (November 24-25th). Outside of the contest, he will be on 30/17/12 meters. QSL via WJ2O. For more details and updates, see:

http://www.wj2o.com

8Q, MALDIVES

Claudio, HB9OAU, will once again be active from the Maldives as 8Q7AU, but from Maayafushi Island (AS-013), North Male Atoll, between November 26th and December 11th. Activity will be holiday style on 80-10 meters SSB only using a 7-band vertical. QSL via his home callsign, direct or by the Bureau. Look for updates and photos from his last trip at:

http://www.hb9oau.ch

9H, MALTA

Operators Brad/K7ZSD (9H3ZD), Carl/WS7L (9H3WM) and Tim/NL8F (9H3TJ) will be active as 9H9X during the CQWW DX SSB Contest (October 27-28th) as a Multi-Single entry. The operators will use their individual callsigns before and after the contest. They will arrive in Malta on October 18th, and make a short trip to Sicily via Brads Yacht, but will be back for the contest. Operators will be staying at the Euroclub Hotel in Qawra, Malta. They will have an A3 beam, S9 43 ft. vertical and some other wire antennas. Radios will be an Icom 756 Pro II and a Elecraft K3 with two 400 watt amps. They will be on the the third floor of the hotel with access to the roof 24/7 where the antennas will be. Tim, NL8F, will leave shortly after the contest and head back home because of business, but the other guys will have a bit more time to be on the air. QSL 9H9X via LoTW. QSL the other callsigns via the operator's instructions.

9J & Z2, ZAMBIA AND ZIMBABWE

Gerard (Gert), ZS6AYU, will be active as 9J2GF from near Livingstone, Zambia, between October 19-22nd, and also as Z21GF from Victoria Falls between October 22-25th. Activity will be holiday style on 40-10 meters using CW only. He informs OPDX that he will use a

FT857D into a Cushcraft R7000 vertical running 100 watts (in 9J) and 400 watts (in Z2). QSL via ZS6AYU, direct or by the Bureau.
C6, BAHAMAS
Brian, N3IQ (ND3F), will once again be active as C6AQQ from Nassau (FL16 - Junkanoo Beach), Providence Island (NA-001) between October 25-31st. Activity will be mostly on the lower bands, but he will also be in the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/Low- Power or QRP entry. He states, "Different location than usual with more modest antennas." QSL via N3IQ, direct preferred or LoTW, by the Bureau (long wait) and eQSL.
C6, BAHAMAS
Operators Bob/N4BP (C6AKQ), Tim/N4UM (C6ARU) and Mike/K4RUM (C6AUM) will be active from Freeport, Lucaya, Bahamas (NA-080, WLOTA 0527), between November 20th and December 11th. Activity will include the CQWW DX CW Contest (November 24-25th), the ARRL 160m Contest (November 30th- December 2nd) and the ARRL 10m Contest (December 8-9th). Outside of the contests, Tim/C6ARU (N4UM) will be doing all the digital, mainly PSK31 and Olivia, but will probably also do some RTTY and other digital modes. Mike/C6AUM (K4RUM) and Bob/C6AKQ (N4BP) will probably do all CW. Bob informs OPDX that "We don't have any band plan, but will cover them all from 160-6 meters including the WARC bands." QSL via the operator's home callsign.
CARIBBEAN TOUR
David, K3LP, will activate the following Caribbean Islands during the later half of December. Specifics of his activities are not known at this time, but it will be holiday style. His tentative schedule is as follows:
December 18-22nd - Callsign K3LP/KP4; San Juan, Puerto Rico
>December 23rd - Callsign K3LP/KP2; St. Croix, U.S. Virgin Islands
>December 24th - Callsign K3LP/V4; Basseterre, St. Kitts
>December 25th - Callsign K3LP/J73; Roseau, Dominica
>December 26th - Callsign K3LP/J3; St. George's, Grenada
>December 28th - Callsign K3LP/KP2; Charlotte Amalie, St. Thomas, U.S. Virgin Islands
>December 29-31st - Callsign K3LP/KP4; San Juan, Puerto RicoLook for possible updates and more details at: http://www.k3lp.com
CY0, SABLE ISLAND (Update/Press Release)
The following was sent out on October 8th [edited]:
"Final preparations for the upcoming Sable Island DXpedition are being completed. Canadian authorities have approved the revised dates of October 22-31st. In order to minimize potential impact to the migratory bird population on Sable Island, we have settled on vertical dipole antennas made by 'GAP Antennas'. GAP has already shipped five, pre-drilled, ready-to-go, mono-band vertical antennas for 10, 12, 15, 17, and 20 meters. These antennas should arrive in Halifax this week. In addition, we are shipping back-up radio transceivers to Halifax on Monday, October 8th. Extra freeze-dried meals are being shipped, as well, in the event that our departure from Sable is delayed by weather conditions. Now that Sable Island has become a national park, it is unclear what limitations, if any, will be placed on future requests for group operations. Even though, we are just a two-person team, we will do our best to provide a new country or new band-country to those in need of CY0. As previously advertised, our focus will be on 10m, 12m, and 15m, where the greatest demand for Sable Island exists. For the latest updates, visit:http://www.CY0dxpedition.com73 de Murray/WA4DAN and Ron/AA4VK"DXPEDITION VIDEOS OF THE WEEK
With more and more DXpeditions putting their videos on YouTube and other Web services, we decided to list them (possibly) each week. For this week's listings:
2012 - 3D2C Conway Reef (Video by AH6HY - mostly bird life on the island):

EA8, CANARY ISLANDS
Sindre, LA6OP, will be active as EA8/LA6OP from Tenerife (AF-004, S-012 for the Spanish Islands Award, WLOTA LH-1276) between October 25th and November 8th. Activity will be holiday style on the bands between 20-10 meters using CW and SSB. QSL vis his home callsign.
EA9, CEUTA & MELILLA
Mek, SP7VC, will be active as EA9/SP7VC from Ceuta between October 22-28th. Activity will be holiday style (he will also be fishing) on 160-10 meters using SSB and also an entry in the CQWW DX SSB Contest (October 27-28th). Equipment consists of: IC-746, HEX beam by SP7IDX techology, R-7000 vertical, Inverted L for 160/80m and a K9AY beverage antenna for receiving. QSL via his home callsign direct or LoTW. For updates, visit his home page at:
http://www.sp7vc.pl
EF8, CANARY ISLANDS
Mauri, EA8CMX/OHBYS, will be active as EF8S during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (160m)/Low-Power entry. He states that he will trying a 3-element wire- Yagis and Beverages. QSL via OH2BYS.
EI, IRELAND
Olivier, ON4EI, will once again be active as EI8GQB and EI1A between October 21-30th. He plans to operate from his caravan using green energy. Olivier will activate EI1A callsign during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/2-Radio (SO2R) entry. You can follow his activity and antenna experimentation on
http://www.qrz.com/db/EI8GQBwhere you will find a live information banner with on air frequencies and information. QSL ONLY via ON4EI by the Bureau.
EY, TAJIKISTAN
Nodir, EY8MM, from Dushanbe, announced once again that he will be active during the CQWW DX SSB Contest (October 27-28th) and the CQWW DX CW Contest (November 24-25th) as a Single-Op/Single-Band (10m) entry. QSL K1BV via direct, by the Bureau or LoTW. Check out his home page at:
http://www.ey8mm.com

FY, FRENCH GUIANA
Didier, FY5FY, will be active as FY5KE during the CQWWide DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (15m)/Low-Power entry. QSL via FY1FL, by the Bureau or direct.
IT'S TIME FOR AZORES NINE ISLANDS HUNT LOTTERY DRAW
Excerpts from an October 12th press release state [edited]: "A lottery draw for two free travel packages to the Azores will take place at DARC Headquarters in Kassel, Germany, at 1100 UTC on October 15, 2012, and the winners will be announced immediately hereafter at: http://www.visitazores.com\a9ihunt... No one at 1200 UTC on September 29th expected that more than 9000 hams from all continents would dedicate all their efforts to make the project a success..... A total of 1542 amateurs contacted five or more of the nine islands, resulting in 11,404 lottery tickets for first round.
Additionally, the twenty-five (25) amateurs who contacted all nine islands fastest will participate in a second lottery. These twenty-five represent 12 different countries and include three stations from USA..... Totally 551 stations contacted all islands and they will be honored with a person- alized special Award of Merit. Full-color QSL cards featuring each island will be released through the QSL bureau network while direct requests can be mailed to Jose Melo, CU2CE."
IOTA NEWS
AS-012. Operators Take/JA6CNH and Yasuro/JF6XQJ will be active from Genkai Island (Shima) between October 19-21st. Any changes to their plans will be made on October 18th.
OC-151. Leo, YC9MLL, who has been living on Flores Island for 8 years, informs OPDX that he operates on SSB mostly, but will operate on CW if requested. He is usually on Saturdays and Sundays, but states that he is on vacation now and hams can arrange for IOTA QSO anytime via E-mail (see (QRZ.com)). Leo can operate on 40/20/15/10 meters using CW, SSB, PSK31, RTTY and SSTV. He has a homebrew radio with 50-100w into a dipole and delta loop antenna. QSL via his home callsign.
JD1, OGASAWARA
Makoto, JI5RPT, will once again be active as JD1BLY from Chichijima Island (AS-031), Ogasawara, between December 10-13th. Activity will be on 40-10 meters, including the satellites, using CW, SSB and the Digital modes. QSL via his home callsign JI5RPT. His log search will be available on his Web site at:
http://www.ji5rpt.com/jd1He will also use Twitter to inform his real-time activities at:http://twitter.com/jd1bly
KG6, GUAM (OC-026)
Joel, KG6DX, will be active as KG6DX in the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (10m)/High-Power entry. QSL via KG6DX, CBA or (QRZ.com) address. Also LoTW.

Operators Bill/N6MW and Jim/N6TQ will be active as KH8/N6MW from a hotel in Tutuila between March 19-28th. Their focus will be on "Maximum number of different stations contacted; CW, some SSB and RTTY if/when things slow down; EU when possible on higher bands; and Significant 160m effort." Their location on the island will be well south of the Pago Pago harbor area to avoid as much mountain low angle cut off as possible. The DXpedition's Web

page states, "One more operator position open." For more details and updates, visit:http://n6mw.jimdo.com
NEW OFFICERS FOR 2013
Members of the Eastern Iowa DX Association (EIDXA) elected the founding officers for 2013: Craig Fastenow, K0CF - President Jerry Rappel, WW0E - Vice President Rich Haendel, W3ACO - Secretary/TreasurerNH8, SWAINS ISLAND (Press Release)
The following was posted on the NH8S Web page www.nh8s.org on October 9th [edited]:
"Craig and I would like to thank everyone who worked us from Swains. We made 105,500 qso's which made a lot of hams happy. This is not a record, but something we and the team are very proud of. We had a great time but are glad to be back home with our families.
>This was truly a remarkable trip in many ways. We are very proud of our team as they performed remarkably well under unbearable heat. As you may know by now, it was 125° F on the beach in the sun. To put up antennas in the loose sand and heat was quite a challenge. During the duration of the trip, the crew walked many miles to get to the operating stations four times a day. Then they worked the endless pileups, which can be stressful. Never did they complain about the job before them, making qso's in those hot tents. Every crew member experienced some type of heat reaction at one time or another. Some members endured other injuries as well, and two were hospitalized, so we had our challenges. Everyone is home and fine now..
>To Swains owners, the Jennings family, you and your group were an enormous help to us. The Island support team of thirteen native men and women worked tirelessly to see that our needs were met. We couldn't ask for better hosts. Including the off-island support crew; it took a total of 43 people to make this all happen.
>QSL cards are ready to be printed and should be distributed in a few months. If you need a card right away, please go to our OQRS link for your QSL card.
>We want to thank all of our equipment sponsors; your equipment worked flawlessly. And to the foundations, clubs and individuals who helped fund this trip, we are most appreciative of your generosity. These trips to remote places are so expensive that it would not be possible without your support.
>It was a great honor for Craig and me to lead such an extraordinary team of highly experienced operators. This was not the easiest trip any of us have been on, and you guys are the greatest.
>Craig/K9CT and Joe/W8GEX Co-Leaders"NP3, PUERTO RICO
Jaime, WP3A, will be active as NP3X from the Coamo Contest club station during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (20m) entry.
ON, BELGIUM
Berkin, TA3J, will be active as ON/TA3J from various locations between December 7-11th. Activity will be on 160-2 meters using SSB and FM. QSL via his home callsign.

T30, WESTERN KIRIBATI
Just a reminder that a Brazilian team will be active as T30PY (HF) and T30SIX (6m, EME on WSJT-JT65A) from Tarawa Island (OC-017) this week between October 16-25th. Activity will be on 160-6 meters using CW, SSB, RTTY EME. Suggested frequencies are listed in OPDX.1059. They will have three stations on the air. QSL via PY2PT, direct, by the Bureau ("Estimation to reply: at last, 3 years."), or by their OQRS on the Web page. For more details, see:
http://www.mdxc.org/t30py
TO2, FRENCH GUIANA
Rich, N6KT (ex-HC8N), will be active as TO2A from French Guiana between October 20-30th. Activity (hopefully) will be on all bands. He will also be in the CQWW DX SSB Contest (October 27-28th). QSL via KU9C.
TT8, CHAD
You only have a few more days to work the "Italian DXpedition Team" as TT8TT from N'Djamena until October 16th. According to their Web page, as of 0818z, October 14th, TT8TT has made 63322 QSOs with 18710 unique callsigns (32866/CW, 27555/SSB and 2901/RTTY). QSL direct via I2YSB. QSL by the Bureau via IK2CIO. Logs will be posted to LoTW within six months. A log search and an OQRS are all available on their Web page at:
http://www.i2ysb.comOfficial forum is at:http://bit.ly/NVQaav
TX5, CLIPPERTON ISLAND (Update)
The 2013 Cordell Expedition to Clipperton Island will use the callsign TX5K. The DXpedition team will leave San Diego on the vessel "Shogun" on February 19th, and land on Clipperton February 27th. They will be on the air between February 28th and March 10th.
The current list of operators are Bob/KK6EK (Organizer, Expedition Leader), Christian/DL1MGB (Co-organizer), Carlos/NP4IW (Logistics), Gerhard/DJ5IW, Robert/SP5XVY, Dietmar/DL3DXX, Andreas/DL5CW, Yann/F1NGP, Mathias/DJ2HD, Heye/DJ9RR, Terry/AB5K, Ed/KE3D, Rick/KF4ZZ, Mike/WA6O, Luis/XE1L, Igor/US0VA, Tom/DL5LYM, Tom/VE3CX, Ken/OZ1IKY, Jef/DD2CW, Dave/WJ2O, Giovanni/I5JHW and one other space open. Louis-Philippe Loncke will be there for documentation. There are four honorary team members: Chod Harris/VP2ML (SK - DXpedition Dedication), Yasuo "Zorro" Miyazawa/ JH1AJT (Honorary DXpedition Leader), Conrad Limbaugh (Expedition Dedication) and Dan Gotshall (Honorary Expedition Leader).
The "Technology Development" team members are: Bob/N2OO is the QSL Manager, Peter/W6OP and Dean/N7XG are Software Development, Rich/KY6R (Social Media), Alan/AD6E (Satellite Communications), Dean/N6BV (Radio Propagation Modeling) and Felipe (Internet Data).

Regional Coordinators are: Marcus/DL9RCF (Germany), Stan/KH6CG (Hawaii), Col/MM0NDX (Scotland), Cesar/PY2YP (Brazil), Andre/V51B (Namibia), Tommy/VK2IR (Australia) and XE2HWJ (Mexico). There will be four members on the Scientific Program team.
For more details, visit the Clipperton Island Web page at:
http://www.cordell.org/CI/index.html
UK, UZBEKISTAN
Takhir, UA1ZEY, will be active as UK/UA1ZEY from Samarkand between October 14th and November 1st. Activity will be active on HF bands. QSL via his home callsign direct.
V8, BRUNEI DARUSSALAM (V84SMD Press Release #5)
The following was sent out on October 8th [edited]:
"DX friends of all over the World , we are now very near the kick off of our new adventure, this time in V8 land. All is going perfectly, and we are happy to report that the DXpedition packaging is ready and all equipments tested. Our international team of 23 operators of 9 Countries, lead by Antonio/IZ8CCW and Gabriele/I2VGW under the flag of Mediterraneo DX Club, is excited about this operation that will be on the air from two different shacks. The first one just on the beach of Pantai Seri Kenangan in Tutong and the second one from a close hotel.
>The team will be running seven stations from 6 to 160 including 6 meters. We'll be on CW, SSB and RTTY around the clock from November 11-23rd, and our aim is to take care of increasing number of QSOs also outside EU, and also to use as many modes possible where the country is most wanted. As we know so far, CW and RTTY modes are more needed all around the world from Brunei Darussalam. We remind you that V8 is also an IOTA reference (OC-88). For further info and to discover how to support us, please see our Web site at http://www.mdxc.org/v84smd. Any donations will be very very useful. So thanks in advance! Here is also our set-up:
>RTX - 4X ICOM IC-7000, 1X ELECRAFT K2, 1 x YAESU FT-950 and 1x ICOM 7200
>ANTENNAS FARM - 1X Vertical antenna for 80m, 2X 5 Bands Spiderbeam, 1X
>UJX-Vertical for 40-10m, 4 Square for 40m, 2X Vertical
>in phase for 30m, 1X 2 element mono 20m, 1x 3 element
>
>mono 15m, 1X Inverted L for 160m, 1x 6 elemnet mono band 50Mhz model 50LFA6XL by Eantenna and 1x WARC Bands Rigid
>Dipole by EAntenna WARC121730
>AMPLIFIRES - 2X Acom 1011, 1X Tokyo 600w, 1x Ameritron 500w and 1x New PA by Italian new factory brand"The DXpedition official Web site at: http://www.mdxc.org/v84smd
VC2, CANADA (Zone 2)
Igor, VE3ZF, will be active as VC2X from Zone 2 during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/ High-Power entry. Igor will be operating from the small French-speaking fishing village of Riviere-Au-Tonnerre, Northern Quebec. Before the contest, he will use the VE3ZF/2 callsign. Igor informs OPDX, "I will use a YAESU FTDX5000D, Kenwood TL922a, phasing verticals on low bands and Spider beam on 14-21-28." QSL all callsigns via VE3ZF.
VP5/VQ5, TURKS AND CAICOS ISLANDS
Operators Bill/KX4WW, Noll/W9RN and Doug/W4OX and Jim/K9PPY will be active as VQ5X during the CQWW DX SSB Contest (October 27-28th) as a Multi-Single entry. QSL via W4OX or LoTW. The team will be on the island between October 20-30th. Outside of the contest, they will use VP5/homecall and be active on all bands 160-10 meters using CW, SSB and RTTY. There is a possibility they may be on 6 meters as well, but this will depend on how long it takes to finish doing some tower maintenance which will determine if they will have enough time to put together the 6m antenna and haul it up one of the towers.
VQ92, CHAGOS ISLANDS

Jim, VQ9JC/ND9M, on Diego Garcia until mid-November, informs OPDX that he will be using another special prefix callsign, VQ92JC (nine two), between October 20th and November 4th. He states,
"I'll be QRV in the 1200-1600z time frame as much as possible during that calendar window. This is the sixth consecutive year that I've been issued a unique prefix. The only drawback is that I'm still operating Field Day style from a recreational park. My station currently is a FT-857 at 100 watts to a dipole at a height of 10 meters. I'll be on during the upcoming CQ WW SSB contest. I've made a lot of calls and CQs on SSB, both in and outside of contests, over the last several months, but very few ops have answered me. No doubt it's largely because prop condx aren't very good and because of my station limitations, so I don't know how good my SSB effort in the WW will be. I'm scheduled to return to the States just after that."QSL via ND9M.
YS, EL SALVADOR
Operators Mario/YS1GMV, Mario/YS1MAE and members of the Club de Radio Aficionados de El Salvador (CRAS) will be active as YS1YS during the CQWW DX SSB Contest (October 27-28th) as a Multi-Single entry. QSL via YS1GMV.
Z8, SOUTH SUDAN
Diya, Z81D, has been very active the past week on 40/20/ 15/12/10 meters SSB at various time. Sometimes via a list operation. Suggest to watch or search QSNs on the DXCluster. QSL via OM3JW.
ZD8, ASCENSION ISLAND
Marko, N5ZO, will once again be active as ZD8O from Ascension Island (AF-003) during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band entry. QSL via OH0XX. Marko will be active between October 18-30th "as time allows from setting up field day operation."
ZF2, CAYMAN ISLANDS
Pete, K8PGJ, will be active as ZF2PG on Grand Cayman (NA-016) during the week of January 12-20th. Activity (when not diving) will occur on 20 to 15 meters SSB during the morning and early afternoon on weekdays. He will be operating in the NAQP Contest on 20 and 40 meters. QSL via his home callsign or LoTW.
ZL7, CHATHAM ISLANDS
Jim, ZL1LC, is currently planning to be active as ZL7LC from Chatham Islands (OC-038) between March 21-27th. Activity will be mainly PSK only. More details will be forthcoming.
ZV7, BRAZIL (Special Event)
Look for several Brazilian operators to activate special event station ZV7O between November 17-18th. Activity will take place during the "FLIPORTO 2012" (Festa Literária Internacional de Pernambuco)
http://www.fliporto.net/fliporto2012/en/fliporto-2012The special ZV7O station will be on the air from the FLIPORTO event doing a public demonstration of amateur radio using different bands and modes. A special award (see QRZ.com) will be issued upon request to the Award Manager for contacts with ZV7O on two different bands or two different modes, at no cost. A colored QSL card will be printed to confirm all contacts made by ZV7O. QSL via PY7JN.

5R - Once again Eric, F6ICX will be active as 5R8IC from Sainte-Marie Island (AF-090) from 10 November to 9 December. He will operate mainly CW, with some RTTY, PSK63 and SSB, on 40-10 metres. QSL via home call, direct or bureau.

9J - Gert, ZS6AYU will be active as 9J2GF from Zambia on 19-22 October. He will be QRV on 40-10 metres CW. QSL via home call, direct or bureau.

9M - Mirek, VK6DXI will be active as 9M8DX from Kuching, East Malaysia on until 15 October. Main activity will be during the Oceania DX Contest (CW); outside the contest he will operate SSB and on 30, 17 and 12 metres. From 15 October to 3 November he will be active in his spare time as 9M8DX/2 from Kuala Lumpur, West Malaysia. QSL via SP5UAF.

9U - An international team from Belgium, the Netherlands and Scotland will be active from Burundi (requested call 9U4U) during the second half of February 2013. They plan to have ten operators and four stations. Further information will follow in due course. A website is under construction. [TNX ON4ATW]

CN - CN8VO, CN2OS (PD0JOS) and CN2LO (ON4LO) are active on 80-10 metres SSB as 5D7AT from Agadir, Morocco until 21 October. QSL via ON4LO, direct or bureau.

CT9 - DL1EK, DH4JQ, DF4UM, DJ5KW and DK8VC will be active as CT9/ homecall from Madeira (AF-014) from 21 October to 2 November. QSL via home calls. They will participate in the CQWW DX SSB Contest as CR3L (QSL via DJ6QT). [TNX NG3K]

E5_sc - Frank, HB9BXU and other operators from Switzerland will be active holiday style as E51C, E51ABS, E51BZD and E51CHX from Aitutaki (OC-083), South Cook Islands on 12-30 November. Look for them between 19 and 12 UTC on SSB (3799, 7070, 14190, 18145, 21290, 24950 and 28490 kHz), CW (3505, 7020, 10104, 14024, 18080, 21024, 24894 and 28024 kHz) and PSK31 (3580, 7035, 10139, 14070, 18100, 21070, 24920 and 28120 kHz). QSL via HB9BXU. [TNX HB9BXU]

EA6 - Once again Adrian, AA5UK will be active as EA6/AA5UK from Ibiza, Balearic Islands (EU-004) on 20-31 October, including an entry in the CQ WW DX SSB Contest. He will operate holiday style on 80-10 metres SSB, RTTY and PSK31. QSL via home call, direct or bureau,

plus LoTW and eQSL. [TNX The Daily DX]

EA8 - Look for Mike, EA8/DL3FCG to be active from Tenerife, Canary Islands (AF-004) on 15-28 October. He will operate CW, SSB, RTTY. PSK and JT65 on 80-10 metres, and will take part in the WAG and CQWW SSB Contests. QSL via home call. [TNX DX Newsletter]

EA9 - Mek, SP7VC will be active as EA9/SP7VC from Ceuta on 22-28 October. He will operate holiday style on 160-10 metres SSB, including an entry in the CQWW SSB Contest. QSL via home call and LoTW. [TNX NG3K]

FO - TX5EG is the special callsign issued to Didier F6BCW, who is visiting French Polynesia until 8 November [425DXN 1111]. He will be active from various islands in IOTA group OC-067: from Huahine until 15 October, followed by Raiatea (15-19 October), Tahaa (19-22 October), Maupiti (22-26 October)and again Huahine (27 October-8 November). He operates CW only with 100 watts and dipoles. QSL via home call, direct or bureau.

FY - Rich, N6KT will be active as TO2A from French Guiana on 20-30 October, including participation in the CQWW SSB Contest. QSL via KU9C. [TNX DX World]

GU - Members of the Guernsey Amateur Radio Society and Guernsey RAYNET group will set up a station to take part in the 55th Jamboree On The Air (JOTA) on 20-21 October. Look for GB2JTA to be active from Guernsey (EU-114) on the HF and VHF bands as conditions permit. QSL via bureau or direct to the address on qrz.com

HL - The Korean Contest Club will be active as D9K from Pigum Island (AS-060) on 26-29 October, CQWW DX SSB Contest included. QSL via DS4NYE.

J7 - Volker, DL8WEM will be active as J79WE from Dominica (NA-101) from 14 October to 7 November. He plans to operate mainly CW on 30, 17 and 12 metres. QSL via home call. [TNX The Daily DX]

KH0 - Kit JA1NVF, Kowata JF7ELG, Miho JJ2VLY and Yutaka JQ2GYU will be active from Tinian Island (OC-086) on 18-22 October. They will be QRV on 80-6 metres CW, SSB and some RTTY/PSK. They will operate as NH0J (QSL via JJ2VLY) and/or their individual callsigns: AH0J (QSL via JA1NVF), WA2O/KH0 (QSL via JF7ELG), WS2M/KH0 (QSL via JJ2VLY) and WS2Y/KH0 (QSL via JQ2GYU). [TNX DX World]

OJ0 - Weather permitting, SM0CXU, SM0BYD and SM0W expect to be active as OJ0R from Market Reef (EU-053) until 16 October, including participation in this weekend's Scandinavian Activity Contest (SAC) SSB. QSL via G3TXF.

ON - Special event station ON44CLM will be active from 16 October to 15 November in remembrance of the November 1944 liberation of Knokke by Canadian Armed forces. QSL via ON3AIM.

PJ4 - N0VD (www.n0vd.com), W4PA and possibly others will be active as PJ4D from Bonaire (SA-006) from 18 November to 1 December. They expect to be active on all bands SSB and CW, with some RTTY if time permits, and to participate in the CQWW CW Contest "in one form or another". QSL via W3HNK. [TNX N0VD]

PJ7 - Kazu, 7L4XDT (PJ7XK) and Masa, JN3NFQ (PJ7I) will be active from Sint Maarten (NA-105) on 18-24 November. They will have two

stations and be active on the HF bands and 6 metres CW, SSB and digital modes. QSL PJ7XK via 7L4XDT, QSL PJ7I via JG2BRI. Logsearch will be provided by Club Log.

PY - Special event station ZV7O will be active on 18-19 November during Fliporto 2012, the International Literary Festival of Pernambuco. QSL via PY7JN. Further information on qrz.com. [TNX PY7ZZ]

S7 - Luca I5IHE will be active as S79LC from Praslin Island (AF-024), Seychelles from 20 October to 5 November. From 21 October to the 31st he will be joined by Simone, IK5RUN (S79UN) and Danio, I5OYY (S79YY). Look for activity on 40-10 metres SSB, CW and RTTY. They might also give 160 and 80 metres a try. QSL via home calls (direct) and LoTW "within 6 months".

SM - SA3BPG, SA3BRX, SM3CER, SM3EAE, SM3UQO and SM5SIC will be active from SI9AM (the King Chulalongkorn Memorial Amateur Radio Society, www.si9am.se) in Ragunda on 13-14 October, including an entry in the Scandinavian Activity Contest (SAC) SSB. Outside the contest they will be on 160-10 metres CW and SSB. QSL via SM3CVM, direct or via bureau.

T30 - Announced frequencies for the 16-25 October T30PY expedition to Tarawa, Western Kiribati [425DXN 1094] are:

CW	28024	24894	21024	18084	14024	10124	7024	3524	1831.5
SSB	28495	24945	21295	18145	14195	-	7085	3795	-
RTTY	28080	24920	21080	18102	14080	-	7038	3580	-

Also, look for T30SIX to be used on 50110 kHz for "propagation checking calls"; they will move to 50120 kHz SSB and 50102 kHz CW "as soon as activity peeks up". EME frequency will be 50198 kHz WSJT-JT65A. Ten operators (PT2OP, PY2DM, PY2PT, PY2WAS, PY2XB, PY3MM, PY4BZ, PY5HSD, PY7XC and PY7ZY) will be active with four stations from two different sites. QSL via PY2PT. Detailed QSLling policy can be found at http://www.mdxc.org/t30py/

UA - Vladimir, UA0LCZ will be active as UA0LCZ/p from Popov Island (AS-066) until 15 October. Look for him on or around 3507, 7007, 10107, 14017, 18077, 21017, 24897 and 28017 kHz. He will participate in the Oceania DX Contest (CW). QSL via home call. [TNX qrz.ru]

V3 - Rich, N0HJZ will be active as V31MW from Belize on 21-30 October, including an entry in the CQWW DX SSB Contest. Outside the contest he will concentrate on 30, 17 and 12 metres and CW. QSL via N0HJZ. [TNX NG3K]

VE - Noel, VE2BR and Gregg, VE3ZZ will participate in the CQWW DX SSB Contest as VC2B (Multi-Single) from Mercier, Quebec (Zone 5). QSL via VE2BR, direct or bureau. [TNX VE3ZZ]

VP5 - Frank WA2VYA, Tony K4QE and Jack N2VW will be active from Providenciales (NA-002), Turks & Caicos Islands on 23-30 October. They will participate in the CQWW DX SSB Contest as VP5T (QSL via N2VW and LoTW); before and after the contest they will operate CW and 30, 17 and 12 metres. [TNX NG3K]

VQ9 - For the sixth year in a row Jim, VQ9JC (ND9M) will use a special prefix from Diego Garcia (AF-006), and will be active as VQ92JC from 20 October through 4 November. After that he will return to

the US. Look for him to be QRV in the 1200-1600 UTC time frame. He is still operating Field Day style from recreational park [425DXN 1110], with 100 watts to a dipole. Also expect some activity during the CQWW SSB Contest. QSL via ND9M. [TNX VQ9JC]

Z2 - Gert, ZS6AYU will be active as Z21GF from Zimbabwe on 22-25 October. He will be QRV on 40-10 metres CW. QSL via home call, direct or bureau.

Archives of the “73 Amateur Radio Today”

Who remembers the “73″ Magazine? If you have a good memory you already knowwhat I’m talking about otherwise you can open the link that I report in this article. In fact, the Jefferson County Amateur Radio Club tells us that the “73“ magazine (also known as 73 Amateur Radio Today) has published its archives to this address: http://www.archive.org/details/73-magazine

This impressive database traces all the years of the magazine from 1960 to 2003, for a total of 511 publications.
Indeed, the archive is published in a truly professional and offers a variety of reading formats: PDF, EPUB, and Kindle.
The publication is also accompanied by a powerful search engine that allows youto find content of interest to you through thousands of pages.
If you like vintage, and if you take a dip into the past of this hobby, this link willundoubtedly be placed among the favorites.
Happy reading!

73 Magazine Information
    A rather insane project... by KB9MWR
Overview
73 Magazine (also known as 73 Amateur Radio Today) was an amateur radio magazine that was published from October 1960 to September 2003. (That's 514 issues, with about 8619 articles, and over 64,000 pages). It was known for its strong emphasis on technical articles and for the lengthy editorials in each issue by its founder and publisher, Wayne Green (W2NSD).
>Prior to beginning his own publications, Wayne Green started an amateur radio teletype newsletter. Within a couple of years, he had 2,000 subscribers. He also was an editor of CQ Amateur Radiomagazine for five years before starting his own magazine.
>He launched 73, a competing magazine, which promoted emerging technologies as do-it-yourself projects. A pioneer promoter of SSB, FM, solid-state, easy construction projects, and the marriage of personal computing and amateur radio. (Wayne's interest in microcomputing led him to found several of the early personal computing magazines.)
>Starting in the early 1960s with an army of can-do, build-it-yourself amateur radio fans behind him, Wayne Green encouraged readers of 73 Magazine (his first and longest-lived publication), to push the limits on the electronic bits and pieces that would evolve into today's e-mail systems, cellular networks and PCs.
>He predicted the rise of the "pico" computer, better known as the laptop. And he encouraged his readers to build a grass-roots wireless telephony network -- a nationwide array of amateur radio repeater towers that was the precursor to today's cellular networks.
>For him, only what's ahead matters. "I'm always impatient with [the pace of] new technologies. I live mostly in the future," he says.
>Some people have described Wayne Green as a visionary and entrepreneur. He actually taught people to think.
>For more info see: Tech Visionary and Byte Magazine Founder Wayne Green on Changing the World
>There is also an episode of the QSO Ham Radio Talkshow podcast by Ted Randall which has an interview with Wayne Green: Wayne Green Interview - Aug. 27, 2009. (48M MP3)
Archives
Many hams have been searching for reprints or back issues floating around. I contacted Wayne to see if there was any type of CD-ROM or other archive of his magazine. He said he didn't know of any source other than scanning in over 50,000 pages. Which he thought was daunting to sell maybe dozens of CDs.
>
>However, Buckmaster was one of the first to have microfilmed, and later, scanned issues of the magazine. From what I have found, the microfilmed versions advertised for sale over the years were purchased by most major technical colleges. So, never fear, it is out there as several university libraries still have it available.
>References:
> * Buckmaster Archive Buckmaster microfilmed various amateur radio magazines, including 73.

> * National Archive Publishing Company Still sells the microfilmed magazine archive, but at a rather expensive price.
> * Quote from KA0GKT/7 at http://www.eham.net/forums/Elmers/97816:
>"...the University of Arizona Science and Engineering Library has back issues of QST, 73 and CQ magazines either in paper form or on microfiech or as PDF files. The PDF files are available via the internet only to students and faculty."
>Sadly it doesn't didn't look like there will ever be an official digital archive of this magazine available for purchase. With current law copyrights expire after author's lifespan plus 70 years. And the courts rulings on CD-ROMs Of Magazine Archives have been mixed.
>73 usually only bought first publication rights and sometimes first reprint rights. One would have to get the permission of every author who had written for 73 Magazine in order to make a CD-ROM collection available. Wayne sold 73 a couple times which further complicates the matter. The transfer of copyright agreements is unclear slipper slope due to the various royalty and copyright issues that existed between contributing authors and 73 Magazine. (ref)
>However, many authors have said they are okay with having their articles reprinted as long as its at no charge. As I have said before, it is out there, but you'll have to use your conscience to as a guide to whether or not obtaining such an archive is legal, moral, and/or ethical.
Update Dec 2011
An Christmas gift was bestowed up on us. The Internet Archive received a voluntary contribution to the public domain by 73 magazine publisher, Wayne Green W2NSD.
>Magazine articles were scanned, quality corrected, and index by an army of individuals, and collected together for Internet Archive by Jason Scott of textfiles.org
>Archive.org was started by internet pioneer Brewster Kahle in 1996, with the goal of archiving internet history. While the resulting "Wayback Machine" is one of their best known projects, the Archive also engages in curated projects, such as the recent archive of all TV coverage on 9/11/01 at september11.archive.org.
>The 73 Magazine Collection on the Internet Archive can be found here:
> http://www.archive.org/details/73-magazine
Other Indexes
Concerning a searchable master index of articles. Didah Publishing shows up as having developed a 73 Magazine index (through 1990) computer program and book under the title "From Beverages thru OSCAR - A Bibliography."
> * WorldCat
> * OpenLibrary
> * Alibris
> * Amazon Used copies show up from time-to-time.
> * AbeBooks.co.uk
>OCLC shows that there are three libraries which have that 73 Magazine index, they are:
> * US, CA LOS ANGLES PUB LIB Code LPU
> * US, DC LIBRARY OF CONGRESS Code DLC
> * US, NC BAKER & TAYLOR INC TECH SERV & PROD DEV Code BTCTA
>Here is quote about Didah Publishing's bibliography program:
>Q: I'm going to be building a big stack of magazines! Can I get an index for our collection?
>>A: There is no single comprehensive index to all amateur radio and electronics literature. The best thing you can do is check the year-end issues. You can also purchase a bibliography computer program called "From Beverages Thru OSCAR," published by Didah

Publishing. By entering a key word in the article description, you can search for articles on nearly every subject and locate the issue you need. The database is very comprehensive, covering many amateur radio general-interest and specialty magazines. Didah also publishes smaller, less-expensive software packages for each of most popular ham magazines. Some of their bibliographies are available in printed form, too. Contact Didah Publishing at P.O. Box 7368, Nashua, NH 03060, (telephone 603-878-3628). You used to be able to buy the complete "From Beverages Thru OSCAR" software package (a DOS program written by Rich Rosen, K2RR) from ARRL Headquarters for $79.
>Rich Rosen's QRZ profile states:
>"I created 'From Beverages Thru OSCAR - A Bibliography' after literally reading every page from QST (Jan. '45-'90), CQ (Jan. '45-'92), Ham Radio (Mar. '68-Jun '90), 73 (Oct. 1960 - Dec. '90), and RadCom (Jan. '79-Dec '90). When I retire (soon), will bring entire database up to date, from QST issue 1 (Dec. 1915) and continue."
>The following preface describes his work and wonderful resource. The printed 73 Magazine index from 1960-1990 is about 100 pages. I suggest contacting him if this or his software would be useful to you.
>"From Beverages Thru OSCAR - A Bibliography" is a 52,880 reference volume to articles written on all aspects of radio communications. The term radio communications is defined by this book in a much broader sense. It encompasses the early days of radio, at the turn of the century, in which wireless transmissions were the only form of communications. But it doesn't stop there. It continues through the 20th century to include the more advanced forms of data communications.
>>The title "From Beverages Thru OSCAR..." tells a story. Beverage is a long wire antenna that was developed in the early 20s. It, and similar type antennas made it possible to clearly receive radio signals from across the Atlantic. This antenna has stood the "test of time" and is used today by radio amateurs, commercial services and the military. OSCAR stands for Orbiting Satellite Carrying Amateur Radio. It's a series of satellites that enable radio amateurs to communicate through a small handheld unit to others half way around tho world.
>>Amateur radio, is what this book is about. At least that was the initial impetus that urged me to put this massive compendium together. Radio amateurs, of which I'm proud to include myself among their rank, number almost a half million strong in the United States and are found in literally every other county in the world. They are a disparate group, speaking collectively hundreds of different languages and working in an even greater number of divers professions. Many who have chosen to delve into the technical mysteries of radio have contributed immensely. Think of any major technological breakthrough in the field of communications and the probability is great that there were at least several radio amateurs present, advancing the state of the art. In many famous cases amateur radio discoveries were made prior to even commercial interest involvement
>>However, only a small percentage of radio "amateurs" publish their findings in the professional and radio journals. Instead they employ consumer magazines (QST, CQ, Ham Radio, 73, andRadio Communication) as a conduit to express their ideas. This very fact has driven me to uncover this wealth of knowledge so that others might benefit. The production of "From Beverages Thru OSCAR" involved the meticulous examination of 231,173 pages from 1,776 issues of these magazines. Names that have meaning to many in the professional world jump out from those pages: Armstrong, the inventor of FM; Brown, Kraus, King, Lewis, and Schelkunoff legends in the field of antenna theory; Friis, Lamb, Rohde, Tuska, and Villard in receiver design, to name a few. These giants in the field of communications have either published in the magazines or greatly influenced the writings and efforts of others.
>>Related contributions in the professional annuals such as the Bell System Technical Journal, Proceedings of the IEEE, and Transaction on Antennas and Propagation are

referenced as well.
>>Access to Columbia University's Engineering Library with its immense open-shelf collection of technical journals provided me the opportunity to spend countless pleasurable hours researching communications topics. Fifteen years of a page-by-page scrutiny embodies this bibliography.
>>It is a unique tome, definitely at least in the sense that it is the only one of its kind. My original intention was solely to locate a reference volume that included the amateur radio sources. After a considerable search none was found. Casual lists of articles of interest just would not suffice for several reasons. First structure was needed to put some order to this information. Lack of the same had been my major complaint of previous lists that I had casually generated. But perhaps more importantly, I found myself expanding my areas of interest at an accelerating pace. Many interesting articles that I had accidentally come across were too precious to let slide back into the closed pages of some dusty volume.
>>A workable format was developed in several months. Though New York City certainly has its share of fine technical libraries, I knew that I needed to have more immediate access to at least the amateur radio journals. The acquisition of entire collections of those magazines became a project in its own right. As the expression goes, the rest is history - culminating in this 1,260 page communications reference volume.
>>For those of us who have ever become frustrated in looking through indices of article titles without being able to decipher the subject matter - this bibliography is for you. Don't expect to find catchword phrases within. Each article reference contains a short abstract that clearly indicates the theme. Anyone who works nine years as a technical editor and reviews over a quarter of a million pages should have the ability to quickly review articles and capture their essence in a few succinct words.
>>Expect it to be comprehensive. Each page of QST from January 1945 to present, and every page of CQ, Ham Radio and 73 Magazine from their premiere issues were personally reviewed. In addition, selected references from 289 other sources have boon included. Those sources are world-recognized journals, society reviews, trade magazines and technical publications from laboratories, agencies and industry. Most of them are available in the larger technical libraries or can be obtained on a loan basis. And what if you can't locate some of the sources? With an average of 575 article references per subject area anyone with even half of the sources should be able to acquire an in-depth knowledge of the subject.
>>References are entered in reverse chronological order, the most recent information appears first. Some subjects include references that go back 80 years. For example, in the area of propagation - chapter 5's first reference is March 1909! Naturally, more recent technical topics such as computers only include early references to articles published in the 1960s.
>>Earlier editions of this bibliography were published. The first: "From Beverages Thru OSCAR - A Bibliography" contained references through December 1978. The second edition: "From Beverages Thru OSCAR - A Bibliography, Addendum 1979-1981" was a three year update to the first volume. This latest rendition not only encompasses completely rewritten and reformatted earlier editions but contains new source and reference material as well. In addition it includes a 100 page 5,000 word keyword index and 23 page author index to assist the user in rapidly locating articles of interest.
>>Knowledge, generated by many, is similar to a country's untapped resources. It remains hidden beneath the surface of subtle or innocuous titles until the proper tool is found and utilized. This bibliography can be that tool.
Index Information
What you see here is phase two of a long project. This index project was inspired by and

dedicated to Wayne Green, W2NSD himself. For the vast technical information in all his years of dedication to the publication and hobby. It is also inspired by the work of Rich Rosen, K2RR. And by Bill Griffith, VE3WGX for his Ham Radio Magazine index work. These three dedicated themselves, which prompted me to say, so can I.
>A special thanks to the daughter of N9AVO/W9LML, Edward Harrigan (SK) who sparked my interest in the whole thing by donating a few decades of the magazine to our club years ago. Also thanks to Buckmaster for microfilming the magazine, the Nicolet Federated Library System and the interlibrary loan staff who helped me track these indexes down, and various other hams.
>What follows is about a years worth of on and off work. This data was generated by scanning and OCR software, errors likely exist.
>To the best of my knowledge it is now complete (December 4, 2009). This index is freely sharable, but please contact me if you plan to redistribute it commercially. It is meant as a free public resource for those who have stacks of these wonderful magazines in their basements (as I have).
>Enjoy - Steve, KB9MWR

```
DXNL 1802 - Oct 17, 2012
                      DX Newsletter

5X, UGANDA
    Nick,G3RWF, who was expected to be active as 5X1NH from Uganda this
    week has postponed his trip without any reason given.

6W, SENEGAL
    Vladimir,RK4FF, announced to be QRV again as 6V7S from the rental shack
    Le Calao from Oct 22 until Nov 3. No information about a participation
    in the WWDX SSB Contest (Oct 27/28). QSL via homecall.
    See also: http://www.le-calao.com/A/residence_A.htm

9J, ZAMBIA
    Gert,ZS6AYU, will be active as 9J2GR working holiday style from the
    lodge "Mama Out of Africa" at the Zambezi river near Livingstone.
    Activities will be in CW on 40m-10m running 100 watts into a R7000
    vertical from Oct 19-22. His next destination will be Zimbabwe.
    QSL via homecall.
    See also: http://www.safarinow.com/go/MamaOutofAfrica

9M2, WESTERN MALAYSIA
    Mirek,VK6DXI, will be QRV as 9M8DX/2 from Kuala Lumpur during his
    spare time between Oct 15 and Nov 3. QSL via SP5UAF (B).

CP, BOLIVIA
    Peter,DF7NX, has travelled from Peru to Bolivia and wants to show up
    on the bands as CP8/DF7NX starting on Oct 19. QSL via homecall.

EA9, CEUTA
    Mek,EA9/SP7VC, will be QRV from Ceuta in holiday style from Oct 22-28.
    Operation will be on 160m-10m in SSB, including the CQWW SSB Contest as
    Single Op/All Band/High Power. Equipment consists of: IC-746, HEX beam
    by SP7IDX, R7000 vertical, Inv L for 160m and 80m, K9AY for receiving.
    QSL via homecall, unfortunately only direct or LoTW.

EI, IRELAND, EU-115
    Olivier,ON4EI, will once again be QRV as EI8GQB and EI1A from Oct 21-30
    using 100 % green energy from a wind/solar hybrid system at his Caravan
    He will join the WWDX SSB Contest as EI1A in the SO2R category.
    More information is available at QRZ.com. QSL via homecall.

FO, FRENCH POLYNESIA
    Alains,F4GYP, trip to the South Pacific as FO/F4GYP is scheduled from
    Oct 19 until Nov 6 as follows:
      Tahiti  (OC-046, DIFO FO-002, WLOTA 0885)
      Mehetia (OC-046, DIFO FO-009),
```

Moorea (OC-046, DIFO FO-010, WLOTA 0465)
Raiatea (OC-067, DIFO FO-012, WLOTA 1977) (maybe Oct 27/28)
He will use the special callsign TX4FO from Ilot Motu Nono (OC-046, Loc BH52ig) near Tahiti. Alain works in SSB on 40m, 20m and maybe 10m. QSL via homecall.

FY, FRENCH GUYANA
Rich,N6KT (ex HC8N), will activate the special event callsign TO2A from Kourou from Oct 20-30. He also plans to join the WWDX SSB Contest. QSL via KU9C.

G, ENGLAND, EU-005
The Bishop Auckland Radio Amateurs Club (G4TTF, FISTS #6471) will be QRV with some scouts using the special callsign GB1FDS during the JOTA weekend (Oct 20/21). QSL via bureau or direct to G0GFG.

GU, GUERNSEY, EU-114
Members of the Guernsey Amateur Radio Society and the Bailiwick of Guernsey RAYNET group plan to activate the special event station GB2JTA on all bands from Vale on Guernsey (EU-114, WLOTA 0013, Loc IN89rl) during the 55th Jamboree On The Air. QSL via bureau.

HA, HUNGARY
The HA-IPA-team celebrates the 20th anniversary of the Hungarian IPA section by activating the special callsign HG20IPA in CW, SSB and digital modes on 160m-6m until Nov 30. They plan to take part in the upcoming IPA Radio Club Contest as well. All QSOs also count for the HA IPARC award. QSL via HA3JB. See also: http://www.ha3jb.com

J3, GRENADA, NA-024
Terry,KS5Z, s planning a one week stay on Grenada with Harry,AC8G, for the WWDX SSB Contest. They will receive their callsign upon arrival on the island on Oct 22.

JA, JAPAN
The special event station 8J2ARDF will be activated during the "All Japan ARDF Athletic Meet" from Oct 20 until Nov 25. QSL via bureau.

The special event station 8J3IPA celebrates the 50th anniversary of the Japanese IPA section until Dec 31. They are working in CW/SSB/RTTY on HF and 6m. 8J3IPA will join the IPA Contest as multi/multi.
QSL via bureau.

ON, BELGIUM
The special event station ON44CLM remembers the liberation of Knokke until Nov 15. QSL via ON3AIM.

P2, PAPUA NEW GUINEA
Axel,DL6KVA, Hans-Peter,HB9BXE, Eddy,K5WQG, Derek,G3KHZ (P29NI), and Hans,SM6CVX (P29VCX), are planning an IOTA DXpedition:
Oct 20-24 Emirau Island (OC-103) as P29VCX
Oct 27-31 Simberi Island (OC-099) as P29NI

Nov 2-4 Lihir Island (OC-069) Call unknown
The team is flying home on Nov 6 without Hans who plans to activate
two other island groups as well:
Nov 6-9 Buka Island (OC-135) as P29VCX
Nov 9-12 Manu Island (OC-025) as P29VCX
See also: http://p29ni.yolasite.com

P4, ARUBA, SA-036
Helmut,DF7ZS, plans to join the Worked All Germany Contest (WAG) on
Oct 20/21 as P40Z. He will work on 17m and 12m before and after the WAG
QSL via homecall. See also: http://www.df7zs.de

SU, EGYPT
The Egyptian Radio Amateur Society for Development (ERASD) and the
Arab Scout Region will join the JOTA Contest with the special callsign
SU55J from Oct 18-22. They are planning many amatuer radio activities
and an interesting touristic program in Kairo plus a surprise.
QSL fuer SU55J via SM5AQD, unfortunately only direct.
See: http://www.facebook.com/events/522556857770399/?context=create

UK, UZBEKISTAN
Takhir,UK/UA1ZEY, is working on HF from Samarkand until Nov 1.
QSL via homecall, unfortunately only direct.

V3, BELIZE
Rich,N0HJZ, will be QRV as V31MW from Placencia in the Stan Creek
district from Oct 21-30. He will work in CW on the WARC bands before
and after the WWDX SSB Contest (SOABHP).
QSL via homecall, direct preferred, but via bureau is ok as well.

VQ9, CAHGOS ARCHIPELAGO, AF-006
Jim,VQ9JC, will use another special prefix callsign VQ92JC from Oct 20
until Nov 4. He will be QRV as much as possible between 1200-1600 UTC.
This is the 6th consecutive year that he has been issued a unique
prefix. The only drawback is that he is still operating Field Day style
from a recreational park running 100 watt from a FT-857 into a dipole
10m high. He will join the upcoming WWDX SSB Contest. He has made a lot
of calls and CQs over the last several months but only very few ops
have answered him due to the bad conditions. He is scheduled to return
to the US after that. QSL via ND9M.

XV, VIETNAM
Yasu,JL7XBN, is planning a 10m FM DXpedition from Oct 19-22. He will
sign XV29FM from Vung Tau in SSB, PSK, JT65A and RTTY on 20m/15m/10m.
QSLs to JA will be sent automatically, all others have to send their
cards only direct unfortunately including SAE + 1 IRC/2 USD or 2 EUR.
QSLs can be picked up also at the Ham-Fair 2013 in Tokyo.
QSLs via JG1DKJ (SSB), JL7XBN (digital modes).

YN, NICARAGUA
Jeff,N6GQ, will sign YN2AA from Grenada (Loc EK71au) working in all
modes on 160m-6m from Oct 23-29. He may try also 6m EME in JT65.

He plans to join the WWDX SSB Contest as SOAB/HP.
QSL via LoTW or direct via NN3W.

Z2, ZIMBABWE
Gert,ZS6AYU, will be QRV in holiday style signing Z21GF in CW on 40-10m from the Victoria Falls running 400 watts into a R7000 vertical from Oct 22-25. QSL via homecall.

ZD8, ASCENSION ISLAND, AF-003
Marko,N5ZO (ZD8O), will stay on Ascension Island from Oct 18-30 and plans to take part in the WWDX SSB Contest (SOAB). QSL via OH0XX.

JOTA: The Jamboree on the Air is an annual event in which half a million Scouts and Guides all over the world make contact with each other by means of amateur radio. The 55th edition will take place on Oct 20/21. Specific "contest-free frequencies" for 80m/40m/20m/15m/10m have been agreed with the organizers of the concurrent WAG Contest in order to avoid interference between the two events.
See also: http://www.scout.org/en/information_events/events/jota

OP wanted: There is still an operator wanted for a DXpedition to KH8 in March 2013. See also: http://n6mw.jimdo.com

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Oct 20/21 JARTS WW RTTY CONTEST
Oct 20/21 Worked ALL Germany Contest (WAG)
Oct 21 Asia Pacific Sprint Contest
Oct 21 ON Contest 2m
Oct 27/28 CQWW DX SSB Contest

IOTA compiled by Klaus, DL7UXG (e-mail: iota@...)

Island activities:
AF-014, CT3, Madeira Archipalego: Peter,CT9/DH4JQ, Marion,CT9/DF4UM, Marco,CT9/DJ5KW, Karlfried,CT9/DL1EK, and Leo,CT9/DK8VC, will be active from Santana, Ilha da Madeira (AF-014, DIP MA-001, PIP MD-001, DPRN FF-101, WFF CTFF-030, WLOTA 0053) between Oct 21 and Nov 2. This will include a Multi-Op entry in the WWDX SSB Contest using the call CR3L. QSLs via homecalls. QSL for CR3L via DJ6QT.

AF-024, S7, Inner Islands: Luca,I5IHE (S79LC), Danio,I5OYY (S79YY), and Simone,IK5RUN (S79UN), are going to hit the airwaves in holiday style from Praslin Island (WLOTA 2862, ARLHS SEY-006, LOC LI75vp) between Oct 20 and Nov 4. Activities will take place in CW, SSB and RTTY on 80m-10m. QSLs direct via homecalls. The log will be uploaded to LoTW

within six months. See also: http://www.ik5run.it/s79.html

AS-012, JA6, Amakusa archipelago (incl. Kami, Naga, Shimo...): Take,JA6CNH, and Yasuro,JF6XQJ, plan to work from Genkai Island from Oct 19-21.

AS-075, XX9, Macau group: Francisco,EA7FTR (XX9TFR), Eugene,EA5HPX (XX9TPX), Jose,EB5BBM (XX9TBM), and David,EB7DX (XX9TEX), will be QRV from the Pousada de Coloane Hotel on Coloane Island (LOC OL62SC) from Oct 18-29. They will work with two stations focusing on stations from NA and EU. Their preferred frequencies are:
CW: 1823, 3523, 7023, 10103, 14023, 18073, 21023, 24893, 28023 kHz
SSB: 1825, 3780, 7065/7160, 14145, 18145, 21295, 28495 kHz
RTTY: 7035, 10140, 18100, 21080, 24921, 28080 kHz
QSLs for all calls direct via EA7FTR. Log will be uploaded to LoTW.
See also: http://adxg.org/macau

EU-004, EA6, Balearic Islands: Adrian,AA5UK, is going to visit the island of Ibiza (DIE E-023, MIA MB-003, WLOTA 0958) from Oct 20-31 and plans to work holiday style as EA6/AA5UK in SSB, PSK31 and RTTY on 80m-10m. He plans to work much in RTTY since EA6 is very rare in this mode. Listen for him also in the WWDX SSB. QSL via AA5UK (buro/direct/LoTW).

EU-010, GM/MM, Outer Hebrides: Steve,G0MTD, Paul,M1PAF, Mark,M0WCR, and Glyn,M0XUH, will be QRV as MS0WRC from South Uist (Outer Hebrides) only in SSB on the HF bands from Oct 20-27. QSL via G0MTD.
See also: http://www.mx0wrc.org/dxpeditions/south-uist-2012

EU-074, F, Bretagne (Cotes-d'Armor Centre) Region group: Samuel,F5UPO (CW), Luis,F5THW (PSK), Didier,F5IHZ (RTTY), and Juan,F5IRC (SSB and CW), will be QRV as TM5BRT from Brehat Island (Loc IN88lu, FFF-1194) from Oct 19-21. QSL via F5THW (bureau/direct).

NA-002, VP5, Caicos Islands: Frank,WA2VYA, Tony,K4QE, and Jack,N2VW, are handing out IOTA points from the Turks and Caicos Islands (Loc FL31vs) from Oct 23-30. They will join the WWDX SSB Contest as VP5T but will be active also as VP5/homecalls before and after the contest.
QSL for VP5T via N2VW (bureau/direct).
QSL routes for the individual calls can be found on QRZ.com.

NA-021, 8P, Barbados: Peter,W0SA, plans to live on Barbados for some time and wants to activate his calls 8P9NX and 8P0P on the HF bands starting from Oct 23. QSLs via W3HNK (d).

NA-063, CY0, Sable Island: Murray,WA4DAN/CY0, and Ron,AA4VK/CY0, are working from Sable Island (CIsA NS004/WFF CYFF-001/WLOTA 0758) from Oct 22-31. They are working with low power and simple antennas on all bands with focus on 10m, 12m and 15m. QSLs via homecalls (d). An OQRS can be found on their website: http://www.cy0dxpedition.com

NA-103, VP2M, Montserrat: George,K2DM (VP2MDG), Dave,G3NKC (VP2MKC), Martin,G4XUM (VP2MXU), and Stewart,GM4AFF (VP2MAF), will be QRV from Gingerbread Hill, St. Peters Parish, Montserrat (WLOTA 1475/Loc FK86vs)

from Oct 23-30. They will sign VP2MDG during the WWDX SSB Contest.
They will be active in all modes on all HF bands before and after the contest. QSL for VP2MKC and VP2MXU via G3NKC (bureau/direct).
All other QSLs via homecalls (bureau/direct).

NA-112, W4, North Carolina State West (Brunswick to Carteret County) group: Wayne,K9YNF, is planning his 5th IOTA DXpedition to Bogue Banks (Emerald Isle, USi NC010S) from Oct 21-26. Listen for Wayne as K9YNF/4 on following frequencies: SSB 14260 and 18128 kHz; PSK31 14070.15 kHz and 7035 kHz. QSL via K9YNF (bureau/direct).

OC-045, KH8, Tutuila Island: Anci,KH8/JA2ZL, plans to show up from Pago Pago on Tutuila (USi AS007S/WLOTA 4385) from Oct 23-29. He will be QRV using his TS-480HX and Hex-Beam in SSB/CW/RTTY on 80m-10m. QSL via JA2ZL.

OC-047, H44, Solomon Islands: Bernhard,DL2GAC, is working again as H44MS only in SSB on 80m-6m from Guadalcanal (WLOTA 0086, Loc RI00aj) between Oct 17 and Dec 10. QSL via DL2GAC (bureau/direct).

OC-086, KH0, Northern Mariana Islands: Kit,JA1NVF, Kowata,JF7ELG, Miho,JJ2VLY, and Yutaka,JQ2GYU, will be QRV as NH0J from Tinian Island (USi NI003S, WLOTA 3108, Grid Loc QK25) from Oct 18-22. They plan to work in CW/SSB and maybe also RTTY/PSK on 80m-6m.
They may also use their individual US calls: AH0J (QSL via JA1NVF), WA2O/KH0 (QSL via JF7ELG), WS2M/KH0 (QSL via JJ2VLY) and WS2Y/KH0 (QSL via JQ2GYU). QSLs for NH0J via JJ2VLY (bureau/direct).

Another DXpedition to the Mariana Islands is leading Matt,AH0/K0BBC, and Ron,AH0/N0AT, to Saipan (USi NI002S, WLOTA 1333) from Oct 23-30. They also plan to join the WWDX SSB. QSLs via homecalls.

OC-151, YB9, Tenggara Timur Islands (incl. Alor and Solor Isl, Flores, Komodo, Sawu, Sumba, etc.): Leo,YC9MLL, is living on Flores Island for 8 years and operates mostly in SSB, but also in CW if requested. He is usually on Saturdays and Sundays, but states that he is on vacation now and you can send him an e-mail (yc9mll@...) for skeds in CW, SSB, PSK31, RTTY and SSTV on 40m/20m/15m/10m. He has a homebrew radio with 50-100 watts into a dipole and delta loop antenna. QSL via YC9MLL.

OC-160, VK4, Queensland State (South Coast) North group: Aki,JA1NLX/VK4, is working from Hamilton Island (Whitsunday Islands archipelago) in CW and SSB on 40m-10m from Oct 18-23.
QSL via homecall (d/L/B). An OQRS will be available for bureau cards.
See also: http://www.ne.jp/asahi/ja1nlx/ham/VK4_2012.html

NON IOTA: The W/VE-QSO-Party will take place on Oct 20/21 and this contest is a good chance to work several islands in the US and Canada usually. DX stations may call as well and hand out some points.
Here is a list of a few announced activities:
W9PVR Coumbe Island (USi WI049)
AB5WB Galveston (USi TX001S)
NM5RC from several islands:

```
              Sand Stone (USi NM023L), Red Rock (USi NM024L),
              Comanche (USi NM025L), Puerco (USi NM026L),
              Cerrito (USi NM027L)
    N3SW/p    Holden Beach (USi NC008S)
    WA3EOP/p  Delmarva Island (USi DE015S)
    KB5IQJ/p  Goose (USi TX003S)
    WC5C      Greer Island (USi TX058L)  or
              Bolivar Peninsula Island (USi TX063S)
              Galveston Island (USi TX001S, NA-143),
              Pelican Island (USi TX008S, NA-143)
              QSL via WC5C (d)
    N1QLL    Great Wass (USi ME004S)
    VE3GJ/p  Henley (ON-007)

WFF: DLFF: DQ125HSB and DK0WFF will be QRV from the national park Harz
    (DLFF-006) on 2m, 70cm and 23cm on Oct 21. QSLs via bureau.
    OZFF: The clubstation OZ8ERA will activate Nakkehovedkilen (OZFF-037)
    on Oct 20. As a bonus they will be QRV also from the lighthouses
    Nakkehoved-Vest (DEN-027) and Nakkehoved-0stre (DEN-028).

 DXNL 1802 - Oct 17, 2012
                      DX Newsletter

5X, UGANDA
    Nick,G3RWF, who was expected to be active as 5X1NH from Uganda this
    week has postponed his trip without any reason given.

6W, SENEGAL
    Vladimir,RK4FF, announced to be QRV again as 6V7S from the rental shack
    Le Calao from Oct 22 until Nov 3. No information about a participation
    in the WWDX SSB Contest (Oct 27/28). QSL via homecall.
    See also: http://www.le-calao.com/A/residence_A.htm

9J, ZAMBIA
    Gert,ZS6AYU, will be active as 9J2GR working holiday style from the
    lodge "Mama Out of Africa" at the Zambezi river near Livingstone.
    Activities will be in CW on 40m-10m running 100 watts into a R7000
    vertical from Oct 19-22. His next destination will be Zimbabwe.
    QSL via homecall.
    See also: http://www.safarinow.com/go/MamaOutofAfrica

9M2, WESTERN MALAYSIA
    Mirek,VK6DXI, will be QRV as 9M8DX/2 from Kuala Lumpur during his
    spare time between Oct 15 and Nov 3. QSL via SP5UAF (B).

CP, BOLIVIA
    Peter,DF7NX, has travelled from Peru to Bolivia and wants to show up
    on the bands as CP8/DF7NX starting on Oct 19. QSL via homecall.

EA9, CEUTA
    Mek,EA9/SP7VC, will be QRV from Ceuta in holiday style from Oct 22-28.
    Operation will be on 160m-10m in SSB, including the CQWW SSB Contest as
    Single Op/All Band/High Power. Equipment consists of: IC-746, HEX beam
    by SP7IDX, R7000 vertical, Inv L for 160m and 80m, K9AY for receiving.

QSL via homecall, unfortunately only direct or LoTW.

EI, IRELAND, EU-115
Olivier,ON4EI, will once again be QRV as EI8GQB and EI1A from Oct 21-30 using 100 % green energy from a wind/solar hybrid system at his Caravan He will join the WWDX SSB Contest as EI1A in the SO2R category. More information is available at QRZ.com. QSL via homecall.

FO, FRENCH POLYNESIA
Alains,F4GYP, trip to the South Pacific as FO/F4GYP is scheduled from Oct 19 until Nov 6 as follows:
Tahiti (OC-046, DIFO FO-002, WLOTA 0885)
Mehetia (OC-046, DIFO FO-009),
Moorea (OC-046, DIFO FO-010, WLOTA 0465)
Raiatea (OC-067, DIFO FO-012, WLOTA 1977) (maybe Oct 27/28)
He will use the special callsign TX4FO from Ilot Motu Nono (OC-046, Loc BH52ig) near Tahiti. Alain works in SSB on 40m, 20m and maybe 10m. QSL via homecall.

FY, FRENCH GUYANA
Rich,N6KT (ex HC8N), will activate the special event callsign TO2A from Kourou from Oct 20-30. He also plans to join the WWDX SSB Contest. QSL via KU9C.

G, ENGLAND, EU-005
The Bishop Auckland Radio Amateurs Club (G4TTF, FISTS #6471) will be QRV with some scouts using the special callsign GB1FDS during the JOTA weekend (Oct 20/21). QSL via bureau or direct to G0GFG.

GU, GUERNSEY, EU-114
Members of the Guernsey Amateur Radio Society and the Bailiwick of Guernsey RAYNET group plan to activate the special event station GB2JTA on all bands from Vale on Guernsey (EU-114, WLOTA 0013, Loc IN89rl) during the 55th Jamboree On The Air. QSL via bureau.

HA, HUNGARY
The HA-IPA-team celebrates the 20th anniversary of the Hungarian IPA section by activating the special callsign HG20IPA in CW, SSB and digital modes on 160m-6m until Nov 30. They plan to take part in the upcoming IPA Radio Club Contest as well. All QSOs also count for the HA IPARC award. QSL via HA3JB. See also: http://www.ha3jb.com

J3, GRENADA, NA-024
Terry,KS5Z, s planning a one week stay on Grenada with Harry,AC8G, for the WWDX SSB Contest. They will receive their callsign upon arrival on the island on Oct 22.

JA, JAPAN
The special event station 8J2ARDF will be activated during the "All Japan ARDF Athletic Meet" from Oct 20 until Nov 25. QSL via bureau.

The special event station 8J3IPA celebrates the 50th anniversary of the

Japanese IPA section until Dec 31. They are working in CW/SSB/RTTY on
HF and 6m. 8J3IPA will join the IPA Contest as multi/multi.
QSL via bureau.

ON, BELGIUM
The special event station ON44CLM remembers the liberation of Knokke
until Nov 15. QSL via ON3AIM.

P2, PAPUA NEW GUINEA
Axel,DL6KVA, Hans-Peter,HB9BXE, Eddy,K5WQG, Derek,G3KHZ (P29NI), and
Hans,SM6CVX (P29VCX), are planning an IOTA DXpedition:
  Oct 20-24 Emirau Island (OC-103) as P29VCX
  Oct 27-31 Simberi Island (OC-099) as P29NI
  Nov 2-4   Lihir Island (OC-069)   Call unknown
The team is flying home on Nov 6 without Hans who plans to activate
two other island groups as well:
  Nov 6-9   Buka Island (OC-135) as P29VCX
  Nov 9-12 Manu Island (OC-025) as P29VCX
See also: http://p29ni.yolasite.com

P4, ARUBA, SA-036
Helmut,DF7ZS, plans to join the Worked All Germany Contest (WAG) on
Oct 20/21 as P40Z. He will work on 17m and 12m before and after the WAG
QSL via homecall. See also: http://www.df7zs.de

SU, EGYPT
The Egyptian Radio Amateur Society for Development (ERASD) and the
Arab Scout Region will join the JOTA Contest with the special callsign
SU55J from Oct 18-22. They are planning many amatuer radio activities
and an interesting touristic program in Kairo plus a surprise.
QSL fuer SU55J via SM5AQD, unfortunately only direct.
See: http://www.facebook.com/events/522556857770399/?context=create

UK, UZBEKISTAN
Takhir,UK/UA1ZEY, is working on HF from Samarkand until Nov 1.
QSL via homecall, unfortunately only direct.

V3, BELIZE
Rich,N0HJZ, will be QRV as V31MW from Placencia in the Stan Creek
district from Oct 21-30. He will work in CW on the WARC bands before
and after the WWDX SSB Contest (SOABHP).
QSL via homecall, direct preferred, but via bureau is ok as well.

VQ9, CAHGOS ARCHIPELAGO, AF-006
Jim,VQ9JC, will use another special prefix callsign VQ92JC from Oct 20
until Nov 4. He will be QRV as much as possible between 1200-1600 UTC.
This is the 6th consecutive year that he has been issued a unique
prefix. The only drawback is that he is still operating Field Day style
from a recreational park running 100 watt from a FT-857 into a dipole
10m high. He will join the upcoming WWDX SSB Contest. He has made a lot
of calls and CQs over the last several months but only very few ops
have answered him due to the bad conditions. He is scheduled to return

to the US after that. QSL via ND9M.

XV, VIETNAM
Yasu,JL7XBN, is planning a 10m FM DXpedition from Oct 19-22. He will sign XV29FM from Vung Tau in SSB, PSK, JT65A and RTTY on 20m/15m/10m. QSLs to JA will be sent automatically, all others have to send their cards only direct unfortunately including SAE + 1 IRC/2 USD or 2 EUR. QSLs can be picked up also at the Ham-Fair 2013 in Tokyo.
QSLs via JG1DKJ (SSB), JL7XBN (digital modes).

YN, NICARAGUA
Jeff,N6GQ, will sign YN2AA from Grenada (Loc EK71au) working in all modes on 160m-6m from Oct 23-29. He may try also 6m EME in JT65.
He plans to join the WWDX SSB Contest as SOAB/HP.
QSL via LoTW or direct via NN3W.

Z2, ZIMBABWE
Gert,ZS6AYU, will be QRV in holiday style signing Z21GF in CW on 40-10m from the Victoria Falls running 400 watts into a R7000 vertical from Oct 22-25. QSL via homecall.

ZD8, ASCENSION ISLAND, AF-003
Marko,N5ZO (ZD8O), will stay on Ascension Island from Oct 18-30 and plans to take part in the WWDX SSB Contest (SOAB). QSL via OH0XX.

JOTA: The Jamboree on the Air is an annual event in which half a million Scouts and Guides all over the world make contact with each other by means of amateur radio. The 55th edition will take place on Oct 20/21. Specific "contest-free frequencies" for 80m/40m/20m/15m/10m have been agreed with the organizers of the concurrent WAG Contest in order to avoid interference between the two events.
See also: http://www.scout.org/en/information_events/events/jota

OP wanted: There is still an operator wanted for a DXpedition to KH8 in March 2013. See also: http://n6mw.jimdo.com

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Oct 20/21 JARTS WW RTTY CONTEST
Oct 20/21 Worked ALL Germany Contest (WAG)
Oct 21 Asia Pacific Sprint Contest
Oct 21 ON Contest 2m
Oct 27/28 CQWW DX SSB Contest

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:

AF-014, CT3, Madeira Archipalego: Peter,CT9/DH4JQ, Marion,CT9/DF4UM, Marco,CT9/DJ5KW, Karlfried,CT9/DL1EK, and Leo,CT9/DK8VC, will be active from Santana, Ilha da Madeira (AF-014, DIP MA-001, PIP MD-001, DPRN FF-101, WFF CTFF-030, WLOTA 0053) between Oct 21 and Nov 2. This will include a Multi-Op entry in the WWDX SSB Contest using the call CR3L. QSLs via homecalls. QSL for CR3L via DJ6QT.

AF-024, S7, Inner Islands: Luca,I5IHE (S79LC), Danio,I5OYY (S79YY), and Simone,IK5RUN (S79UN), are going to hit the airwaves in holiday style from Praslin Island (WLOTA 2862, ARLHS SEY-006, LOC LI75vp) between Oct 20 and Nov 4. Activities will take place in CW, SSB and RTTY on 80m-10m. QSLs direct via homecalls. The log will be uploaded to LoTW within six months. See also: http://www.ik5run.it/s79.html

AS-012, JA6, Amakusa archipelago (incl. Kami, Naga, Shimo...): Take,JA6CNH, and Yasuro,JF6XQJ, plan to work from Genkai Island from Oct 19-21.

AS-075, XX9, Macau group: Francisco,EA7FTR (XX9TFR), Eugene,EA5HPX (XX9TPX), Jose,EB5BBM (XX9TBM), and David,EB7DX (XX9TEX), will be QRV from the Pousada de Coloane Hotel on Coloane Island (LOC OL62SC) from Oct 18-29. They will work with two stations focusing on stations from NA and EU. Their preferred frequencies are:
CW: 1823, 3523, 7023, 10103, 14023, 18073, 21023, 24893, 28023 kHz
SSB: 1825, 3780, 7065/7160, 14145, 18145, 21295, 28495 kHz
RTTY: 7035, 10140, 18100, 21080, 24921, 28080 kHz
QSLs for all calls direct via EA7FTR. Log will be uploaded to LoTW.
See also: http://adxg.org/macau

EU-004, EA6, Balearic Islands: Adrian,AA5UK, is going to visit the island of Ibiza (DIE E-023, MIA MB-003, WLOTA 0958) from Oct 20-31 and plans to work holiday style as EA6/AA5UK in SSB, PSK31 and RTTY on 80m-10m. He plans to work much in RTTY since EA6 is very rare in this mode. Listen for him also in the WWDX SSB. QSL via AA5UK (buro/direct/LoTW).

EU-010, GM/MM, Outer Hebrides: Steve,G0MTD, Paul,M1PAF, Mark,M0WCR, and Glyn,M0XUH, will be QRV as MS0WRC from South Uist (Outer Hebrides) only in SSB on the HF bands from Oct 20-27. QSL via G0MTD.
See also: http://www.mx0wrc.org/dxpeditions/south-uist-2012

EU-074, F, Bretagne (Cotes-d'Armor Centre) Region group: Samuel,F5UPO (CW), Luis,F5THW (PSK), Didier,F5IHZ (RTTY), and Juan,F5IRC (SSB and CW), will be QRV as TM5BRT from Brehat Island (Loc IN88lu, FFF-1194) from Oct 19-21. QSL via F5THW (bureau/direct).

NA-002, VP5, Caicos Islands: Frank,WA2VYA, Tony,K4QE, and Jack,N2VW, are handing out IOTA points from the Turks and Caicos Islands (Loc FL31vs) from Oct 23-30. They will join the WWDX SSB Contest as VP5T but will be active also as VP5/homecalls before and after the contest.
QSL for VP5T via N2VW (bureau/direct).
QSL routes for the individual calls can be found on QRZ.com.

NA-021, 8P, Barbados: Peter,W0SA, plans to live on Barbados for some time
and wants to activate his calls 8P9NX and 8P0P on the HF bands
starting from Oct 23. QSLs via W3HNK (d).

NA-063, CY0, Sable Island: Murray,WA4DAN/CY0, and Ron,AA4VK/CY0, are working
from Sable Island (CIsA NS004/WFF CYFF-001/WLOTA 0758) from Oct 22-31.
They are working with low power and simple antennas on all bands with
focus on 10m, 12m and 15m. QSLs via homecalls (d). An OQRS can be found
on their website: http://www.cy0dxpedition.com

NA-103, VP2M, Montserrat: George,K2DM (VP2MDG), Dave,G3NKC (VP2MKC),
Martin,G4XUM (VP2MXU), and Stewart,GM4AFF (VP2MAF), will be QRV from
Gingerbread Hill, St. Peters Parish, Montserrat (WLOTA 1475/Loc FK86vs)
from Oct 23-30. They will sign VP2MDG during the WWDX SSB Contest.
They will be active in all modes on all HF bands before and after the
contest. QSL for VP2MKC and VP2MXU via G3NKC (bureau/direct).
All other QSLs via homecalls (bureau/direct).

NA-112, W4, North Carolina State West (Brunswick to Carteret County) group:
Wayne,K9YNF, is planning his 5th IOTA DXpedition to Bogue Banks
(Emerald Isle, USi NC010S) from Oct 21-26. Listen for Wayne as K9YNF/4
on following frequencies: SSB 14260 and 18128 kHz; PSK31 14070.15 kHz
and 7035 kHz. QSL via K9YNF (bureau/direct).

OC-045, KH8, Tutuila Island: Anci,KH8/JA2ZL, plans to show up from Pago Pago
on Tutuila (USi AS007S/WLOTA 4385) from Oct 23-29. He will be QRV using
his TS-480HX and Hex-Beam in SSB/CW/RTTY on 80m-10m. QSL via JA2ZL.

OC-047, H44, Solomon Islands: Bernhard,DL2GAC, is working again as H44MS
only in SSB on 80m-6m from Guadalcanal (WLOTA 0086, Loc RI00aj) between
Oct 17 and Dec 10. QSL via DL2GAC (bureau/direct).

OC-086, KH0, Northern Mariana Islands: Kit,JA1NVF, Kowata,JF7ELG,
Miho,JJ2VLY, and Yutaka,JQ2GYU, will be QRV as NH0J from Tinian Island
(USi NI003S, WLOTA 3108, Grid Loc QK25) from Oct 18-22. They plan to
work in CW/SSB and maybe also RTTY/PSK on 80m-6m.
They may also use their individual US calls: AH0J (QSL via JA1NVF),
WA2O/KH0 (QSL via JF7ELG), WS2M/KH0 (QSL via JJ2VLY) and
WS2Y/KH0 (QSL via JQ2GYU). QSLs for NH0J via JJ2VLY (bureau/direct).

Another DXpedition to the Mariana Islands is leading Matt,AH0/K0BBC,
and Ron,AH0/N0AT, to Saipan (USi NI002S, WLOTA 1333) from Oct 23-30.
They also plan to join the WWDX SSB. QSLs via homecalls.

OC-151, YB9, Tenggara Timur Islands (incl. Alor and Solor Isl, Flores,
Komodo, Sawu, Sumba, etc.): Leo,YC9MLL, is living on Flores Island for
8 years and operates mostly in SSB, but also in CW if requested. He is
usually on Saturdays and Sundays, but states that he is on vacation now
and you can send him an e-mail (yc9mll@gmail.com) for skeds in CW, SSB,
PSK31, RTTY and SSTV on 40m/20m/15m/10m. He has a homebrew radio with
50-100 watts into a dipole and delta loop antenna. QSL via YC9MLL.

OC-160, VK4, Queensland State (South Coast) North group: Aki,JA1NLX/VK4, is
working from Hamilton Island (Whitsunday Islands archipelago) in CW and
SSB on 40m-10m from Oct 18-23.
QSL via homecall (d/L/B). An OQRS will be available for bureau cards.
See also: http://www.ne.jp/asahi/ja1nlx/ham/VK4_2012.html

NON IOTA: The W/VE-QSO-Party will take place on Oct 20/21 and this contest
is a good chance to work several islands in the US and Canada usually.
DX stations may call as well and hand out some points.
Here is a list of a few announced activities:
W9PVR Coumbe Island (USi WI049)
AB5WB Galveston (USi TX001S)
NM5RC from several islands:
Sand Stone (USi NM023L), Red Rock (USi NM024L),
Comanche (USi NM025L), Puerco (USi NM026L),
Cerrito (USi NM027L)
N3SW/p Holden Beach (USi NC008S)
WA3EOP/p Delmarva Island (USi DE015S)
KB5IQJ/p Goose (USi TX003S)
WC5C Greer Island (USi TX058L) or
Bolivar Peninsula Island (USi TX063S)
Galveston Island (USi TX001S, NA-143),
Pelican Island (USi TX008S, NA-143)
QSL via WC5C (d)
N1QLL Great Wass (USi ME004S)
VE3GJ/p Henley (ON-007)

WFF: DLFF: DQ125HSB and DK0WFF will be QRV from the national park Harz
(DLFF-006) on 2m, 70cm and 23cm on Oct 21. QSLs via bureau.
OZFF: The clubstation OZ8ERA will activate Nakkehovedkilen (OZFF-037)
on Oct 20. As a bonus they will be QRV also from the lighthouses
Nakkehoved-Vest (DEN-027) and Nakkehoved-0stre (DEN-028).

http://www.cordell.org/HD/HD_pages/HD_News.html

15 October 2012 PROJECT DESCRIPTION and TEAM UPDATES

We have posted updates of the Project Description (version 5.2) and the TEAM.

We are pleased to welcome Steve Chamberlian VK6IR and William (Wild Bill) Beyer N2WB to the radio team. We also welcome several other persons to the offsite team, including Yasuo "Zorro" Miyazawa JH1AJT, Tommy Horozakis VK2IR, and Christopher Wells N9LXR. Wells is implementing a real-time interactive video capability for the Clipperton Expedition (see below), ands will do the samer for Heard Island.

We are also pleased to welcome Dr. Robert Pitman, NOAA Southwest Fisheries Science Center in La Jolla, California. Pitman is a world expert on killer whales. Killer whales are arguably one of the most recognizable, and best-studied, large animals on earth, yet basic questions about how many species there are and how they function within the ecosystem remain unanswered. Pitman has assembled evidence for the existence of a new species of killer whale in Antarctic waters, in the area that the Heard Island expedition will be travelling.Pitman will be on the Heard Island cruise to search confirm the proposed new whale species. Confirming new species in Antarctic waters would highlight the fact that our knowledge of marine biodiversity is perhaps even more rudimentary than currently recognized.

Please note the connection between the 2014 Heard Island Project and the 2013 Clipperton Expedition (www.cordell.org/CI). Some of the same team members will be implementing some of the same science projects on Clipperton that we expect to carry out at Heard Island. While being a major expedition on its own, Clipperton is also a development and test project for Heard Island. Because of this close relationship, we hope that sponsors will support both projects.

15 September 2012 SPONSORSHIP

We have posted a document describing opportunities for sponsorship of the Heard Island 2014 expedition. The document (updated to version 1.3) gives an overview of the project, and particularly addresses the question: "Why go to Heard Island?" It describes the central role of networking with people and organizations worldwide, particularly in real-time. In addition, it shows how this project may be the World's First Open-Source Expedition. This term means that the entire project is open for public inspection, interaction, and contributions. The logo for the open-source expeditioni is shown at left.
The document also describes the audience for the project, the target market, and the various opportunities for sponsorship, including product and services exposure, integrated advertising, engagement identification, and marketing via souvenirs. This document will be of interest to anyone in a position to help the expedition by obtaining sponsors, and for individuals who wish to understand the project in more detail.

15 August 2012 PROJECT DESCRIPTION and TEAM UPDATES

We have posted updates of the Project Description (version 5.0) and the TEAM.

You will see in the Project Description that we have developed a wide-ranging scientific program, including radio operations (the DXpedition), real-time communications, mountain science, biological science, atmospheric science, astronomical science, documentatioin, and educational outreach. We are proposing that the AAD collaborate on some of the research.

We have confirmation of the vessel Marion-Dufresne for the expedition, the same vessel we used for VK0IR in 1997. We will now be working with the AAD concerning the permit. We are interested in establishing a collaboration with any person or group that can fit into the research program (or extend it). The next NEWS update will be on Sept. 15. The next round of team members will be announced on October 15, but if you are interested in joining the team (on the island or offsite), we invite you to contact us anytime.

15 July 2012 PROJECT DESCRIPTION

We have posted two documents on this website:

1. The Preliminary Project Description (version 3.6) for the 2014 Heard Island Expedition. This document changes signficantly every few days. Please click on the link above for the latest version.

2. The book VK0IR Heard Island, by KK6EK. This is the complete original book about the 1997 DXpedition.

Currently we are elaborating the scientific program for the expediton and adding to the list of candidates for the team. We are pleased to have Jean-Michel Cousteau as Honorary Expedition Leader and Joe Taylor K1JT (Nobel physics) as Honorary DXpedition Leader. If you have interest in being involved in the project in any capacity, we would welcome your inquiry.

15 June 2012 INITIAL TEAM

We are pleased to announce the initial team for the 2014 expedition to Heard Island. At this time this list is incomplete; it will be augmented in the coming months. The next round of team members will be announced on August 15.15 May 2012 ANNOUNCEMENT

After 5 months of planning, Cordell Expeditions is pleased to announce an expedition to Heard Island, Territory of Australia, in early 2014.We have assembled a core team, arranged for the vessel, and are awaiting the landing permit and radio callsign. Initial team members, collaborating organizations, and other resources will be announced in the near future.

The expedition will be multi-disciplinary, with three major activities: Communications, Environmental Science, and Documentation. We will be active on all amateur radio bands and all modes, implement a variety of innovative real-time communications technologies, and field a variety of scientific projects that are designed to observe and document some of the unique resources on this extraordinary island. We will use the latest version of DXA (www.cordell.org/DXA) for real-time online presentation of log data, images, and video from Heard Island.

This project follows the very successful amateur radio expedition to Heard Island carried out by this group in 1997 using the callsign VKØIR. Details of that operation can be seen

at www.cordell.org/HI and in the book VKØIR Heard Island. The website for the 2014 DXpedition is www.cordell.org/HD or www.heardisland.org.

We invite your participation in this project, as a potential team member, supporter, collaborator, field scientist, or as a callsign in our radio log. If you have a particular interest in Heard Island or have a project you would like to propose, we invite you to contact us.

For information, please contact the Expedition Leader, Dr. Robert Schmieder (KK6EK) schmieder (at) cordell.org.

http://www.scout.org/en/information_events/events/jota/the_55th_jota_2012

The 55th JOTA 2012
The 55th Jamboree On The Air will take place on 20 and 21 October 2012.
This year's theme is: How big is your world?.

All about JOTA and how to join in

Find out all about WOSM's largest world-wide event.

See also......
==> Latest News
==> 55th JOTA programme details

What is Jamboree-on-the-Air (JOTA)?

The JOTA is an annual event in which Scouts and Guides all over the world speak to each other by means of amateur radio contacts. Scouting experiences are exchanged and ideas are shared, via the radio waves.

Read more...

How to take part?

Contact a local amateur radio operator;
Invite him to set up his radio station in your Scout Hall;
Call "CQ Jamboree" on the Scout Frequencies;
Answer any Scout station that replies to your call.

Yes, it's that simple....

Read more...

Rules of the game

There are some basic rules that should be followed:
All radio operators must operate their stations strictly in accordance with their national licensing regulations;
Stations should call "CQ Jamboree" or answer scout stations calling to establish a contact;
Any authorized frequency may be used. It is recommended that stations use the agreed World Scout Frequencies
The JOTA is not a contest. The idea is not to contact as many stations as possible during the weekend. · All participating groups are asked to send a report of their activities to their National JOTA Organizer (NJO) after the event.
NJO's are requested to send a National JOTA Report to the World Scout Bureau, for inclusion in the World JOTA Report.

Call signs of Scout stations

Each licensed amateur radio station has a registration number, a call sign. The first one or two letters are specific to a country. Here are a few call signs of well-known Scout station that can often be contacted:

Read more...

Make a sked !

Do you want to be sure you will meet with your friends during the JOTA?

Make a pre-arranged sked on the radio. Here's how.

Read more...

How to avoid contest interference?

During the JOTA weekend there is unfortunately one contest (amateur radio competition). It is an exception to the agreement that there will be no contests during the JOTA weekend. However, an agreement has been reached with the organizers of this German WAG contest on the use of amateur radio frequencies during the JOTA in such a way that it allows both events to operate in parallel. This worked satisfactorily last year, so we would like to continue it for this years' JOTA as well.

Read more...

National JOTA Organization

Each Scout Association is requested to appoint a National JOTA Organizer (NJO). This NJO can co-ordinate the JOTA participation of Scouts in his country. He or she can also serve as the point of contact for JOTA information. The NJO will be able to bring Scouts into contact with radio amateurs and vice versa.

Read more...

World JOTA Organization

The World Scout Bureau's JOTA Organizer provides the following annual information:

OM Zen,
Belum ada perasaan hati yg akan dicurahkan, walopun berjam2 kemarin panggil Rodriguez 3B9SP gagal melulu padahal signalnya kuat saya terima.
Kalo gak salah dengar OM Zen berhasil ya.

Sementara juga disambil nyoba bikin interface yang VOX, tapi belum berhasil "mentrigger" PTTnya, sempat sebentar berhasil - tapi terus gak bisa lagi.

Kemungkinan bad connection/solder karna mata sudah kuras awas lagi, atau jack audio yg gak bagus.
Utk jack audio yg female, nemunya cuma yang utk langsung pasang di PCB seperti parts SMD dengan kwalitas sangat kacangan.
Kemarin sih monitor OM Gun - YB1LZ di PSK31 cqing.

 DXNL 1802 - Oct 17, 2012
                     DX Newsletter

5X, UGANDA
    Nick,G3RWF, who was expected to be active as 5X1NH from Uganda this
    week has postponed his trip without any reason given.

6W, SENEGAL
    Vladimir,RK4FF, announced to be QRV again as 6V7S from the rental shack
    Le Calao from Oct 22 until Nov 3. No information about a participation
    in the WWDX SSB Contest (Oct 27/28). QSL via homecall.

See also: http://www.le-calao.com/A/residence_A.htm

9J, ZAMBIA
Gert,ZS6AYU, will be active as 9J2GR working holiday style from the lodge "Mama Out of Africa" at the Zambezi river near Livingstone. Activities will be in CW on 40m-10m running 100 watts into a R7000 vertical from Oct 19-22. His next destination will be Zimbabwe. QSL via homecall.
See also: http://www.safarinow.com/go/MamaOutofAfrica

9M2, WESTERN MALAYSIA
Mirek,VK6DXI, will be QRV as 9M8DX/2 from Kuala Lumpur during his spare time between Oct 15 and Nov 3. QSL via SP5UAF (B).

CP, BOLIVIA
Peter,DF7NX, has travelled from Peru to Bolivia and wants to show up on the bands as CP8/DF7NX starting on Oct 19. QSL via homecall.

EA9, CEUTA
Mek,EA9/SP7VC, will be QRV from Ceuta in holiday style from Oct 22-28. Operation will be on 160m-10m in SSB, including the CQWW SSB Contest as Single Op/All Band/High Power. Equipment consists of: IC-746, HEX beam by SP7IDX, R7000 vertical, Inv L for 160m and 80m, K9AY for receiving. QSL via homecall, unfortunately only direct or LoTW.

EI, IRELAND, EU-115
Olivier,ON4EI, will once again be QRV as EI8GQB and EI1A from Oct 21-30 using 100 % green energy from a wind/solar hybrid system at his Caravan He will join the WWDX SSB Contest as EI1A in the SO2R category. More information is available at QRZ.com. QSL via homecall.

FO, FRENCH POLYNESIA
Alains,F4GYP, trip to the South Pacific as FO/F4GYP is scheduled from Oct 19 until Nov 6 as follows:
  Tahiti (OC-046, DIFO FO-002, WLOTA 0885)
  Mehetia (OC-046, DIFO FO-009),
  Moorea (OC-046, DIFO FO-010, WLOTA 0465)
  Raiatea (OC-067, DIFO FO-012, WLOTA 1977) (maybe Oct 27/28)
He will use the special callsign TX4FO from Ilot Motu Nono (OC-046, Loc BH52ig) near Tahiti. Alain works in SSB on 40m, 20m and maybe 10m. QSL via homecall.

FY, FRENCH GUYANA
Rich,N6KT (ex HC8N), will activate the special event callsign TO2A from Kourou from Oct 20-30. He also plans to join the WWDX SSB Contest. QSL via KU9C.

G, ENGLAND, EU-005
The Bishop Auckland Radio Amateurs Club (G4TTF, FISTS #6471) will be QRV with some scouts using the special callsign GB1FDS during the JOTA weekend (Oct 20/21). QSL via bureau or direct to G0GFG.

GU, GUERNSEY, EU-114
Members of the Guernsey Amateur Radio Society and the Bailiwick of Guernsey RAYNET group plan to activate the special event station GB2JTA on all bands from Vale on Guernsey (EU-114, WLOTA 0013, Loc IN89rl) during the 55th Jamboree On The Air. QSL via bureau.

HA, HUNGARY
The HA-IPA-team celebrates the 20th anniversary of the Hungarian IPA section by activating the special callsign HG20IPA in CW, SSB and digital modes on 160m-6m until Nov 30. They plan to take part in the upcoming IPA Radio Club Contest as well. All QSOs also count for the HA IPARC award. QSL via HA3JB. See also: http://www.ha3jb.com

J3, GRENADA, NA-024
Terry,KS5Z, s planning a one week stay on Grenada with Harry,AC8G, for the WWDX SSB Contest. They will receive their callsign upon arrival on the island on Oct 22.

JA, JAPAN
The special event station 8J2ARDF will be activated during the "All Japan ARDF Athletic Meet" from Oct 20 until Nov 25. QSL via bureau.

The special event station 8J3IPA celebrates the 50th anniversary of the Japanese IPA section until Dec 31. They are working in CW/SSB/RTTY on HF and 6m. 8J3IPA will join the IPA Contest as multi/multi.
QSL via bureau.

ON, BELGIUM
The special event station ON44CLM remembers the liberation of Knokke until Nov 15. QSL via ON3AIM.

P2, PAPUA NEW GUINEA
Axel,DL6KVA, Hans-Peter,HB9BXE, Eddy,K5WQG, Derek,G3KHZ (P29NI), and Hans,SM6CVX (P29VCX), are planning an IOTA DXpedition:
Oct 20-24 Emirau Island (OC-103) as P29VCX
Oct 27-31 Simberi Island (OC-099) as P29NI
Nov 2-4 Lihir Island (OC-069) Call unknown
The team is flying home on Nov 6 without Hans who plans to activate two other island groups as well:
Nov 6-9 Buka Island (OC-135) as P29VCX
Nov 9-12 Manu Island (OC-025) as P29VCX
See also: http://p29ni.yolasite.com

P4, ARUBA, SA-036
Helmut,DF7ZS, plans to join the Worked All Germany Contest (WAG) on Oct 20/21 as P40Z. He will work on 17m and 12m before and after the WAG QSL via homecall. See also: http://www.df7zs.de

SU, EGYPT
The Egyptian Radio Amateur Society for Development (ERASD) and the Arab Scout Region will join the JOTA Contest with the special callsign SU55J from Oct 18-22. They are planning many amatuer radio activities and an interesting touristic program in Kairo plus a surprise.

QSL fuer SU55J via SM5AQD, unfortunately only direct.
See: http://www.facebook.com/events/522556857770399/?context=create

UK, UZBEKISTAN
Takhir,UK/UA1ZEY, is working on HF from Samarkand until Nov 1.
QSL via homecall, unfortunately only direct.

V3, BELIZE
Rich,N0HJZ, will be QRV as V31MW from Placencia in the Stan Creek district from Oct 21-30. He will work in CW on the WARC bands before and after the WWDX SSB Contest (SOABHP).
QSL via homecall, direct preferred, but via bureau is ok as well.

VQ9, CAHGOS ARCHIPELAGO, AF-006
Jim,VQ9JC, will use another special prefix callsign VQ92JC from Oct 20 until Nov 4. He will be QRV as much as possible between 1200-1600 UTC. This is the 6th consecutive year that he has been issued a unique prefix. The only drawback is that he is still operating Field Day style from a recreational park running 100 watt from a FT-857 into a dipole 10m high. He will join the upcoming WWDX SSB Contest. He has made a lot of calls and CQs over the last several months but only very few ops have answered him due to the bad conditions. He is scheduled to return to the US after that. QSL via ND9M.

XV, VIETNAM
Yasu,JL7XBN, is planning a 10m FM DXpedition from Oct 19-22. He will sign XV29FM from Vung Tau in SSB, PSK, JT65A and RTTY on 20m/15m/10m. QSLs to JA will be sent automatically, all others have to send their cards only direct unfortunately including SAE + 1 IRC/2 USD or 2 EUR. QSLs can be picked up also at the Ham-Fair 2013 in Tokyo.
QSLs via JG1DKJ (SSB), JL7XBN (digital modes).

YN, NICARAGUA
Jeff,N6GQ, will sign YN2AA from Grenada (Loc EK71au) working in all modes on 160m-6m from Oct 23-29. He may try also 6m EME in JT65.
He plans to join the WWDX SSB Contest as SOAB/HP.
QSL via LoTW or direct via NN3W.

Z2, ZIMBABWE
Gert,ZS6AYU, will be QRV in holiday style signing Z21GF in CW on 40-10m from the Victoria Falls running 400 watts into a R7000 vertical from Oct 22-25. QSL via homecall.

ZD8, ASCENSION ISLAND, AF-003
Marko,N5ZO (ZD8O), will stay on Ascension Island from Oct 18-30 and plans to take part in the WWDX SSB Contest (SOAB). QSL via OH0XX.

JOTA: The Jamboree on the Air is an annual event in which half a million Scouts and Guides all over the world make contact with each other by means of amateur radio. The 55th edition will take place on Oct 20/21. Specific "contest-free frequencies" for 80m/40m/20m/15m/10m have been agreed with the organizers of the concurrent WAG Contest in order to

avoid interference between the two events.
See also: http://www.scout.org/en/information_events/events/jota

OP wanted: There is still an operator wanted for a DXpedition to KH8 in
March 2013. See also: http://n6mw.jimdo.com

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Oct 20/21 JARTS WW RTTY CONTEST
Oct 20/21 Worked ALL Germany Contest (WAG)
Oct 21   Asia Pacific Sprint Contest
Oct 21   ON Contest 2m
Oct 27/28 CQWW DX SSB Contest

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AF-014, CT3, Madeira Archipalego: Peter,CT9/DH4JQ, Marion,CT9/DF4UM,
Marco,CT9/DJ5KW, Karlfried,CT9/DL1EK, and Leo,CT9/DK8VC, will be active
from Santana, Ilha da Madeira (AF-014, DIP MA-001, PIP MD-001, DPRN
FF-101, WFF CTFF-030, WLOTA 0053) between Oct 21 and Nov 2. This will
include a Multi-Op entry in the WWDX SSB Contest using the call CR3L.
QSLs via homecalls. QSL for CR3L via DJ6QT.

AF-024, S7, Inner Islands: Luca,I5IHE (S79LC), Danio,I5OYY (S79YY), and
Simone,IK5RUN (S79UN), are going to hit the airwaves in holiday style
from Praslin Island (WLOTA 2862, ARLHS SEY-006, LOC LI75vp) between
Oct 20 and Nov 4. Activities will take place in CW, SSB and RTTY on
80m-10m. QSLs direct via homecalls. The log will be uploaded to LoTW
within six months. See also: http://www.ik5run.it/s79.html

AS-012, JA6, Amakusa archipelago (incl. Kami, Naga, Shimo...): Take,JA6CNH,
and Yasuro,JF6XQJ, plan to work from Genkai Island from Oct 19-21.

AS-075, XX9, Macau group: Francisco,EA7FTR (XX9TFR), Eugene,EA5HPX (XX9TPX),
Jose,EB5BBM (XX9TBM), and David,EB7DX (XX9TEX), will be QRV from the
Pousada de Coloane Hotel on Coloane Island (LOC OL62SC) from Oct 18-29.
They will work with two stations focusing on stations from NA and EU.
Their preferred frequencies are:
CW: 1823, 3523, 7023, 10103, 14023, 18073, 21023, 24893, 28023 kHz
SSB: 1825, 3780, 7065/7160, 14145, 18145, 21295, 28495 kHz
RTTY: 7035, 10140, 18100, 21080, 24921, 28080 kHz
QSLs for all calls direct via EA7FTR. Log will be uploaded to LoTW.
See also: http://adxg.org/macau

EU-004, EA6, Balearic Islands: Adrian,AA5UK, is going to visit the island of
Ibiza (DIE E-023, MIA MB-003, WLOTA 0958) from Oct 20-31 and plans to
work holiday style as EA6/AA5UK in SSB, PSK31 and RTTY on 80m-10m.
He plans to work much in RTTY since EA6 is very rare in this mode.
Listen for him also in the WWDX SSB. QSL via AA5UK (buro/direct/LoTW).

EU-010, GM/MM, Outer Hebrides: Steve,G0MTD, Paul,M1PAF, Mark,M0WCR, and
Glyn,M0XUH, will be QRV as MS0WRC from South Uist (Outer Hebrides)
only in SSB on the HF bands from Oct 20-27. QSL via G0MTD.
See also: http://www.mx0wrc.org/dxpeditions/south-uist-2012

EU-074, F, Bretagne (Cotes-d'Armor Centre) Region group: Samuel,F5UPO (CW),
Luis,F5THW (PSK), Didier,F5IHZ (RTTY), and Juan,F5IRC (SSB and CW),
will be QRV as TM5BRT from Brehat Island (Loc IN88lu, FFF-1194) from
Oct 19-21. QSL via F5THW (bureau/direct).

NA-002, VP5, Caicos Islands: Frank,WA2VYA, Tony,K4QE, and Jack,N2VW, are
handing out IOTA points from the Turks and Caicos Islands (Loc FL31vs)
from Oct 23-30. They will join the WWDX SSB Contest as VP5T but will
be active also as VP5/homecalls before and after the contest.
QSL for VP5T via N2VW (bureau/direct).
QSL routes for the individual calls can be found on QRZ.com.

NA-021, 8P, Barbados: Peter,W0SA, plans to live on Barbados for some time
and wants to activate his calls 8P9NX and 8P0P on the HF bands
starting from Oct 23. QSLs via W3HNK (d).

NA-063, CY0, Sable Island: Murray,WA4DAN/CY0, and Ron,AA4VK/CY0, are working
from Sable Island (CIsA NS004/WFF CYFF-001/WLOTA 0758) from Oct 22-31.
They are working with low power and simple antennas on all bands with
focus on 10m, 12m and 15m. QSLs via homecalls (d). An OQRS can be found
on their website: http://www.cy0dxpedition.com

NA-103, VP2M, Montserrat: George,K2DM (VP2MDG), Dave,G3NKC (VP2MKC),
Martin,G4XUM (VP2MXU), and Stewart,GM4AFF (VP2MAF), will be QRV from
Gingerbread Hill, St. Peters Parish, Montserrat (WLOTA 1475/Loc FK86vs)
from Oct 23-30. They will sign VP2MDG during the WWDX SSB Contest.
They will be active in all modes on all HF bands before and after the
contest. QSL for VP2MKC and VP2MXU via G3NKC (bureau/direct).
All other QSLs via homecalls (bureau/direct).

NA-112, W4, North Carolina State West (Brunswick to Carteret County) group:
Wayne,K9YNF, is planning his 5th IOTA DXpedition to Bogue Banks
(Emerald Isle, USi NC010S) from Oct 21-26. Listen for Wayne as K9YNF/4
on following frequencies: SSB 14260 and 18128 kHz; PSK31 14070.15 kHz
and 7035 kHz. QSL via K9YNF (bureau/direct).

OC-045, KH8, Tutuila Island: Anci,KH8/JA2ZL, plans to show up from Pago Pago
on Tutuila (USi AS007S/WLOTA 4385) from Oct 23-29. He will be QRV using
his TS-480HX and Hex-Beam in SSB/CW/RTTY on 80m-10m. QSL via JA2ZL.

OC-047, H44, Solomon Islands: Bernhard,DL2GAC, is working again as H44MS
only in SSB on 80m-6m from Guadalcanal (WLOTA 0086, Loc RI00aj) between

Oct 17 and Dec 10. QSL via DL2GAC (bureau/direct).

OC-086, KH0, Northern Mariana Islands: Kit,JA1NVF, Kowata,JF7ELG,
Miho,JJ2VLY, and Yutaka,JQ2GYU, will be QRV as NH0J from Tinian Island
(USi NI003S, WLOTA 3108, Grid Loc QK25) from Oct 18-22. They plan to
work in CW/SSB and maybe also RTTY/PSK on 80m-6m.
They may also use their individual US calls: AH0J (QSL via JA1NVF),
WA2O/KH0 (QSL via JF7ELG), WS2M/KH0 (QSL via JJ2VLY) and
WS2Y/KH0 (QSL via JQ2GYU). QSLs for NH0J via JJ2VLY (bureau/direct).

Another DXpedition to the Mariana Islands is leading Matt,AH0/K0BBC,
and Ron,AH0/N0AT, to Saipan (USi NI002S, WLOTA 1333) from Oct 23-30.
They also plan to join the WWDX SSB. QSLs via homecalls.

OC-151, YB9, Tenggara Timur Islands (incl. Alor and Solor Isl, Flores,
Komodo, Sawu, Sumba, etc.): Leo,YC9MLL, is living on Flores Island for
8 years and operates mostly in SSB, but also in CW if requested. He is
usually on Saturdays and Sundays, but states that he is on vacation now
and you can send him an e-mail (yc9mll@...) for skeds in CW, SSB,
PSK31, RTTY and SSTV on 40m/20m/15m/10m. He has a homebrew radio with
50-100 watts into a dipole and delta loop antenna. QSL via YC9MLL.

OC-160, VK4, Queensland State (South Coast) North group: Aki,JA1NLX/VK4, is
working from Hamilton Island (Whitsunday Islands archipelago) in CW and
SSB on 40m-10m from Oct 18-23.
QSL via homecall (d/L/B). An OQRS will be available for bureau cards.
See also: http://www.ne.jp/asahi/ja1nlx/ham/VK4_2012.html

NON IOTA: The W/VE-QSO-Party will take place on Oct 20/21 and this contest
is a good chance to work several islands in the US and Canada usually.
DX stations may call as well and hand out some points.
Here is a list of a few announced activities:
W9PVR Coumbe Island (USi WI049)
AB5WB Galveston (USi TX001S)
NM5RC from several islands:
Sand Stone (USi NM023L), Red Rock (USi NM024L),
Comanche (USi NM025L), Puerco (USi NM026L),
Cerrito (USi NM027L)
N3SW/p Holden Beach (USi NC008S)
WA3EOP/p Delmarva Island (USi DE015S)
KB5IQJ/p Goose (USi TX003S)
WC5C Greer Island (USi TX058L) or
Bolivar Peninsula Island (USi TX063S)
Galveston Island (USi TX001S, NA-143),
Pelican Island (USi TX008S, NA-143)
QSL via WC5C (d)
N1QLL Great Wass (USi ME004S)
VE3GJ/p Henley (ON-007)

WFF: DLFF: DQ125HSB and DK0WFF will be QRV from the national park Harz
(DLFF-006) on 2m, 70cm and 23cm on Oct 21. QSLs via bureau.

OZFF: The clubstation OZ8ERA will activate Nakkehovedkilen (OZFF-037)
on Oct 20. As a bonus they will be QRV also from the lighthouses
Nakkehoved-Vest (DEN-027) and Nakkehoved-0stre (DEN-028).

> Olivier,ON4EI, will once again be QRV as EI8GQB and EI1A from Oct 21-30
> using 100 % green energy from a wind/solar hybrid system at his Caravan
> He will join the WWDX SSB Contest as EI1A in the SO2R category.
> More information is available at QRZ.com <http://qrz.com/>. QSL via
> homecall.
>
> FO, FRENCH POLYNESIA
> Alains,F4GYP, trip to the South Pacific as FO/F4GYP is scheduled from
> Oct 19 until Nov 6 as follows:

> Tahiti (OC-046, DIFO FO-002, WLOTA 0885)
> Mehetia (OC-046, DIFO FO-009),
> Moorea (OC-046, DIFO FO-010, WLOTA 0465)
> Raiatea (OC-067, DIFO FO-012, WLOTA 1977) (maybe Oct 27/28)
> He will use the special callsign TX4FO from Ilot Motu Nono (OC-046,
> Loc BH52ig) near Tahiti. Alain works in SSB on 40m, 20m and maybe 10m.
> QSL via homecall.
>
> FY, FRENCH GUYANA
> Rich,N6KT (ex HC8N), will activate the special event callsign TO2A from
> Kourou from Oct 20-30. He also plans to join the WWDX SSB Contest.
> QSL via KU9C.
>
> G, ENGLAND, EU-005
> The Bishop Auckland Radio Amateurs Club (G4TTF, FISTS #6471) will be
> QRV with some scouts using the special callsign GB1FDS during the
> JOTA weekend (Oct 20/21). QSL via bureau or direct to G0GFG.
>
> GU, GUERNSEY, EU-114
> Members of the Guernsey Amateur Radio Society and the Bailiwick of
> Guernsey RAYNET group plan to activate the special event station GB2JTA
> on all bands from Vale on Guernsey (EU-114, WLOTA 0013, Loc IN89rl)
> during the 55th Jamboree On The Air. QSL via bureau.
>
> HA, HUNGARY
> The HA-IPA-team celebrates the 20th anniversary of the Hungarian IPA
> section by activating the special callsign HG20IPA in CW, SSB and
> digital modes on 160m-6m until Nov 30. They plan to take part in the
> upcoming IPA Radio Club Contest as well. All QSOs also count for the
> HA IPARC award. QSL via HA3JB. See also: http://www.ha3jb.com
>
> J3, GRENADA, NA-024
> Terry,KS5Z, s planning a one week stay on Grenada with Harry,AC8G, for
> the WWDX SSB Contest. They will receive their callsign upon arrival on
> the island on Oct 22.
>
> JA, JAPAN
> The special event station 8J2ARDF will be activated during the "All
> Japan ARDF Athletic Meet" from Oct 20 until Nov 25. QSL via bureau.
> ---
> The special event station 8J3IPA celebrates the 50th anniversary of the
> Japanese IPA section until Dec 31. They are working in CW/SSB/RTTY on
> HF and 6m. 8J3IPA will join the IPA Contest as multi/multi.
> QSL via bureau.
>
> ON, BELGIUM
> The special event station ON44CLM remembers the liberation of Knokke
> until Nov 15. QSL via ON3AIM.
>
> P2, PAPUA NEW GUINEA

> Axel,DL6KVA, Hans-Peter,HB9BXE, Eddy,K5WQG, Derek,G3KHZ (P29NI), and
> Hans,SM6CVX (P29VCX), are planning an IOTA DXpedition:
> Oct 20-24 Emirau Island (OC-103) as P29VCX
> Oct 27-31 Simberi Island (OC-099) as P29NI
> Nov 2-4 Lihir Island (OC-069) Call unknown
> The team is flying home on Nov 6 without Hans who plans to activate
> two other island groups as well:
> Nov 6-9 Buka Island (OC-135) as P29VCX
> Nov 9-12 Manu Island (OC-025) as P29VCX
> See also: http://p29ni.yolasite.com
>
> P4, ARUBA, SA-036
> Helmut,DF7ZS, plans to join the Worked All Germany Contest (WAG) on
> Oct 20/21 as P40Z. He will work on 17m and 12m before and after the WAG
> QSL via homecall. See also: http://www.df7zs.de
>
> SU, EGYPT
> The Egyptian Radio Amateur Society for Development (ERASD) and the
> Arab Scout Region will join the JOTA Contest with the special callsign
> SU55J from Oct 18-22. They are planning many amatuer radio activities
> and an interesting touristic program in Kairo plus a surprise.
> QSL fuer SU55J via SM5AQD, unfortunately only direct.
> See: http://www.facebook.com/events/522256857770399/?context=create
>
> UK, UZBEKISTAN
> Takhir,UK/UA1ZEY, is working on HF from Samarkand until Nov 1.
> QSL via homecall, unfortunately only direct.
>
> V3, BELIZE
> Rich,N0HJZ, will be QRV as V31MW from Placencia in the Stan Creek
> district from Oct 21-30. He will work in CW on the WARC bands before
> and after the WWDX SSB Contest (SOABHP).
> QSL via homecall, direct preferred, but via bureau is ok as well.
>
> VQ9, CAHGOS ARCHIPELAGO, AF-006
> Jim,VQ9JC, will use another special prefix callsign VQ92JC from Oct 20
> until Nov 4. He will be QRV as much as possible between 1200-1600 UTC.
> This is the 6th consecutive year that he has been issued a unique
> prefix. The only drawback is that he is still operating Field Day style
> from a recreational park running 100 watt from a FT-857 into a dipole
> 10m high. He will join the upcoming WWDX SSB Contest. He has made a lot
> of calls and CQs over the last several months but only very few ops
> have answered him due to the bad conditions. He is scheduled to return
> to the US after that. QSL via ND9M.
>
> XV, VIETNAM
> Yasu,JL7XBN, is planning a 10m FM DXpedition from Oct 19-22. He will
> sign XV29FM from Vung Tau in SSB, PSK, JT65A and RTTY on 20m/15m/10m.
> QSLs to JA will be sent automatically, all others have to send their
> cards only direct unfortunately including SAE + 1 IRC/2 USD or 2 EUR.

> QSLs can be picked up also at the Ham-Fair 2013 in Tokyo.
> QSLs via JG1DKJ (SSB), JL7XBN (digital modes).
>
> YN, NICARAGUA
> Jeff,N6GQ, will sign YN2AA from Grenada (Loc EK71au) working in all
> modes on 160m-6m from Oct 23-29. He may try also 6m EME in JT65.
> He plans to join the WWDX SSB Contest as SOAB/HP.
> QSL via LoTW or direct via NN3W.
>
> Z2, ZIMBABWE
> Gert,ZS6AYU, will be QRV in holiday style signing Z21GF in CW on 40-10m
> from the Victoria Falls running 400 watts into a R7000 vertical from
> Oct 22-25. QSL via homecall.
>
> ZD8, ASCENSION ISLAND, AF-003
> Marko,N5ZO (ZD8O), will stay on Ascension Island from Oct 18-30 and
> plans to take part in the WWDX SSB Contest (SOAB). QSL via OH0XX.
>
> JOTA: The Jamboree on the Air is an annual event in which half a million
> Scouts and Guides all over the world make contact with each other by
> means of amateur radio. The 55th edition will take place on Oct 20/21.
> Specific "contest-free frequencies" for 80m/40m/20m/15m/10m have been
> agreed with the organizers of the concurrent WAG Contest in order to
> avoid interference between the two events.

OM Zen,
Beberapa hari yanglalu pileup apa ya ?
Saya gagal trus, tapi masih sempat dengar YB0MZI/4 dipanggil - worked.

Bukan 5R8UI,
Madagascar 5R8UI ini, saya sudah confirmed yg 10M, nunggu yang 15M (worked) tinggal QSL cardnya.

Masih ada khan ?

Tadi waktu saya masuk di 15M utk 3B9SP, sudah set di 21.295MHz (RX) dan 21.300MHz (TX) - tapi lupa pencet tombol split - jadilah ditegur.
Alhamdulillah berhasil juga, penasaran aja kalo masih blm berhasil karena signal dia S9 +10dB, lihat di VOACAP warnanya merah bata banget, = Harus berhasil, HI.

Macau - XX9LT di 10M - tadi saya panggil dapat sih, truz lagi QSO sama saya sepertinya ada masalah & sempat hilang sebentar, mungkin karna manggil callsign saya YB0QR.
Setelah saya ulang, baru kemudian setelah hilang muncul lagi mengkoreksi callsign saya dan QRX betulin sesuatunya yg bermasalah.
Sebelumnya saya sudah wkd dengan XX9LQ di tahun 2011 tapi gak ada balasan QSL card.

Tadi kita panen raya juga dengan Rodriguez 3B9SP, yg sempat saya monitor YB0MZI/4, YB2DX, YB1LJY, YB1UUN, YC6JRT, YB6ZAB, YB6NE, YB0COU, YC6NAY - sapa lagi ya.., lupa.

Antenna 10M yang mana ya, saya pake 4 element deltaloop utk 10M, dan 4 element Yagi utk 15M - keduanya mounted on one boom.
Kalo yang ini spasinya ngatur berulang2 karna cari yang sesuai dg rumus/teori dan bisa balance beratnya dan gak tabrakan antar element Dloop/Yagi dan bracket mast to boom nya.

Oh, yang 3 element Yagi - itu khan arsip yg saya download dari internet yg punyanya amateur radio dari Greece - seingat saya juga saya post di YBDXC & FB antenna mania. cmiiw.

Space antara element : 0,2 lambda - kalo hitung kasarnya = 0,2 x 10M = 2M, tapi kalo rada akuratnya mungkin lambdanya yg dihitung dulu setelah kita tetapkan frekwensinya, misalnya 28,500MHz : 300 : 28,5 = 10,53M - jadi 0,2 lambdanya = 0,2 x 10,53M = 2,11M.

Oh, yang 3 element Yagi - itu khan arsip yg saya download dari internet yg punyanya amateur radio dari Greece - seingat saya juga saya post di YBDXC & FB antenna mania. cmiiw.

Space antara element : 0,2 lambda - kalo hitung kasarnya = 0,2 x 10M = 2M, tapi kalo rada akuratnya mungkin lambdanya yg dihitung dulu setelah kita tetapkan frekwensinya, misalnya 28,500MHz : 300 : 28,5 = 10,53M - jadi 0,2 lambdanya = 0,2 x 10,53M = 2,11M.

Macau - XX9LT di 10M - tadi saya panggil dapat sih, truz lagi QSO sama saya sepertinya ada masalah & sempat hilang sebentar, mungkin karna manggil callsign saya YB0QR.
Setelah saya ulang, baru kemudian setelah hilang muncul lagi mengkoreksi callsign saya dan QRX betulin sesuatunya yg bermasalah.
Sebelumnya saya sudah wkd dengan XX9LQ di tahun 2011 tapi gak ada balasan QSL card.

Tadi kita panen raya juga dengan Rodriguez 3B9SP, yg sempat saya monitor YB0MZI/4, YB2DX, YB1LJY, YB1UUN, YC6JRT, YB6ZAB, YB6NE, YB0COU, YC6NAY - sapa lagi ya.., lupa.

Antenna 10M yang mana ya, saya pake 4 element deltaloop utk 10M, dan 4 element Yagi utk 15M - keduanya mounted on one boom.
Kalo yang ini spasinya ngatur berulang2 karna cari yang sesuai dg rumus/teori dan bisa balance beratnya dan gak tabrakan antar element Dloop/Yagi dan
bracket mast to boom nya.

4094. QSLing.

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-10-18 02:04:15 UTC
From: hendro s.joedho
Topic: 4094 Message: 4094

QSLing adalah bagian dari DXing, tapi kita kudu waspada dan teliti juga sebelum melaksanakan QSLing setelah kita yakin memang sudah on log/worked.

Setelah kemarin2 berhasil kontak dengan 3D2MM, saya mencatat alamat untuk pengiriman QSL card yang tercatat di QRZ.com atas nama Mina De Yong dan QSL via Eddy De Yong (VK4AN). Sempat bingung juga, seingat saya kawan QSO waktu itu (3D2MM) OM bukan YL - tapi kopq namanya Mina dan diisi biografinya juga bilang dia YL. cmiiw.

Untungnya saya menunda QSLing dan setelah beberapa waktu kemudian lihat lagi di QRZ.com ternyata isinya sudah berubah.
3D2MM yang semula tertulis Mina De Yong dan QSL via VK4AN, berganti menjadi Miguel Zimermann (PY3MM) QSL via PY3MM. Lalu bagaimana nasib QSL card yg sudah terlanjur terkirim ke VK4AN ?
Rupanya dulu 3D2MM pernah digunakan Mina beberapa tahun yll dan ketika PY3MM ke Fiji menggunakan suffix sesuai dengan sufix callsign aslinya MM, tapi tidak langsung merevisi data di QRZ.com.

Pernah kejadian lain.
Saya kirim QSL card ke 3DA0NJ (Swaziland) alamat sesuai QRZ.com : Nico Copetzee - Panata Ranch, Ngogola, Swaziland.
Sempat ragu, koq alamat "ringkes" banget nih - ya mungkin ranch disana cuma satu, akhirnya saya kirimlah QSL ke ranch itu.

Waktu saya monitor QSL yg blm berbalas setelah sekian bulan, 3DA0NJ ternyata masih kosong dan saya chek lagi alamatnya di QRZ.com.
Ternyata sudah ganti menjadi Panata Ranch, P.O. Box 226, Manzini M200 - Swaziland.
Waduuhh..!!
Akhirnya saya tanya ke dia, ternyata memang dia gak terima dan (mungkin) banyak komplain dari DXer lain sehingga dia akhirnya menggunakan P.O. Box.
Saya diminta kirim ulang QSL card tanpa perlu melampirkan GS/IRC dan akhirnya sampai juga balasan dari dia. Alhamdulillah cuma rugi perangko.

ARLD043 DX news

ZCZC AE43
QST de W1AW
DX Bulletin 43 ARLD043
From ARRL Headquarters
Newington CT October 18, 2012
To all radio amateurs

SB DX ARL ARLD043
ARLD043 DX news

This week's bulletin was made possible with information provided by NC1L, W3UR, QRZ DX, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

ZAMBIA, 9J. Gert, ZS6AYU is QRV as 9J2GR from the Mama Out of Africa lodge at the Zambezi river near Livingstone until October 22. Activity is on 40 to 10 meters using CW. QSL to home call.

IRELAND, EI. Olivier, ON4EI will be QRV as EI8GQB from October 21 to 30. He will be active as EI1A in the upcoming CQ WW SSB DX contest as a Single Op/2 Radio entry. QSL via bureau to home call.

FRENCH GUYANA, FY. Rich, N6KT will be QRV using special event callsign TO2A from Kourou from October 20 to 30. This includes an entry in the upcoming CQ WW SSB DX contest. QSL via KU9C.

GUERNSEY, GU. Members of the Guernsey Amateur Radio Society and the Bailiwick of Guernsey RAYNET plan to be QRV with special event station GB2JTA from Vale during the Jamboree On The Air. QSL via bureau.

JAPAN, JA. Special event station 8J2ARDF will be QRV during the All Japan ARDF Athletic Meet from October 20 to November 25. QSL via bureau.

PAPUA NEW GUINEA, P2. Operators DL6KVA, HB9BXE, K5WQG, G3KHZ and SM6CVX will be QRV from various islands as part of an IOTA DXpedition from October 20 to November 12. They will be active as P29VCX from Emirau Island, IOTA OC-103, from October 20 to 24, and as P29NI from Simberi Island, IOTA OC-099, from October 27 to 31. Activity will be on the HF bands. QSL via operators' instructions.

ARUBA, P4. Helmut, DF7ZS plans to be active as P40Z in the Worked All Germany contest. Before and after the contest look for him on 17 and 12 meters. QSL to home call.

SEYCHELLES, S7. Operators I5IHE, I5OYY and IK5RUN will be QRV as S79LC, S79YY and S79UN, respectively, from Praslin Island, IOTA AF-024, from October 20 to November 4. Activity will be holiday style on 80 to 10 meters using CW, SSB and RTTY. QSL direct to home calls.

EGYPT, SU. Members of the Egyptian Radio Amateur Society for Development and the Arab Scout Region are QRV with special callsign SU55J until October 22. This includes being active in the Jamboree On The Air event. QSL direct via SM5AQD.

MONTSERRAT, VP2M. Operators K2DM, G3NKC, G4XUM and GM4AFF will be QRV as VP2MDG, VP2MKC, VP2MXU and VP2MAF, respectively, from Gingerbread Hill, St. Peters Parish from October 23 to 30. This includes being active as VP2MDG in the upcoming CQ WW SSB DX contest. Activity will be on all HF bands before and after the contest. QSL VP2MKC and VP2MXU via G3NKC and all others to home calls.

UZBEKISTAN, UK. Takhir, UK/UA1ZEY is QRV from Samarkand until November 1. Activity is on the HF bands. QSL direct to home call.

CHAGOS ISLAND, VQ9. Jim, ND9M will be QRV as VQ92JC from October 20 to November 4. He will be active Field Day style from 1200 to 1600z as much as possible. This includes an entry in the upcoming CQ WW SSB DX contest. QSL to home call.

VIET NAM, XV. Yasu, JL7XBN is QRV as XV29FM from Vung Tau until October 22. He is active on 20, 15 and 10 meters using SSB, RTTY, PSK and JT65A and FM on 10 meters. QSL direct to home call.

MACAO, XX9. Operators EA7FTR, EA5HPX, EB5BBM and EB7DX are QRV as XX9TFR, XX9TPX, XX9TBM and XX9TEX, respectively, from the Pousada de Coloane Hotel on Coloane Island until October 29. Activity is on 160 to 10 meters using CW, SSB and RTTY with two stations. QSL all calls direct via EA7FTR.

NICARAGUA, YN. Jeff, N6GQ will be QRV as YN2AA from Grenada from October 23 to 29. Activity will be on 160 to 6 meters using all modes. He may also try 6-Meter EME using JT65. This includes an entry in the upcoming CQ WW SSB DX contest as a Single Op/All Band/High Power entry. QSL direct via NN3W.

ZIMBABWE, Z2. Gert, ZS6AYU will be QRV as Z21GF from the Victoria Falls from October 22 to 25. Activity will be holiday style on 40 to 10 meters using CW. QSL to home call.

SOUTH SUDAN, Z8. Diya, Z81D is usually active using SSB on 40 to 10 meters at various times. QSL via OM3JW.

THIS WEEKEND ON THE RADIO. Stew Perry Topband CW Challenge, Scout Jamboree On The Air, Araucaria VHF Contest, JARTS World Wide RTTY Contest, 10-10 International Fall CW Contest, SYLRA Contest, New York QSO Party, Iowa QSO Party, Worked All Germany Contest, W/VE Islands QSO Party, Feld Hell Sprint, Asia-Pacific Fall CW Sprint, UBA ON 2-Meter Contest and the Illinois QSO Party are all on tap for this upcoming weekend. The Run for the Bacon QRP CW Contest is scheduled for October 22. The SKCC CW Sprint and CWops Mini-CWT Test are scheduled for October 24. Please see October QST, page 87 and the ARRL and WA7BNM Contest websites for details.

4098. Perangko naik lagi dari USA

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-10-19 16:44:52 UTC
From: Stephan Busono
Topic: 4098 Message: 4098

Rekan2 DXers,

Mulai 27 January 2013, perangko internasional dari USA naik lagi dari 1.05 ke 1.10, tapi juga akan dikeluarkan untuk pertama kalinya FOREVER International Stamp. Kalau kita sudah beli seharga 1.10 dan tahun depan perangko naik lagi ke luar negeri kita tetap bisa gunakan FOREVER stamp ini. Untuk domestik forever stamp sudah dikeluarkan bbrp thn yang lalu, malahan sudah tidak ada lagi perangko USA yang sekarang tertulis harga untuk first class domestik, semua tertulis FOREVER. Untuk yang lebih dari 1 oz harus tambah perangko masih disediakan berbagai rupa perangko tambahan 20c, 1c, 2,c, 5c, 10c dll.
Silahkan dibaca link di bawah ini.

Read and Weep - for those of you still dealing with Snail Mail QSL Cards
Postal Postal Rates going up AGAIN !
Jan 27, 2013
http://about.usps.com/news/national-releases/2012/pr12_114.htm
For those that need that QSL card bad - There will now be a Forever stamp for International First Class Postage - $1.10 for up to 1 Ounce

Memang LOTW menjadi semakin menarik,
tapi saya pribadi masih senang menerima QSL kertas dan berburu QSL kertas, walaupun sekarang
untuk DX QSL jatuhnya 1.10 plus QSL 10c, plus IRC or 2-3 USD sekitar 3.40 minumum-4.30 tergantung pakai IRC
atau pakai greenstamps. Untung ada buro dan walau agak lama biasanya sampai.

Sampai jumpa di udara,
73, Steve, W2FB

http://www.leoshoemaker.com/files/HEXBeam_by_K4KIO.pdf

HEX BEAM

Building the G3TXQ Broad Band Hexagonal Beam Six Steps to build it:

The electrical design of this hexagonal beam is the same as the beam featured in the March 2009 QST article by the author. However, the mechanical details here differ somewhat and are an improvement, in my opinion, over the mechanical design in the QST article. The guidelines here are for a six band hexagonal beam.

However, if only three bands are desired or five bands, the same specifications apply for the bands you want to equip. The cost for materials for this beam are around $300 retail and sources for some key parts are on line while most of the small parts are obtainable from Home Depot or Lowes.

The approach in this site is to explain five steps for building the components shown below and then Step 6 outlines how they are all assembled into a hex beam.

Step 1: The Base Plate

- The baseplate is made of a 12 inch square type 6061 T6 aluminum plate that is 3/16 inch thick.
This particular type aluminum is harder than pure aluminum and less likely to bend while being resistant to weather. U-bolts attach the spreaders to the baseplate.
- Two square base floor flanges normally used for handrails are used to mount the center post to the base plate. One is on the top for mounting the center post and the other is on the bottom for insertion of the mast. These flanges are made of aluminum-magnesium alloy.
- Stainless steel hardware can be used to minimize corrosion especially in saltwater environments although it is more expensive. Lock washers should be used; otherwise movement of the hex beam by wind and rotation will eventually work the fixtures loose.

Don't want to cut and drill and chase down all these parts? Get the plate already cut and drilled and all hardware tools for under $90. Your cost for parts and shipping will be close to this if you go ahead and built it yourself so why bother? See the details at www.hexkit.com

Six Steps to build it - The Base plate:

Measuring and marking the hexagon. Bellow more details on how to do this.

See more details:

The plate can be cut with a hacksaw by hand or by a reciprocating saw with a metal cutting blade. A piece of board and clamp are used to hold it all steady for cutting.

See more details:

A metal hole saw and a hand operated drill can be used to easily cut out the center hole. There is a rule in all building and repair projects. You will have to buy at least one new tool. This metal hole saw from Lowe's cost about 8 dollars and I'll probably never use it again.

The holes for the U bolts are carefully cut where the lines have been measured. If you have a drill press, the holes will be more accurately cut. If you look closely you can see some of mine are a little short of perfection.

The center post will fit snugly into this floor flange. Put one on the top and bottom of the base plate for greatest strength. Bellow why is better this tip:

Why two flanges is a good idea?

http://www.leoshoemaker.com/files/HEXBeam_by_K4KIO.pdf

HEX BEAM

Step 2: The Spreaders

• Fiber glass tubes are recommended for the spreaders. These can be purchased from Max Gain
Systems. Max Gain provides tips for attaching them together. Three thicknesses are needed 1" O.D., 3/4" O.D., and 1/2" O.D. The smaller sizes fit perfectly into the next larger size.
• While it is not necessary, you can spray paint on the spreaders to achieve the color you want.
• Some have tried to build spreaders using PVC but I have heard of no one who has done this successfully. PVC is simply too limber and does not have the "spring tension" needed to maintain the hexagonal beam shape. I recommend against its use for a hexagonal beam.

The thinner pieces slip easily into the next larger pieces for a telescoping structure that will be 136" long when assembled. Each section is 48" long. Note the two clamps that tighten the three sections together. You should assemble six such telescoping spreader arms.

One end of the large and the medium spreaders should be slit about an inch with a hack saw or a jig saw, if available, as shown so that later, when telescoped together the clamp can be slipped over the slits and tightened. An unslit end goes into a slit end.

If you don't mind a permanent arrangement, you can just glue the sections together with Liquid Nail and then you won't have to slit the sections and buy the hose clamps to clamp them together.

See more details:

Mark with tape or felt tip pen the initial locations for the wire clamps. These should be as set forth below. These are preliminary and approximate clamp locations.

See more details:

Slip the hose clamps and P clips on now for use in attaching the wires later at the places marked in the preceding photo.
Use the #8 Med clamps on the large section and #6 on the other two sections. Insert P clamps under them for slipping the wires through later. Tighten them only a little as you will be making adjustments later in the assembly stage.

See more details:

http://www.leoshoemaker.com/files/HEXBeam_by_K4KIO.pdf

HEX BEAM

Step 3: The Center post

- The center post is for mounting the terminals that connect the various bands' driver wires to the coax feed line. It is made of basic one inch PVC plumbing that is a perfect fit into the baseplate described in Step 1.
- The terminals are located on the center post and are European terminals. The terminals are connected with 50 ohm coax pieces from the bottom terminals to the top where they are connected to the feedline from the transceiver.
- All bands are connected together via the coax links and are all fed by a single feedline.
- The terminal spacing on the center post and the length of the post itself are set forth below along with steps for constructing the center post.

A vertical line to mark the holes for the European style terminals should be marked. The post should be 40 inches long and locations for the Euro terminal mounting holes should be marked as shown to the right.

These jumbo size European style terminal strips at Radio Shack can be easily cut into 6 double terminals to attach to the center post. The jumbo size is needed to accommodate the coax and the wires that must be inserted into the terminals. These can be obtained from other vendors such as Mouser

Drill a hole completely through the post for each terminal at the marks made in the first photo. You will be using a #6-32 X 2 brass or stainless steel bolt for each terminal. The bit size should be
9/64 inch. Install a double European terminal for each band at the marks.

See more details:

Here is schematically what you will be doing with the terminals on the center post. Only five bands are shown here but the sixth can be added below 10 meters. Be careful not to flip one of the coax pieces so as to put its shield on the side of the inner conductor of the others. It will cause big problems in performance.
Also, why not do a simple test for shorts when you get this finished? A piece of braid touching the inner conductor would be a headache to avoid with such a simple test.

See more details:

Cut coax pieces for connection between the center post driver terminals. If you are not going to be running more than 500 watts of transmitter power output, you can use RG 58 coax instead of RG 213 and it is much easier to work with.

Seal up the exposed coax braid with liquid tape or silicone sealant to keep moisture out. Apply it also to the metal of the terminals as the metal is steel and will rust if not

protected. Paint has been applied. The driver wires will be bent to an "L" shape on the ends and pushed down into the tops of the terminals. Add a 1/2 inch to each driver half wire in Step 4.The feed line will also be connect to the top terminal and looped down the side of the post to the bottom of the hex beam.

Here is how your coax connects to the top of the center post to feed all the bands. Of course, you need to seal it up with liquid tape or silicone to prevent moisture from entering the braid and contaminating it. The wires are shown installed here as well as the radial cords. Use an eyebolt through the cap on top to anchor all the radial cords.

http://www.leoshoemaker.com/files/HEXBeam_by_K4KIO.pdf

HEX BEAM

Step 4: The Wire Sets

- The driven element will consist of two pieces of wire for each band. The reflector will also consist of one piece of wire for each band. Each driven element piece will be shaped by the hex beam structure into an inverted "V" and when arranged next to the other piece, will form a "M." Each Reflector piece will be wrapped around the four spreaders and attached to the tip spacers which in turn are attached to the driver wires. Be precise with cutting the wires as an inch can make a difference in the resonant frequency of that band.
- Each outer half of the driver wires has a non-conducting line that connects that wire to one end of the reflector wire. These non-conducting lines will be called "tip spacers." The length of the spacers is important to proper performance of the hex beam and they are designed here so they can be adjusted precisely.
- The two ½ driver wires, the reflector wire and the two tip spacers should be measured and assembled as single end to end sets before installation on the spreaders using the approach below for each band.
- The higher frequency bands are nested inside the lower frequency bands but only one band is shown here for the sake of simplicity. The wire lengths are for #14 or #16 gauge bare wires. Insulated wire can be used in salt water environments and the lengths will be shorter. Tables for the lengths are on the next page.

For each band, make sections as shown here and then connect the pieces altogether for a single wire assembly that will look like the photo above when strung on the beam. Use the table on the Specifications page for the lengths to measure and cut as shown above. You will need one set of the elements above for each band on your hexbeam. The cords can be made of Kevlar which has very little stretch or Dacron. When finished, connect all the pieces together for a complete wire assembly.

Measure the half driver wire using the length found on the Specifications page. Include the ring terminal in the measurement and also add 1/2 inch for bending the other end into an "L" shape for insertion into the center post terminal. Repeat this for the other half driver wire for others meters.

Then measure out the reflector wire per the Specifications page and solder a ring terminal on each end. Include these ring terminals in the measurement. A good way to handle the measurement process is to use a nail in a board so you can anchor the wire while stretching it out on the floor or driveway.

Be very careful with the measurements. It is not fun to have to solder a piece back in that was mistakenly cut off. So remember the old carpenter's adage.

Measure once; cut twice or measure twice and cut once.
See more details:

Here is an assembled wire set with the reflector coiled in the middle and the two half reflector wires coiled on the ends. The cord knots to the wires are covered with heat shrink but the heat shrink is not really necessary

http://www.leoshoemaker.com/files/HEXBeam_by_K4KIO.pdf

HEX BEAM

Step 5: The Support Cords

Support cords from the center post to the ends of the spreaders along with two other cords between the ends and the middle of the two front spreaders establish and hold the shape of the hexagonal beam. When installed properly, very little tension is on the wires as these cords do the physical work.

Measure six radial cords 128 inches including the hooks. You can choose to use knots instead of crimps.

Measure one perimeter cord 128 inches to be used between the two front spreaders because they tend to be pulled apart by the wires and need this counter pull provided by a cord. Add another short cord about 90 inches between the same two spreaders located in toward the center. Don't use hooks on this short cord; use a cable tie on each end to wrap around the spreaders.

Here is how the support cords are connected to the end of the spreaders. Just hook down into the end and then secure the hook with a large cable tie. Measure out 7 cords of Kevlar/Dacron with little "S" hooks on the end. The cords should be 128 inches long, including the hooks. The Kevlar is very strong and will not stretch and the Dacron covering provides resistance to UV radiation. Use the crimps instead of knots. You will need an intermediate cord between the two front spreaders. Make this cord 90 inches long but don't use hooks; instead put a cable tie on each end that will be used to wrap around the spreader at about the 15 M band. You can use plain Dacron instead of Kevlar but it stretches more and you need to pull it a bit before measuring. Also, using knots instead of the crimps is fine.

Here is how the cords are arranged on the spreaders viewing from above.

When measuring the cords, remember that the cords, although relatively stretch-free, will stretch a couple inches under tension. So pull on them when measuring and before crimping them to end up with 128 inchesincluding hooks, when stretched.

There is about 7 pounds of force on the cords when installed on the beam

Here is how the support cords are connected to the end of the spreaders. Just hook down into the end and then secure the hook with a large cable tie. Note how the wire is anchored to the P clip with a small cable tie. This should be done on the back four spreaders and for 20 meters only, as the last step after all adjustments of wires and clamps have been completed.
Anchoring the wire in this manner will add stability to the overall structure in windy conditions. Plus it will keep the wires from "sawing" through the P clip.

http://www.leoshoemaker.com/files/HEXBeam_by_K4KIO.pdf

HEX BEAM

Step 6: Assembly

Now that you have built the components for your hexbeam, all that remains is to assemble them into a completed beam. Just follow these steps.

1. Set the base plate on a table, a 10 gallon paint bucket filled with water or rocks to serve as an assembly foundation.
Assemble the spreaders and insert them into the baseplate using the U bolts. All the P clips on the spreaders should be on the top side of the spreaders. Make sure each spreader is in line with the opposite spreader and if not, then loosen the U bolts and readjust. Do not over tighten the U bolts as you can easily crush the spreaders. If the spreaders are starting to flatten, you have tightened them too much.
2. Install the center post into the baseplate and tighten the two set screws snugly. Do not over tighten as they will penetrate the center post.
3. Install the support cords between each spreader end and the anchor eye bolt on top of the center post. The easiest way to do this is to hook one cord on the end of one spreader and another on the end of the opposite spreader. Then, standing in the middle, pull both cords up simultaneously and hook them on the center post eyehook. Repeat this process for another spreader pair and then another as shown here.
Fasten the cords to the ends of the spreaders as shown in step 5.

4. Install the wire sets starting at the highest frequency band. Attach one end to a terminal for that band and then fish the other end through each of the P clips on the spreaders. Then attach the other end to the second center post terminal. If the wire will not reach the terminal without excessive tension, then loosen the P clips for that band and let them slip inward about 1/2 inch each or until the wire reaches. Take small steps in this for better results. Do not have the wires over taut. This only distorts the shape of the beam and makes the remaining wires harder to adjust. Tautness does not improve beam performance at all. A little slack is better.
5. After installing all wire sets, make adjustments so that all wires have generally the same slack and the overall shape of the beam is balanced and symmetrical.
6. Connect the coax to the top of the center post to the 20 meter terminal. Use a small piece of coax at first in order to make SWR tests before going further. You should see an SWR dip for each band but the lowest SWR will not be achieved until the beam is raised 20-30 feet.

If you do not get a dip in SWR, make sure all connections of the wires are tight in the terminals including the coax links. When finished, be sure to seal the terminals and coax ends to keep moisture out as contaminated coax will not perform correctly on the beam.

73 and Good DX´s

FAQ's

1. Why should I be considering a broad band beam?
Because it performs better than the classic hex beam. And on top of that it is easier to build and easier to adjust. The only drawback is that it is slightly larger in diameter by less than three feet.

2. Are the wire lengths critical?
A. Well, if you change the wire length for the reflector on 10M by one inch, it changes the design frequency by about 130 kHz. Two inches would be about 260 kHz, and so on. You can do a simple ratio of frequencies to figure the change in wire lengths.

Change in wire length (+,-) = Change in frequency (-,+) X Orig. wire length / Original frequency
(Remember, increasing frequency requires decreasing wire length and vice versa.)
If you change the reflector lengths be sure and do the same for the driver wires.

3. How important are the tip spaces?
A. They affect the front/back performance and the SWR and are designed for the optimal balance of these two performance criteria. But if you are off an inch or even two, it isn't going to make a lot of difference.

4. What if I want to use a different gauge of wire than 16 gauges?
A. That is fine. Just use the Conversion Table on this page to scale the driver wire lengths shown here for your particular wire thickness. The reflector wire gauge is relatively immune to differences in wire thickness so just use the table amounts for 16 gauges. Also, leave the end spaces as they are shown here.

5. How high should the hex beam be?
A. Higher is better for DX generally as it reduces the takeoff angle of the main RF lobe. However, the hex beam can be quite effective even at modest heights. Some say 40 feet is optimal but really, if you can get it higher for DX, go for it. Try to get 20 feet at least.

6. What about use of steel wire or aluminum instead of copper?
A. You will need new dimensions based on conductivity of those materials. The dimensions here are strictly for copper.

7. What about stranded wire or solid wire?
A. Either is fine.

8. What about insulated wire?
A. It can be used and if it is the specific wire in the table here you already have the specs. But you can't depend on these specifications for all other insulated wire.

9. How important is spacing on the center post?
A. Post spacing is mainly determined by the geometry of your particular hex beam. Try to get your wires generally parallel, level with the ground, symmetrical, etc. Spacing can become a problem if they are too close. In particular, it has been found by some that if the 10 meter wires are too close to the 12 meter wires, the two bands can interact with each other. If you can't get the specified 4 inch spacing between 12 and 10 meters while keeping the 10 meter wires parallel, that's OK; just pull the wires down the post a bit; performance will be better.

10. Should I feed the hex beam at the top or the bottom?
A. Top feeding will provide better results overall.

11. Should I connect the bands with wire or coax?
A. Coax will provide better results. Use 50 ohm coax.

12. Do I need a balun?
A. It is a good idea because it prevents surface currents flowing on the exterior of the coax and thereby distorting the radiation pattern. The best price for a ferrite bead balun I have found is at www.palomar.com.

13. Can I substitute materials if those on the parts list aren't available?
A. Well, sure. Your substitutions might be better than mine. Just be sure you know the physical factors that are important and make judicious choices. There are only a few things truly critical about the details of a hex beam such as wire length, general shape, etc.

14. Where can I learn more about the hex beam theory?
A. Visit the web site of Steve, G3TXQ. (http://karinya.net/g3txq/hexbeam/)

15. Can I buy a broad band hexagonal beam?
A. Thought you'd never ask. Seriously, I am selling a multi-band hexagonal beam on another web site that is already built. You just assemble five modules when you get it and it works with no tuning. DX Engineering sells a kit of parts with illustrated instructions to build a broadband hexagonal beam. Is it as good as mine? Well, I'm sure it's a good product but be prepared to do more work than you would do with one purchased from me. You get over 200 parts and a 38 page manual.

HEX BEAM

By K4KIO (k4kio@...) - Page revision date 6/2010
By PU7IRR (rossijunior@...) - Word edition date 12/2010

This file provides guidelines to build a G3TXQ broad band hexagonal beam R.F. antenna for the six amateur radio bands, 20, 17, 15, 12, 10 and 6 meters. This antenna is featured in the March 2009 edition of QST magazine and is a significant improvement over the Hex-Beam design.

The hexagonal beam offers a number of features as follows:
- Gain and front/back comparable to a two element Yagi.
- Five bands with low SWR
- Broad band characteristics
- Low weight and low wind load
- Construction from general hardware components
- Ease of adjustment

If you have been to other sites on construction of the hexagonal beam you might be a bit confused. You see, some sites tell you how to build the “original” hexagonal beam which is patterned after the design of the HEX-BEAM, a trademarked product of Traffie Technologies. The wires for this original design for a single band look from above, like an “M” over a “W”.

For a more full understanding of the technical parameters of the G3TXQ broad band hexagonal beam, visit the web site of its inventor, Steve Hunt, G3TXQ.
(http://karinya.net/g3txq/hexbeam/)

If you feel you would rather not get into building your own G3TXQ broad band hexagonal beam, I can build one for you. See the Hexagonal Beam by K4KIO for sale details here.
(http://k4kio.com/)
This original design is a good antenna and owners of the HEX-BEAM are quite vocal about its performance as were builders of the homebrew version. I used to be one of the homebrew builders and was so enthusiastic that I published a set of guidelines like these to help others build one.

But, things have progressed a little and thanks to the exhaustive work of Steve Hunt, G3TXQ, a slightly different configuration of the hexagonal beam has been discovered. Viewed from above the wires for a single bander look like the sketch to the right.

Which one is better? Well, owners of the original HEX-BEAM are very loyal. But the only competitors in the market are selling only the new broad band hexagonal beam and home brewers are all building that version of the hexagonal beam instead of the original. And here is the reason why.

Overall Description

This is a G3TXQ broad band hexagonal beam for 6 - 20 meters. It is just less than 22 feet in diameter and is constructed of six fiberglass tubes and 14 or 16 gauge stranded copper wire. The center post is a five foot piece of fiberglass or PVC. The beam is fed at the top of the center post with 50 ohm coax and weighs about 25 pounds.

The hexagonal beam consists of two elements for each band. The driven element is in the shape of an "M" and the reflector element is wrapped around the four spreaders to the rear of the driver wires. The elements are made of wire instead of tubes used by most Yagi antennas Therefore there is a need for a supporting structure. The supporting structure consists of six flexible fiberglass tubes attached to a base. The tubes are as shown and thus the name hexagonal beam.

The antenna elements are held in place by the base/tube structure, the wires and Kevlar/Dacron cords. All bands of the antenna are fed by a single coax cable. To the right are sketches of how the G3TXQ broad band hexagonal beam is configured for a single band. A sketch of the wires of a five band hexagonal beam can be viewed here.

Freq. bands (M):	6, 10, 12,15,17,20
Weight:	25 lbs
Diameter:	22 ft
Wind Surface Area:	2.5 Sq Ft

The support structure for the hexagonal beam resembles an umbrella upside down. To the left, wires only for a five band hexagonal beam are shown. The wires for 20 meters are the outermost and 10 meters are the innermost. The gaps between the ends of wires are insulated end spacers which keep the tips of the driver wires and coupling. reflector wires at the specified distance from each other for proper

The driver wires are fed with a single coax from the top with each band's driver wires connected at different vertical positions on the center post (handle of the umbrella).The spokes of the hexagonal beam are flexible tubes that keep tension on the wires while supporting their weight.

Why the G3TXQ Broad Band Hexagonal Beam?

The classic hexagonal beam has been in use for several decades and a commercial version is available for purchase in a variety of configurations; multi-band, mono band, etc. Many, including the author have built home brew versions of the HEX- BEAMR and used them quite successfully. Guidelines for building one are available on other sites for those who prefer to stick with the tried and true.

The classic hexagonal beam, for its compact size, is fairly narrow banded in its front/back and SWR performance. This is one of the trade offs for the compact physical size that makes the classic hexagonal beam so attractive. In late 2007 Steve Hunt, G3TXQ conducted extensive testing and modeling of many variations of the classic hexagonal beam seeking to overcome its narrow banded deficiency without sacrificing the simplicity and small size. The design featured in this G3TXQ broad band hexagonal beam is the result of his efforts in this regard. A full explanation of the design is available on Steve's web site. An overall comparison of the new broad band design and the classic design is available. These guidelines are based on my own construction of the G3TXQ broad band hexagonal beam.

The New G3TXQ Broad Band Hexagonal Beam vs. the Classic Hexagonal Beam

The original or classic hexagonal beam is the configuration of the Hex-beam manufactured by Traffie Technologies and copied by many homebrewers. The classic hexagonal beam is a proven winner among those who have built one. However, the classic beam has a significant shortcoming that is a result of its compressed configuration. It is rather narrow banded. In fact, if you design your classic hexagonal beam for use on the SSB portion of the larger bands such as 20 or 15 meters it will perform quite well. But you will find that the front to back performance on the CW end of the band is quite mediocre if not downright unacceptable. You can adjust the wires for resonance at the middle of the band but then it will be only average in performance on both the SSB and CW sub bands.

In November 2007, Steve Hunt, G3TXQ, developed a major improvement in the classic hexagonal beam to overcome these bandwidth limitations. The new G3TXQ hexagonal beam is much broader in its performance and as a result will deliver quite good front to back performance as well as low SWR over the entire range of frequencies of the larger bands. Below are charts that illustrate the differences in the classic and broadband hexagonal beams on 20 meters. The only penalty to be paid for this improved performance is a slightly larger diameter of the broad band. The five band classic hexagonal beam for 10, 12, 15, 17, 20 meters is about 19 feet in diameter; the broadband is 22 feet.

This minor difference in size for such a major improvement in performance causes me to recommend the G3TXQ hexagonal beam over the classic. I have modeled both, I have built both, I have tested both and I have used both. And I am convinced that the G3TXQ broad band beam is better. At the urging of the late L.B. Cebik, W4RNL, Steve recently authored an article featuring the broad band hexagonal beam in the December 2007 edition of the ham radio on line antenna magazine, AntenneX.

Below is a comparison of the classic and the broad band hexagonal beams.

Top view of a five band classic hexagonal beam antenna showing wires only with no spreaders or other supporting structure. Diameter is 19 feet
Top view of a five band G3TXQ hexagonal beam antenna showing wires only with no spreaders or other supporting structure. Diameter is 22 feet

GOLD TIP:

Construction of the G3TXQ broad band hexagonal beam is easier than the classic hexagonal beam:

- No terminals for the reflector on the center post
- Only two end spacers per band rather than four
- Reflector, driver and spacers are a single loop making adjustment much simpler
- Tuning is not as critical because the bandwidth is broader

Data for five band beams on 20 meters at 30 feet above good ground. Azimuthal patterns at 29 degrees elevation. SWR for 50 ohm feed.

The SWR of the G3TXQ hexagonal beam is dramatically better on the low end of the band making it easier to couple the transceiver to the antenna for maximal power transfer.

The forward gain of the G3TXQ hexagonal beam is slightly better than the classic design.

Azimuthal radiation patterns for the classic hexagonal beam and for the G3TXQ hexagonal beam. Note the slightly superior forward gain and the significantly superior front/back

performance of the G3TXQ hexagonal beam.
The front/back gain ratio of the G3TXQ hexagonal beam is dramatically better than the classic design. This means that unwanted signals coming into the transceiver from the back of the beam will be much less than with the classic hex beam.

Note: the peak of front/back performance of the classic version occurs at 14.05 MHz whereas the SWR at this same frequency is about 2.2:1, a sub-optimal point on the SWR curve. What this means is that it is necessary to compromise between optimal SWR and best F/B with the classic design. On the other hand, with the broadband version, the front/back performance peaks at the lowest SWR with the result that there is no need to compromise between these two major goals in beam performance.

http://www.leoshoemaker.com/files/HEXBeam_by_K4KIO.pdf

HEX BEAM

Step 2: The Spreaders

• Fiber glass tubes are recommended for the spreaders. These can be purchased from Max Gain
Systems. Max Gain provides tips for attaching them together. Three thicknesses are needed 1" O.D., 3/4" O.D., and 1/2" O.D. The smaller sizes fit perfectly into the next larger size.
• While it is not necessary, you can spray paint on the spreaders to achieve the color you want.
• Some have tried to build spreaders using PVC but I have heard of no one who has done this successfully. PVC is simply too limber and does not have the "spring tension" needed to maintain the hexagonal beam shape. I recommend against its use for a hexagonal beam.

The thinner pieces slip easily into the next larger pieces for a telescoping structure that will be 136" long when assembled. Each section is 48" long. Note the two clamps that tighten the three sections together. You should assemble six such telescoping spreader arms.

One end of the large and the medium spreaders should be slit about an inch with a hack saw or a jig saw, if available, as shown so that later, when telescoped together the clamp can be slipped over the slits and tightened. An unslit end goes into a slit end.

If you don't mind a permanent arrangement, you can just glue the sections together with Liquid Nail and then you won't have to slit the sections and buy the hose clamps to clamp them together.

See more details:

Mark with tape or felt tip pen the initial locations for the wire clamps. These should be as set forth below. These are preliminary and approximate clamp locations.

See more details:

Slip the hose clamps and P clips on now for use in attaching the wires later at the places marked in the preceding photo.
Use the #8 Med clamps on the large section and #6 on the other two sections. Insert P clamps under them for slipping the wires through later. Tighten them only a little as you will be making adjustments later in the assembly stage.

See more details:

http://www.leoshoemaker.com/files/HEXBeam_by_K4KIO.pdf

HEX BEAM

Step 4: The Wire Sets

- The driven element will consist of two pieces of wire for each band. The reflector will also consist of one piece of wire for each band. Each driven element piece will be shaped by the hex beam structure into an inverted "V" and when arranged next to the other piece, will form a "M." Each Reflector piece will be wrapped around the four spreaders and attached to the tip spacers which in turn are attached to the driver wires. Be precise with cutting the wires as an inch can make a difference in the resonant frequency of that band.
- Each outer half of the driver wires has a non-conducting line that connects that wire to one end of the reflector wire. These non-conducting lines will be called "tip spacers." The length of the spacers is important to proper performance of the hex beam and they are designed here so they can be adjusted precisely.
- The two ½ driver wires, the reflector wire and the two tip spacers should be measured and assembled as single end to end sets before installation on the spreaders using the approach below for each band.
- The higher frequency bands are nested inside the lower frequency bands but only one band is shown here for the sake of simplicity. The wire lengths are for #14 or #16 gauge bare wires. Insulated wire can be used in salt water environments and the lengths will be shorter. Tables for the lengths are on the next page.

For each band, make sections as shown here and then connect the pieces altogether for a single wire assembly that will look like the photo above when strung on the beam.
Use the table on the Specifications page for the lengths to measure and cut as shown above. You will need one set of the elements above for each band on your hexbeam. The cords can be made of Kevlar which has very little stretch or Dacron. When finished, connect all the pieces together for a complete wire assembly.

Measure the half driver wire using the length found on the Specifications page. Include the ring terminal in the measurement and also add 1/2 inch for bending the other end into an "L" shape for insertion into the center post terminal. Repeat this for the other half driver wire for others meters.

Then measure out the reflector wire per the Specifications page and solder a ring terminal on each end. Include these ring terminals in the measurement. A good way to handle the measurement process is to use a nail in a board so you can anchor the wire while stretching it out on the floor or driveway.

Be very careful with the measurements. It is not fun to have to solder a piece back in that was mistakenly cut off. So remember the old carpenter's adage.

Measure once; cut twice or measure twice and cut once.
See more details:

Here is an assembled wire set with the reflector coiled in the middle and the two half reflector wires coiled on the ends. The cord knots to the wires are covered with heat shrink but the heat shrink is not really necessary

HEX BEAM

Step 2: The Spreaders

• Fiber glass tubes are recommended for the spreaders. These can be purchased from Max Gain
Systems. Max Gain provides tips for attaching them together. Three thicknesses are needed 1" O.D., 3/4" O.D., and 1/2" O.D. The smaller sizes fit perfectly into the next larger size.
• While it is not necessary, you can spray paint on the spreaders to achieve the color you want.
• Some have tried to build spreaders using PVC but I have heard of no one who has done this successfully. PVC is simply too limber and does not have the "spring tension" needed to maintain the hexagonal beam shape. I recommend against its use for a hexagonal beam.

The thinner pieces slip easily into the next larger pieces for a telescoping structure that will be 136" long when assembled. Each section is 48" long. Note the two clamps that tighten the three sections together. You should assemble six such telescoping spreader arms.

One end of the large and the medium spreaders should be slit about an inch with a hack saw or a jig saw, if available, as shown so that later, when telescoped together the clamp can be slipped over the slits and tightened. An unslit end goes into a slit end.

If you don't mind a permanent arrangement, you can just glue the sections together with Liquid Nail and then you won't have to slit the sections and buy the hose clamps to clamp them together.

See more details:

Mark with tape or felt tip pen the initial locations for the wire clamps. These should be as set forth below. These are preliminary and approximate clamp locations.

See more details:

Slip the hose clamps and P clips on now for use in attaching the wires later at the places marked in the preceding photo.
Use the #8 Med clamps on the large section and #6 on the other two sections. Insert P clamps under them for slipping the wires through later. Tighten them only a little as you will be making adjustments later in the assembly stage.

See more details:

OM Steve, saya sebenarnya juga penikmat paper QSL tetapi akhir2 ini sering kiriman saya tidak berbalas (diantaranya dari VE2, ZP dan CE yg sebenarnya sangat saya butuhkan kartunya) menyebabkan saya lebih cenderung ke LoTW. Entah kiriman saya yang tidak sampai atau balasan dia yang tidak sampai. Ini menyebabkan kepercayaan saya kepada jasa pos menjadi berkurang.

Subject: [YBDXC_News] Perangko naik lagi dari USA

Rekan2 DXers,

Mulai 27 January 2013, perangko internasional dari USA naik lagi dari 1.05 ke 1.10, tapi juga akan dikeluarkan untuk pertama kalinya
FOREVER International Stamp. Kalau kita sudah beli seharga 1.10 dan tahun depan perangko naik lagi ke luar negeri kita tetap bisa gunakan FOREVER stamp ini. Untuk domestik forever stamp sudah dikeluarkan bbrp thn yang lalu, malahan sudah tidak ada lagi perangko USA yang sekarang tertulis harga untuk first class domestik, semua tertulis FOREVER. Untuk yang lebih dari 1 oz harus tambah perangko masih disediakan berbagai rupa perangko tambahan 20c, 1c, 2,c, 5c, 10c dll.
Silahkan dibaca link di bawah ini.

Read and Weep - for those of you still dealing with Snail Mail QSL Cards
Postal Postal Rates going up AGAIN !
Jan 27, 2013
http://about.usps.com/news/national-releases/2012/pr12_114.htm
For those that need that QSL card bad - There will now be a Forever stamp
 for International First Class Postage - $1.10 for up to 1 Ounce

Memang LOTW menjadi semakin menarik,
tapi saya pribadi masih senang menerima QSL kertas dan berburu QSL kertas, walaupun sekarang
untuk DX QSL jatuhnya 1.10 plus QSL 10c, plus IRC or 2-3 USD sekitar 3.40 minumum-4.30 tergantung pakai IRC
atau pakai greenstamps. Untung ada buro dan walau agak lama biasanya sampai.

Sampai jumpa di udara,
73, Steve, W2FB

Rekan2 DXers,

selain IRC dan green stamps, untuk berburu DX QSLs saya juga sering menggunakan DX stamps,
di USA sini ada dua dealers yg spesialis menjual DX stamps untuk DXers. Dan sukses rate saya naik waktu menggunakan DX stamps ini, jadi kita tidak menggunakan USD dan tidak menggunakan IRC melainkan
amplop yang sudah ditempeli perangko dari negara yg bersangkutan,

contoh, waktu kirim QSL ke Mongolia, JT1 stations, saya selalu menggunakan perangko Mongolia yang saya beli dari WIlliam Plum plumdx@.... Dia mengeluarkan daftar perangko yang dia ada, dan dia menjual perangko cukup untuk airmail return postage dari negara ybs. Untuk waktu kirim DX QSL ke St. Helena ZD7 saya juga menggunakan perangko, juga ke negara2 Afrika, dan juga di Asia, negara bekas Soviet Republik, dll.

Saya sudah tidak menggunakan ini lagi agak lama jadi saya tidak tahu harganya belakangan ini, tapi ini suatu alternativ yang bisa digunakan untuk rekan2 dxers. Jadi nggak takut hilang karena amplop hanya isi QSL, ampop yg sudah diperangkoin, amplop bisa digunting di sudut supaya maling pos tahu tidak ada isi yg "berharga". Nah sebagaik kolektor perangko saya senang sekali waktu dapat balasan dari dx stn menggunakan perangko2 yang menarik ini.

Saya juga sering memberi feedback kepada Bill Plum kalau perangkonya "kurang" misalnya dari Indonesia dia hanya beri 7500rp ternyata balasan 8000 atau 10,000rp saya akan laporkan ke beliau dan beliau biasanya berterima kasih, saya sering dapat perangko gratis untuk Japan atau untuk England, dll.

Semoga info ini berguna bagi rekan2 dxers di YB Land.

Bisa pake OQRS (Online QSL Requests) dari clublog.org, jadi bisa terima Paypal.

Banyak DXpedition yg pake itu sekarang sih, lebih aman and praktis, kalo ada apa2 bisa di reverse payment oleh Paypal nya :)

OM Iwan - W7NZ,

Beberapa stasiun DXPedtition saya gunakan OQRS dan direspon cepat oleh QSL Manager nya, kalau kita berhasil kontak di beberapa band dan beberapa mode, mereka akan kirim sesuai yang kita klaim, pernah suatu saat saya kelebihan nilai nominal OQRS, saya minta di return oleh Paypal saat itu juga di return, cuman kena fee.
hal ini juga saya alami yang OQRS ke saya, ada beberapa Stasiun yang OQRS saya melalui Paypal, kita dapet message via email, kita cek di Account Paypal ada yang request, hari itu juga saya kirim QSL Card, yang enggak OQRS saya kirim via bureau, kecuali ada GS/IRC
metode ini bisa dipakai untuk OQRS Sepcial Call Radio Malabar Mei tahun depan.
sekedar sharing aja. tnx

Bisa OM,
Saya beberapa kali utk yg new one, saya lampiri IRC dari negara lain, bahkan yg dari negara itu sendiripun juga pernah. Misal ke Germany saya pakai IRC yg dari Germany juga tidak ada komplain dari si penerima dan QSL Card dibalas olehnya sesuai jadwal.

Sebagai pembayaran awards ataupun donasi DXpedition pun juga saya tidak/belum pernah ditolak. Semuanya clear, asalkan IRC yg kita kirim belum expired.

Rata2 yg menggunakan OQRS hanya untuk melayani dan bukan untuk kebutuhan.
Saya juga pakai OQRS hanya utk melayani teman2 DXer yg QSO dgn saya dan butuh QSL Card saya, sedangkan saya sendiri tidak terlalu butuh QSL Card DXer tsb karena sudah tidak ada value added nya lagi. Dan kebanyakan akhirnya jadi sampah.

Kecuali jika ada new dan kita butuh maka kita yg akan mendahului kirim dgn melampiri USD atau IRC.

OM Steve,
Tapi saya pernah baca beberapa QSL Manager DX/DXpedition jelas2 menyebutkan tidak mau dikirimi perangko, dan kadang jkuga tidak mau terima IRC.
Mereka jelas menyebut hanya menerima greenstamps/USD atau Euro, mintanya 3 GS lagi kalau dari outside EU.

Jadi nggak takut hilang karena amplop hanya isi QSL, ampop yg sudah diperangkoin, amplop bisa digunting di sudut supaya maling pos tahu tidak ada isi yg "berharga". Nah sebagaik kolektor perangko saya senang sekali waktu dapat balasan dari dx stn menggunakan perangko2 yang menarik ini.

Saya juga sering memberi feedback kepada Bill Plum kalau perangkonya "kurang" misalnya dari Indonesia dia hanya beri 7500rp ternyata balasan 8000 atau 10,000rp saya akan laporkan ke beliau dan beliau biasanya berterima kasih, saya sering dapat perangko gratis untuk Japan atau untuk England, dll.

Semoga info ini berguna bagi rekan2 dxers di YB Land.

>OM Steve, saya sebenarnya juga penikmat paper QSL tetapi akhir2 ini sering kiriman saya tidak berbalas (diantaranya dari VE2, ZP dan CE yg sebenarnya sangat saya butuhkan kartunya) menyebabkan saya lebih cenderung ke LoTW. Entah kiriman saya yang tidak sampai atau balasan dia yang tidak sampai. Ini menyebabkan kepercayaan saya kepada jasa pos menjadi berkurang.

OM Zen,
Kita suka juga pake merpati pos tapi milik UNO = UPU.

Kalo merpati beneran sampenya ke satu tujuan yg dilatih saja - jadi OM Zen harus punya beberapa merpati terlatih ke tujuan masing2 :
- EA7FTR, N2OO, YT1AD, IZ8CCW, EB7DX, EA5GL, W3HNK dan beberapa QSL Manager lainnya.

HI HI - dibahas lagi ya ..?

om Steve,
Terimakasih informasinya. Selain bikin bangkrut DXer juga bikin bangkrut belanja online nih.
Sepertinya perlu dipikirkan menambah keterangan di QRZ.COM sbb (seperti teman kita dr Hongkong):
Please do not send QSL card via Bureau, eQSL, LOTW and QRZ Logbook.
Only one route=direct.
No return posted =no QSL
Card without green stamp(s) or valid IRC(s) with proper chop on left hand side, and an SAE WILL NOT BE ANSWERED.

OM Bagus,
Saya bisa nebak yg dimaksud adalah amateur radio yang paling aktif disana ya, yang punya Porsche yg bisa gonggong, HI.
Mungkin maksudnya sih sama dengan DXer lain yg sudah tidak perlu QSL card dari negara lain, kecuali yg dia anggap perlu - dan gak mau dibebani dengan biaya reply QSL card.

Tapi bahasanya terlalu "gimana gitu", kesannya beliau terlalu pelit dan GS collector (SRI). Sebenarnya kalo punya jiwa amatir - yah eQSL dan LoTW khan juga gak berbiaya utk membalas QSL dari orang lain.

OM Gun,
Iya antaranya begitu, juga seperti yang pernah saya baca bahwa ada pemegang honor roll yg dia tinggal nunggu QSL card dari HK0NA, maka semua entity sudah confirmed.

Saya sedang coba apply DUF4, application sudah dicek oleh award manager (YB0ECT) tapi belum yakin kemana harus apply (DUF managernya), berapa award fee.
Sementara saya kirim GCRnya doang ke REF HQ, sambil tanya award feenya - semoga gak salah prosedur.

OM Bagus,

Pernah punya rig Lafayette ya - typenya apa ?
Saya juga punya dan awalnya dulu juga pake itu walaupun cuma 22 channel, karena rig saya itu masih model yg menggunakan crystal synthesized, tapi lumayanlah. Typenya kalo gak salah SSB-25 tersimpan di lemari atas. HI.

SB PROP @ ARL $ARLP042
ARLP042 Propagation de K7RA

ZCZC AP43
QST de W1AW
Propagation Forecast Bulletin 42 ARLP042
From Tad Cook, K7RA
Seattle, WA October 19, 2012
To all radio amateurs

SB PROP ARL ARLP042
ARLP042 Propagation de K7RA

Sunspot activity rose this week, with average daily sunspot numbers up over 45 points to 97, and average daily solar flux rising over 24 points to 129.2. October 12-14 had high geomagnetic activity, with a planetary A index at 12, 38 and 19, college A index (in Alaska) at 18, 70 and 33, and mid-latitude A index (measured in Virginia) at 12, 28 and 20. On October 13 solar wind spilled through a gap in our Earth's magnetosphere, unsettling conditions here. Aurora was seen across the northern tier states in the United States.

The latest prediction is for solar flux peaking at 140 (not at 150 as predicted until October 12, and not 135 as reported in the ARRL Letter for October 18) for October 19-21, 135 and 130 on October 22-23, 125 on October 24-26, 130 on October 27-28, then 125, 120, 115, 110, 105 and 100 on October 29 through November 3, and 105 on November 4-5, peaking again at 140 on November 12-14.

The predicted planetary A index is 6 on October 19, 5 and 8 on October 20-21, 5 on October 22 through November 7, then 10, 20, 15, 12, 8, 8, 10 and 8 on November 8-15, and 5 on November 16 through the end of November and the first few days of December.

OK1HH predicts the geomagnetic field will be quiet October 19-22, mostly quiet October 23-24, quiet October 25-26, quiet to active October 27, active to disturbed October 28, quiet October 29, quiet to unsettled October 30, quiet October 31, mostly quiet November 1, quiet to unsettled November 2, mostly quiet November 3, active to disturbed November 4-5, quiet to active November 6, quiet to unsettled November 7-8, quiet to active November 9, and active to disturbed November 10.

Recently I've made a spreadsheet for myself to track changes in the 45-day solar flux forecast. This is an interesting exercise in observing the changes to the forecast over time. Dates along the vertical access are the dates of each of the forecasts, and along

the horizontal are the dates that each of the values correspond to. Each cell has a flux value.

So looking at October 13, 2012, tracking the changes to the flux values for that date from September 27 to October 12, we see it start out at 115 in the October 13 column on September 27, then change to 105 on October 6, then 100 on October 7-9, 115 on October 10-11, 125 on October 12, then on October 13 the actual value is recorded, 124.9. We end up with smoothly changing groups of flux values, finally ending at the real number on the bottom. The spreadsheet keeps progressing from upper left toward lower right. As these are 45-day forecasts, the series of numbers is always 45 days wide.

In last week's Propagation Forecast Bulletin ARLP041 we mentioned John King, EI2HVB of Letterkenny, Ireland. This week he gave a little more detail. He worked W1AW at 1927 UTC on October 10 on 20 meter CW running two watts with an MFJ Cub 9320.

This week he wrote: "I have a sloping 'V' dipole, the front plane of which is firing due east, and best DX to the east so far is a 559 into Perm in eastern Russia (2000 miles from my QTH). I regularly get 579 to 599 all over Eastern Europe. I cannot seem to work Spain, Portugal or North Africa, so there is no side lobe to the south of my antenna. However, there seems to be a side lobe firing north, as I recently got a 589 into Iceland. On October 10 when I worked W1AW the Northern Lights were seen from the north of Ireland later that night, and had also been visible the previous night. I suspect my signal was going over the North Pole rather than across the Atlantic."

Of course without a directional antenna, it is difficult to know, although we can assume W1AW was using a directional antenna from their end. Following last week's bulletin, Jim Parkinson, W9JEF of Tontitown, Arkansas commented: "When we talk about radio propagation, most of us assume the path to be a straight line (in azimuth). But according to KL7AJ, in QST articles, that path is not always 'straight' (not that there's anything wrong with that).

"As Eric points out - and many other hams such as myself have experienced - the aurora and other polar effects can bend or reflect a signal. Assuming that the 'straight' path did not exist at the time, would the portion of signal from John's dipole that reached the aurora region not have been bent back eastward toward W1AW (with reciprocity)?"

By the way, a little point of interest, Jim's aunt Ethelyn Parkinson wrote the 1968 book, "Today I Am a Ham."

John Jones, N0JK wrote: "There was a nice 'off season' October Es opening on 50 MHz Sunday October 14. The band appeared to be open over 6 hours for many across the eastern USA to the Midwest and

southern Canada.

"Here in Kansas, the W3HH/b EL89 (3.25 W, omni antenna) and the W4CHA/b EL88 6 meter beacons were solid copy on my attic dipole around 0315 UTC Oct. 15."

Joe Dawson, K4WLS of Atlanta, Georgia wrote on October 18: "I have made contacts in France, Belgium, Latvia, Greece, Croatia, Morocco, Mexico, Cuba, Cayman Islands and Italy in the past 3 days during my lunch hour using a slinky antenna and 50 watts on 10 meters. Similar DX activity on 15 and 17 meters as well, but not to the extent of 10 meters. The barn door is open on 10 meters during the day but shuts down cold around 5pm eastern."

Thanks Joe! And thanks for mentioning the slinky antenna, which I have not heard of for a long time. A web search though shows there is still quite a bit of interest in this antenna.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for October 11 through 17 were 82, 89, 85, 97, 119, 107, and 100, with a mean of 97. 10.7 cm flux was 116.6, 121.9, 124.9, 132.1, 136.8, 137, and 135, with a mean of 129.2. Estimated planetary A indices were 6, 12, 38, 19, 8, 5, and 7, with a mean of 13.6. Estimated mid-latitude A indices were 5, 12, 28, 20, 7, 5, and 6, with a mean of 11.9.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 14th-October, through Sunday, 21st-October there were 227 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5U, 5W, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ5, PJ7, PY, PZ, R1FJ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T30, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2M, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z3, Z8, ZA, ZB, ZC4, ZD7, ZD8, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B9, RODRIGUES ISLAND. The 3B9SP DXpedition is close to going QRT. The operation is expected to go QRT October 23rd. According to the ClubLog Web page, as of 1455z, October 21st, 3B9SP has made 18715 QSOs with 8211 unique callsigns (11213/CW, 6353/SSB, 890/RTTY and 259/PSK). Breakdown by

continent is: 176/AF, 0/AN, 3690/AS, 9177/EU, 5279/NA, 290/OC and 103/SA. QSL via HB9ACA direct or use the OQRS on ClubLog. The logs will be uploaded to LotW within 6 months after the DX Operation. For more details and updates, see: http://hb9fr.ch/3b9sp

5H, TANZANIA (Senior Moment For Editor!). Last week we reported that Noel, WB0VGI, informed OPDX that he is now operational in Iringa, Tanzania. However, your editor forgot to put Noel's callsign in the announcement. His callsign is 5H3NP, and he will be there until December 17th. Operations will be on CW, SSB and PSK. QSL via his home callsign.

5X, UGANDA (Back On!). Nick, G3RWF, who was expected to be active this October as 5X1NH from Uganda for two months but then postponed his trip, has now announced that he will return on November 6th for 5 weeks. He should be on 80-10 meters, possibly 160m, and he prefers to operate CW but will also be on the Digital modes with some SSB. Nick will probably also be in the CQWW DX CW Contest and the ARRL 10m Contest. QSL via his home callsign.

9V, SINGAPORE. Koichi, JR1MLT, is currently active as 9V1KK from Singapore. He is there because of his job, and he informs OPDX that he expects to be in Singapore for "five years or so (up to economy and market)". His station is very much limited due to the residential conditions. Koichi mentions that he currently lives on the 10th floor of a condo and his antenna is much restricted. Koichi just put up a long wire with the ATU for the HF bands (40-10m) with 100 watts. He operates mostly on SSB and CW. However, he travels extensively and his operating time is limited, but he will get on the air as much as possible. QSL via JH1ILX direct.

9Y4, TRINDADE AND TOBAGO. Chris, 9Y4D (ex-9Y4NZ), will be active during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (20m)/High-Power entry. QSL via 9Y4D (see QRZ.com).

A22, BOTSWANA. Schalk, ZS3O, from Sandbaai, South Africa, was active as A22LL this past weekend from Lobatse, Botswana. He informed OPDX that he has a farm in Lobatse and will be in there "every 2nd weekend". When there, Schalk mentioned that he will be on the 20m band operating CW and SSB. Watch 14020 kHz for CW and between 14180-14240 kHz for SSB (mostly on 14200 kHz calling CQ. QSL via his home callsign, direct and by the Bureau. NO LoTW.

AH0, MARIANA ISLANDS. Operators Kuniyoshi/7L1FPU (W1FPU), Moto/JE1NDE (W1NDE), Naoyuki/JK1FNL (NA8O), Yuzo/JQ2WTT (KH0XW) and Hiroyuki/JG7PSJ (KW2X) will be active as AH0BT during the CQWW DX SSB Contest (October 27-28th) as a Multi-2 entry. QSL via 7L1FPU. The team will try to be active using their own callsign before the contest (October 25-26th).

AH2, GUAM. Members of the Guam Contest Club will be active as AH2R during the CQWW DX SSB Contest (October 27-28th) as a Multi-Single entry. Operators mentioned are: Kazuma/JG3RPL, Toshinobu/JI3ERV, Mikiawa/JR7OMD and Miyazawa/JP7DKQ. QSL via LoTW or direct to JH7QXJ. PLEASE DO NOT QSL via the KH2 Bureau.

C45, CYPRUS. Spyros, 5B4MF, will be active using his special callsign C45T for the CQWW DX SSB Contest (October 30-31st) as a Single-Op/Low-Power entry. QSL via address on QRZ.com, or by the Bureau or LoTW.

CP8, BOLIVIA. Peter, DF7NX, is now active as CP8MW from Bolivia until October 23rd. Activity will be on the 30-10 meters mostly CW. QSL via his home callsign, direct or by the Bureau.

CR2, AZORES. Kim, OH6KZP, will be active as CR2X from Ribeira Grande during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/High-Power entry. QSL via OH2BH. For more details, visit the CR2X Web page at: http://www.cu2a.com

CY0, SABLE ISLAND (Reminder/Update). PRESS RELEASE - date October 20th [edited]: "Murray/WA4DAN and Ron/AA4VK announce that everything is set for their operation from Sable Island beginning October 22-31st. The weather forecast for Monday looks good, at this time. The only concern is the beach conditions. Rain is forecast for Sunday which could potentially affect the 'beach runway'. Travel to Sable Island is always problematic. Often, when conditions in Halifax are good, conditions at Sable Island are not good and visa versa. Also, the 'old' Britten-Norman Islander aircraft is not equipped with modern instrumentation, which limits the conditions under which it is safe to fly between the mainland of Nova Scotia and Sable Island. We were unsuccessful in two previous attempts to visit Sable Island. We are optimistic that Monday will be a 'GO'.

As previously advertised, our focus will be on 10, 12, and 15 meters, where the demand for CY0 is greatest, and especially on 10M, where new DX'ers, with modest stations, have the best opportunity to work 'a new one'. Also, we plan to be active in the upcoming CQWW Phone contest on 10, 15, 20, and 40 meters to provide CY0.

We would like to thank Gerry Forbes, Officer-in-Charge for Sable Island for being so helpful in trying to make this, our third attempt, successful. In addition, we would like to express our appreciation to Gary, VE1RGB, who has provided invaluable logistical support in Halifax, Nova Scotia, the departure point for the flight to Sable Island.

Monitor <www.cy0dxpedition.com> for the latest updates."

DXPEDITION VIDEOS OF THE WEEK. With more and more DXpeditions putting their videos on YouTube and other Web services, we decided to list them (possibly) each week. For this week's listings:

2011 - D4C Cape Verde (CQWW WPX SSB Contest): http://www.youtube.com/watch?v=JVc-CTHU6z0
2011 - D4C Cape Verde (CQWW DX SSB Contest): http://www.youtube.com/watch?v=xSruNHc9o0I
1990 - XU8DX - XU8CW Phnom Penh, Cambodia: http://vimeo.com/30892749
1989 - XW8DX - XW8CW Vientiane, Laos: http://vimeo.com/30307643
1988 - 3W8DX - 3W8CW Hanoi, Vietnam: http://www.youtube.com/watch?v=wJ39iNDVfD4

If you have a DXpedition 'video' available on the Web and would like to have it listed in the OPDX, PLEASE send the URL to use, and we will publish it.

EA8, CANARY ISLANDS. Operators Andrea/IK1PMR and YL Claudia/PA3LEO will be active as EA8/homecall from Tenerife Island (AF-004, S-012 for the Spanish Islands Award, WLOTA LH-1276) between December 3rd and February 12th (2013).

Activity will be on the HF bands and 6 meters. Andrea will operate CW and Claudia will operate RTTY. QSL via their home callsign, direct or by the Bureau (E-mail requests accepted). Watch Andrea's Web site for updates and more details at: http://www.ik1pmr.com

ED9, CEUTA AND MELILLA. Operators Con/DF4SA, Frank/DL2CC, Zoli/HA1AG, Laszlo/HA3NU and Mark/N5OT will be active as ED9Z from Ceuta during the CQWW DX CW Contest (November 24-25th) as a Multi-Single entry. The group will be using all Spiderbeam antennas and a 40m 3 element full size beam. QSL via EA9LZ.

EF8, CANARY ISLANDS. Juan, EA8CAC, will be active as EF8R from Gran Canaria Island (AF-004) during the CQWW DX SSB SSB Contest (October 27-28th) as a Single-Op/Low-Power/SO2R entry. QSL via direct to EB7DX or LoTW.

FG, GUADELOUPE. Yann, F1NGP, President of the French Clipperton DX Club, is now active as FG/F1NGP from Saint Francois (Grid FK96IF), Guadeloupe (NA-102) until about October 26th. Activity will be on 40-10 meters using CW, SSB and RTTY. QSL via his home callsign.

FG, GUADELOUPE. Gildas, TU5KG, is now active as FG/TU5KG from Guadeloupe until October 24th. Activity will be holiday style operating mainly RTTY and SSB. QSL via F4DXW, direct only.

FG, GUADELOUPE. Yann, F5UTN, will be active as FG/F5UTN from Guadeloupe between October 23rd and November 1st. Activity will be holiday style operating mainly CW and SSB. He will also be in the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band or Single-Band (15m)/Low-Power entry. QSL via his home callsign.

GJ, JERSEY. Members of the Jersey Contest Group will be active as GJ2A from Jersey Island (EU-013) during the CQWW DX SSB Contest (October 27-28th) as Multi-Single entry. QSL via LoTW, or direct to GJ3DVC.

HK, COLOMBIA. Pepin, CO2TK, will be active as HK3TK during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (10m)/Low-Power entry. QSL via F5CWU direct.

HR, HONDURAS. Operators Dan/HR2DMR, HQ2DOM and Johnny/HQ2JCM will be active as HR2WW during the CQWW DX SSB Contest (October 27-28th) as a Multi-Op/All-Band/Low-Power entry. QSL via KD4POJ.

HS, THAILAND. Anothai, HS8FLU, from Nuakhlong Krabi will be active during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (20m)/Low-Power entry. QSL via his home callsign, direct, by the Bureau or eQSL.

HS25, THAILAND (Special Event). Look for special event station HS25DX to be active from Kao Kluay in Surathani Province in the south part of Thailand from October 27-28th. Activity is to celebrate the 25th anni-versary of the "100watts Magazine". Activity will include an entry in the CQWW DX SSB Contest (October 27-28th). QSL via E20PFE.

IOTA NEWS.............

AS-060. Members of the Korea Contest Club (KCC) will be active as D93I from Pigum Island between October 21-29th. Activity will be on 80-10 meters using a beam antenna for HF, 4-square for 40m and vertical for 80m. They will also be in the CQWW DX SSB Contest (October 27-28th). QSL via DS4NYE direct or LoTW.

EU-050. Carlo, IK4JQQ, will be celebrating his 25th year on amateur radio by being active as IL7/IK4JQQ from San Domino Island, Tremiti Islands, between October 21-23rd. Activity will be on the HF bands and possibly the satellites. QSL via his home callsign, direct, by the Bureau, LoTW or eQSL.

NA-027. Operators Gus/VO1MP and George/K5KG will be active as VD1M from Newfoundland Island during the CQWW DX SSB Contest (October 27-28th) as a Multi-Single entry. QSL via VO1MP.

OC-160. Akira, JA1NLX, is now active as JA1NLX/VK4 from Hamilton Island until October 23rd. Activity will be on the 40-10 meters on the IOTA frequencies using CW, SSB and RTTY. He will use an Elecraft KX3 with Juma PA100D into a random wire wound on fishing pole and radials with ATU or Loop wire with ATU. It will be mounted on the room balcony. QSL via his home callsign or LoTW. Log will be upload onto ClubLog and LoTW server when he returns home. For more details and updates, watch the following Web pages at:

http://www.ne.jp/asahi/ja1nlx/ham/VK4_2012.html
http://ja1nlx-aki.blogspot.jp/search/label/JA1NLX%2FVK4_2012

OC-271. (NEW IOTA). Operators Joppy/YB8XM and Andy/YC0MVP will activate the new IOTA Babar Island during the first week of November. The specific dated are November 1-8th. QSL via YB9BU. Look for updates on Joppy Twitter account or Blog page at:

https://twitter.com/YB8XM
http://oc271.blogspot.jp

SA-087. Operators Ruben/LU3XEM, Luis/LU3XEI, Edgar/LU5VAT and Carlos/LU7DSY will be active as LT0X from Penguin Island between November 2-4th. There has been no activity from this island for 12 years. Activity will be on 80/40/20/15/12/10 meters, possibly 6 meters, using CW, SSB and PSK31, with three stations active on the air. QSL via LU7DSY.

KG4, GUAM. John, KF4EME, will be active as KG4EM from Guantanamo Bay during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/Low-Power entry. QSL via KB7GJ.

VRY DIS - Very Disturbed	Severe Storm	K=6-9	100-400

KP2, U.S. VIRGIN ISLANDS. Operators Bob/K3EST, Fred/K9VV and Philip/KT3Y will be active as KP2M from the Radio Reef Contest Station on St. Croix (NA-106) during the CQWW DX CW Contest (November 24-25th) as a Multi-Single entry. QSL via AI4U and LoTW. Look for the operators to possibly be active outside of the contest as KP2/homecall. They will be there between November 22-27th. For more details about the KP2M station, see: http://www.radioreef.com

LX, LUXEMBOURG. Philippe/LX2A will be active as LX7I during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band entry. He states that he will be using a new setup and antennas for the contest. QSL via LX2A. Visit the LX2A Web page at: http://www.lx2a.com

OH0, ALAND ISLAND. Look for OH0Z to be active once again in the CQWW DX SSB Contest (October 27-28th), but as a Single-Op/All-Band/High-Power entry. Operator will be Tomi/OH6EI. QSL via W0MM.

OH0, ALAND ISLAND. Kim, OH6KZP, will be active as OH0X from Aland Island during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/High-Power entry. QSL via OH2TA.

OH0, ALAND ISLAND. Pekka, OH2YY, will be active as OH0YY during the CQWW DX SSB Contest (October 27-28th) as a Single-Op (possibly as a Single-Band (10m) entry. QSL via OH2YY.

OH0, ALAND ISLAND. Waldemar, SM0TQX, will be active as OH0JFP during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (40m or 10m) entry. QSL via OH0JFP, by the Bureau or direct.

P4, ARUBA. Valery, R5GA, will once again be active as P4/R5GA from Oranjestad (P49V/P40YL Aruba Ham Radio Rental - see <www.p49v.com>) between November 22-28th. Activity will be on CW mainly on 160-10 meters, especially on the 30/17/12 meters. Operations will also include the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band entry using the callsign P40F. QSL via UA3DX. QSL P4/R5GA via R5GA, direct, by the Bureau or LoTW.

PJ4, BONAIRE. Operators Paul/K1XM, Al/W1FJ, John/K4BAI and Jeff/KU8E will be active as PJ4A from the "PJ4G Radio House" on Bonaire (SA-006, WLOTA LH-1279) during CQWW DX CW Contest (November 24-25th) as a Multi-? entry. The team will be on the island between November 20-27th. Outside the contest, operators will be active as PJ4/homecall. QSL PJ4A, PJ4/K4BAI

and PJ4/KU8E via K4BAI. QSL PJ4/K1XM and PJ4/W1FJ via their home callsigns.
Check out the "PJ4G Radio House" at: http://www.pj4g.com

  PREVIEW THE 7O6T QSL CARD on "DX-World.net at:
  http://dx-world.net/2012/qsl-card-preview-7o6t

 UK TO PHASE OUT IRCS. Phil, G3SWH, received the following info from the
  Royal Mail: "Due to declining international mail volumes and electronic
  substitution, customer demand for International Reply Coupons has been
  falling dramatically over the last few years. Overall sales of Inter-
  national Reply Coupons have been very low indeed - on average just 4
  per annum bought from each Post Office branch. Therefore, it was no
  longer commercially viable to maintain the sale of coupons and Royal
  Mail has taken the decision to withdraw them from sale.
    International Reply Coupons have not been withdrawn globally from
  sale. Under UPU regulations Royal Mail through Post Office Counters
  is obliged to redeem International Reply Coupons presented having been
  purchased overseas, but we are not obliged to sell them. However, I can
  confirm that customers have up to December 2013 to redeem IRCs."
    Phil states, "This seems to be much more in line with the Royal Mail's
  responsibilities under their UPU membership. Looks like they're safe
  until 31st December 2013. It may be that the UPU will change their rules
  after that date (which would be no bad thing IMHO)."

  S57S, T6LG, T6MO, UN5J, UR3IFD, UR5MSW and XM2I

  QSLS RECEIVED VIA MAIL: 3D2AG/p, D3AA, CY9M, EX2F, FK/JJ2NYT, FW0NAR,
  HB0/DL2SBY, KH8/W8GEX and YE0M

  QSLS RECEIVED VIA THE BUREAU: CY9M

SI9, SWEDEN. Operators Jef/DD2CW, Marcel/ON6UQ and Dirk/ONL741 will operate as SI9AM between October 24-31st, from the "King Chulalongkorn Memorial" in Raganda. They will be in the CQ WW SSB DX Contest (October 27-28th). Outside of the contest, they will be active on all HF bands. Main frequencies:

  CW - 1817, 3517, 7017, 10117, 14017, 18077, 21017, 24897 and 28017 kHz
  SSB - 1840, 3760, 7060, 14210, 18160, 21310, 24960 and 28510 kHz
  FM - 145.550 MHz and Repeater RV49 - 145.612 MHz.

QSL via SM3CVM, Bureau cards can be requested by E-mail to: info(at)si9am.se
Visit the SI9AM Web page at: http://www.si9am.se

SILENT KEY. OPDX was informed that Théo Jacobs, ON4LEP, become a Silent key (SK) on October 12th. OPDX and its readers would like to send out our deepest sympathy to the family and friends of ON4LEP.

T30, WESTERN KIRIBATI. The Brazilian team will go QTH as T30PY (HF) and T30SIX (6m, EME on WSJT-JT65A) from Tarawa Island (OC-017) this week on October 25th. According to the ClubLog Web page, as of 0842z, October 19th, T30PY has made 15652 QSOs with 6369 unique callsigns (6994/CW and 8235/SSB and 423/RTTY). Breakdown by continent is: 58/AF, 0/AN, 7606/AS, 2484/EU, 3823/NA, 883/OC and 798/SA. QSL via PY2PT, direct, by the Bureau ("Estimation to reply: at least, 3 years."), or by their OQRS on the Web page. For more details, see: http://www.mdxc.org/t30py

T33, BANABA (Update). A group of 14 operators, who was expected to be led by Jay/W2IJ and David/N1EMC for a DXpedition to Banaba for March/April 2013 (see OPDX.1079), has now been cancelled according to "The Daily DX". The cancellation is the "result of logistical issues that occurred this (past) week. They are re-evaluating the issues and hope to activate the island later on in 2013."

T4, CUBA. Operators Carlos/CO6CAC, Jose/CO6EC, Hector/CO6HLP, Orelvis/CO6LC, Luis/CO6LE, Luis/CO6LP, Yordany/CO6YAC, Edor/CO7PH and Jose/CM8AKD will be active as T46A during the CQWW DX SSB Contest (October 27-28th) as a Multi-? entry. QSL via EA5GL.

T6, AFGHANISTAN. Eric, K9GY, will be active as T6MO during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (10m or possibly 15m)/Low-Power entry. QSL via K9GY.

T8, PALAU. Three JA operators will activate the "West Plaza By The Sea Hotel Rental Shack" on Palau Islands (OC-009) over the next month. Their activities should be on all bands and modes. Currently, operators Kunio/JO1AEC and Hideyuki/JM1LJS will be active as T88EC and T80W, respectively, until October 23rd. This will be followed by Mazshita/JF2SKV as T88KV between October 26-30th. He will be active in the CQWW DX SSB Contest (October 27-28th) [for more details, see OPDX.1079]. Then look for Toshiharu, JA3JND, to be active as T88ON between November 9-13th. QSL T88EC via JO1AEC, T80W via JM1LJS and T88ON via JA3JND. For details on the "West Plaza By The Sea Hotel Rental Shack", see:
http://palau.rental-shack.com/english

TF, ICELAND. Members of the IRA club (Íslenskir radíóamatörar) will be active as TF3W during the CQWW DX SSB Contest (October 27-28th) as a Multi-Single entry. Operators mentioned are Jon/TF3ZA, Bjorn/SM0MDG, Patrik/SM0MLZ and Ulf/SM0NOR. QSL via TF3W, by the Bureau or direct.

TK, CORSICA. Salvatore, IK8UND, will be active as TK9R during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/High-Power entry. Look for possible activity on CW and RTTY before the contest. QSL via IK8UND direct ONLY.

TX5, CLIPPERTON ISLAND (Update). The 2013 Cordell Expedition to Clipperton Island posted the following on October 15th [edited]: "The March, 2013 DXpedition to Clipperton Island has received the callsign TX5K to be used during the operation. With the addition of Luis/XE1L, Dave/WJ20, and Giovanni/I5JHW, the team has 23 members. One space remains available for another operator, scientist, or other supporter who wishes to join the DXpedition.

We are proud to announce that the QSL Manager will be Bob, N2OO. Offsite team member Dean, N7XG, is developing new software to help automate some of the operations at the QSL manager and his team.

The expedition will use DXA, the system that enables real-time Web display of the log data, first used on Kure Atoll K7C 2005, to provide confirmation of valid QSOs in about 1 minute after they are made. We will also make use of ClubLog and LoTW.

The DXpedition will be active on all HF bands and modes for about 10 days. In addition to the radio operations, the team will carry out numerous scientific projects of environmental science, especially involving studying invasive and undiscovered species that have potential for catastrophic disruption of the Clipperton ecosystem. The team will study vortex winds produced by the island, and will document foraging by congenitally deformed birds. Advisor Robert Pitman reports that a significant portion of the masked boobies are deformed and apparently are fed by their parents their entire lives.

The DXpedition is very pleased to acknowledge a personal gift from a world-famous ham of 10,000 USDs. While preferring to remain anonymous, the donor hopes that his gift will stimulate others to support the project. A particularly interesting activity will be the real-time Internet video connection with students. After the expedition the students will write essays for a compendium to be titled 'Saving the World, by We the Students.' The publication is designed to be the first of a series of 'Saving the World, by...' The team also will collect and remove plastic debris from the island. You can help in these efforts by making a donation through the link on the Web site.

Complete information about the project is available on the Web site at <www.cordell.org/CI>. The project is being organized and will be led by:
Bob KK6EK schmieder (a) cordell.org
Chris DL1MGB Chris (a)DL1MGB.com "

VE2, CANADA (Zone 2). Operator Yuri, VE3DZ, will once again be active as VE2IM from Sept-Iles, QC (Zone 2), during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/High-Power or Low-Power entry. Yuri states that he will be there between October 23-30th. This is his 17th

trip to Zone 2 since 1999. Activity before and after the contest will be on CW, SSB and RTTY, and all HF bands including the 30/17/12 meter bands. QSL via VE3DZ, direct, by the Bureau or LoTW.

VK0H, HEARD ISLAND (Update). A recent update, dated October 15th, was posted on the Heard Island (The 2014 Cordell Expedition) Web page at:

http://www.cordell.org/HD

Under "News" it states [edited]: "We have posted updates of the Project Description (version 5.2) <http://www.cordell.org/HD/HD_pages/HD_Documents.html> and the TEAM.

We are pleased to welcome Steve Chamberlian/VK6IR and William (Wild Bill) Beyer/N2WB to the radio team. We also welcome several other persons to the offsite team, including Yasuo "Zorro" Miyazawa/JH1AJT, Tommy Horozakis/VK2IR, and Christopher Wells/N9LXR. Wells is implementing a real-time interactive video capability for the Clipperton Expedition (see below), and will do the same for Heard Island.

We are also pleased to welcome Dr. Robert Pitman, NOAA Southwest Fisheries Science Center in La Jolla, California. Pitman is a world expert on killer whales. Killer whales are arguably one of the most recognizable, and best-studied, large animals on earth, yet basic questions about how many species there are and how they function within the ecosystem remain unanswered. Pitman has assembled evidence for the existence of a new species of killer whale in Antarctic waters, in the area that the Heard Island expedition will be travelling. Pitman will be on the Heard Island cruise to search confirm the proposed new whale species. Confirming new species in Antarctic waters would highlight the fact that our knowledge of marine biodiversity is perhaps even more rudimentary than currently recognized.

Please note the connection between the 2014 Heard Island Project and the 2013 Clipperton Expedition <www.cordell.org/CI>. Some of the same team members will be implementing some of the same science projects on Clipper-ton that we expect to carry out at Heard Island. While being a major expedition on its own, Clipperton is also a development and test project for Heard Island. Because of this close relationship, we hope that sponsors will support both projects."

VP2M, MONTSERRAT (Update). Operators (YL) Babs/DL7AFS and Lot/DJ7ZG will once again be on another DXpedition. This time they will be active as VP2MYL and VP2MGZ, respectively, from Montserrat (NA-103, WLOTA 1475) between November 5-20th. Activity will be on 80-6 meters using mainly RTTY, PSK31, PSK63 and SSB, on the usual DX frequencies. QSL via DL7AFS, by the Bureau or direct to: Baerbel Linge, Eichwaldstr. 86, D-34123 Kassel, Germany. Lot states, "We hope to have an internet access for online log because our QTH is in the north part of Montserrat." For more information and updates, visit their Web site at: http://www.qsl.net/dl7afs

VQ9, CHAGOS ISLANDS. Steve, W3HF, will be active as VQ9HF from Diego Garcia Island until the end of October. Activity will be on the HF bands, but with a focus on PSK31. QSL via his home callsign.

XX9, MACAO. Operators Francisco/EA7FTR (XX9TFR), Eugene/EA5HPX (XX9TPX), Jose/EB5BBM (XX9TBM) and David/EB7DX (XX9TEX) are now active from Pousada

de Coloane Hotel, Coloane Island (AS-075) until October 29th. Activity will be on 160-6 meters, including the 30/17/12 meter bands, using CW, SSB and RTTY, with at least 2 stations on at the same time on different bands and modes. Suggested frequencies were published in OPDX.1081. There will be an emphasis on working NA and EU. QSLs for all callsigns are via EA7FTR, direct. All QSOs will be confirmed via LoTW. For more details and updates, see: http://adxg.org/macau/index.php

ZP9, PARAGUAY. Manu, ZP9MCE, announced that he will be active in both the CQWW DX SSB Contest (October 27-28th) and CQWWDX CW Contest (November 24-25th) as a Single-Op/Single-Band (10m)/Low-Power entry. QSL only via EA5ZD.

Om Hen,
Pernah sewaktu rame2nya CBer, kemudian lahirnya RAPI di DIY, ada larangan menggunakan pesawat Import, sejak saat itu sy gak perpanjang ijinnya krn hrs pake Aries Rig gak bermutu hehehe..... sy beli TS430 dan lebih sering menggunakan TS430 untuk DX dan lokal di SSB.
Th 2000 an krn lihat Lafayet sayang gak dipakai, sy modif ke 40m ditempat teman sampai sekarang blm sy ambil hehehe...

20 October 2012 A.R.I. DX Bulletin

No 1120

==========

*** 4 2 5 D X N E W S ***

**** DX INFORMATION ****

==========

Edited by I1JQJ & IK1ADH

Direttore Responsabile I2VGW

C6 - George, KQ8Z will be active as C6AZZ from Grand Bahama Island (NA-080) on 24-31 October. He will focus on 6 metres (CW, SSB, FM) if there are any band openings, otherwise he will operate mainly CW with some SSB on 80-10 metres. He will also participate in the CQWW DX SSB Contest on 20 metres. QSL via KQ8Z, direct only. [TNX OPDX Bulletin]

C6 - Brian, N3IQ will be active as C6AQQ from New Providence (NA-001), Bahamas on 25-31 October, including an entry in the CQWW SSB Contest. QSL via home call, LoTW and eQSL. [TNX The Daily DX]

EI - Olivier, ON4EI will be active as EI8GQB on 21-30 October using an hybrid wind-solar power system from his caravan. He will participate in the CQWW SSB Contest as EI1A. QSL for both callsigns via bureau to ON4EI. A Live Information Banner will be available at http://www.qrz.com/db/EI8GQB [TNX ON4EI]

F - The Council of Europe Radio Amateur Club (www.tp2ce.eu) will be active as TP8CE on until 21 October. QSL via F5LGF. [TNX F6FQK]

F - F5IHZ, F5IRC, F5THW and F5UPO will be active as TM5BRT from Brehat Island (EU-074) on 19-21 October. They will operate CW, SSB, RTTY and PSK on 80-10 metres. QSL via F5THW. [TNX DX Newsletter]

FG - Yann, F1NGP will be active as FG/F1NGP from Saint Francois, Guadeloupe (NA-102) on 19-25 October. He will operate RTTY, SSB and CW on 40-10 metres. QSL via home call. [TNX F5NQL]

FG - Yann, F5UTN will be active as FG/F5UTN from Guadeloupe from 23 October to 1 November. He will also participate in the CQWW SSB Contest as either an all band or single band (15m) entry. QSL via home call. [TNX NG3K]

HL - Members of the Korean Contest Club will be active as D93I from Pigum Island (AS-060) between 21 and 29 October. QSL via DS4NYE (direct) and LoTW. [TNX DX World]

I - Celebrating his 25th year in amateur radio, Carlo, IK4JQQ will be active as IL7/IK4JQQ from San Domino, Tremiti Islands (EU-050) on 21-23 October. QSL via home call.

JA - Look for JA6CNH/6 and JF6XQJ/6 to be active from Genkai Island (AS-012) on 19-21 October. They will operate CW and SSB on 80, 40, 20, 15 and 10 metres. QSL via home calls. [TNX JN6RZM]

JA - Take, JI3DST will be active from Shikine Island (AS-008) on 20-24

October. QSL via bureau. [TNX JR3TVH]

KH0 - Matt, K0BBC and Ron, N0AT will be active as WH0/K0BBC and AH0/N0AT on 23-30 October, including an entry in the CQWW SSB Contest as AH0/N0AT. Outside the contest they will operate SSB, CW and RTTY on 160-6 metres. QSL via home calls, direct or bureau, and LoTW. [TNX The Daily DX]

KH8 - Anci, JA2ZL will be active as KH8/homecall from Pago Pago (OC-045), American Samoa on 23-29 October. He will operate CW, SSB and RTTY on 80-10 metres. QSL via home call, direct or bureau. [TNX NG3K]

LU - LU3XEM, LU3XEI, LU5VAT and LU7DSY will be active as LT0X from Isla Pinguino (SA-087) on 2-4 November. They plan to operate SSB, CW and PSK31 on 80, 40, 20, 17, 15, 12 and 10 metres and possibly 6m. QSL direct to LU7DSY. [TNX rsgbiota.org]

OJ0 - OG9X, OH2HAN and OH6XX will be active from Market Reef (EU-053) on 25-29 October. OG9X as OJ0B (80 metres) and OH6XX as OJ0X (15 metres) will participate in the CQWW SSB Contest, while OH2HAN will operate as OJ0MI on RTTY. QSL OJ0B and OJ0X via OH2BH. QSL OJ0MI via OH2HAN. [TNX NG3K]

T8 - JF2SKV will be active as T88KV from Palau on 26-30 October. He will operate CW, SSB and digital modes on the HF bands, and will take part in the CQWW DX SSB Contest. QSL via home call. [TNX NG3K]

VE - Yuri, VE3DZ will be active as VE2IM from Sept-Iles (Zone 2) on 23-30 October, CQWW SSB Contest included. Outside the contest he will operate SSB, CW and RTTY on all bands. QSL via VE3DZ. [TNX NG3K]

VK - Nigel (VK6NI), Steve (VK2SJK), Reinhard (DF4TD) and Wally (VK6YS) will be active as VK6WDI from Woody Island (OC-170) on 9-13 November. They expect to have two stations on 40-10 metres, running 100 watts into verticals and one tribander. QSL via VK6YS, direct only. Further information and logsearch can be found at www.westozdx.net/IOTAS/OC170/OC170.html [TNX rsgbiota.org]

VP2M - Look for K2DM (VP2MDG), G3NKC (VP2MKC), G4XUM (VP2MXU) and GM4AFF (VP2MAF) to be active from Montserrat (NA-103) on 23-30 October. They will participate in the CQWW DX SSB Contest as VP2MDG (Multi-Two). [TNX NG3K]

VP2M - Babs, DL7AFS and Lot, DJ7ZG (www.qsl.net/dl7afs) will be active as VP2MYL and VP2MGZ from Montserrat on 5-20 November. They will be QRV on 80-10 metres RTTY, PSK31, PSK63 and SSB. QSL for both calls via DL7AFS, direct or bureau. [TNX DJ7ZG]

VP5 - K9PPY, KX4WW, W4OX and W9RN will be active as VP5/homecall from Providenciales (NA-002), Turks & Caicos Islands on 20-30 October. They will operate CW, SSB and RTTY on 160-10 metres (also 6 metres, if they have enough time) and will participate in the CQWW SSB Contest as VQ5X (QSL via W4OX and LoTW). [TNX OPDX Bulletin]

YB - Andy, YC0MVP will be joining Joppy, YB8XM for the IOTA expedition to Babar Island (OC-271, new one). They expect to be QRV on 1 November for one week. QSL via YB9BU. They have a website at http://oc271.blogspot.jp/ [TNX JN6RZM]

YN - Jeff, N6GQ will be active as YN2AA from Grenada, Nicaragua on

23-29 October. He will operate on 160-6 metres all modes, and will participate in the CQWW SSB Contest. QSL via NN3W and LoTW. [TNX ARRL DX News]

ZD8 - Marko, N5ZO will operate as ZD8O from Ascension Island (AF-003) until 30 October. Main activity will be during the CQWW SSB Contest. QSL via OH0XX. [TNX NG3K]

Welcome ...Babar Island OC-271
 CQ ZONE 28 - ITU ZONE 51
DXPEDITION ISLAND ON THE AIR (IOTA) OC-271

BABAR ISLAND - MALUKU BARAT DAYA
MALUKU - INDONESIA1-8 November 2012

Joppy, YB8XM and Andy , YC0MVP , has plans to be active from Babar Island OC-271 New IOTA during first week of November 2012.

Name: Babar Islands
Location: 7.45S - 8.33S / 129.42E - 130.17E

About

Babar Islands (OC-271 New IOTA) in Indonesia

Babar Islands (OC-271 New IOTA) in Indonesia (YB8)

Joppy, YB8XM and Andy , YC0MVP , has plans to be active from Babar Island OC-271 New IOTA during first week of November 2012.
Name: Babar Islands
Location: 7.45S - 8.33S / 129.42E - 130.17E

Babar Islands
The Babar Islands (Pulau-pulau Babar) are located in Maluku Province, Indonesia between latitudes 7 degrees 31 minutes South to 8 degrees 13 minutes South and from longitudes 129 degrees 30 minutes East to 130 degrees 05 minutes East. Tepa (population 2000 people) is the capitol of the Babar Islands municipality ("Kecamatan Pulau-pulau Babar") actually now reduced in size to encompass only the western half of Babar Island, Wetang Island and Dai Island. The town of Letwurung on the east side of Babar island is the capitol of the new municipality called "East Babar" ("Kecamatan Babar Timor") in the east half of the Babar Islands, consisting of the East half of Babar Island, Marsela Island, Dawera Island and Dawelor Island.

Central island
The islands take their name from the large central island of Babar which is roughly 20 miles across and 60 miles around. Babar Island has a maximum elevation of approximately 750 meters and is lightly covered with sub-tropical montane forest, although the 5 rivers and 2 large year-round springs afford tropical forest in their narrow ravine courses.

Topography
The topography of all the Babar islands is distinctive for their marked stepped appearance, the result of a combination of periodic uplifting of the tectonic plate interacting with the erosive action of the constant ocean waves. Water action on the coral base over the millennia has created many caves and shafts.

Agriculture and fisheries
Rain is plentiful from December to July so corn, plantains, bananas, cassava, various tubers and red rice (unirrigated) grow plentifully. Fish is the main source of protein. Sufficient potable water on Babar Island is provided by year round springs and shallow wells. Coconut oil is important for consumption while the oily meat called copra, is sold. Other items harvested and sold for export are sea shells, sea weed, sea cucumbers, shark fins, live lizards and birds, cattle, cashews, nutmeg, cloves and eucalyptus oil.

Smaller islands
This situation contrasts markedly with the much smaller islands ringing Babar Island. These are low-lying, uplifted reef and limestone (with the exception of Dai Island, which is largely granite), infertile, not heavily forested and lacking in fresh water sources. The more difficult environment leads the indigenous inhabitants to focus more of their energies on fishing and hand-crafts which are then traded for garden produce from Babar Island. The people collect rain water in large above ground cisterns which can last them through the driest time of the year (September to December). When the drought is longer than usual the water in these tanks is exhausted and the people have to walk miles to the few villages with springs or wells, and queue up for a turn to draw a few liters of water. People camp overnight beside the well waiting their turn. The Indonesian government has provided funds for many more collection tanks for rain water, so the situation has improved markedly in the last few years.

Transport
There is no airport or landing strip in the Babar Islands. Small freighters that have contracts to carry passengers service the islands. It is a minimum twelve hour ride to the nearest city with an airport where one can catch a commercial flight to other towns in Maluku being Tual, Larat, Wonreli (Kisar) and Ambon.

People
In comparison to the majority of Indonesians living nearer the political centre of the country, the indigenous Babar Islanders tend to darker epidermal pigmentation, have kinky hair and generally lack the epicanthic eyefold of East Asians.

Religion
Most indigenous Babar Islanders are baptised into the Protestant Church of Maluku (Gereja Protestan Maluku, GPM). The GPM's roots are in the [[Dutch Reformed Church}} started by the Dutch colonists. Due undoubtedly to the aridity of the islands and the lack of natural resources, there has been no mass transmigration from more populous Indonesian areas. In Tepa, there are 3 other denominations with church buildings: a Catholic church, a Seventh-day Adventist church, and a Pentecostal church. There is also a mosque in Tepa that serves the small community of Muslims. All the other towns have one GPM church each, totaling 56 GPM churches in the entire GPM diocese of Babar islands ("Klasis GPM Pulau-pulau Babar"). While these world faiths are represented, there is much hybridization with the preexisting animist beliefs and practices. The traditional dance of Babar is "Seka".

Solar & Propagation bulletin #7 Oct. 21, 2012
SUNDAY OCT 21, 2012
TAGS: IK8LOV, propagation, SFI, solar cycle, SOLAR FLUX, SSN
* By Max IK8LOV
Solar indices:
SSN: 115 – ISN: 56
Area(tot): 870 – New AR today: 1
Solar Flux @2800 MHz: 151 sfu (Penticton)
Solar activity continues to be lively and sturdy. The earthside face of the Sun shows today eight different Active Regions and a total perturbed area of 870 millionths of the Sun's visible hemisphere. Even though in the next few hours three of them will reach the hidden side of the Sun (AR1589, AR1590 andAR1597), global conditions will maintain substantially the same levels. SFI is expected to be 150 s.f.u. tomorrow and 145 s.f.u. on Oct 23th (source: NOAA-SWPC).
The three AR represent only 34% of the whole perturbed area, nearly the same of AR1596. A quick look at the pie chart to the side will give us a better sense of proportions.
Smallest and barely visible, the AR1594 deserves a particular mention due to a strong M9-class flare occurred yesterday at 18.14 UTC. Fortunately, becouse of its "peripheral" position, CME will affect very weakly our geomagnetic field.
The summary table below shows more in detail Sunspos, perturbed Area and Flares (occurred in the last 48 hours) for each AR.

Though Solar Flux is expected to decrease slightly in the next two days, index levels will round up 130 sfu. Plots below show Solar Flux, SESC Sunspot Number and perturbed area fluctuations during the past three months. In particular, we can notice that Solar Flux level is near the same of Aug. 1st, the highest in the last three months.

Geomagnetic activity:
A: 3 – K: 1
No important coronal holes on the Earthside of the Sun. However, in the next few days Ap is expected to increase up to 10 (NOAA-SWPC). In case of new strong flares on the AR1594, Ap could be subject to remarkable alteration of its levels.

Propagation:
Fall and springtime seasons are the best period for F2-layer propagation on highest bands of HF. October, more than September, will tend to offer better chances on both hemispheres of our Planet. Decreasing Solar Flux, expected for the next few days, will be very slight and will not affect substantially MUF. The only unpredictable worsening of ionospheric conditions might be caused by sudden flares, expecially on the AR1594. 10m and 12m will go on to offer incredible openings (short and long paths) expecially during daylight hours.
Expected 6m TEPs too.
A WWDX SSB 2012 special edition of our propagation bulletin will be online in the midweek.
As always, for more news and alerts stay tuned with us also on Facebook and Twitter.
73 and good DX

Max Laconca – IK8LOV

If you are interested in the propagation evolution follow DX-World Twitter and/or IK8LOV Twitter channels. A daily Tweet with the updated Solar and Terrestrial data (and alerts when necessary) will be sent to all our followers.

http://www.dxcoffee.com/eng/2012/10/22/dxpedition-ibiza-story/
DXPedition to Ibiza, the story

We are pleased to receive and publish the story of Alessandro, IZ4WNA and his DXpedition Holiday Style of this Summer. Alessio and his friend Giuliano, IZ4WNP were active from Ibiza Island, IOTA EU-004.

It all started when I asked myself why not use my holiday vacation in Ibiza to play a bit of radio and to activate that island? I obtained my hamradio license in the beginning of 2012 and since that I've hear lots of stations from EU-004 but none from Ibiza itself. I immediately exposed to my friend Giuliano, IZ4WNP, my idea and he was eager to be active from there as well.

The day before the departure we were shocked by the news of some OMs that encountered some problems with respect to lincensing. Our CEPT license were reported as "CEPT TR61-02" instead of the needed TR61-01. After few initial moments of literally terror we managed to avoid this problem. The Telecummunication Ministry attached also the TR61-01 document but we almost forgot to have it. Problem fixed and we didn't have any problem while we were operating in Ibiza.

In order attein to the luggage weight policies of the airline services (max 15kg each) we had to split our equipments into three luggages.One with the personal effects while the other two with the hamradio material comprehendingPCs for the logging programme and the digital modes, interfaces, coax cableas and all the testing material such as wattmeters and SWR meters, power suppliers and dipoles to cover 40, 80, 20, 15 and 10m.

Quite a lot of stuff !!!!!

We took off from Bologna at 10 o'clock and landed in Ibiza at midday after about two hours of flight. Our DXPedition QTH was a wonderful house with lots of room. Indeed, the best peculiarity of such a house was the amazing terrace facing the sea. Such a terrace had enough room to set up our stations and operate from there, enjoying the skyline while operating !

Using both SSB and PSK we managed to collect almost 400 QSOs in somewhat two days of operations. In fact we started on September the 7th and we flew back to Italy on September the 10th.

We tried to operate as much as we could in this first DXpedition. Our great passion and involvment with this hobby allowed us not to give up even in those moments in which we were tired or we had few time to operate.
It has really been a great experience. Only nine months ago we got licensed and now, we were on our very first DXPedition. We really hope to have helped as many hamradio operators as possible to gain a QSO with Ibiza. We're already dreaming and talking about future plans. Thanks everybody, especially the CENTO DX TEAM for the assistance and the suggestions.

All logs have been updated into LoTW and eQSL, QSL via Bureau to Home Calls.

4136. CQ WW Officially Moves to Ban Post-Contest Log Massage With Rules Change for 2012 CQ WW DX

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-10-23 01:59:25 UTC
From: Yb land Dx club

http://www.radio-sport.net/cq2012_rules.htm

CQ WW Officially Moves to Ban Post-Contest Log Massage With Rules Change for 2012 CQ WW DXBy Jamie Dupree NS3T radio-sport.net

Along with instituting a new five day log submission deadline, the CQ WW Contest Committee has included a specific rule change for the 2012 CQ WW DX Contests that seeks to crack down on post contest log changes.
"13. Post-contest correcting of call signs by using any database, recordings or confirming QSO's is not allowed (Rule XII.2 always applies)" reads the new language in the CQ rules. The message there is very clear, that post-contest log cleanup by using outside aid - whether it is call sign databases or recordings of the contest are now clearly considered against the rules.
The reference to "Rule XII.2" is important as well, because that contains new langauge that could mean a variety of things to CQ WW competitors and their logs:
"2. All sent and received exchanges are to be logged. In addition to the number exchange, the call sign sent by an entrant during a completed exchange, must be logged as sent by the entrant. All QSO exchanges must be logged upon QSO completion."
The new language there includes the final two sentences: "In addition to the number exchange, the call sign sent by an entrant during a completed exchange, must be logged as sent by the entrant" and then "All QSO exchanges must be logged upon QSO completion."
The release of the rules on the CQWW web site was not accompanied by any public explanation of the changes from the CQ WW Contest Committee, but this rule seems to indicate that the CQ WW Contest Committee is ready to use SDR recordings of the contest to check the transmitted signal of someone in contention for a top award, to see what has been sent in the exchange.
Other changes in the 2012 CQ WW rules are visible almost immediately, dealing with power, as the committee refined the language that warns about excessive power in your contest category:
"You must not exceed the total output power limitation of your chosen category on any band. Total output power on any band at any time is measured at the output of the active amplifier(s)," reads the new language, emphasizing the precise point where power is to be measured.
There is also new language on multi-op efforts:
"Multi-Operator Categories (all-band operation only): Any public QSO spotting help is allowed. Any number of operators is allowed. Total output power must not exceed 1500 watts on any band at any time," reads the new language.
From "Fair Play" to a Specific Ban on Log Massage
A year ago, the CQ WW Contest Committee rolled out a public relations campaign designed to publicly pressure contesters over the idea of post-contest log changes, often referred to as "log massage," arguing it was against the spirit of true competition.
"Your contest result is a measure of your contesting skill," argued CQ WW Contest Committee member Doug Zwiebel KR2Q in a 2011 CQ WW webinar, where the CQ WW CC argued to contesters that changes to a log - with outside aid after a contest - is considered outside the

bounds.
But in 2011, the CQ WW Contest Committee only called the use of post contest data sources "unsportsmanlike" - now there is a specific new rule meant to make entrants think twice about using the internet, a recording, or other sources to fix some mistakes in their log. The newly issued rules for the 2012 CQ WW DX Contests are available on the CQ WW web site. Do you agree or disagree with the decision by CQ WW to ban post-contest log changes? Will it even work? Or is this just another rule that can't really be enforced in ham radio contesting?

Dear All,

kami tim YE2R ,
nanti pada tanggal 27-28 Okt mendatang akan mengikuti kegiatan kontes CQWW-SSB,
mohon doa restu dari OM dan YL semoga semuanya lancar,

bilamana ada diantara rekan-rekan yang ingin melihat aktifitas kami lebih dekat kami persilahkan untuk bisa datang di QTH kami di Grobogan / YB2DX.

terima kasih / 73

OM,
Di 28.440 MHz ada Guyana - 8R1Z , masih bisa terbaca walaupun agak tertutup QRM yg cukup kuat dan lumayan bikin sakit telinga.

From: Yb land Dx club
Topic: 4158 Message: 4158

Pre-CQ WW Propagation News / X1.8 flare update
TUESDAY OCT 23, 2012
TAGS: Contest, cqww, flare, IK8LOV, propagation, SFI, solar cycle, SOLAR FLUX,SSN
* By Max IK8LOV

At 0317 UTC a strong X1.8-class Flare took place from the AR1598. Radiation from the Flare created strong ionization over Asia and Australia. D-layer ionization produced HF radio blackouts and S.I.D. observed on sunlit zones of the Earth.
In the following plot we can observe a very strong flare activity, occurring since Oct. 22 on the AR1598

At the moment the Active Region 1598 is the most active area in the Sun's visible hemisphere. Here is the series of Flares occurred in the last 48 hours: C3.4, C1.6, M5.0, X1.8, C1.6, C2.3.
The Region is 46% of the whole perturbed area and is the only one growing from yesterday (+37%). Because of its strong activity and position (it will cross the solar disk – from left to right – during the next two weeks) the AR1598 is a matter of concern for the evolution of propagation conditions, especially with a view to the CQWW SSB Contest.
In the next few hours/days we'll keep an eye on further news and 48 hours before the contest we'll be online with a new special Propagation bulletin!
Near real time breaking news on sudden solar events can be followed on our Facebook and Twitter channels. Don't forget to join us!
For more news and alerts, as always, stay tuned with us!
73 and good DX
Max Laconca – IK8LOV

If you are interested in the propagation evolution follow DX-World Twitter and/or IK8LOV Twitter channels. A daily Tweet with the updated Solar and Terrestrial data (and alerts when necessary) will be sent to all our followers.

http://www.dxcoffee.com/eng/2012/10/23/flare-class-x1-8/

Flare Class X1.8
Posted about 1 min ago | 0 comment
A new active region on the Sun has produced a series of M-class flares.
This morning around 03:22 Z, a Class Flare x1.8 was issued by the same group of sunspots.
The X flare has caused a radio blackout R3 (strong) and currently the absorption layer D is high on the lower frequencies, up to about 5 MHz.

Subject: [YBDXC_News] Partisipasi di CQWW - SSB 27-28 Okt 2012

Dear All,

kami tim YE2R ,
nanti pada tanggal 27-28 Okt mendatang akan mengikuti kegiatan kontes CQWW-SSB,
mohon doa restu dari OM dan YL semoga semuanya lancar,

bilamana ada diantara rekan-rekan yang ingin melihat aktifitas kami lebih dekat kami
persilahkan untuk bisa datang di QTH kami di Grobogan / YB2DX.

terima kasih / 73
